ment, are immediately convinced that there is something wonderfully good which the Stock Exchange has got hold of, and rush in while they think it is yet time. We fear that no amount of preaching will instruct the miscellaneous public to be sufficiently careful about their investments, but this particular abuse should at least be guarded against. They ought to understand that the quotations of new companies at least are almost wholly artificial. In former times of mania almost every new company did go to a premium, and the habit of seeing them at a premium before they will invest has grown so inveterate with the public that the promoters invariably make an artificial price. A dealer is put into the market to bid for the shares, and so the nominal quotation is obtained. But there are no real transactions, or hardly any; and if there are, the promoters usually make themselves safe by dealing in the scrip of shares not fully paid up, and making all the allotments to "fully paid" subscriptions, so that there is nothing really to settle for. It may happen sometimes that there are not a sufficient amount of fully-paid subscriptions, but it may still answer the purpose of the promoters best to complete these subscriptions themselves, taking their chance of floating them on the market, rather than complete their purchases of not fully-paid scrip, which they would equally have to sell again. Of course the unhappy investor finds out at once when the shares are allotted that the premium has not only disappeared, but that his shares are hardly saleable. As a general rule, therefore, the investor should be altogether distrustful of the quoted premiums on newly-issued companies. There is less risk of that kind with new loans of large amount, where a syndicate must be very cautious in rigging the market, but in new companies with small capital it is all but certain that the premium is a fiction. It would be untrue to say that no quotations are genuine except of companies quoted in the official lists, for there are large dealings in such concerns as Patent Gas, Phosphate Sewage, and one or two others; but this class of quotations is to be distrusted, and with a little care the public would easily distinguish between the few companies which are largely dealt in and those where the quotations are mostly nominal. Certainly no premium should ever excuse an investor or speculator for not investigating the merits of the affairs in which they put their money.

THE CHANNEL.—We are glad to see that one of the objects of a private Bill lodged by the South-Eastern Railway Company is to enable them "to enter into arrangements and "agreements with the Governments of France and England, "and with the Northern Railway of France, for the purpose "of facilitating and improving the communication between "England and the continent." We hope there is at length some prospect of a termination to the horrors of the Channel passage, although the grand projects of a tunnel or a bridge are not yet to be thought of. Deeper harbours on both sides of the Channel, and larger steamers to use them, will constitute an immense improvement on the existing arrangements, and should add sensibly to the dividends of the shareholders in both the English and French railways by which the communication between Paris and London is conducted.

MR LOWE ON THE SILVER COINAGE.—We sincerely pity Mr Lowe for the duty which has been cast upon him of replying to certain working men, or pretended working men, who assert they have a grievance because the Mint coins silver under different regulations from those which relate to the gold coinage. Silver, they say, is the poor man's money, and gold the rich man's money; and they should be coined on the same terms—otherwise the poor man suffers. Surely Mr Lowe is fit for better uses than to be put to answer such nonsense as this, and our pity for him is all the greater, because it is quite certain that the working men, as a body, neither know nor feel any such grievance as that which is put forward in their name by some crack-brained currency theorists. Of course the answer to all the nonsense is very simple. The gold is coined in a certain way and on certain conditions, because it performs certain functions which silver is not selected by the State to perform. The working men might as well ask that the State should be made to coin copper, lead, or any other metal which they might choose to fancy is poor man's money, on the same terms that gold is now coined. The demand is all the more strange as addressed to Mr Lowe, since he objects already to the unreasonableness of the State's coining gold at its own expense, and wants to make a profit out of it, or, at least, make the coinage bear the expense; and he would certainly be the last person to consent to coin another metal in the same way. It is almost a pity, however, he should have taken so much trouble to give the explanation he has done, as there is certainly no grievance really complained of. To answer people who believe that because shillings are only tokens the poor are heavily taxed is a sheer waste of time. If workmen felt the grievance alleged, we should hear of it in quite a different way.

INDUSTRIAL ENTERPRISE IN GERMANY.—As a proof of the activity of the new spirit of commercial enterprise in Germany, the Berlin correspondent of the *Times* gives the following list of new companies, and new issues of old companies, introduced to the Berlin Bourse in the twelve days preceding the date of his letter (Nov. 8):—

	Thalers.
Cologne Bank for Rhineland and Westphalia	5,000,000
Hamburg Makler Bank	1,000,000
Hamburg Anglo-German Bank	5,000,000
Berlin German Discount Bank	2,000,000
Breslau Discount Bank, fresh issue	2,000,000
Breslau Agricultural Bank, fresh issue	300,000
Stuttgart Bank	4,000,000
Vienna Commission Bank	6,600,000
Bavarian Vereins Bank	3,000,000
Darmstadt Bank for Süddeutschland, fresh issue, about	2,000,000
Dux Bodenbach Railway	2,500,000
Oberlausitz Railway	3,600,000
Vorslberg Railway	4,000,000
Hamburg South American Steam Navigation Company	1,250,000
Mecklenburg Real Estate Credit Company	2,000,000
Breslau Entrepôt Company	1,000,000
Rhine Ruhr Canal Company, fresh issue	40,000
Wurm Coal-fields Company, fresh issue	220,000
Bernsdorf Coal Mining Company	650,000
Märkisch-Silesian Locomotive Company at Berlin	2,300,000
Hamburg Carriage Railway Company	850,000
Berlin "White Beer" Brewery	190,000
Berlin Petroleum Lamp Company	800,000
Berlin Guttapercha Company	400,000
Stassfurt Chemical Works (artificial manure)	530,000
Leopoldshall Chemical Works (ditto)	367,000
Heinrichshal Chemical Works (ditto)	350,000
Berlin Chemical Works (patent medicines, &c.)	500,000
Berlin Charlottenburg Chemical Works (potash)	375,000
Hermsdorf Cement Company	300,000
Komotau Iron Works	1,000,000
	Roubles.
Russian Real Estate Credit Company, fresh issue	5,000,000
	Dollars.
Missouri Pacific Railway	900,000
Buffalo, New York, Philadelphia Railway	2,500,000

The total amount of the shares is 64,000,000 thalers, or 10,000,000*l*. It will be interesting to see what will be the upshot of the company mania in Germany, which appears to be the first fruit of the abundance of money there consequent on the receipt of the war indemnity.

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts on account of Revenue during the week ending Nov. 11:—

	Receipts of Week Ending Nov. 11.
	£
Customs	325,000
Excise	551,000
Stamps	166,000
Taxes	nil.
Income tax	17,000
Post Office	50,000
Telegraphs	nil.
Crown lands	nil.
Miscellaneous	nil.
Total	1,109,000

The total receipts of the previous week were 1,351,112*l*.

The Exchequer issues of the week on account of expenditure were 560,000*l*, viz.:—

	£
Interest of debt	nil.
Other charges on Consolidated fund	nil.
Supply services	560,000
Telegraph services	nil.
	560,000

During the week the cash balances have increased as follows:—

		Bank of England.		Bank of Ireland.		Total.
		£		£		£
Balances on Nov. 4		1,409,245	...	340,556	...	1,749,801
— 11		1,922,845	...	402,056	...	2,324,901
Increase		513,600	...	61,500	...	575,100

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, Nov. 16.

The returns of the Bank of France for this week, last week, and for the week ending 8th September, 1870, are as follow :—

	Nov. 16, 1871.		Nov. 9, 1871.		Sept. 8, 1870

A comparison of this week with last, in the principal items, shows :—

DEBTOR.	Increase. francs.		Decrease. francs.
Notes in circulation	18,750,000	.....	...
Treasury balance	4,500,000	.....	...
Deposits	...	.....	33,800,000
CREDITOR.	Increase. francs.		Decrease. francs.
Coin and bullion	1,500,000	.....	...
Bills discounted	...	.....	5,500,000
Advances on securities	...	.....	3,500,000

The item of commercial bills prolonged by law, which at the end of June amounted to 371 millions, and a month back to 47 millions, has now disappeared entirely from the Bank return. A large portion of the 26 millions which had been set aside as a reserve to cover any eventual loss under that head, and the winding-up of the branches in Alsace and Lorraine, may consequently be transferred back to the assets. The liquidation of this chapter has been more prompt and satisfactory than that of the 85 millions of bills which remained in suspension after the revolution of 1848. At the end of 1853, or more than four years after that date, that item still figured for a million-and-a-half in the Bank return.

The sales of disposable rente by the Bank of France, made manifest by a diminution of about a million-and-a-half in that item in the return of last week, have been since continued, and a further reduction of three millions-and-a-half appears in the balance sheet of to-day. So far these sales are of no great importance, as the amount held under the head "disposable rente" is still nearly 65 millions. Whether, however, those five millions represent the whole of the rente thus thrown on the market will only be known after settling day at the end of the month. What relief is obtained by these sales is obtained at an immense sacrifice, as this stock was purchased at 72, and being disposed of at 57, entails a loss of 15f for every three francs of rente.

The rumour of the contemplated doubling of the Bank capital has caused demands for that stock, from the idea that the proprietors would have the option of taking the new shares; after closing the week heavily at 3,600, it rose on Tuesday to 3,715, but this upward movement has not been maintained, and compared with Thursday last there is a fall of 35f.

The increase in the Bank rate of discount has so far not procured the relief that was expected from the measure. Fears that a further advance would be made led to an influx of demands, and at the end of last week the margin of one hundred millions between the amount of notes in circulation and the limit of 2,400 millions was reduced by one-third. The situation became so critical that the regents of the Bank decided on applying to the Government for authorisation to still further increase the issue of notes as the only means of avoiding a fresh rise in the price of discount. An interview with M. Thiers and the Minister of Finance took place on Monday, when the Government appears to have strenuously opposed the expedient of a further advance in the rate, and to have preferred an increase of the circulation to a sum of three millards at least, but as a necessary corollary the Bank is to be allowed at the same time to double its capital, which will then amount to 365 millions. A Bill to authorise those modifications will therefore be prepared and presented to the National Assembly immediately on its re-opening, and as the declaration of urgency will be made the measure may be voted and promulgated by the commencement of the month of January. The Bank will in the meantime continue to sustain itself with its present resources, the Government on its side engaging not to make any further withdrawals of its deposits. During this meeting the question was raised of the State repaying the advances it has obtained from the Bank, by means of a new loan. This proposal was, however, rejected by the Government, which will not borrow with rente at its present price. The State has moreover no interest in changing the conditions on which its advances were obtained; the interest at present paid is but one per cent., the loan having been made by an increased paper issue, while if converted into ordinary stock the additional interest would amount to about 35 millions.

The Bank, in order to meet all requirements until the proposed measures for its relief can be put into execution, without again increasing its rate of discount, will have to restrict its advances by every possible means. With that view it has raised from one to three per cent. the rate for its loans on deposits of bullion, which amounted last week to nearly 34 millions; the similar measure adopted with regard to advances on railway shares and other securities, and which represented a sum of over 50 millions, will no doubt lead to considerable reimbursements, and render available further sums for the accommodation of trade.

The new five-franc paper money tokens have not yet made their appearance, and will not be issued before the 20th. The Government is now coming round to the opinion that the issue of this paper ought to have been made by the Bank of France, as had been generally maintained by the public, and it is not improbable that the affair will be taken shortly, by that establishment, out of the hands of the Comptoir d'Escompte. In that case, a large portion of the increased issue of paper it is proposed to allow the Bank to put into circulation will consist of notes of 20f and under. The Bank is in a certain measure responsible for much of the present embarrassment to trade from the deficiency of small change, for had a larger portion of the 2,300 millions of notes in circulation consisted of those for small sums, to replace the coin exported, the difficulty would perhaps have been never felt. In the month of June last the amount of notes issued was about 2,300 millions, of which one thousand millions were of 1,000f each, five hundred millions from 100f to 500f, and four hundred millions only of those from 20f to 50f. The deficiency becomes apparent when a comparison is made with the proportion in other countries of Europe where there is a forced currency. In Italy, of eight hundred millions, four hundred are in notes not exceeding 50f; in Austria the proportion is eight hundred millions in 1,500f, and in the United States four-sevenths of the two thousand five hundred millions of paper money is in notes of ten dollars and under.

It may have been remarked that the Société Générale was not one of the nine banks which form the Syndicate for the issue of the five-franc notes. That establishment, for reasons of its own, has decided on acting independently, and is about to issue also notes of its own of 1f, 2f, and 5f, which it will deliver to its customers on application. These will be the first in the field, as they are advertised to be put into circulation on the 18th inst. Nothing will prevent other rival banks from following its example, and the consequence will be an extraordinary state of confusion from the different types of notes, and a temptation to fraud and forgery, which will go far to destroy the confidence with which the public were at first disposed to accord to this kind of paper. If some restriction is not placed on this right of issuing such tokens, in

Paris and in the provincial towns, we shall have before the end of the year several scores of different patterns of notes in circulation. And unfortunately this is not likely to be a temporary expedient, for with 3,500 millions more to be paid to Prussia, the country will be completely drained of specie, and it will be many years before such a stock can be reconstituted as to permit these tokens to be withdrawn from circulation. As I have already said, the only remedy consists in the Bank of France undertaking the emission itself; it is indeed difficult to understand that that establishment should ever have consented to allow what is virtually an infringement on its privilege of being the sole bank of issue in France.

The pattern of the paper tokens to be issued by the Comptoir d'Escompte is described as follows:—On the face at the left side is a figure representing the Republic; in the middle the words "cinq francs" are printed in large letters, and at each corner is a 5 in a medallion, and at the top the words "Comptoir d'Escompte" in a scroll; the ground is formed of a fretwork of lines crossed and interlaced. On the back is a circle, in which are inscribed the names of the nine banks which form the syndicate, and in the four corners are small heads. These notes will be contained in books with counterfoil, and will each bear two register numbers.

The Ministry of Finance is on its side preparing the penny receipt stamps which are to come into use for all sums of ten francs and upwards from the 1st December. They are rather larger than the postage stamps, are blue without any figure, and bear simply the words: "*France* 10 *centimes; Quittances, recus, décharges.*

The receipt of a telegraphic message announcing a reduction in the rate of discount of the Bank of England to-day, gave great firmness to the market, which after opening with a fall on yesterday's closing rates, rallied, and finally left off with a rise of 40 centimes on rente and 67½ on the five per cent. loan. Railways, Credit Foncier shares, and many other securities participated in this recovery. The effects of the sort of panic in the early part of the week have not however been effaced, and with few exceptions, stocks and shares of all kinds present a diminution of prices compared with Thursday last. The premium on gold has fallen to from 13f to 15f, and exchange on London to 25f 87c to 25f 92½c for long paper, and 25f 77½c to 25f 82½c for short. English banknotes and sovereigns are purchased at from 25f 95c to 26f. Subjoined are the latest quotations:—

The Morgan loan has been admitted to the official price current of the Paris Stock Exchange since Saturday last. The *Semaine Financière* states that the French Government is about to adopt measures to restrict the payment of the coupon in London to the stock actually subscribed in England. The loan has been heavy during the week, and since its first appearance in the quotations has fallen from 515f to 508f.

The Credit Mobilier held its meeting on the 11th, when the resolutions for the transformation of the company were adopted by 224 shareholders holding 734 votes, against 5 with 12 votes. The accounts for the year 1871 down to the 10th inst. were also passed by the meeting. Notwithstanding the almost unanimous vote for the reconstitution of the company, the shares are largely offered, and after reaching 280f a fortnight back, they have since lost 45f, of which nearly 30f has been since the meeting of Saturday last.

A letter from the Financial Commissioner of the Italian Government in Paris, replying to a question relative to the conversion of the Roman debt, states that the only stock for which the exchange of titles before the 1st December next is obligatory, are the Roman five per cent consolidated rente, and the scrip of the Pontifical loan of 1860-64. No period is yet fixed for the conversion of the following:—Rothschild loan 1857; definitive titles of the Pontifical loan 1860-1864, and the loan issued by MM. Blount, of Paris, in 1866. It is however probable that these latter will be converted in the first few months of 1872, in accordance with the law of the 29th June last, which orders the absorption of the Roman debt and its consolidation with that of the Kingdom of Italy.

A commission has been ordered by the Ministry of Commerce to form a new classification of the different types of sugar which serve as a basis for fixing the rate of duty. The Chambers of Commerce in the seaports will be represented by delegates specially charged with the grouping of foreign sugars, and others from the districts in which the beetroot is cultivated, with the collocation of the native produce.

M. Victor Borie succeeds M. Pinard as chairman of the board of directors to the Comptoir d'Escompte. The new director was lately secretary-general of the same establishment, and is well known as a writer on commercial and agricultural subjects.

The Suez Canal Company has issued a circular, announcing that by the aid of resources acquired, but which will not be realised immediately, it will be able to pay in the first quarter of 1872 the coupon which fell due in April, 1871, and the bonds drawn in December, 1870, and March of this year; and in the course of the year 1872 the coupon of October last, and of April and October next, less the sums extinguished by subscriptions to the new thirty years' bonds. The sum subscribed for these last already amounts to six millions of francs.

An interesting discussion on the question of Free-trade and Protection has just taken place in the Council-General of the Seine Inferièure (Havre and Rouen). The subject before the Council was a report on the commercial and industrial situation of the department, and which concluded in favour of the denunciation of the treaties of 1860, and the re-establishment of Customs duties on foreign importations. M. Le Cesne opposed those conclusions, showing—that crises as serious as those from which trade is now suffering had occurred previously to 1860, naming no less than six such periods of commercial distress in the thirty years which ended in 1847; that even if the treaty with England were denounced, the effects would not cease for a period of fifteen months, while those with Italy and Switzerland had still a period of seven years to run; that a duel of tariffs had been attempted, but had failed; France had been forced to give way with England and the United States, and accept a reciprocity; the history of the shipping trade was there to prove it; the drawer up of the report had said that he would accept the free importation of raw material; but how was that term *raw material* to be interpreted? For the spinner it was the cotton, for the weaver the yarn, for the printer the tissue, and for the dresser the printed stuff; there was no industry which had not before it a manufactured article, and behind it a raw material; protection would have to be accumulated on protection, and the result would that in protecting everybody, no one would be protected, and that the only result would be to destroy the export trade of France. M. Waddington took the opposite side, and maintained that whereas in the previous decennial periods there had always been an improvement, in that ending in 1870 there was a decline; in 1859 there had been in the cotton district around Rouen 2,190,000 spindles in working or ready for use, an inquiry instituted in 1870 showed that the number had fallen to 1,560,000. That unfavourable state of things could not be attributed to the crisis in the cotton trade as in England, where the consequences of the American war were more severely felt than in France, the number of spindles had increased between 1856 and 1868 from 28 millions to 32. The Council eventually adopted, by 26 votes to 22, an amendment declaring that it confided in the wisdom of the National Assembly.

The following are the latest quotations of the produce markets at Havre, per 50 kilos, duty paid:—

Cotton.—New Orleans very ordinary, 118f; Oomra fair, 87f; good ordinary, 90f; Georgia middling, 115f 50c; low middling, 114f 50c; Pernambuco, first sort, 112f 50c. Sales last week 7,851 bales; arrivals 5,382; stock, 131,031.

Sugar.—French West India, 1st jet, 64f to 69f 50c, samples; 2nd jet, 58f 50c to 60f 50c. No arrivals.

Hides.—Monte Video green ox, 85f; cow, 78f; Buenos Ayres dry ox, 136f 50c; Rio Grande green ox and cow, 78f; Trinidad, 80f.

Coffee.—Rio, 140f; West India, 61f (in bond); Hayti, 144f; Malabar, 80f to 83f. Sales last week, 18,700 bags; deliveries, 16,500 and 125 tierces; stock, 162,878 bags and 2,523 tierces.

Wool.—Buenos Ayres unwashed, 190f to 210f; Monte Video, 217f 50c to 221f 75c; Spanish, 215f to 240f; Levant washed, 310f; Chili unwashed, 230f to 250f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The official report of the foreign commerce of the United States for the fiscal year ending June 30th, 1871, shows that the proportion of foreign to American tonnage entering and clearing from American ports continues as great as ever. Thus, during the year the total tonnage entered was 10,009,881, compared with 9,155,659 the previous year. For the later year the proportion was 6,266,444 foreign to 3,742,740 American; and for the earlier year, 5,669,621 foreign to 3,486,038

American. Of the total increase of 854,222 tons the increase of American tonnage was but 256,702, while the increase of foreign tonnage was 594,823. The foreign tonnage thus increased at a larger ratio than its previous ratio to the American tonnage, so that the foreign bottoms seem to be carrying a somewhat larger amount of American imports and exports than formerly. The clearances show the same proportions. Thus, for the later year they were 6,151,537 foreign and 3,746,945 American, a total of 9,898,482 tonnage; and for the earlier year, 5,662,474 foreign and 3,506,929 American; a total of 9,169,405 tonnage. There arrived at American ports during the last fiscal year 321,350 immigrants, of whom England contributed 56,580, Ireland 57,439, Scotland 11,984, Wales 899. Great Britain (locality not specified, supposed to be mainly from Ireland), 16,042, and Germany 82,554.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap 32, for the week ending on Wednesday, the 15th day of November, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued	38,237,935	Government debt	11,015,100
		Other securities	3,984,900
		Gold coin and bullion	23,237,935
		Silver bullion	...
	38,237,935		38,237,935

BANKING DEPARTMENT.

	£		£
Proprietors' capital	14,553,000	Government securities	15,001,028
Rest	3,115,589	Other securities	17,583,530
Public deposits, including Exchequer, Savings' Banks, Commissioners of National Debt, and dividend accounts	5,629,468	Notes	13,471,750
Other deposits	22,903,908	Gold and silver coin	654,168
Seven-day and other bills	508,511		
	46,710,476		46,710,476

GEORGE FORBES, Chief Cashier.

Dated the 16th November, 1871.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

LIABILITIES.	£	ASSETS.	£
Circulation (including Bank post bills)	25,274,696	Securities	33,031,558
Public deposits	5,629,468	Coin and bullion	23,892,103
Private deposits	22,903,908		
	53,808,072		56,923,661

The balance of Assets above Liabilities being 3,115,589*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts compared with those of last week exhibit—

	Increase.		Decrease.
	£		£
Circulation	...	...	405,003

Government securities	...	...	...
Other securities	...	...	648,850
Bullion	817,173	...	...
Rest	4,021	...	...
Reserve	1,195,233	...	...

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house:—

	Week ending Nov. 15, 1871.		Week ending Nov. 8, 1871.		Week ending Nov. 16, 1870.
	£		£		£
Thursday	11,152,000	...	12,821,000	...	10,755,000
Friday	14,623,000	...	16,167,000	...	9,613,000
Saturday	16,254,000	...	18,397,000	...	12,418,000
Monday	16,862,000	...	15,298,000	...	11,112,000
Tuesday	13,709,000	...	18,202,000	...	26,596,000
Wednesday	40,539,000	...	13,079,000	...	12,530,000
Total	113,139,000	...	96,964,000	...	83,024,000

JOHN C. POCOCK, Deputy Inspector.

Bankers' Clearing-house, November 16th, 1871.

The total since the 4th of January, 1871, is 4,100,102,000*l*, compared with 3,395,381,000*l* for the corresponding period last year, showing an increase of 704,721,000*l*.

The following shows the amount of the Circulation, Bullion in both departments, Banking Deposits, Banking Securities, Reserve, and Rate of Discount, for three months ending 15th November, 1871:—

Date.	Circulation.	Bullion.	Deposits.	Securities in Banking Department	Reserve.	Rate of Discount
	£	£	£	£	£	%

Clearing-house returns	...	75,364,000	75,222,000	83,024,000	113,139,000

In 1861, the demand for money continued to be restricted, and there was an abundant supply in Lombard street. Some excitement had just been caused in France by the appointment of M. Fould as Finance Minister, and the announcements made as to the necessity of strong measures to put the finances in good order. The prospect of a speedy end to the American Secession war was becoming daily more hopeless.

In 1868, the Bank rate was raised from 2 to 2½ per cent. There had lately been a considerable demand for bullion, chiefly, it was understood, on Russian account. The new elections on the Irish Church Disestablishment question were for the most part over, and were issuing in a great triumph for the Liberal party.

In 1869, money was for the moment easy, the recent advance of the Bank rate to 3 per cent having retained a considerable amount of foreign money in Lombard street. The opening of the Suez Canal for commerce had just occurred. The North-Eastern Railway amalgamation was being effected.

In 1870, business in the money market was unsettled by the Russian denunciation of the Treaty of Paris. Money was very abundant, but in the unsettled state of affairs, coupled with doubts as to the approaching course of the Franco-German war, the old rates were maintained. The Russian note which declared Russia to be freed from the stipulations of the Paris Treaty, excluding her fleets from the Black Sea, was also the cause of a serious panic on the Stock Exchange.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 3,024,255*l*; in 1868, an excess of 1,888,685*l*; in 1869, an excess of 1,823,983*l*; and in 1870, an excess of 2,843,284*l*. In 1871, there is an excess of 5,320,378*l*.

DISCOUNT AND MONEY MARKET.—The Bank of England reduced its minimum rate on Thursday from 5 to 4 per cent. As the 5 per cent. rate had only been maintained for several weeks by way of precaution, the open market rate being much below it, the change has had hardly an appreciable effect on

the outside movements. The banks and discount houses had already reduced their allowances for money to the amounts usually corresponding to a 4 per cent. Bank minimum, while the rates of discount were also well under that minimum. The market has been a little unsettled, however, owing to the continued abundance of money, which still weighs on the market, notwithstanding a slight hardening of the current discount demand at the banks during the last ten days. The rates for the moment appear to tend lower, but it is too soon yet after the change to quote steady rates. To-day there was a quiet demand both in the open market and at the Bank.

The changes in the Bank return for the week show that it has become much stronger during the week. The bullion has increased 817,173*l* and the reserve 1,195,233*l*, while the private securities have diminished 648,850*l*, and the circulation 405,003*l*. For the present too the movements of the bullion market and the foreign exchanges appear to be all in favour of the accumulation of money in London. On 'Change this afternoon there was hardly any business doing, and as there is no demand for bullion the large quantities of gold arriving from day to day are all taken to the Bank, large shipments being on their way from Australia. The American exchange is also very much higher, the last quotation being 109⅛. There is a now a very strong opinion that in these circumstances, notwithstanding the accumulation of demands now impending, the rates in the open market must go still lower, and the Bank will be under the necessity of making a further reduction. The accumulation of resources is certainly once more becoming most unprecedented, but much of the money there is no doubt is also very unstable, and will speedily be dispersed with lower rates.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—2 to 3 months	3⅜ ½	per cent.
Do 4 months	3½ ¾	per cent.
Do 6 —	3⅝ 4	per cent.
Trade bills—2 to 3 months	3¾	per cent.
Do 4 months	4	per cent.
Do 6 —	4¼ ½	per cent.

The allowances for money at the private and joint stock banks and discount houses are as follow :—

Private and Joint Stock Banks at call	3	per cent.
Discount houses at call	3	per cent.
Do with seven days' notice	3¼	per cent.
Do fourteen days'	3½	per cent.

The London and Westminster Bank has given notice that on deposits under 500*l* it will only allow 2 per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent.		Open Market, per Cent.	
	1870.	1871.	1870.	1871.
Paris	6	6	...	5½
Vienna	6	7	5⅝ 6	6½
Berlin	5	4½	4½	3¾ 4¼
Frankfort	4	4	3½ ¾	3½ ¾
Amsterdam	4	3	3½ ¾	2⅞
Brussels	3½	5	3¼	4½
Hamburg	...	...	3¾ 4¼	4
St Petersburg	7	8	6	7

THE STOCK MARKETS.—The continued ease of the money market, marked as it has been this week by the reduction in the Bank rate of discount to 4 per cent., has at length removed the only obstacle to the great rise in prices, which was impending in every description of the leading securities. Confidence has returned, and with a large amount of buying, both for speculation and investment, coupled with great reluctance in all holders to sell, the upward movement has been on a very extensive scale. This has been especially the case in English railways. The settlement on Wednesday was a very large one, a considerable quantity of stock having been delivered and taken up; but though the supply of stock was so large as to make the contangoes increase greatly during the progress of the account, the market has not been seriously weakened, and all through the week prices have steadily moved upwards—being now generally above the point at which they stood before the September panic. There has also been a great improvement this week in Canadian railways, on which the traffic receipts have lately been quite as remarkable as on the English home lines, and some of the leading foreign lines, such as Great Luxembourg, have also advanced. The advance in foreign securities generally, it will be seen, has also been considerable, the reduction in the Bank rate having affected the principal continental bourses as well as this market. In miscellaneous securities Indian bank shares are beginning to be inquired for owing to the recent prosperity of the Indian trade, and the continuous shipment of specie to the East.

Notwithstanding the ease of the money market very few new undertakings were brought out during the week, and the public in general do not seem to regard them with any degree of enthusiasm. This afternoon the reduction of the Bank rate has had the effect which might have been anticipated, and it is likely that during the next few days the number of appeals to the public will increase.

ENGLISH GOVERNMENT SECURITIES.—The movement in Consols has been more decided this week than it has been lately—the usual effect of easy money being perceptible in a considerable rise. It is understood, however, that some large purchases have lately been made for investment, so that the money which goes into Consols, notwithstanding the increased favour in which railway debenture stocks are held, must still be very considerable. To-day the market has continued good, notwithstanding realisations in the afternoon, and the closing price is 93⅜ ½ for money, and 93⅝ ¾ for the January account.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money. Lowest	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March and June
Saturday	93	93½	93	93⅝	5s to 10s pm
Monday	93	93½	93	93½	4s to 10s pm
Tuesday	93	93½	93	93½	4s to 9s pm
Wednesday	93⅜	93½	93½	93½	4s to 10s pm
Thursday	93½	93⅝	93½	93⅝	2s to 8s pm
Friday	93½	93⅝	93½	93⅝	2s to 7s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Consols for money	93 ½	93⅜ ½	+ ½
Ditto December	93 1/16 3/16	93⅜ ½	+ 5/16
Reduced 3 %	91 11/16 13/16	91⅝ ½	+ 5/16
New 3 %	91 11/16 13/16	91⅝ ½	+ 5/16
Bank Stock, last dividend 4½ %	237 39	237 39	... ...
Ind a Stock, 10½ %, red. at 200 Apl. 30, 1874	206 8	207 9	+ 1
Do 5 %, red. at par, July 5, 1880	112¼ ⅜	112½ 13	+ ½

EXCHEQUER BILLS 2s to 7s prem.

COLONIAL GOVERNMENT SECURITIES.—The following are the changes for the week in this department :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Canada 6 %	109 10	109 10	... ...
Ditto 5 %	102 3	102½ 3½	+ ½
New Zealand 5 % Consolidated Bonds	100½ 1½	101 2	+ ½
New South Wales 5 % Bonds, 1888 to 1896	104 5	104 5	... ...
Nova Scotia 6 % Bonds, 1875	104½ 5½	105 6	+ ½
Queensland Government 6 % Bonds, 1881-5	109½ 10½	110 11	+ ½
Victoria 6 %	111½ 12½	111½ 12½	... ...
Ditto New 5 %	105 6	105½ 6½	... ...

The bidding this afternoon for the loan of 140,000*l*, of the South Australian Government in 5 per cent. bonds, expiring 1915-20, affords a striking illustration of the growing appreciation amongst English capitalists of this class of security. The tenders were for nearly four times the amount required. One bid for 2,000*l* was at the high price of 104*l*, but the bulk of the loan was secured by a firm of brokers who tendered for the whole at 102*l* 1s 6d. And as the 5 per cent. deposit on application loses six weeks' interest, this is equivalent to a bid at 102*l* 2s 1½d, so that the return of interest on investment at that price is not higher than 4*l* 17s 11d per cent.

FOREIGN GOVERNMENT SECURITIES.—The advance in this department has been very marked, the rise extending to nearly every description of foreign security. Among the more speculative stocks Turkish, which for sometime have been heavily bulled, had advanced on Thursday evening to 48⅛ ⅜—a rise of nearly 1 per cent. since last Friday. Spanish also improved on the continued reports of the opposition which the proposed new tax on the debt is meeting with in the Cortes. Egyptian have also improved from 80¾ 81 last Friday, to 81½ 82 on Thursday evening. French securities also advanced materially, though they are not now taking the lead in the market which they did some time since. The rise, however, has been even more marked in the less speculative stocks—Argentine, after being at 94¼ early in the week touching 96 on Thursday, and the new loan being also better at 90½ ¾, owing to its relatively lower price. In the old loan there is a drawing in December. Brazilian have also improved as well as other South American stocks. Russian securities have also advanced for the week. The whole movement shows what was beginning to be apparent last September before the panic, that steady purchases for investment, coupled with the indisposition of the public to put their money into new undertakings, were likely to cause a change of level in the prices of the leading foreign securities. The only exception is Spanish, which was rapidly becoming the favourite of the market,

but in which the Spaniards, by their own folly, have effectually prevented an advance. To-day the steady tone of the market was maintained, but there was no material change in prices, and the markets were even a little flat in the afternoon owing to realisations. French and Egyptian stocks were especially in demand, but Spanish were weak. The new Russian (Moscow Koursk) scrip is at 2⅛ premium; and Central Urguay has been pressed for sale, closing flat at 3 to 2 dis, a reduction of 2½ per cent. for the day.

Lord Westbury has acceded to the unanimous request of the General Committee of Spanish bondholders to accept the office of chairman, and Mr Coles Child has been elected deputy-chairman.

Annexed are our usual quotations showing the changes for the week:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Argentine 6 %	94 ½	95⅝ 6	+ 1⅛
Ditto 1871	89½ 90½	90⅛ 1	+ ⅛
Brazilian 5 % 1865	93 4	95¼ ⅜	+ 1⅜
Ditto 4½ %, 1863	83 4	83 4	... ...
Ditto 5 %, 1871	90⅜ 1⅛	91⅛ ¼	+ ⅛

ENGLISH RAILWAYS.—As we have stated, the most important rise has been in this department, the set of speculation having lately been towards it, and operations being resumed with full vigour on the prospect of a settled money market. Prices, as a whole, at the settlement were just a little over the point at which they stood before the panic of September, and as a large quantity of stock has got into stronger hands, and the traffics of the two months which have elapsed have been rather in excess of the anticipations of speculators in September, with every prospect of continuing for some time, there are all the materials for another great upward movement in prices. During the progress of the account a large quantity of stock came forward for delivery, and contangoes ruled heavier than at the opening—especially in the heavy lines, with the exception of North-Western; but the account was completed without difficulty, owing to the *bona fide* character of the purchases which had been made, and the abundance of floating money. The rise this week has been especially marked in South-Eastern, Great Eastern, North-Western, Chatham Preference and Ordinary, Great Western, Brighton, and Great Northern—having moreover been so general that it is hardly fair to single out particular lines. To-day the market opened strongly, but prices became weaker upon numerous realisations incidental to the great rise which has occurred. The realisations were especially numerous in Chatham, North-Eastern, Midland, and Great Northern A, the fall in the latter case from the best point of the day being 2 per cent. Brighton was also pressed for sale on revived rumours as to the competing line project, and fell 1½, showing rather a fall for the week. Sheffield, Caledonian, South-Western, and Metropolitan all advanced to day—the latter having partially recovered rather a serious fall in the early part of the week, consequent on the continuance of bad traffic.

A circular has been sent this week to the shareholders of the South-Eastern and Brighton lines by Mr Tufnell Southgate, a solicitor acting on behalf of a portion of the shareholders, requesting proxies to vote at the next meeting of the companies in favour of a policy of amalgamation. The movement, it has been stated, has not the sanction of the boards of the two companies, but the reason, we hope, is that they have already been moving in the direction indicated, and do not wish to have their hand forced. No lines in England are so suitable for amalgamation as these southern lines, owing to the number of duplicate passenger trains which they run, and other expenses of competing working. An amalgamation which would include the Chatham and Dover, and perhaps also the London and South-Western Companies, would add largely to the dividends of the shareholders, and enable the united companies to increase very materially the accommodation now offered to the public. The rumour of a new competing line to Brighton is unfortunately revived, but it may be hoped the public are now too wise to subscribe to any such scheme.

Among the announcements which have been made respecting the private Bill legislation of next Parliament, it is stated that Bills for the North-Western and Lancashire and Yorkshire, and for the Midland and Glasgow and South-Western amalgamations, will be brought in. The subject of railway monopolies may thus be expected to occupy very seriously the attention of Parliament next Session.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices:

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Caledonian	117⅞ 18	118½ ¼	+ ⅜

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending Nov. 11 to 780,749*l*, being an increase of 50,950*l* on the corresponding week of last year. The aggregate receipts of the current half-year to date are now 15,157,290*l*, being an increase of 1,104,316*l* on the corresponding period of last year. The principal increases for the week are—London and North-Western, 10,895*l*; Midland, 8,242*l*; North-Eastern, 7,979*l*; Great Western, 5,309*l*; Lancashire and Yorkshire, 4,167*l*; Great Eastern, 2,707*l*; Great Northern, 2,628*l*; and Chatham and Dover, 1,816*l*. London and South-Western shows a decrease of 6,416*l*, and Metropolitan, 230*l*. The following shows the increase or decrease in each case for the week and for the whole period:—

AMERICAN SECURITIES.—The tone of this market has been very steady throughout the week, and no further advance has taken place in the quotations. Five-Twenty bonds here are in good request, and show an advance of ½; but American railways have ruled scarcely so firm. Annexed are the changes on the week :—

	Closing Prices last Friday.	Closing Prices this day.	Inc or Dec.

Pennsylvania Gen. Mort. 6 % Bonds, 1910	97 ⅛	97⅛ 8⅛	+ 1
Virginia 6 % Bonds	49 51	49 51	... ...

JOINT STOCK BANKS.—Prices of bank shares have been favourably influenced by the prosperous appearance of commercial affairs generally, and by the recent course of the money market. We note an advance of 1 in Hong Kong and Shanghae and in British North American; while Anglo-Egyptian and Australasian have risen ½. Standard of British South Africa show an improvement of 2½. On the other hand, Oriental, Union of Australia, and Union of London have declined ½. The market, however, closed steadily.

TELEGRAPHS.—This department was at one period of the week much depressed, but subsequently considerable activity prevailed, and prices closed to-day at a sensible rise on the week. Anglo-American and Anglo-Mediterranean have risen 2; French Atlantic, 1½; Great Northern, ¾; British India Extension, ½; British Indian Submarine and Cuba, ⅜; Falmouth and Reuter's, ¼. The only adverse movements are in Mediterranean Extension and West India, which have given way ¼. Construction shares have moved in sympathy, Telegraph Construction being ¾ and Hooper's ⅛ better on the week.

MINES.—Eberhardts have fluctuated violently throughout the week, and to-day large sales again took place. The last price shows a fall of 3 on the week, while St John del Rey have given way 1; United Mexican, ½; and Chontales, ⅜. In the British market we note a decline of ½ in East Caradon, East Lovell, Great Laxey, and Marke Valley; ¼ in East Grenville and West Caradon, but Assheton have advanced ¼; Great Wheal Vor, South Condurrow, Tankerville, Van, and Wheal Grenville, ⅛.

A prospectus is issued this evening containing the terms of subscription for 2,800 first mortgage debentures of 25*l* each, total 70,000*l*, secured on the property of the Espinosena Silver Mining Company, situated at San Antonio, Lower California, Mexico. The debentures are to bear interest at 7½ per cent., and, in addition, each debenture will entitle the subscriber to five fully paid shares, entitled to a farther preferential dividend of 7½ per cent. until the debentures are redeemed. The shares to be allotted will be 14,000, forming part of 26,000 shares, constituting the capital of the company. 30,000*l* of the capital to be raised is to be employed in the business.

MISCELLANEOUS.—The dealings in this department has been on a full average scale, and the changes in the quotations have been for the most part favourable. North British Australasian have advanced 5; London General Omnibus and Native Guano, 3; British American Land, 2; Australian Agricultural, Copper Miners, Crystal Palace, Lisbon Steam Tramways, Madras Irrigation, Peel River Land, and Roumanian Government Annuities, 1; Hudson's Bay, London Financial, and Rio Improvements ½; National Discount, ¼. Ceylon Company's shares and Nantyglo preferred have given way 1, but these are the only adverse movements worthy of notice.

A prospectus is issued this evening of the Leicestershire Ironstone and Smelting Company. Capital 200,000*l*, in 20,000 10*l* shares. The company is formed to purchase 1,000 acres of land in Holt, Medbourne, and Bradley, Leicestershire, and "work, vend, and smelt" the ironstone therein. The estate is agriculturally valuable, and yields a rental of 2,000*l* per annum, which may be increased. A profit of 54,500*l*, or 30 per cent. per annum, is confidently reckoned on.

The British and Foreign Tramways Company invite subscriptions for 35,000 shares of 10*l* each, being the entire capital of the Glasgow Tramway and Omnibus Company. The latter company has acquired from the Corporation of Glasgow the property in a complete system of tramways for the city and suburbs—thus giving to the company a practical monopoly of the important traffic of the city. The managing director of the new company is Mr Andrew Menzies, a well-known omnibus proprietor in Glasgow; and larger profits than usual are anticipated, from the circumstance that the Glasgow tramway system is "probably more complete and judiciously planned than that of any other city." The British and Foreign Tramways Company provides the Glasgow Company with cars, horses, stabling, and other appliances.

It is stated that the works of the Patent Gas Company at Barnet will be completed in the first week in December.

It is announced that Henry Bailey, Esq., late of Crawshay, Bailey, and Company, has joined the board of directors of the Nantyglo and Blaina Ironworks Company, Limited.

In the new undertakings, Limmer Asphalte are quoted 3⅞ to 4⅛, United Limmer 2 to 1½ dis., Anglo-Austrian Bitumen 2 dis. to par, Anglo-Hungarian Bitumen 1½ to 2½ pm., Anglo-German Bitumen 1 dis. to par, Di Castro Asphalte 1 dis. to par, Société des Asphaltes Francais ½ to 1 pm., Native Guano 30 to 31, Phosphate Sewage 21½ to 22, Sombrero Phosphate 1 dis. to par, Patent Gas 14½ to 15, new shares 6¼ to 6¾, and Emma Mining shares 3 to 4 pm., but in many cases the quotations are rather nominal.

EXCHANGES AND BULLION.—Very little exchange business was transacted this afternoon, and the rates on the continent, with the exception of France, are generally higher than last week. Small quantities of gold are, however, still arriving from Paris, the fall in the exchange being, to some extent, owing to the corresponding fall in the premium on gold.

The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week :—

Gold.—The arrivals during the week, which have been chiefly from France, have been sent into the Bank, the total so disposed of being about 956,000*l*. The withdrawals of sovereigns have been small, comprising only 88,000*l*, which have been sent to the Brazils. The Nyanza has taken 97,180*l* to India, and the Tasmanian has brought 23,000*l* from the West Indies.

Silver remains as last quoted; considerable amounts have been purchased during the week for India, and fine qualities, suitable for the East, have been taken to some extent at 61d per oz standard. We have received about 120,000*l* from New York, and 48,000*l* from the West Indies. The Nyanza has taken 170,800*l* to the East; the Nebraska has also sailed with about 90,000*l* to Bombay, through the Canal.

Mexican Dollars by the Pacific steamer, and by other vessels from New York, amounting to about 230,000*l* in value, have been sold at an increased rate, the old coinage realising 61d per oz, the new, 59⅜d per oz; the demand for China has been very active, and the Nyanza has taken 130,270*l*.

Exchange on India for Bank drafts at 60 days' sight is 1s 11⅛d per rupee. The India Council bills allotted yesterday realised higher rates; the minimum was raised to 1s 11d per rupee, and tenders on Calcutta and Madras at 1s 11⅛d receive 13 per cent, and on Bombay at the same rate, 22 per cent; above this rate in full. The amounts allotted were—to Calcutta 299,300*l*, to Madras 700*l*, and to Bombay 100,000*l*.

63,000*l* in bullion has been sent into the Bank to-day.

According to the *Gazette* return, the imports of the precious metals during the week ended November 15 were—gold, 727,732*l*; silver, 323,674*l*. The exports were—gold, 1,026,034*l*; silver, 492,107*l*.

NOTICES AND REPORTS.

STOCKS.

Turkish 6 per Cent., 1862.—622 bonds, representing 132,300*l* have been drawn for redemption at par on the 1st January.

RAILWAY COMPANIES.

Brazilian Street Railway.—The manager, in his advices dated 28th Oct., states that the traffic continues remarkably good.

Eastern Bengal.—At the meeting called for the 28th instant it will be proposed to raise 250,000*l*, either by borrowing, or the creation of shares.

Kent Coast.—Holders of B stock are invited to exchange their security for an equal amount of London, Chatham, and Dover Four-and-a-Half per Cent. Arbitration Preference Stock.

Midland—Glasgow and South-Western.—It has been announced that the Bill for the amalgamation will be applied for in the coming session, and if obtained come into operation on the 1st of July, 1872. The ordinary stock of the two companies will receive equal dividends after the opening of the Settle and Carlisle Railways on the 1st of January, 1874, whichever shall first happen. In the meantime the joint traffic receipts of the two companies will be so apportioned that the Glasgow and South-Western Company shall receive a dividend not lower than 1 per cent. under that of the Midland, but should the receipts of the former afforded a higher rate, it should be paid proportionately.

North Monkland.—A prospectus is issued for a new railway to accommodate the district to the North of the present Monkland Railway, which is now part of the North British system, and one of their guaranteed stocks. This new line, it is stated, intersects the remaining mineral fields of the Monklands, and will pick up traffic to a large extent from every half-mile or so of its whole length. It forms a junction both with the North British and Caledonian, thus acquiring an outlet in all directions.

BANKS.

English Bank of Rio de Janeiro.—Dividend declared of 4 per cent. for the half-year.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

Imperial Credit.—At the meeting it was announced that certificates have already been issued for 48,185 shares in exchange for a corresponding number of shares in the Imperial Mercantile Credit Association, Limited, and that the claims and loans outstanding have been paid off excepting a few accounts not yet adjusted, estimated not to exceed 5,000*l*.

Otago and Southland Investment.—The usual interim dividend at the rate of 10 per cent. per annum has been declared.

ASSURANCE COMPANIES.

Ocean, Railway, and General Traveller's Assurance, Limited.—Capital, 200,000*l*, in 40,000 shares of 5*l*. Of these shares 7,500 are to be fully paid, while on the other 32,500 only 1*l* is to be called, the remaining liability serving as a guarantee for the operations of the company, in consideration for which liability of 4*l*, the holders are to receive preferentially an interest of 2 per cent. per annum on that amount. A leading object will be to insure the lives of professional mariners, and of passengers to and from all parts of the world.

MISCELLANEOUS COMPANIES.

Alexandra Palace and Muswell Hill Estate Tontine.—Subscribers have had the full amount of their subscriptions returned to them.

British-Indian Submarine Telegraph.—Gross receipts for the six months, less 2,751*l* loss on exchange, 61,803*l*; and expenses, including income tax, 16,979*l*; balance, 44,823*l*. It is proposed to pay a dividend for the half-year of 6s per share, free of income tax, which will absorb 35,625*l*; and with 1,578*l* balance from last account, will leave 10,777*l* to be carried forward to reserve. It is mentioned that the section of the Australian Company's line from Java to Australia will shortly be completed, thus ensuring a further increase of traffic, and that the directors have not yet agreed upon terms of amalgamation.

China Submarine Telegraph.—The report states the gross receipts from the opening in June to the 4th November at 26,895*l*, while the estimated expenses have been 6,550*l*. It is probable, therefore, that an interim distribution at the rate of 6 per cent. per annum will be made on the 1st January.

Colonial Trusts Corporation, Limited.—Capital, 300,000*l*. First issue, 150,000*l*, in 30,000 5*l* shares, upon which 1*l* per share, it is intended, will be called up. 15,177 shares will be allotted to shareholders in the Colonial Securities Company, Limited, the business of which will be taken over. The business, it is announced, will allow of the payment of 8 per cent. dividends forthwith, and consists of investments in colonial first mortgages, the negotiation of loans, and colonial agency.

Falmouth, Gibraltar, and Malta Telegraph.—The gross receipts for the six months ended September amounted to 41,452*l*, and the expenses to 10,805*l*, leaving 32,473*l*; to which must be added the undivided profits from the last account. The directors recommend the payment of a dividend of 7s per share on the original capital, and 1s 2d on the new shares, being at the rate of 7 per cent. per annum on both, and leaving 8,897*l* to be carried to the reserve.

Hudson's Bay.—The following are extracts from the report:

The returns for 1870 compare unfavourably with the average returns for former years, arising partly from the continued scarcity of provisions throughout the country, and partly from a deplorable visitation of smallpox, which has committed great ravages amongst the Indians, half-breeds, and settlers in the Saskatchewan district. The committee have been engaged in proceeding with the re-organisation of the fur trade. The new province of Manitoba is attracting numerous settlers, and surveys are in progress not only with a view to the settlement of the country, but also to the construction of a line of railway. The committee have received the balance of the Oregon money from the United States Government, amounting to 46,316*l*, subject to a deduction of about 6,000*l* for charges, which will be placed to the Oregon Claims Reserved Account, the mode of dealing with which will have to be con-

sidered at the close of the financial year. The payment of an interim dividend of 5s per share is recommended.

Russian (Vyksounsky) Ironworks.—The report mentioned that the business was progressing satisfactorily, and that if the shareholders would only forbear until the position is strengthened, and the disputes with the Schepeleffs are adjusted, there would be a career of prosperity before them.

South African Diamond Fields Association, Limited.—Capital, 100,000*l*, in 5*l* shares. One-half the capital now offered. It is intended to acquire and work diamond claims in South Africa, to purchase and advance upon precious stones under the guidance of an experienced valuer, and to convey persons to the diamond fields.

West India and Panama Telegraph.—The report refers to the continued delay in the completion of the contract, and expresses a hope that the contractors will make due reparation for the losses sustained by the undertaking. The revenue balance-sheet shows an expenditure of 4,495*l*, against net receipts 3,511*l*, or a balance against capital of 983*l*.

MINING COMPANIES.

I. X. L. Gold and Silver.—The directors announce that they will close their share list on Thursday, 23rd inst., for town and country.

Scottish Australian.—A dividend has been declared of 5 per cent. per annum, leaving 160*l*.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was increased firmness in the grain trade to-day, and wheat was more saleable at Mark lane, at the extreme rates of Monday last for both English and foreign qualities. Prices abroad are relatively higher than they are here; nevertheless, the imports have continued on an extensive scale. Flour showed more firmness, while maize and oats have risen 1s per quarter on the week. Barley has ruled dull of sale, but beans and peas have commanded very full prices. This week's imports of foreign and colonial produce into London have amounted to 18,080 quarters of wheat; 22,260 barley; 19,570 oats; 4,550 beans; 950 peas; 950 sacks of flour.

At Liverpool and Wakefield this morning the wheat trade ruled steady, and sellers demanded rather more money.

The Liverpool cotton market opened quietly on Friday last, but has since been very steady, and a good business has been done at an advance of $\frac{1}{16}$d to $\frac{1}{8}$d per lb since last Friday. The total sales for the week are 98,650 bales; of which the trade have taken 71,930 bales; speculators and exporters, 26,720 bales. The imports are 120,450 bales; the actual exports, 7,714 bales, and to-day's stock is 538,950 bales. Quotations for American descriptions have advanced $\frac{1}{8}$d per lb., East Indian $\frac{1}{16}$d to $\frac{1}{8}$d per lb, and Bengals remain unchanged since this day se'nnight, To-day the market closes firm; sales, 15,000 bales.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended November 16, 1871:—

	Imported.	Exported.
American.....bales	15,258	789
Brazilian	20,954	200
East Indian	80,558	10,130
Egyptian	19,124	20
Miscellaneous	7,199	23
Total	143,093	11,162

At New York to-day middling Upland cotton was quoted at 18$\frac{5}{8}$c per lb. At Bombay, on November 15, fair Dhollerah was quoted at 216 rupees, "advancing."

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, Oct. 20:—We have a very small business to report in cotton during the past week, the transactions only aggregating about 1,600 candies. The reported frost in America, and the consequent spurt in Liverpool on the 13th, were known here the following morning, and on Saturday and Monday several speculative contracts for new cotton were entered into, machine-ginned Broach for delivery 15th April, at 260 rs, and Oomrawuttee, February delivery, at 235 rs to 240 rs. Old Dhollerah, for delivery in 2$\frac{1}{2}$ months, was also purchased at 235 rs, and some small parcels on the spot at 229 rs to 232 rs. The news of the reaction in Liverpool, however, has since given a very decided check to the demand, and during the past two days we have not heard of any transactions, although there is nominally very little alteration in prices, which still give a cost to sell considerably above Liverpool currencies. Arrivals during the week have been small, and consist chiefly of sawginned Dharwar by native craft from Compta. The samples we have seen show considerable discolouration from rain damage, and in most cases also a good deal of black leaf. The cotton now coming forward was stored on the coast during the monsoon, and it is expected that that which was stored in the districts, and is now being despatched to the coast, will turn out better. Crop prospects—The reports from the districts as to the growing crop continue on the whole very favourable. Hingunghat—The weather has continued fine, and some of the more advanced fields are almost ready for picking. Oomrawuttee—There is some cotton appearing here and there, and picking is expected to begin in about a fortnight. Sheagaum and Khamgaum—The cotton crops are reported as looking very well, and fast coming to maturity. Broach—In some quarters there are fears that the drought has been injurious, but on the whole the crop is strong and healthy. Dhollerah—There has been a further slight fall of rain, and prospects are very encouraging. Dharwar—Sowing has been completed, and the weather so far has been very favourable. Tinnevelly—We have a telegram dated yesterday, quoting 7$\frac{3}{4}$d, c. and f., with a firm market.

Grand total	1,084,486	.....	1,003,753

Actual exports since last mail left, 15,113 bales.

The Imperial Ottoman Bank have furnished the following report, dated Alexandria, Nov. 3:—Cotton has been in good demand during the week, although the news from Liverpool has not been very favourable. Business has been somewhat checked on account of the scarcity of money, but holders have shown every disposition to meet buyers at current prices. The crop is now arriving very freely. Fair open, with staple, 9½d to 9⅝d per lb, f.o.b.; good fair, ditto, 9¾d to 9⅞d, ditto; fully good fair, ditto, 10¼d, ditto; extra fine (very scarce), 14d to 16d, ditto. Arrivals from Oct. 28, to Nov. 3, 57,250 crs. Sales from Oct. 28 to Nov. 3, 18,925 crs. Shipments from Oct. 27 to Nov. 3—England, 6,733; France, 237; Italy, 1,587; Austria, 132—total, 8,689 bales.

The demand for colonial produce has ruled active during the week. Sugar has been in good request, and prices are again 6d higher on the week. The stock of sugar in the United Kingdom is 116,670 tons, against 164,065 last year; while the quantity of East India sugar afloat to the United Kingdom and continent (not including Government exports from Java) is 36,000 tons, against 23,300 in 1870, and 24,500 in 1869. Coffee has advanced 1s, plantation sorts having ruled active. The quantity of East India coffee afloat (not including Java exports) is 12,900, against 7,400 in 1870, and 9,850 tons in 1869. Rice has also been active, and a good business has been done in floating cargoes. Afloat 74,800, against 78,600 tons in 1870, and 44,000 in 1869. Rum is rather dearer on the week.

The following report, dated October 14, has been forwarded by Messrs Fryer, Schultze, and Co., of Colombo:—A continuance of fair weather has enabled curers and shippers to make good progress in the exports of coffee crops, of which a good deal has recently gone afloat, though to date but one ship has cleared outwards with cargo for Great Britain. The distribution of shipments may be seen below:—

During the early part of the fortnight just elapsed, there was a good deal of business done in parchment coffee of all qualities, at our previous quotations; more recently the market for this article has been quiet. The comparative scarcity of native clean coffee and its favourable position in the home market, have enhanced the pretension of dealers, and we call the article fully two shillings dearer. At present quotations dealers refuse contracts.

Annexed is Messrs Kilburn, Kershaw and Co.'s circular:—The silk market continues very quiet at unaltered prices, and the fortnight has passed with very limited inquiry and small business. Deliveries are satisfactory of all but Bengal silk, which still remains a dead letter. Cantons continue to arrive in large quantities, but the high cost prevents their being freely offered, and importers generally decline to sell at the current market price of 16s for ordinary Tsatlee reel. In Japans everything is quiet, and there is nothing new to report. Deliveries from 1st to 15th instant have been as follows:—China, 1,296 bales; Canton, 481; Japan, 286; Bengal, 191—total, 2,254 bales.

Mr Helmuth Schwartze reports:—The arrivals for the fifth and last series of public sales, which is to commence on Thursday, the 23rd inst., comprise up to date:—Sydney, 18,986; Port Phillip, 6,364; Van Diemen's Land, 592; Adelaide, 1,399; Swan River, 36; New Zealand, 5,357; Cape, 30,049—total, 62,783 bales. This figure will probably represent the total available by the 23rd inst., for though a few thousand bales more may arrive, such additions will merely replace what has been forwarded direct to the country or the continent. The order of selling was to-day fixed by the brokers. There is no change to report in the market, which, though quiet, remains firm, the consumption going on undiminished in all quarters. The prices paid in the few transactions that take place are always fully up to the level of October closing rates. The Antwerp sales, which commenced on the 7th inst., and will close to-morrow, progress satisfactorily. There is good competition, and prices rule ¾d to 1¼d per lb higher than in August, or about on a par with present London quotations.

Messrs Laurence Brothers observe:—At this period of the year there is frequently only a limited demand for many classes of leather; therefore, although on some few articles a further advance has been realised, it is not surprising to notice upon others a slight tendency to recede in value. It is probably correct to report the trade, since our last circular, as being beyond the usual average. Large arrivals have come to hand from America and Australia, and without these goods it is difficult to perceive how English manufacturers would have been able to execute their orders. At the present time the following rough and curried articles appear in most demand:—English and foreign butts and bends of the best tannages; crops of medium and heavy substance; wide English shoulders and offal; light shaved and dressing hides; horse hides; kips for export; medium and heavy calf skins; basils. The inquiry for green goods still continues active; market hides, although quoted a little easier in price, cannot be regarded as really lower, when the increased hair and dirt is taken into consideration. Lime pelts can be largely disposed of, also wool sheep and calf skins.

The annexed is dated New York, Nov. 3:—All things considered, the volume of trade is pretty large, and market values of leading descriptions of merchandise are tolerably well sustained, though there is here and there some shading in prices, particularly on goods which are getting to be a little out of date, and which holders are anxious to close out. The continued active demand for money also bears with severity upon parties heavily encumbered with goods, and who have large obligations to meet. Mercantile paper is still difficult of negotiation, when not strictly first-class, and there is more business in the way of discounts above one per cent. a month, than below that figure. The banks are nursing their resources, by lending the bulk of their funds on call at about seven per cent., thus throwing an unusually large amount of business paper upon the discount houses, where rates take a very wide range. The demand for general merchandise from Chicago, comprising the leading necessaries of life, builders' materials, &c., continues very active, and the payments, under the circumstances, are made with a degree of promptness that excites the admiration of all who are in any way interested. From other sections of the interior, the demand for goods is decreasing, as is usual at so advanced a stage of the season, when the distributive merchants have about completed their stocks. The volume of both exports and imports has been comparatively moderate of late. Most kinds of western produce are a little above the shipping point, but this halt is not likely to be of more than temporary duration, judging from the public and private accounts from Europe. The gold market has ruled quite steady and firm, while foreign exchange has been more or less unsettled.

THE COTTON TRADE.

LIVERPOOL.—NOVEMBER 16.

Cotton has been firm throughout the week, with a considerable business, and an upward tendency in prices. On Monday and Tuesday there was some animation in the market, and though a quieter tone has since prevailed, quotations of the current descriptions are advanced about ⅛d per lb. The Bank rate has this day been reduced to 4 per cent. For Sea Island the demand has been only moderate, without change in prices. American has been in good request, and has risen about ⅛d per lb in the middling and lower grades. New York advices to the 15th instant quote middling Upland 18⅜ cents, costing to sell in Liverpool 10d per lb by steamer. Brazil has been more inquired for, and has commanded an advance of ⅛d per lb. Egyptian is in more general request, and the prices of last week are fully maintained. East Indian has been in improved demand, with considerable purchases on speculation and for export, and prices close partially $\frac{1}{16}$d per lb dearer.

In cotton to arrive and for future delivery the transactions have been rather numerous. The latest quotations are—American, basis of middling, from any port, not below low middling, shipment November-December 9⅜d; not below good ordinary, shipment October-November 9⅜d; November-Dec. 9⅜d; January-February 9⅜d; Savannah, ship named, without clause 9⅜d; New Orleans, not below good ordinary, November delivery 9⅜d; November-December shipment 9⅜d; Maceio, basis of fair, mutual allowances, ship named 9⅛d per lb.

The sales of the week, including forwarded, amount to 98,650 bales, of which 12,900 are on speculation, and 13,820 declared for export, leaving 71,930 bales to the trade.

Nov. 17.—The sales to-day will probably amount to fully 12,000 bales, with a firm market.

The above figures show:—

	bales.
An increase of import compared with the same date last year of	759,860
An increase of quantity taken for consumption of	483,300
An increase of actual exports of	223,900
An increase of stock of	130,830

In speculation there is an increase of 360,610 bales. The imports this week have amounted to 120,544 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to Nov. 10) is 94,000 bales, against 169,000 bales at the corresponding period last year. The actual exports have been 7,714 bales this week.

LONDON.—NOVEMBER 16.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

The market has been steady, but quiet, during the week, and prices at the close remain on a par with our last quotations.

NEW YORK.—Nov. 3.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Nov. 3. From the figures thus obtained it appears that the total receipts for the seven days have reached 96,708 bales, against 93,969 bales last week, 82,538 bales the previous week, and 64,097 bales three weeks since, making the total receipts since Sept. 1, 1871, 459,111 bales, against 542,745 bales for the same period of 1870, showing a decrease since Sept. 1, this year, of 83,634 bales. The exports for the week ending this evening reach a total of 35,768 bales, of which 30,130 were to Great Britain, 2,762 to France, and 2,876 to rest of the continent, while the stocks as made up this evening are now 263,101 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:—

Week ending Nov. 3.	Exported to Great Britain.	Exported to Continent.	Total this week.	Same week 1870.	Stock. 1871.	Stock. 1870.
New Orleans	9833	3027	12860	30593	62755	66965

Other ports	1089	...	1089	1410	25000	18000
Total	30706	5638	36344	73124	263101	247802
Total since Sept. 1	172236	17011	189217	229553	...	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 36,780 bales, while the stocks to-night are 15,299 bales *more* than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Oct. 27, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph:—

Ports.	Receipts since Sept. 1. 1871.	1870.	Exported since September 1 to Great Britain.	France.	Other Foreign.	Total.	Coastwise Ports.	Stock.

Total this year	362203	...	141530	9715	1658	152903	174450	221932
Total last year	...	436339	114233	1494	10702	156429	191304	230801

There has been no new feature in the cotton market the past week. Prices have fluctuated from day to day, improving early in the week and declining again toward the close, showing at the close, however, an improvement since the previous Friday of 1/8c on all grades. The influence mainly operating have been the variations in tone and price at Liverpool, and the daily receipts at our ports. There is considerable timidity among holders and operators, growing out of the fact

that last year's crop was so much in excess of the current estimates. Hence the receipts are watched with the greatest closeness, and the prevailing crop estimate is raised or lowered pretty much in accordance with the varying daily movement at the ports, and prices fluctuate accordingly. For future delivery the transactions have been large, but prices are rather easier than a week ago, especially for the later months, low middling being quoted at 18 1/16c for November, 18¼c for December, 18½c for January, 18¾c for February, 19c for March, and for April, 19¼c. The total sales of this description for the week are 115,850 bales, including 2,600 free on board. For immediate delivery the total sales foot up this week 14,952 bales, including 7,324 for export, 5,926 for consumption, 402 for speculation, and 1,300 in transit. Of the above, 351 bales were to arrive. The following are the closing quotations:—

	Upland and Florida.	Mobile.	New Orleans.	Texas.
	c c	c c	c c	c c
Ordinary.....per lb	16½ @ ...	16½ @ ...	16⅝ @ ...	16¾ @ ...
Good ordinary	17⅝ ...	17½ ...	18⅛ ...	18¼ ...
Low middling	18⅛ ...	18⅝ ...	18¾ ...	19 ...
Middling	18½ ...	18¾ ...	19⅛ ...	19⅜ ...
Good middling.....	19⅛ ...	19⅜ ...	20⅛ ...	20½ ...

For forward delivery the sales (including 2,600 free on board) have reached during the week 115,850 bales (all low middling or on the basis of low middling).

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports, receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:—

	Week ending Nov. 3, 1871.			Week ending Nov. 3, 1870.		
	Receipts.	Shipments.	Stock.	Receipts	Shipments.	Stock.
Augusta	7805	309	13461	9000	10715	5000
Columbus	2461	1505	5552	3900	3451	5300
Macon	3429	2453	7577	6251	5040	7131
Montgomery	3173	3114	6173	4346	4299	5745
Selma	3097	2594	4603	4156	3108	5831
Memphis	17643	14622	15226	13825	11820	12529
Nashville.....	1741	1675	1394	1054	1038	1712
	39349	26272	53986	42532	39471	43248

The above totals show that the interior stocks have increased during the week 13,661 bales, and are to-night 10,738 bales *more* than at the same period last year. The receipts have, however, been 3,183 bales *less* than the same week last year.

The exports of cotton this week from New York show a decrease since last week, the total reaching 13,922 bales, against 14,930 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1871; and in the last column the total for the same period of the previous year:—

—*New York Commercial and Financial Chronicle.*

NEW YORK, November 10.—According to Messrs Moffatt, Davidis, and Co.'s report, the week's receipts of cotton at all United States' ports have been 105,000 bales, and since the 1st of September, 565,000 bales. Shipments to England, 31,000 bales; ditto to France, 6,000; and to the continent 4,000 bales. Total since the 1st of September, 228,000 bales. Stock at all ports, 298,000 bales. Middling Upland, 8 1/16d, cost and freight, per steamer.

The four days' receipts of cotton at all United States' ports have been 52,000 bales. Shipments to England. 25,000 bales; ditto to France, 4,000 bales; and to the continent, 3,000 bales. Midland Upland, 9d, cost and freight per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, November 16.—At the date of our last we characterised the market as quiet, with prices tending in favour of buyers. Since then our market has gradually assumed a stronger tone with less irregularity in values, so that practically prices have advanced, though we make no change in the quotations. During the week an average business has been done in a quiet way, but at the close the firmness of sellers is limiting business. Yarns have been sold to a fair extent, and are now dearer all round, except perhaps the lowest qualities. In cloth an increased business has been done, and makers are again generally under contract, except for some classes of heavy goods, which continue depressed. At the close a firmer tone has been imparted to the market by the reduction of the Bank rate of discount to 4 per cent.

BRADFORD.—There is a cheerful tone prevailing in the wool market, but the transactions are only limited. All descriptions of long-stapled wool are held with great firmness, and in some instances even a slight advance is sought. In noils and brokes there is no appreciable change. The yarn market is rather quiet. The high quotations of spinners rendered necessary by the dearness of wool, has the result of checking operations. The piece market is only quiet. The business doing for all quarters is restricted. Prices are firm.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Nov. 3.

The chief feature of the markets for flour and grain the past week has been a speculative feeling, which has controlled prices without much reference to other influences, but the close is quite dull. Flour has arrived less freely, and early in the week there was some speculative feeling, with a moderate export demand, but both subsided and the market became weak; good shipping extras, which sold last Friday at $6.95 to $7, declined to $6.80; but in view of the comparatively small receipts and the fact that stocks are everywhere quite limited, receivers have been disposed to store freely rather than accept reduced prices. To-day the market was dull and depressed, fair shipping extra State offered at $6.75, with a line of prime sold at $6.85. Wheat has been very unsettled. There has been some speculative demand, and holders have offered sparingly, preferring to send to store. Shippers have reported their limits generally reduced, but with lower freights have been enabled to do a little business, part for the continent, Receipts have fallen off materially, both here and at the West; but the dulness of the flour market and the reduced export movement cause a feeling of uncertainty respecting the future. To-day the market declined, in sympathy with a decline abroad. No. 2 spring sold at $1.47½ to $1.50; amber Michigan, $1.63, and choice white ditto, $1.68 to $1.70. Barley has been active; free sales were made to-day at 98c to 102c for Canada West, 89c for rowed State, with 80c bid for prime Western—with poorer qualities quoted at 5c to 7c under these figures. Corn has declined; orders from the East fell off, speculation subsided, and the local trade became dull, while the receipts were rather in

excess of the estimates. We notice also the arrival of new mixed corn from Ohio. The season has been very favourable to its getting early into marketable condition, and we understand that supplies nearly equal to our local wants may be expected by rail. It sold yesterday at 74c, while prime old mixed brought 78c, afloat. To-day the market was dull and weak—prime afloat closing at 77½c, and yellow 79c. The movement in breadstuffs at this market has been as follows :—

RECEIPTS AT NEW YORK.

	1871. For the week.	1871. Since Jan. 1.	Same time Jan. 1, 1870.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The corn trade has presented a firmer appearance this week, owing to the approach of frosty weather, and sales have been more freely made, full prices having been paid for both English and foreign descriptions. The reduction in the rate of discount has naturally strengthened the hands of holders, and hopes are now entertained of maintaining present prices throughout the winter, more especially as the navigation is now closed in the Baltic and Black Sea, and on the American canals. On the other hand, the expectation of a considerable export demand has been completely disappointed, though prices abroad are relatively higher than those current here. Stocks of foreign wheat in granary are large; and farmers' deliveries, as ordinary at this period of the year, are heavy, but factors are very firm in demanding extreme currencies. Flour ruled dull at the commencement of the week, but to-day closed with a firm appearance.

Spring corn has been in good request. Oats and maize show an advance of 1s per quarter on the week; while beans and peas are fully as dear. Barley has met a dull inquiry, but is not cheaper.

The following statement shows the imports and exports of breadstuffs into and from the United Kingdom since harvest, viz., from August 26 to the close of last week, compared with the corresponding periods in the three previous years :—

IMPORTS.

	1871. cwts.	1870. cwts.	1869. cwts.	1868. cwts.
Wheat	11,151,350	7,579,094	10.378,623	6,317,509

Flour	17,584	324.570	4,043	8.753

Mr George Dornbusch thus reports the state of the floating grain and seed trade :—During the last eight days 77 grain and seed-laden vessels have arrived at ports-of-call, viz. :—37 wheat, 10 maize, 9 barley, 8 rye, 3 beans, 5 linseed, 1 cotton-seed, 1 maize and wheat, 2 palm kernels, 1 ground nuts. The floating grain trade has this se'nnight varied—at first firm, later calmness prevailed, closing again firm. Wheat—At first steady, later the demand fell off, but again returned at improving prices. Maize—Fine cargoes firm; inferior neglected. Barley—Good cargoes steady; inferior difficult to dispose of. Rye—At first languid, later the demand improved.

COLONIAL AND FOREIGN PRODUCE MARKETS,

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—There has been a very good demand from the trade, and farther speculative business done during the week. Prices may now be quoted fully 6d per cwt dearer than on Friday last. Transactions in Manila have been extensive, and several parcels of brown Mauritius have changed hands. Crystallized sorts of the latter are getting scarce, and have commanded higher prices. West India has met with a steady inquiry, about 3,396 casks selling in three days. Barbadoes, 30s to 35s per cwt. At auction and by private contract, importers now require some advance for the reduced quantity of West India on show. Some fine grainy white beet sugar in public sale realised 37s 6d per cwt. A large delivery of 5,270 tons last week caused the stock to decrease to 55,000 tons. In the previous year it was 83,230 tons, and in 1869 84,000 tons.

Mauritius.—8,766 bags by auction went at full prices to 6d advan c Brown, 26s to 30s; grainy, 33s to 36s; crystallized yellow and white

37s to 38s 6d. Privately business has been done chiefly in brown at 25s 6d to 30s.

Bengal.—1,061 bags chiefly found buyers at 28s to 33s 6d for Gurpatta, and 27s to 28s for soft brown Dumma sorts.

Madras.—1,400 bags Jaggery on the spot, 22s; and 450 tons afloat at 21s 3d per cwt.

Penang.—1,806 bags found buyers at 33s to 34s 6d for soft yellow and greyish white. Privately, 50 tons low Penang in baskets at 21s 9d

China.—11,000 bags soft brown have been sold at 23s 3d.

Manila.—Sales have been large. About 45,000 bags unclayed have changed hands. Taal, 22s to 23s 9d; Ilo Ilo, 23s 6d to 24s. 40,000 bags clayed at 25s to 27s. Of 11,657 bags clayed by auction, a pile of fine dry quality realised 30s. The remainder was withdrawn above the present market value. 2,800 tons have sold afloat: Ilo Ilo, 24s 9d; Zebu, 23s 6d to 24s.

Other Foreign.—409 casks, 48 barrels Porto Rico by auction were chiefly taken in. A few lots low sold at 30s 6d to 31s 6d. Privately 1,550 boxes Havana and Cuba at 34s to 35s. 800 casks Porto Rico at 31s 6d to 35s.

Floating Cargoes.—One of Porto Rico at 28s 9d per cwt for the United Kingdom.

Refined.—The market is firmer, and prices show some advance. Dry goods quoted 40s to 41s 6d for common to middling. Pieces and crushed also rather dearer.

Molasses.—No sales reported.

Rum.—The supply is now moderate, and the sales during the week have been rather limited in extent at firmer prices. Demerara 1s 10d to 1s 11d. 60 puncheons Penang at 1s 7½d proof. A few sales of Jamaica are reported at 3s 6d to 4s 2d per gallon.

Coffee.—The speculative demand for ordinary qualities continues, higher prices being paid. Native Ceylon on the spot, 64s to 66s; East India, 63s 6d to 66s 6d. Several sales of the former to arrive at 65s to 67s. The last sale of the Netherlands Trading Company this year, fixed for the 22nd inst., will contain only 83,700 bags (including 5,000 bags Rio), against 114,700 bags in 1870. 964 casks 91 barrels 123 bags plantation Ceylon sold steadily at full to rather higher rates than last quoted: grey and pale, 68s to 73s 6d; colory, middling mixed to good, 71s 6d to 79s; and good bold up to 84s. 178 casks 876 cases 1,068 bags East India sold as follows:—Naidoobatum and Wynaad, 70s to 77s 6d; Courtallum, 67s to 71s 6d. 110 half-bales mixed quality Mocha partly realised 90s. 544 bags foreign sold at high prices: pale Guatimala, 69s 6d; washed Rio, 70s 6d to 72s. A cargo of Rio has sold, the price said to be at or about 65s per cwt. There were 1,500 tons delivered from this port last week, and the stock is farther reduced to 19,800 tons, as against 28,230 tons last year, and 24,750 tons in the previous one.

Cocoa.—There has not been any change in the market. At the public sales on Tuesday 2,000 bags Guayaquil were withdrawn. There has been a large arrival of this description. 525 bags Trinidad went at steady prices, ranging from 66s to 105s, and grey as low as 57s 6d. The total stock is reduced to 35,050 bags, &c., against 38,200 last year. Deliveries for home use and export have hitherto been 93,000 bags, &c., against 56,550 bags, &c., last year.

Tea.—The market has been largely supplied from the recent arrivals, and the trade have bought freely. Importers showing a desire to realise, prices of some kinds, including red leaf, have experienced a slight reduction. A quiet tone now prevails. Indian teas have been in good demand at the sales and also by private contract, generally at full rates. Inferior sorts attract rather more attention, also green teas. The deliveries are large.

Rice.—Several thousand tons new season's crop of Rangoon have sold for delivery at 10s 3d ex ship, or 10s 6d landed. A cargo of Moulmein at 10s 9d for the continent. 4,000 bags Madras have sold for arrival at 10s 3d. On the spot transactions of moderate extent have occurred, including white Bengal, at 10s 7½d to 13s; Necrancie Arracan, 10s 3d to 10s 4½d; Rangoon, 10s 1½d per cwt.

Imports and Deliveries of Rice to Nov. 11, with Stocks on hand.

	1871.		1870.		1869.		1868.
Imports ..... tons	77600	...	64500	...	70700	..	63850

Stock	42400	...	49630	...	19460	.	33510

Sago.—There is not any farther change in prices. 170 boxes bold grain part sold at 18s. 1,300 bags partly met with buyers; small grain 16s to 16s 6d; one lot 17s for low to fair; bold, 17s 6d to 18s per cwt. The stock is rather heavy.

Sago Flour.—813 bags were taken in at 16s 6d per cwt.

Tapioca.—Of 1,691 bags by auction a few lots Singapore sold at 2d to 2¼d per lb. 1,426 bags Tapioca flour withdrawn.

Black Pepper.—The prices have declined ⅜d to ½d per lb. Yesterday, a large quantity was advertised for public sale, viz., 6,744 bags Penang, a portion of which sold at 6⅜d to 6½d, and 1,469 bags Singapore, part sold at 6½d to 6⅝d for greyish to good. A considerable quantity was withdrawn, as the sellers would not accept the above reduced terms. During the week Penang on the spot sold at 6½d; Singapore, 7d; Penang to arrive, at and under 6¼d, and 50 tons now due, at 6½d per lb.

White Pepper is firm, and the stock continues very small. 579 bags Singapore, offered by auction yesterday, were chiefly taken in above the value. 90 bags with short prompt sold at 1s 3d. During the week business has been done at 1s 2½d to 1s 3d per lb on the spot and afloat.

Other Spice.—Nutmegs are rather cheaper. 42 cases brown Padang in yesterday's sales were chiefly taken in. A few cases sold: 105's, 3s 2d; 76's, 3s 6d. 15 cases Penang partly found buyers: 74's to 68's, 3s 6d to 3s 10d. 7 cases wild mace sold at 9⅝d. 3 casks low Java were bought in above the value. 293 bags cinnamon chips part sold at 3½d per lb for ordinary mixed quality. 110 cases ordinary Cochin were taken in at 48s per cwt.

Saltpetre.—A few parcels of Bengal have sold on the spot at full rates: low to fine, 31s 6d to 32s 6d. 150 tons to arrive at 32s to 32s 3d per cwt., usual allowances. The market is steady, but quiet.

Imports and Deliveries of Saltpetre to Nov. 11, with Stocks on hand.

	1871.		1870.		1869.		1868.

Total delivered	10030	...	11920	...	9670	...	9660
Stock	1990	...	2220	...	4460	...	4680

Deliveries last week 175 tons.

Cochineal.—At the sales on Wednesday 1,284 bags Teneriffe were only partly disposed of on former terms: silvers, 2s 4d to 2s 7d; blacks, 2s 4d to 4s. A considerable quantity was withdrawn. 166 bags Honduras went at barely former rates for silver, viz., 2s 3d to 2s 8d. A few lots low and pasty, 2s 1d to 2s 2d; common blacks, 2s 10d to 2s 11d. 81 bags Mexican: silver, 2s 3d to 2s 4d per lb.

Other Drysaltery Goods.—Business has been done in cutch at lower prices, viz., 23s 6d to 24s; and the market is quiet. Gambier remains steady, sales reported at 17s 6d ex ship; price on the spot, 17s 6d to 17s 9d. 791 mats cubes by auction part sold at 23s. China galls have sold at 62s 6d. 269 bales Bengal safflower part sold at 4*l* 12s 6d to 9*l* 15s. Turmeric is quiet. At auction Bengal was taken in at 18s 3d to 18s 6d. 907 bags Madras sold at 15s 6d to 21s. 607 chests lac dye were bought in, excepting a few lots D T, which sold at 2s per lb.

Shellac.—Further advanced prices have been paid on the spot and to arrive. 336 chests by auction sold: good button, 8*l* 5s to 8*l* 10s; native and second sort orange, 7*l* to 7*l* 2s 6d, and subsequently at 7*l* 10s to 7*l* 12s 6d. Privately 6*l* 10s to 6*l* 15s paid for garnet afloat and fine orange up to 8*l* and 8*l* 2s 6d per cwt on the spot.

Metals.—There has been a continuance of active demand, and the tone of business is healthy. The principal feature of the week has been an important advance upon copper, in which extensive operations have occurred. Chili, &c., 69*l* to 71*l*; Walaroo and Burra, 79*l* to 80*l*; English, 78*l* to 80*l*. Tin is again higher, the statistics of the market being favourable to importers. The later sales of Straits have been at 144*l* to 145*l*. The 250 tons for sale by public tender sold at 142*l* 10s to 144*l* 5s. English is much dearer. Tin plates have again risen in value. Spelter steady. Silesian, 26*l* to 20*l* 5s. Belgian and Rhenish, 19*l* 5s to 19*l* 10s. British iron supports the recent improved quotations. In the early part of the week Scotch pig further improved in value, touching 68s 9d, cash, but the market since became flat. It closes firmer at 69s to 69s 3d per ton, cash. Quicksilver, 11*l* per bottle.

Hemp.—A few sales have been effected in Manila at full prices, and the market is firm although not active. Privately, 42*l* to 49*l* paid; and Sorsogon, 51*l* 10s. 700 bales by auction yesterday were bought in at 49*l* to 50*l* 10s per ton for roping sorts.

Jute.—The consumers in Dundee do not extend their operations, and the market is rather quiet. Several contracts have been made for arrival during the week. On Wednesday 14,301 bales were brought to auction, when 3,000 sold, common kinds being rather cheaper. Low to fine, 16*l* 10s to 26*l* 10s. The new crop jute was chiefly taken in at high prices. A small parcel has sold at 28*l* per ton.

Linseed.—A large business in Taganrog and Azoff seed for arrival at 64s, and coast cargoes at 63s. Higher prices now demanded. Calcutta afloat 63s to 64s; nearest value on the spot 63s; Bombay, 64s 6d per quarter on the spot and to arrive.

Oils.—Stocks of sperm are small, and the market has further advanced; 90*l* now demanded. Pale seal quoted 37*l* to 37*l* 10s per tun. English brown rape has varied in price from 45*l* to 45*l* 5s. November to December delivery quoted 45*l* 10s. A good business for January to April at 46*l*. Refined quoted 47*l* 10s. Foreign, 50*l* to 51*l*. Linseed oil is readily saleable, 35*l* to 35*l* 5s paid on the spot; for delivery in January to April, 1872, 34*l* 10s per ton paid.

Tallow.—Advices of early post and the short shipments from St Petersburg gave a firmer tone to the market last week. Since Friday the prices further advanced. At one time new Petersburg reached 50s 3d and 51s 3d March. Subsequently the market became weaker. This morning's quotations are as follows: Old, 48s 3d to 48s 6d; new, 49s to 49s 3d; March, 50s to 50s 3d per cwt.

POSTSCRIPT. Friday Evening.

Sugar.—The market has been firm. Sales of West India 75 casks; for the week, 3,471 casks. Jamaica by auction, 28s to 32s. 1,255 bags Mauritius went at 37s 6d to 39s for grainy white. 2,334 bags Bengal were chiefly taken in.

Coffee.—278 casks 95 barrels and bags plantation Ceylon went at full prices to some advance. 160 casks 623 cases 984 bags East India partly sold, including native and pale qualities, at 66s to 69s; fine colory plantation as high as 89s per cwt.

Tallow.—Petersburg dull. No change in town tallow. The sales of Australian were large, viz., 2,687 casks, and went 1s cheaper, about 900 casks finding buyers. Mutton, 47s to 49s 3d; inferior in proportion. Beef, 45s to 48s per cwt.

ADDITIONAL NOTICES.

Flax.—Market steady.

Hemp.—Market quiet for Russian. Manila firm, at full prices.

Tobacco.—There has been a moderate amount of activity in our market for North American tobacco, buyers having taken such as suited their purposes out of the last import, the sampling of which is now nearly completed. Prices continue firm, and holders show no disposition to submit to any reduction. In other growths there has been a fair inquiry.

Metals.—The business of the week has been very considerable. Copper has been in active demand, and large transactions have resulted, at advancing prices. In addition to a total advance of about 50s per ton on foreign brands, the English smelters have notified an advance of 2*l* per ton. Iron is in steady demand, at full prices. Tin has further advanced in price by about 30s per ton, and a good deal has been sold. Spelter is buoyant. Lead steady. Tin plates in active demand.

PROVISIONS.

Butter, Friesland, very indifferent in quality, prices ranging from 30s to 144s. Irish but little inquired for. Bacon stationary, at

63s 6d. Hams, brisk demand. Lard, prices remain unaltered. Sale very dull.

METROPOLITAN CATTLE MARKET.

MONDAY, Nov. 13.—The total imports of foreign stock into London last week amounted to 21,630 head. In the corresponding week in 1870, we received 15,789; in 1869, 11,021; in 1868, 6,129; and in 1867, 13,415 head.

A firm tone has pervaded the cattle trade to-day. Business of fair magnitude has been passing, and prices have ruled firm. The supply of beasts was not so large as on Monday last. The demand was steadier, and 2d per 8 lbs more money was obtained. The best Scots and crosses occasionally made 6s, but 5s 8d to 5s 10d per 8 lbs was the general top quotation. The show of sheep has been limited. The demand has not been active, but the trade has been firm, and prices have been well maintained. The best Downs and half-breds have been disposed of at 6s 10d to 7s per 8 lbs. Calves, the show of which has been moderate, have changed hands quietly, on former terms. Pigs have been steady, at late rates. The cattle show will be held on the 4th of December, and the annual Christmas market will be held on the following Monday,

SUPPLIES ON SALE.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 17.—The demand for home consumption continues fair, and prices of all useful kinds are well supported. The quantity of East India wool to be offered during next week will scarcely reach 10,000 bales, as so far only about 8,000 bales have arrived.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 17.—Wheat was in fair demand, at 1d per cental advance on Tuesday's rates. Flour had a slow sale. Indian corn was dull, at late rates. The market closed firm, with a fair attendance.

WAKEFIELD, Friday, Nov. 17.—Wheat was held firmly for the full rates of last Friday, but the business passing was not very extensive. Barley was in fair demand at late rates. Another report says:—There were short supplies, and a slightly improved condition imparts more tone to the wheat trade, and to-day there has been a fair demand at 1s advance on last Friday's rates. Fine barley was dearer, but other sorts met a slow sale.

The Gazette.

TUESDAY, Nov. 14.

BANKRUPTS.

Angus Hamilton, Pall Mall place, St James's.
Frances Anne Remmett, Queen's Gate terrace, Kensington, widow.
Henry Carter, Scarborough, cab proprietor.

DUNN'S "ESSENCE OF COFFEE," 1s and 2s a Bottle.

DUNN & HEWETT'S "BROMATINE," a Cocoa deprived of its superfluous Butter, 6d a Packet.

MANUFACTORY—PENTONVILLE, LONDON.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

FINE FLAVOURED STRONG BEEF

TEA at about 2½d a pint. Ask for LIEBIG COMPANY'S EXTRACT OF MEAT, requiring Baron Liebig the Inventor's Signature on every jar, being the only guarantee of genuineness.

DINNEFORD'S FLUID MAGNESIA.

—The medical profession for thirty years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion; and as the best mild aperient for delicate constitutions, especially adapted for ladies, children, and infants.

DINNEFORD and CO., Chemists, 172 New Bond street, London, and of all other chemists throughout the world.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER

TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage 1s 10d. Post-office orders to be made payable to John White, Post-office Piccadilly.

NEW PATENT

ELASTIC STOCKINGS, KNEE

CAPS, &c., for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS &c. They are porous, light in texture and inexpensive and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

THE LITERARY MACHINE

(patented), for holding the book, writing desk, lamp, meals, music, &c., in any position, and screening the face from the fire. As used by Princess Louise. Easily applied to a bed, sofa, or easy chair. Invaluable to invalids, students or aged persons. Admirably adapted for India. A most useful and elegant gift. Prices, 20s, 50s, and upwards; lamps, 8s and 17s 6d. Illustrated catalogues free.—J. Carter 55 Mortimer street, W.

MILNERS' STRONG HOLDFAST AND FIRE-RESISTING SAFES

(of Six Progressive Qualities and Prices, suitable for all amounts of risk), CHESTS, STRONG ROOMS AND DOORS with all the Latest Improvements. Effectually guarding against the novel modes of attack, as used by the Caseley gang in the Cornhill and other robberies (against which, no safe made before 1865 is secure), but which addition to Milners' succession of improvements during the last half-century constitutes their safes the strongest, and (quality considered) the cheapest safe-guard against fire and the modern burglar. Milners' Phœnix Safe Works, Liverpool, the most extensive and complete in the world. Depots: Liverpool, Manchester, Sheffield, Leeds, Hull; London depot, 47A Moorgate street, City, near the Bank of England. Circulars free by post.

HOLLOWAY'S PILLS.—NOTHING

Better.—With the shortening days and foggy atmospheres the human system will certainly be more or less deranged, and notably these invaluable pills exert a greater and more beneficial influence over loss of appetite, dyspepsia, bilious errors, irregularity of the bowels, and nervous disorders, than any other medicine. Their mode of action is thoroughly consonant with reason. They completely purify the blood, relieve both head and stomach of all faulty functions, and expel all oppressive accumulations from the bowels. With the blood purified, and all poisons purged from the system, regularity must prevail throughout the body, aches and pains must cease, healthful energy must supplant weariness, and the shaky nerves must regain their wholesome tone.

THE OCEAN, RAILWAY, AND GENERAL TRAVELLERS' ASSURANCE COMPANY (Limited).

To be incorporated under the Companies' Acts, 1862 and 1867, and the Life Assurance Companies' Act, 1870 and 1871.

Capital £200,000, in 40,000 shares of £5 each (of which upwards of 10,000 shares have already been privately subscribed, and deposits paid thereon). With power to increase. In two Series, viz.:—

Series A.—7,500 shares, to be fully paid up as follows:—£1 on Application, £1 10s on Allotment, and £2 10s two months afterwards. No further liability can arise on these shares, which may be represented by Warrants to Bearer, at the option of the holder.

Series B.—32,500 shares, on which is contemplated only £1 per share will be called up, viz.:—10s on Application and 10s on Allotment. The remaining £4 per share to constitute (in addition to the paid-up capital) a guarantee of the Company's engagements. The holders of this series will be entitled to a Preference Dividend or Bonus of £2 per cent. per annum on the amount uncalled before any division of profits in respect of the general capital, and, as to the £1 paid, will share with holders of series A pro rata.

OFFICE—Mansion House buildings, London.

ABRIDGED PROSPECTUS.

The purposes for which this Company is established are—the Assurance of Railway Passengers by the issue of policies for a single journey, or for stated periods, in the event of loss of life, or non-fatal injury.

The Assurance of passengers for over-sea voyages to and from all parts of the world.

The Assurance for the like voyages of professional mariners.

The Assurance against accidental death or personal injury from any cause.

The business of the Railway Passengers' Assurance Company extends only to insurance against railway and other accidents to life or limb, yet it has enjoyed for upwards of twenty years a continuous and progressive prosperity, and, in addition to paying very large and increasing dividends, has been enabled to accumulate a fund of treble the amount of its entire paid-up capital.

This Company will, instead of an Insurance Ticket, issue a regular Policy of Assurance, recording each transaction, so as to remove all difficulty of identification from loss of tickets.

The Company will also transact the business of insuring against accidents of all kinds, which has been found highly profitable, and has been largely adopted by the public, particularly by the professional, mercantile, and artisan classes.

One feature distinguishing this from ordinary life assurance companies is that it will take no risks extending over long periods; moreover, its actual position as to liability may at any time be minutely ascertained, and it seems only reasonable to anticipate that the shareholders will find in the Company not only a safe but a highly lucrative investment.

As it is expected that the profits of the undertaking will be very large, it is intended to give to insurers an interest in its success, by making such reductions in respect of premiums upon policies as may from time to time be justified by the increasing business of the Company.

A Contract has been entered into, dated the 14th day of November, 1871, and made between Mr Joseph Green, on behalf of the Company of the one part, and Mr Edward Neeves Hudson, of the other part. Copies of this Contract, and of the Memorandum and Articles of Association, may be seen at the Offices of the Solicitors of the Company.

Prospectuses and Forms of Applications for Shares of the respective classes may be obtained at the Bankers, Brokers, and Solicitors, and at the Office of the Company.

Should no allotment be made, the deposit will be returned in full.

London, 16th November, 1871.

THE OCEAN, RAILWAY, AND GENERAL TRAVELLERS' ASSURANCE COMPANY (Limited).—The SUBSCRIPTION LIST for this COMPANY will CLOSE on Wednesday, the 22nd of November inst.—By order,

JOSEPH GREEN, Sec. (pro. tem.)

Mansion House buildings, London, Nov. 16, 1871.

PROSPECTUS.

This Company is formed to purchase about 1,000 acres of valuable freehold land, situate in the parishes of Holt, Medbourne, and Bradley in Leicestershire, and about midway between the towns of Market Harborough and Uppingham, on the borders of Northamptonshire, and contiguous to the Medbourne Bridge Station on the Stamford and Rugby branch of the London and North-Western Railway, and to work, vend, and smelt the ironstone therein, and for smelting purposes to take powers to erect blast furnaces.

The estate consists of highly productive arable, pasture, and meadow land, with farmhouses, homesteads, and buildings, and is let to responsible tenants, at a rental of about £2,000 per annum, which may be increased by the erection of dwellings for the labour of the district.

The geological position of the estate is in the Oolitic formation, in which are the Northamptonshire beds of ironstone; and the beds of ironstone in this property are calculated by a high authority (Mr John Roseby), as per annexed report, to contain more than 16 millions of tons, which is equal to a vend of 300,000 tons of ore per annum for 54 years. It is important to notice that, after the removal of the ironstone and replacement of the top soil, the surface can be restored for cultivation.

The ore contains 33 to 40 per cent. of metallic iron of good quality, and the result in practical operation, as is shown in the report of Mr Gjers, who is one of the highest authorities on the manufacture of pig iron, is equal to one ton of iron from rather less than 2¾ tons of ore, being a higher percentage than the Cleveland ores.

Large quantities of this class of ore are vended into Staffordshire, Derbyshire, and South Wales, where it meets with a ready and increasing market.

Upon the estate are also large beds of gravel; sand for the preparation of pig-iron beds; and a superior brick-earth.

It is estimated that the expenses of laying out the ironstone beds for an out-put of 300,000 tons yearly will not exceed £6,000, and that the cost of working and delivering into trucks will not average more than 1s per ton, as the ore is obtainable chiefly by quarrying, and can be opened out sufficiently in three months to deliver this quantity.

It is proposed to vend 150,000 tons, and also to smelt 150,000 tons of ore per annum, subject to such deviations as circumstances may render desirable.

The selling price of the ore in Staffordshire is 6s 6d to 7s a ton, and the total cost (calculated at 4s 1d delivered there), would leave a profit of 2s to 2s 6d per ton

According to the accompanying report, the cost of producing pig-iron from the ore on the spot will not exceed 30s per ton, as the ore can be delivered into the proposed blast furnaces at a less cost than can now be done into any furnaces in the Kingdom, namely, at about 3s per ton of iron produced. Taking the price of pig-iron at only 45s (instead of 55s as now ruling), it will yield a profit of 15s a ton, and by smelting a portion of the ore on the property much more advantageous railway rates may be obtained, owing to the return freights.

The nett profits as estimated would be as follows, viz.:—

From vending 150,000 tons of ore, at 2s a ton profit	£15,000
From smelting 150,000 tons to 50,000 tons iron at 15s.....	37,500
From rentals of land, &c., estimated at.....	2,000
Total	£54,500

which is equal to a profit of 30 per cent. per annum upon the proposed paid-up capital, and it is a novel and important feature in this company that the value of the freehold estate for agricultural purposes is equal to about one-half the purchase money.

This class of investment has been hitherto but little known to the general public, because local ironmasters have, for the most part, monopolised the enormous profits resulting from iron-stone undertakings, but several limited companies which have taken up this branch of industry are paying dividends ranging from 15 to 25 per cent., which proves the very lucrative nature of this description of industrial enterprise.

Mr Robert Hunt, F.R.S., of the "Mining Record" office, states that the out-put of iron ore in 1869 had increased to 11¼ millions of tons, of the value of £3,732,560, the quantity being more by 1,340,000 tons than in 1868. This amount was largely exceeded in 1870, and has been much more increased in the present year.

According to the Board of Trade Returns, the exports of iron and iron manufactures for the ten months of the present year reached the enormous total of 31½ millions sterling!

The demand for first-class iron ores of all kinds exceeds the supply, and prices have advanced accordingly; and never before has there been such an impetus given to ironstone mining. The demand for pig iron is altogether unprecedented. Makers are, in many instances, over-sold, and there is no probability of other than a great expansion of business in the iron trade.

An agreement has been entered into for the purchase of this property for the sum of £110,000 in cash, and £28,000 in fully paid-up shares, the price of which is twopence per ton for the ironstone, exclusive of the agricultural value and the lower Ironstone bed.

An offer has recently been made by one of the largest rail-makers in the country for 50,000 tons of pig iron to be made from this ore, at 45s per ton.

Arrangements have also been made for obtaining a perpetual way leave from the property to the London and North-Western Railway, the terms of payment for which are provided in the contract specified below.

A Contract, dated the 30th day of October, 1871, and made between Edwin Gerard of the one part, and William Byrom Fox and Frederick Williams, of the other part, has been entered into, and a copy thereof and of the Plans annexed thereto may, together with a copy of the Memorandum and Articles of Association, be seen at the Offices of Messrs Merriman and Pike, Solicitors Library Chambers, Blomfield street, Finsbury Circus, London; and the original Contract and Plans annexed thereto may, together with a copy of the Memorandum and Articles of Association, be seen at the Offices of Messrs Partington and Allen, Solicitors, Town Hall buildings, King street, Manchester.

The Directors invite a careful perusal of the accompanying reports.

Copy Report of Mr Gjers, of the Firm of Gjers, Mills, and Co., "Ayrsome Iron Works," Middlesborough.

Middlesborough-on-Tees, 5th August, 1871.

Gentlemen,—In reply to yours asking me to give you my experience of the "Nevill Holt" iron ore, I can only say that having gone over the estate and examined the bed, there is no doubt of its existing in very large quantities, and that it could be cheaply worked and easily opened out at a comparatively small outlay. The ore is in the Northampton bed, and it may be considered in practice, without much sorting, to contain 33 per cent. of iron; that is, it would take about three tons of ore to make one ton of iron. The quantity of nearly 200 tons which I superintended the smelting of at Claycross came out at about 37 per cent., but this was probably more carefully sorted than would be necessary in practice if the ore was smelted on the spot. The quality of the iron from it may be considered similar to that smelted from Northamptonshire ores, and is, more particularly, a useful iron for foundry purposes. About the probable quantity of ore on the estate, and the actual cost of getting, I would prefer you to consult a mining engineer.—Yours truly,

(Signed JOHN GJERS.

Copy Report of Mr John Roseby, Mining Engineer and Mining Surveyor, Engineer to the Frodingham Ironstone Properties.

Haverholme House, near Brigg, Lincolnshire, 30th September, 1871.

Gentlemen,—I have carefully examined the property set forth in the schedule and plan hereto attached, situate in the parishes of Holt, Medbourne, and Bradley, about six miles from Market Harboro', in the county of Leicester, and containing about 1,000 acres, and now beg to lay before you my views as to the geological position of the property and the ironstone to be found therein.

First,—As to the geological position. The strata found to exist immediately below the surface are known as the Lower Oolite, in which the Northampton beds of ironstone exist; below this is found the lias and marlstone, in which the Cleveland and North Lincolnshire beds of ironstone are found. The first of these beds forms the surface of a considerable area of this estate, and is known as the Northamptonshire bed of ironstone; below this is a series of blue shale beds for a depth of 35 yards, where the top Cleveland bed may be found. The third bed of ironstone will be found about 30 or 40 yards below the top Cleveland bed.

Secondly,—With regard to the first of these series of ironstone beds, or that known as the Northampton bed it is found to crop to the surface in various parts of the estate, and forms the surface with a thin covering of soil over a considerable area. It is variable in thickness. It has been opened and worked by open quarry, and many thousands of tons have been sent into Staffordshire and sold to various ironmasters, who speak in favourable terms as to its quality and character. In fact the price realised for the stone in Staffordshire is a proof that it is favourably received.

The average thickness of this bed of ironstone may be safely taken at 15 feet over an area of about 340 acres of this property, and will produce a gross total of nine millions (9,000,000) tons of ironstone.

The second, or No. 2 bed of ironstone, known as the Cleveland top bed, will be found about 4 feet 6 inches in thickness, and will be obtained by mining. This bed will be found to exist under at least 800 acres of this property, and will produce a gross total of seven million two hundred thousand (7,200,000) tons of ironstone.

The third, or Main Cleveland, or North Lincolnshire bed of ironstone, will be found to extend under the whole of the estate. This bed has not been worked in any part of Leicestershire or Northamptonshire, although it is exposed at the surface at various points in both counties and also in Rutlandshire, but at places where it is not accessible either by water or rail. I estimate that this bed will yield (after allowing for loss by mining) 20,000 tons per acre. But to leave this bed entirely out of calculation and to deal with the first two beds, we have a gross total of sixteen million two hundred thousand (16,200,000) tons of ironstone, which is equal to a vend of three hundred thousand (300,000) tons per annum for a term of fifty-four (54) years.

Large quantities of this ore are vended into Staffordshire, Derbyshire, and South Wales, where it meets with a ready market, and is at present in great demand through the whole of these districts.

I estimate that the expense in laying out these mines for working and vending three hundred thousand (300,000) tons of this stone per annum would not exceed six thousand (£6,000) pounds, since for laying down the necessary tramways, as shown on plan attached, all the necessary foundations, cuttings, and bridges are completed, and railway formations constructed. I estimate that the cost of working these two beds of ironstone and delivering the ore into trucks will not exceed one shilling (1s) per ton on the average; but assuming the average cost to be one shilling and four pence (1s 4d) per ton into railway trucks, the cost of transit to various parts of Staffordshire may be taken at an average of 2s 9d per ton, and waggon hire 6d per ton. The selling price is at present not less than 6s 9d in Staffordshire, so that a clear profit of two shillings and two pence per ton may be realised on the sale of ironstone.

By smelting a portion of the stone on the place an additional profit can be realised, as the iron ore can be put into the furnaces from this property at less cost than in any place where pig iron is at present made. In fact there is no doubt that pig iron can be made here at 30s per ton, and at the low price of 45s per ton 15s per ton profit can be realised. You would also have an advantage in railway rates by having a back carriage in coal or coke from Staffordshire or Derbyshire.

I estimate that by the sale of

	£
150,000 tons of ironstone at 2s per ton instead of 2s 2d equals	15,000
150,000 tons of stone smelted on the property, producing 50,000 tons pig iron, at 15s per ton profit	37,500
Thus leaving a clear profit of ...	52,500 per annum.

I am, gentlemen, your obedient servant.

JOHN ROSEBY.

Prospectuses and forms of application for shares may be had from the Bankers, Solicitors, Brokers, and also from Frederick Williams, Esq., at the Offices of the Company, No. 75 Mark lane, London, and from whom all further information can be obtained.

75 Mark lane, London, November 18, 1871.

FORM OF APPLICATION FOR SHARES.

(To be retained by the Bankers.)

To the Directors of the Leicestershire Ironstone and Smelting Company (Limited).

Gentlemen,—Having paid to the credit of the Company, at your Bankers, the sum of pounds, being £1 per share on my application for shares of £10 each in your Company, I request you to allot to me that or any less number of the said shares. And I hereby agree to accept the same, and to pay the balance in respect thereof, and to be registered as a member of the Company, in terms of the articles of association of the Company.

Name (in full) .....
Address .....
Profession (if any) .....
Date .....
(Signature) .....

(Addition to be signed by applicant desiring to pay up all the instalments on allotment.)

I desire to pay up my subscription in full on allotment, thereby entitling me to priority with allotments, and to rank at once for dividends on the amount paid up.

(Signature) .. .. ..

ADHESIVE STAMPS.—BILLS OF EXCHANGE.

THE BOARD OF INLAND REVENUE give notice, that they will shortly issue to the public adhesive stamps for denoting the ad valorem duties payable on bills of exchange drawn out of the United Kingdom, of a different colour to those now in use. The colour of the stamps for the various rates of duty in shillings will be green instead of purple, and those for the duties in pounds will be purple instead of green.

The alteration, which is limited to these two series, will not interfere with the continued use of the present stamps.—By order of the Board,

WM. LOMAS, Secretary.

Inland Revenue, Somerset House, 14th November, 1871.

INDIA OFFICE, 11th November, 1871.

WITH REFERENCE TO THE advertisements from this Office, dated the 16th September last and 20th ultimo, relative to the discharge in India on the 16th January, 1872, of the Loan commonly known there as the New Five per Cent. Loan of 1856-57, the Secretary of State for India in Council publishes for general information the following notification, which has been issued by the Government of India, and published in the GAZETTE OF INDIA Extraordinary of the 16th October, 1871.

M. E. GRANT DUFF.

No. 4134.

GOVERNMENT OF INDIA.

FINANCIAL DEPARTMENT.

NOTIFICATION.

Accounts.

Simla, the 16th October, 1871.

His Excellency the Right Honourable the Viceroy and Governor-General in Council is pleased to give notice of the discharge of the Five per Cent. Loan of the 28th February, 1857, raised by the Government of India, in pursuance of advertisement in the CALCUTTA GAZETTE of the 16th January, 1857, to which additions or transfers have been made under subsequent notifications, the Loan being commonly known as the New Five per Cent. Loan of 1856-57.

2. All outstanding notes of the above Loan will be paid off in cash, together with interest due upon them, at the General Treasury of Fort William, on the 16th of January, 1872, on and from which date all further interest upon them shall cease.

3. Holders of stock are referred to the notification published in the several Government Gazettes Extraordinary of the 16th September last for particulars respecting the option of transfer offered by Government, with certain limitations, into a new stock created for that purpose.

Published by order of His Excellency the Governor-General in Council.

(Signed) R. B. CHAPMAN,

Secretary to the Government of India.

GLASGOW, COATBRIDGE, AND AIRDRIE TRAMWAYS COMPANY.

To be incorporated by Special Act of Parliament, the liability of the shareholders being limited to the amount of their shares.

Capital, £100,000, in 10,000 shares of £10 each.

Deposit, £1 per share on application and £1 on allotment, and the remainder by calls not exceeding £1 per share, and at intervals of not less than three months between each call.

If no allotment is made the deposit will be returned in full.

PROVISIONAL DIRECTORS.

BANKERS.

The National Bank of Scotland, Glasgow and Edinburgh; Branches in Scotland, and 37 Nicholas lane, Lombard street, London, E.C.

TEMPORARY OFFICES—63 Bath street, Glasgow.

PROSPECTUS.

This Company is proposed to be incorporated with the view of obtaining the necessary Parliamentary authority to construct and work tramways, commencing by a junction with the authorised "Glasgow Street Tramways," at a suitable point near "Parkhead," and passing through "Shettleston," "Barrachnie," "Baillieston," "Langloan," and "Coatbridge" to "Airdrie," being a distance of about ten miles.

It is also proposed to obtain powers to construct branch tramways from the main line, so as to establish tramway connections with the public railways and the various public works, &c., in the district and on the Clyde, thus enabling waggons to run direct along the railway and tramway system, and from work to work.

The district has long been known as one of the great centres of iron production and manufacture, and as a focus of railway communication to all parts of the country.

The population along the line of proposed tramways may be moderately estimated at 100,000, and is rapidly increasing.

There is a large traffic in goods and minerals capable of being developed by the tramways, which offer a cheap, speedy, and easy mode of conveyance, and it is expected that these will prove feeders to the railway system, and also carry a considerable portion of the goods and minerals, for which the present railway and canal communication is neither convenient nor adequate.

The tramways will place the ironworks and mineral fields of the district in direct communication with most of the public works throughout the City of Glasgow, and the various shipbuilding yards on the Clyde. As is well known, scarcely any of the shipbuilding yards have any communication with the existing system of railways, so that the tramways will necessarily command a great portion of the traffic between them and the ironworks of the district.

Tramways have now been successfully used for several years both in this country and on the Continent of Europe, as well as in America and Canada. There is no prejudicial interference with the streets and roads, as carriages and other conveyances can cross and re-cross the rails without inconvenience.

The district is remarkably well suited for tramways. The roads are wide and regular, and the gradients are unobjectionable, so that the traffic can be worked very economically.

The adoption of the grooved rail, which is laid flush with the road, has removed the objections which formerly existed to the general formation of tramways.

By the system of brakes employed, the tramway carriages can be stopped, while running, within the distance of their own length.

The difference in the question of working expenses between tramways and omnibuses is much in favour of tramways, the average in the case of a tramway being about 60 per cent., while omnibuses can only be worked at a much higher percentage.

Tramway companies recently started in this country, where the traffic has been almost exclusively passengers, have proved very successful; and, looking to the field proposed to be occupied by this Company, where there is a large traffic in goods and minerals, as also passengers, the Directors are satisfied that this is an undertaking of unusual promise.

It is estimated that the proposed capital will suffice for the construction and equipment of a double line of main tramways, and branches of single line.

Forms of application for shares, and sketch plan, showing the proposed main line of tramways, may be obtained at the Temporary Offices of the Company, or from the Brokers and Bankers of the Company.

NORTH MONKLAND RAILWAY.

LENGTH, 12 MILES.

Capital, £75,000, in Shares of £10 each.

With the usual borrowing powers.

10s to be paid on application, £1 10s on allotment, and the balance as required, in instalments of £1 per share. Three months' notice to be given before each call is made.

Liability of Shareholders limited to the amount of their Shares.

BROKERS.

Glasgow—Messrs Keir, Anderson, and Co., 132 St Vincent street.
Edinburgh—Mr William Bell, North St David street.
London—Messrs Massey and Waithman, 3 Austinfriars.

PROSPECTUS.

This Company is formed for the purpose of affording railway facilities to the North-Eastern portion of the parishes of Old and New Monkland, in the county of Lanark. The proposed railway will start from the Red Bridge, near Kipps, on the North British Railway, a short distance North-East of Coatbridge, and will run in a North-Eastern direction to near the town of Slamannan, where it will form a junction with the North British Railway. It is also proposed to make a connecting loop line to the Castlecarry branch of the Caledonian Railway. The proposed lines will give a short and direct route to the South and West, via the North British Railway, to the College Station of the Union Railway in Glasgow, also by the North British Railway to the East, and to the North by the Caledonian Railway.

The district abounds in the minerals known as the lower seams of the Monkland section, which consists of the Virtuewell, the Kiltongue, and the Drumgray coals; the Musselband and Slatyband ironstone; limestone, shales, freestone, large deposits of the sandstone used in the manufacture of glass, and fire-clay of the best description.

Various collieries and oilworks are at present in operation, but these are limited from the want of railway facilities. This Company will accommodate these works, as well as those that will be erected when the numerous fields now lying dormant are opened up. The following is a list of the principal fields, with the proprietors' and lessees' names (where let), and the probable output of coal from each:—

Name of Field.	Proprietor.	Lessee.	Estimated Output per Day.
			tons.
Cromlet	Mrs Waddell.	Jackson.	100
Palace	Mrs Waddell.	Unlet.	100
Drylat	Mr Colquhoun.	Unlet.	50
Nettlehole	Mr Colquhoun	Smith.	150
Stand	Col. Gerard.	Unlet.	100
Drumshangie Moss	Col. Gerard.	Ross.	30
Drumshangie.....	Col. Gerard.	Law.	100
Riggend	Mr Rankin.	Napier.	30
Wattston.....	Mr Watt.	Unlet.	30
Drumgray	Mr Rankin.	Unlet.	100
Blacktongue	Col. Buchanan.	Unlet.	100
Bogiea	Col. Buchanan.	Unlet.	100
Loanhead	Mr Black.	Robinson.	50
Glentore	Mr M'Kenzie.	Unlet.	100
Langdales	Mr Rankin.	Rankin.	200
Luckenburn	Col. Buchanan.	Forrester.	100
Todsburghts	Col. Buchanan.	Forrester.	100
Short Eggshead ..	Mr Marshall.	Forrester.	50
Drumriggend	Mr Arthur.	Unlet.	30

Which shows that a large, steady, and continuous income will accrue from the carriage of coal alone. The coals of this district are well known to be of very superior quality. They are used for smithy, steam, and household purposes, and command the highest price in all the markets.

It is proposed in the meantime to lay a single line of rails, but land will be taken for a double line. The works are of the simplest character, and the strictest economy will be exercised in their construction consistent with the formation of a substantial permanent way. The gradients are very favourable over the whole length of the line. An estimate made of the cost of construction shows that the line can be formed considerably under the proposed capital.

The land owned by the principal proprietors, which comprises about nine-tenths of the whole, is offered at thirty years' purchase of the present agricultural rental, on the understanding that they are paid in the stock of the Company.

PROBABLE TRAFFIC.—The above statement, got from the mineral lessees and other gentlemen well acquainted with the district, and with mining, gives a daily output of coal alone of 1,620 tons, this multiplied by 240 (colliers' working days), yields 388,800 tons per annum of coal. Other minerals and oil are moderately estimated to yield 100,000 tons per annum. These, taken at the moderate average rate of 8d per ton, give a very large margin of profit.

WORKING EXPENSES.—From the close proximity of the various mineral fields over the whole length of the line, the magnitude of the traffic, and the low cost at which coal traffic can be wrought, it is confidently assumed that the line will be easily worked at 40% of the gross receipts.

	£	s	d
388,800 tons of coal 8d	12,960	0	0
100,000 tons oil and other minerals 8d	3,333	0	0
	16,293	0	0
Allowing 40% for working expenses	6,517	0	0
Leaving a balance of profit amounting to.....	9,776	0	0

Which on the capital of £75,000 shows a return of over 13%.

Applications for shares, accompanied by the Banker's receipt for deposit of Ten Shillings per share, will be received by the Bankers, Brokers, and the Secretary of the Company.

In the allotment of the shares the Directors reserve to themselves full liberty in the selection of allottees, and of the number of shares to be allotted to each person, their desire being to place the shares in the hands of bona fide investors.

In case no allotment of shares be made, the amount paid on deposit will be returned without deduction.

LOAN OF £10,000.

The Guardians of the East Preston Union, in the county of Sussex, invite TENDERS for a LOAN of the above amount, to be secured on Mortgage of the Poor-rates of the Union, and repayable in 30 annual instalments.

The Guardians would prefer to take the money in instalments, not to exceed 5, completing the Loan within the next 12 months.

Persons tendering must state rate of interest required, and all other terms, and every Tender must be sealed up, endorsed "Tender for Loan," and sent to the undersigned on or before the 5th day of January next.

The Guardians do not bind themselves to accept the lowest or any Tender.

ROBERT FRENCH, Clerk to the Guardians.

THE I. X. L. GOLD AND SILVER MINING COMPANY (Limited).

Notice is hereby given, that the SHARE LIST of this Company will CLOSE for London and the Country on THURSDAY, 23rd inst.—By order,

W. A. M. BROWNE, Secretary.

114 Palmerston buildings, Old Broad street, E.C.

THE SOUTH OF ENGLAND OYSTER COMPANY (Limited).

Mr ALBERT RICARDO, 11 Angel court, is PREPARED to RECEIVE APPLICATIONS for the remainder of the 4,000 10 PER CENT. PREFERENTIAL SHARES at £5 each, to be paid by four instalments, with the right to participate equally with the Ordinary Shares in every Dividend that may be declared.

CIENFUEGOS AND VILLA CLARA (CUBA) RAILROAD.—SEVEN PER CENT. LOAN

for £90,000 Sterling.—The Half-Yearly INTEREST on the above Bonds, due on the 1st December, will be PAID on that day and any succeeding day, at the Counting-house of Messrs J. Henry Schroder and Co., 145 Leadenhall street, between the hours of Eleven and Two o'clock. The Coupons must be left for examination two clear days before applying for payment.

London, Nov. 16, 1871.

THE NANTYGLO AND BLAINA IRONWORKS COMPANY (Limited).

Notice is hereby given, that the FIRST ORDINARY GENERAL MEETING of the Company will be HELD at the Terminus Hotel, Cannon street, in the City of London, on SATURDAY, the 25th day of November, at Twelve o'clock noon.—By order of the Board,

JOHN ROBERTS, Secretary.

The London Agency grants Drafts and Letters of Credit, and purchases or collects Bills payable at the above-named places.

The Agency will conduct banking business of every description with the Continent, India, China, &c., &c., &c. upon terms to be ascertained at the Office.

ISSUE OF 2,800 FIRST MORTGAGE DEBENTURES OF £25 EACH, BEARING INTEREST EQUIVALENT TO 15 PER CENT. PER ANNUM, PAYABLE TO BEARER,

Secured on the whole of the Property of the

ESPINOSENA SILVER MINING COMPANY, LIMITED.

Each Debenture will bear Interest at the rate of 7½ per cent., and will entitle the subscriber to five fully paid up Shares of £5 each of the Company, as a bonus, which Shares will be entitled to a preferential dividend of 7½ per cent. until the Debentures shall have been paid off, making together 15 per cent. on the capital subscribed.

Price of Issue—Par, or £25 per Debenture,

Redeemable by Yearly Payments in numerical order at Par, or £25 per Debenture.

The 14,000 Shares to be allotted with the Debentures form part of 26,000 Shares constituting the Share Capital of the Company, which will be entitled to receive dividends limited to 7½ per cent. per annum until all the Debentures are redeemed, when the whole of the profits will be divided among the Shareholders.

TRUSTEES.

William Gordon Thomson, Esq. | Captain James Rennie, C.B.

DIRECTORS.

John Brown, Esq., Gresham place and Woodford, Essex.
W. R. A. Boyle, Esq., Kensington, W.
Captain Felix Jones, F.R.G.S. (late Her Britannic Majesty's Political Resident in the Persian Gulf), Fernside, Upper Norwood.
Charles Mackay, Esq., LL.D., Ferndell, Mickelham.
Sir Thomas Parkyns, Bart., 9 Gloucester square, W.
James Wyld, Esq., Charing cross, S.W.

CONSULTING ENGINEER—Professor Price, M.E., San Francisco.

AGENTS AT SWANSEA—Messrs Townshend, Wood, and Co.

BANKERS—The Imperial Bank (Limited), Lothbury, E.C.

BROKER—Coleridge Allsop, Esq., 76 Old Broad street, E.C.

AUDITORS.

Geo. Whiffin, Esq., Public Accountant, 8 Old Jewry, E.C. | Messrs Buffen and Chandler, Public Accountants, Coleman street, E.C.

SOLICITORS—Messrs Lawrence, Hardwick, and Holmes, Mitre chambers, 157 Fenchurch street.

SECRETARY (PRO TEM.)—G. Hewlett Potts, Esq.

OFFICES—Ethelburga House, 70 Bishopsgate street, E.C.

The Directors of the Espinosena Silver Mining Company (Limited), are prepared to receive applications for 2,800 first mortgage debentures of £25 each, payable to bearer, to be secured by a first mortgage on the rich and valuable mines named "Espinosena," Salaguena., and "Damasias," situated at San Antonio, Lower California, Mexico, and on the whole plant and effects of the Company.

15th November, 1871.

The price of issue of the debentures now offered for subscription, is par, namely, £25 for each debenture, payable as follows:—

£1	on each debenture,	payable	on	application.
£2	„	„	„	allotment.
£5	„	„	„	1st January, 1872.
£8	„	„	„	1st February, 1872.
£9	„	„	„	1st March, 1872.

The debentures will carry interest at 7½ per cent. per annum, commencing from 1st November, 1871, which will be payable out of profits of the Company, and after such payment, 7½ per cent. will be paid as a preference dividend on the ordinary shares allotted with the debentures; then 7½ per cent. on the shares given in payment to the vendor. The surplus capital will be appropriated annually towards the redemption of the debentures until the whole shall have been redeemed in numerical order. When a debenture shall have been paid, the preferential dividend will cease, and the shares allotted with it will then rank with those of the vendor until all the debentures are redeemed, then the profits accruing from the mines will be divided among all the shareholders pro rata to their holdings.

The debenture holders become, by this means, shareholders entitled to all the benefits and advantages of ordinary shareholders; and, until the debentures are redeemed, will have a prior lien on the property of the Company, secured by a first mortgage.

A meeting of the allottees will be convened as soon after allotment as possible, for the purpose of drawing the debentures, which will be redeemed annually in numerical order at par, or £25 per debenture.

It is anticipated that the whole of the debentures will be paid off within four years.

Thirty thousand pounds of the capital to be raised will form part of the property of the Company, and will be applied in erecting machinery for concentrating the ores, and developing the mines as recommended by the Engineers.

The property to be conveyed in trust by mortgage deed consists of—

The Espinosena Silver Mine .....)
The Salaguena do. do. ..... } 3,800 lineal ft by 400 ft.
The Damasias do. do. .....)

The buildings, machinery, plant, and ores on hand.

Captain McNab in his report states that there are 2,000 tons of rich ore now in view, valued by him at £40,000, which can be brought to market immediately; and he estimates the ores to be raised, when the shaft is sunk and adit driven, at 150,000 tons, valued at £14 per ton, equal to £2,100,000.

The share capital of the company consists of 26,000 fully paid-up shares of £5 each, 14,000 of which have been reserved for the holders of the debentures, and the remainder will be appropriated in part payment of the purchase money. The shares will be entitled to receive dividends as above-mentioned out of profits up to 7½ per cent. per annum, until the debentures are wholly redeemed, and when this is effected, the whole of the profits will belong to and be divided among the shareholders.

No portion of the purchase money will be paid until the Company is in the possession of the property.

The Articles of Association, Deeds of Trust, and Purchase Agreement, together with the plans and sections of mines, may be seen at the Offices of the Company, where prospectuses, Engineer's Report, and forms of application, may also be obtained.

Applications for debentures to be addressed to the Secretary, Bankers, and Brokers of the Company on the accompanying form.

This Company is formed for the purpose of purchasing and extending the workings of the rich and valuable silver mines called "Espinosena," "Salaguena," and "Damasias," situated at San Antonio, Lower California, Mexico. From the engineer's reports and statements it will be seen that these mines are in the immediate neighbourhood of other mines, which are as rich in silver as any in the world, and are on the same lodes.

That an engine-shaft has been sunk at Espinosena to the depth of 160 feet, and several levels driven, from which about 2,000 tons of silver-ore have been raised, producing from 25 to 300 oz of silver per ton.

That there are three well defined lodes at Espinosena and one at Salaguena, known as true fissure veins, increasing in richness as depth is attained.

That the measured ore in the mine is 2,000 tons, of the value of £29 per ton, and when the deep adit, which will take only six months to drive, is completed, it is estimated that at least 150,000 tons of ore will be available.

The property is held in perpetuity direct from the Mexican Government, and is free of all rates, rents, or royalties; it extends over 3,800 lineal feet along several lodes of silver ore, and is within 20 miles of the shipping port of Vantana Bay, to which there is a good road.

Owing to the nature of the ores, the proprietors, at the recommendation of Professor Price, of San Francisco, made shipments to Messrs Townshend, Wood, and Co., of Swansea.

The following is a copy of Messrs Townshend, Wood, and Co's account sales:—

"Swansea, 24th Oct., 1870.

"Particulars of consignments of silver ore from the Espinosena Mine; shipped at San Francisco to Messrs Townshend, Wood, and Co., Swansea.

(Signed) TOWNSHEND, WOOD, and CO.

Professor Price writes Messrs Townshend, Wood, and Co.:—

"Of the true value of the mine I have only to refer you to the shipments I have made to you, and in addition to the above, some 25 tons were shipped by another house, which average some 120 ounces of silver; and 21 tons were worked by the Pacific Metallurgical Works of this city, it averaged 303 ounces of silver per ton; of course this was well selected, and was from the surface of the lode. The out-croppings are generally very rich. I have myself assayed specimens from the surface of the Espinosena lode assaying 2,000 ounces of silver per ton."

On another occasion he says:—

"That the mine is of immense value, surpassing anything he knows."

The above extracts are correct and furnished by us,—TOWNSHEND, WOOD, & Co.

Professor Price appointed Mr W. V. Robarts, an English mining engineer, resident in that country, to examine and report on the mines. These reports are unopened, also reports by Captain McNab, a mining engineer of repute in California, and Mr J. J. Corrigan, who is now in England who endorse all the statements made by Mr Robarts as to the value of the mines.

Mr Robarts and Captain McNab in their reports recommend that an adit should be driven, as represented in the section, to cut the lodes that are now being worked, and the engine shaft sunk to the depth of 500 feet; also that storehouses be provided at Vantana Bay, and machinery erected near the mines to concentrate the ores. He estimates the cost of these at £10,000, and advises that a working capital of not less than £10,000 be provided. With these amounts he states he will be enabled to ship monthly, when the adit is completed, not less than 500 tons of ore, that will realise an average price of £30 per ton at Swansea, whilst the cost including freight will not exceed £11 per ton. At Vantana Bay there is a good and safe harbour, good anchorage, and sufficient depth of water, even at low tide, for vessels of the largest class to ride within easy distance of the shore.

The mines are so situated that they will be drained without pumping, the country is well wooded, and labour cheap and plentiful.

The price to be paid for the mines, buildings, machinery, tools, &c., as well as ores and lands, will be £100,000, to be paid as follows:—£60,000 in shares fully paid-up and £40,000 in debentures or cash at the option of the Board of Directors, but no portion of the purchase money will be paid until the Company is in possession of the property.

According to the estimate made by Mr Robarts dividends at the rate of not less than 50 per cent. per annum must be returned to the shareholders.

The preliminary expenses up to allotment will be paid by the vendor.

The following are the particulars of the only agreement entered into by the Company (published pursuant to the Companies' Act, 1867, s. c. 39).

Date of the agreement—25th October, 1871.

Names of the parties to the agreement—Isaac E. Davis, by H. M. Ommanney his attorney, of the one part, and George Hewlett Potts, on behalf of the Company of the other part.

Registered at the General Post Office as a Newspaper and for Transmission Abroad.

This day is Published, No. XI., New Series, Price 8d and 8½d,

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL for November gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains

A FINANCIAL RECORD OF THE MONTH;

New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to November 22.

Advertisements for the next Number, to be published on December 30, must be sent, to insure insertion, on or before December 28.

The December Number of the INVESTOR'S MONTHLY MANUAL will give, in addition to the usual information, the Highest and Lowest Prices of all Stocks and Shares for the last Three Years, the latest quotations for 1870 (so as to indicate the Exact Movement during the Twelve Months), a Complete Directory, the names of the Markets where each Security is chiefly dealt in, a Financial History of the Year 1871 (including a Tabulated Chronicle of Events), besides Memoranda relating to the Financial Position of Foreign and Colonial Governments, to Railways, &c., &c. A copious Index will be added for purposes of reference.

This Double Number will be published on Saturday, the 30th of December.

OFFICE—340 Strand.

THE PAYMENTS TO GERMANY.

The large monetary operation of which we have spoken is now beginning. 2,000,000*l* of bills are due to-day, and are in the hands of the German Government, and about 5,000,000*l* more are becoming due within a moderate period. What the German Government will do with the money we do not know, or when they will require it to be paid; but what is certain is, that they have the *command* of this very large sum, and can, if they choose, at any moment withdraw it from us.

The wisdom of the course taken by the Bank in raising its rate of discount, and the necessity of making due provision for the large requirement, is now evident. We now have 14,720,000*l* of reserve in the banking department, but on the 11th of Oct., when the Bank rate was raised to 5 per cent., the reserve was only 8,064,000*l*. We now have a sufficient reserve, and we then had an insufficient. The success of the precautionary measures of the Bank has indeed been so complete that, in some quarters, it is contended that no such precautions were required. But practical men will not listen much to this. They hold that persons under large and imminent liabilities must themselves provide against those liabilities, and not throw that duty on other people. And it is obvious that the Bank of England would have been justly and severely blamed if they had taken no precaution, and if, in consequence of the default of others, they had been found with but a small reserve in the face of a liability so large and so peculiar.

THE DANGER TO WHICH THE BANK OF FRANCE IS EXPOSED.

We showed some time since that the stability which the Bank of France had shown during the German invasion and during the Commune was marvellous. It emerged from those calamities in a condition which many banks would have considered reasonably good for common times. It had 22,000,000*l* as a reserve in specie, and that reserve amounted to about $\frac{1}{6}$th of the liabilities, and considering that the Bank of England only holds about that amount of bullion now, and that the banking liabilities of England, all which rest solely on the reserve in the Bank of England, are immensely greater than those of France, it is plain that the banking condition of France when she emerged from her greatest difficulties was one which may fairly be said to be, for the circumstances, excellent. Nor is the state of the Bank of France, as exhibited by this week's account, in itself to be considered as exceedingly alarming.

The liabilities are :—

	£
Notes and drafts in circulation	92,438,000
Public deposits	6,234,000
Private deposits	14,934,000
	113,606,000

And the Bank has a specie reserve of 25,372,000*l*, besides having set aside a special sum of more than 1,000,000*l* for the expected losses by bills discounted which were returned during the invasion, and which now will never be paid in full. But though this state of affairs is in many respects not unsatisfactory, a most serious danger threatens the Bank. The circulation has increased with great rapidity—

	£
It was on 30th June, 1870.....	59,588,000
— 23rd Nov., 1871	92,438,000
Increase	32,850,000

ing in the circumstances of that time. During the war it was natural that coin should be hoarded; it was almost inevitable that specie payments should be suspended; it was certain that banknotes would be wanted to take the place of the specie which was hoarded, and would indeed be hoarded themselves. But what is not natural is that since the war that circulation should still be undiminished. The coin hoarded on account of the war ought now to be resuming its place in common use and dealing; the banknote circulation temporarily required by calamitous circumstances ought to be unnecessary, and to be withdrawn, now that those circumstances are at end.

Nor is this all. At the conclusion of the war the notes of the Bank of France were at par; they passed equally with gold. M. Thiers even went so far as to say that banknotes were at a premium, and were preferred to gold. But now they are at a discount, small as yet, it is true, but still gradually augmenting. The usual results are following—specie is getting scarce; silver especially is hardly to be obtained, and some small change—some fractional currency, to use the American expression—is urgently required. So far from coin being likely under these circumstances to reappear in circulation, it is likely to be more and more hoarded. All experience shows that so soon as paper is even thought to be likely to decline, everyone who possesses both paper and coin will, if he can, keep the coin and pass on the paper; there will be a continual and urgent pressure on the issuers of paper to issue more and more, and very soon there will be no coin, but instead an immense sum of inconvertible paper in circulation. This is what has happened to America in consequence of the issue of greenbacks, what happened to France after the issue of *assignats*, and what must always be looked for in similar cases. The Bank of France is therefore at present in this position: either it must somehow bring the banknote to par, which so long as specie payments are suspended is exceedingly difficult, or it must go on increasing the circulation—driving out the coin and augmenting the depreciation of paper more and more. It is not possible for a bank so placed to stop short and say—"Our note is now depreciated 2 per cent. "That is not much: we will not trouble about it, or try to "correct it; we will only exert ourselves to see that it does not "get worse." So long as the cause remains the effect will follow. If depreciated paper and coin circulate together the holders will always, if possible, hoard the coin and use the paper. There will be a constant daily tendency to the disappearance of the metallic circulation, and an equally constant tendency to the further depreciation of the paper note. So long as any coin remains in circulation you can only arrest the augmenting depreciation of paper by removing the existing depreciation.

The peculiarities of the present moment make the case worse. It is an unusually difficult moment for augmenting the value of the banknote as compared with coin. Just now in France the coin has an exceptional tendency to rise in value. It is wanted to pay the German indemnity; a sum of unprecedented magnitude has, on a sudden, to be paid to the foreigner; and large sudden transactions with foreigners, as we have seen ourselves in the case of the cotton drain and of bad harvests, all require large amounts of metallic cash,—the only currency the foreigner knows. And in this case the German Government certainly do not try to lessen the difficulties of France. It looks as if they were not sorry that the business classes of France should feel so much of the full financial evils of the last war as to make them additionally unwilling to begin another. Either for this reason or some other the Berlin Government augments the difficulties of France by retaining in store a large sum of the coin paid to her. Just therefore when the Bank of France wants to raise the value of paper up to the coin, untoward and powerful agencies are at work to raise the value of the coin above the paper.

And there is another and even greater additional difficulty arising from the circumstances of the moment. In the present condition of France, the sole effectual remedy is peculiarly painful. The only way in which the Bank of France can raise the paper to the level of the coin is by diminishing the quantity of the paper. But if it does so, prices will fall, and trade will be crippled and restricted. Paper is now the legal currency of France, and if we diminish its quantity we shall lessen the practical demand for commodities, and all sellers will feel an It is true that by far the greater part of that increase occurred during the invasion, and was scarcely to be considered alarm-unusual hindrance, though they may not understand whence it comes. But just now, when a great and fatal war is but just over—when Paris has been subjected, first to an exhausting siege, and then to a yet more exhausting revolution—when great and natural distrust still prevails—when an enormous addition must be made to taxation,—trade and industry need particularly to be encouraged, not discouraged. And yet, at this very moment, they ought to (and must unless worse come) be subjected to a contraction of the currency, and to a consequent fall in prices. The payment to Germany would naturally make money scarce, and cause a slackening of demand and a fall in prices; and unhappily this inevitable calamity ought now to be intensified by a contemporanecus contraction of paper, which except for fresh errors would not have been necessary, but which cannot now be avoided, except at the cost of great evils hereafter.

In truth this healthy process did begin to operate. The banknote circulation, which on the 29th of June was 89,000,000*l*, had fallen on the 7th of September to 78,000,000*l*. The complete figures are these—

Circulation of Bank of France Notes.

June 30, 1870	£59,588,000
Sept. 8, 1870	73,193,000
June 29, 1871	89,985,000
Sept. 7, 1871	78,358,000
Oct. 5, 1871	79,787,000
Nov. 23, 1871	92,438,000

So that the healthy and natural process of diminishing the circulation has been arrested. The opposite action has begun, and the note circulation is now higher than it was at the end of the war, or than it was at any other time.

The person most to blame for these calamities is unquestionably M. Thiers. He has sacrificed the permanent interest of the Bank of France to the momentary advantage of the French exchequer. During the war, great advances had been made by the Bank to the Government, and it was in consequence of those advances that such immense additions had been made to the note circulation. The private securities—the advances from the Bank to individuals and commerce—were almost exactly the same just before the war as they are now; at the very end of the war they were even less. It was by helping the State that the Bank incurred its difficulty. Naturally, therefore, it might have expected help from the State. Out of the first proceeds of the loan M. Thiers certainly ought to have repaid a large part of the advances made by the Bank during the war. But he refused to do so. The Bank charges the Government less, is compelled to charge the Government less, than the market rate of interest, and M. Thiers preferred to endanger the position of the Bank to paying the price which was required to strengthen it. If he had repaid gradually a considerable part of the 47,000,000*l* of Treasury obligations when he contracted the loan, the present difficulty would not have occurred. The banknote was not then depreciated. If the circulation had been gradually contracted by a Government repayment, the metal hoarded during the war would have been attracted from its concealment, and the existing depreciation would probably never have occurred. As we have seen, there was in fact a proper and healthy contraction as soon as order began, and if the State had, as it ought, aided that contraction, it would hardly have failed to be sufficient. But the golden opportunity was lost, and the evil, which might easily have been prevented, has now with the greatest difficulty to be cured.

The remedies which have been proposed are these—1st. That the State should make the repayment now which it ought to have made before. And this is unquestionably part of the remedy required. The Bank of France will in that manner receive a large number of the now depreciated notes, and will in that manner be aided in contracting its circulation. Suppose that by a new loan, or by one of the coming instalments of the past loan, a large amount of notes now in the hands of the public were repaid to the Bank, the value of the bank note would almost certainly rise. But it must not be supposed that this remedy would now be sure entirely to cure the evil; it would have prevented its existence, but it may not at once destroy it. No doubt if it could be assumed that a large repayment of its own notes to the Bank would prevent the reissue of those notes, the depreciation would soon and certainly be removed. But with such a Bank as that of France the note issue is by no means wholly optional. If a bank is a mere lending company, it has only to contract its loans, and its issue is sure to be less. But if a bank is also a bank of deposit, it has of necessity to pay

cheques, and if it pays for them in its own notes, the depreciated issue may still continue. If it pays for them in gold or silver, it is—when the deposits are made, as in France they have been lately—paying in a currency which is at a premium, and receiving in a currency which is at a discount. A large repayment by the Government, though a necessary prerequisite to the cure of depreciation, will hardly of itself cure it, and even materially to conduce towards it a much larger repayment would now be necessary than would formerly have prevented it.

The second remedy is a rise in the rate of interest. And it is most material to observe the difference between the effects of that step in a country which has a currency of inconvertible paper and one like England, which has a currency of gold and its representatives. In England we habitually regard a rise in the rate of interest as the most obvious and certain way of augmenting our reserve in the precious metals. If we raise our rate above that of other nations, gold is at once sent here to be used as money and to gain that rate. But in a country where the circulation consists wholly of paper (and France is quickly becoming such a country) gold is a mere commodity. The import of it has no other effect on the rate of interest than that of so much cotton, or so much silk. Advances are not made *in* it; on the contrary, advances in paper are made upon it. When indeed a paper currency is depreciating, it is unsafe to lend in the precious metals at any rate of interest, because, paper being the legal tender, you may be repaid in paper, and your principal may be so much less in value that it is comparatively immaterial what rate of interest you charge; your loss by the depreciation of your principal may always more than counterbalance even the highest rate of interest. As then gold in a country with a currency of inconvertible paper cannot be used as money, a rise in the rate of interest for money has no attractive effect in bringing gold to that country. By raising the rate of interest even to 10 per cent., the Bank of France would not at all strengthen its reserve of the precious metals. What it would do is that it would raise, or would tend to raise, the value of its paper as compared with those metals. If the Bank of France could entirely control the rate of interest throughout France, and if the trade of France were carried on as much by borrowed capital as that of England is, a rise in the rate of interest would be sure to affect prices at once. A large rise in the discount rate of the Bank of England has always, or almost always, that effect in England. So many persons carry on their trade on borrowed money, and so many have to pay, or think they may have to pay, more for it in consequence of the action of the Bank, that the number of wholesale buyers of all great articles is diminished, and prices fall. In the theoretical language of political economy, the *efficiency* of the currency (that is, the number of transactions a given sum of money effects in a given time) is less when the rate of interest is high than when that rate is low; and therefore, though the minimum quantity of the currency may be as great before the rise of the rate as after it, yet the bargaining power will be less, because buyers will not be so ready to make use of it, and so prices will fall—at least they will do so in a country where a great many buyers can only buy if they borrow.

In proportion as the required conditions are satisfied, the Bank of France will obtain these advantages by raising its rate of discount. But in France the conditions are far from being so completely satisfied as in England; the amount of bargains depending on borrowed money is not nearly so great in France as in England; and we do not know how far, in such circumstances as the present, a rise in the rate of interest by the Bank of France would be followed by a universal rise among other lenders. Still a great rise in the rate of interest would have a very important effect in raising prices, and in arresting and curing the depreciation of the note; and therefore the rate should be raised without delay.

The other two remedies are the augmentation of the capital of the Bank of France, and the sale of the saleable Government securities,—apart from the advances made to the Government, which are not saleable, or in any manner negotiable, in the market. As to these, the augmentation of the capital is a very good measure in itself. The liabilities of the Bank have augmented enormously since its capital was last increased, and according to a very common rule of banking the capital is not now enough for the business. But the augmentation of the capital, however proper in itself, will not at all mend the present difficulty; it will not cure the depreciation of the banknote. The credit of the Bank of France is excellent. The depreciation of the note does not at all arise from the discredit of the issuer: it arises wholly from an excessive quantity in the note issue itself. But the capital of the Bank of France is now only 7,300,000*l*; if it were doubled, and if the whole augmentation was paid in banknotes and remained in it, it would make but a little impression on the 92,000,000*l*, to which the circulation now amounts. And it is not likely at all that the whole augmentation would be deducted from the circulation; some of it would probably be at first deducted from the deposits; some of it would soon go out again in other ways. No real help is therefore to be gained in this way. The sale of the *rentes* belonging to the Bank is in principle of the same nature as the repayment of the debt by the State, and is therefore in principle good. But it is a less effective embodiment of that principle. The amount of these Government securities is only 9,500,000*l*, and this amount is not large enough to make an impression on the circulation, even if it were wholly deducted from it. And it is not at all likely that it would be so deducted. The purchasers of the *rentes* would in many cases be people keeping an account at the Bank of France, and the purchase money would often be paid from their deposits at the Bank, and thus have no effect on the circulation. A new loan, especially if bought on easy terms and payable at convenient periods, attracts into the money market the hoards of the population, and so may probably bring many notes to the Bank, but the sale of existing securities on the Paris Bourse has not that effect at all, or very slightly.

For this reason we believe that a large repayment by the Government to the Bank, and a rise in the Bank rate of interest, are by far the best remedies which could now be adopted in the present difficult condition of the affairs of the Bank of France. But we are sorry to say that we see little reason to think that these wise remedies will be adopted. The Government object to raise the rate of discount, because it would check trade, irritate the great centres of population, already hostile, and give, as they believe, a severe blow to public confidence. Nor do they like to make a new loan so soon after the recent one, for fear of lowering the price of their securities, and of impairing in the future their borrowing power. These reasons are, it is true, of no weight in comparison with the great object of curing the present, and of staying the growing, depreciation of the note currency. But though they are of no comparative importance, we fear the present French Government may imagine them to be so. We fear that no real remedies will be tried, that the matter will drift on, that the circulation will be depreciated more and more, that the metallic money will disappear and be hoarded, and that France will add another to the present long list of civilised countries which are entirely destitute of a stable standard of value, and which are wholly subject to the irregular fluctuations of inconvertible paper.

The condition of the French currency is of vital importance to the English money market at the present peculiar time. France has an immense sum to pay to Germany, and the natural fund out of which it should be paid—at least in the first instance—is the French metallic currency. But this will not now be obtainable. The depreciated paper is already causing much of it to be hoarded, and will soon cause it all to be so. Gold and silver not being obtainable in their own country, the French Government will be forced to buy them in the European, and principally in the English, market, and this will have many important consequences.

MR BRIGHT'S RETURN TO PARLIAMENT.

EVERYBODY will feel the liveliest satisfaction that one of our greatest orators, most imaginative political thinkers, and at bottom, we firmly believe, most sensible public men, should be able to return to his place in Parliament. Mr Bright is, with all his reputation for passion and vehemence of speech, a thoroughly sober, and, in a certain sense, even Conservative, politician; in fact, we should be disposed to say that he does not intellectually give half enough weight to considerations which seem to have no root in British history, that his mind, as a Reformer, is somewhat limited by the political ways and methods of the country in which he has grown up. His presence therefore in Parliament, and his presence as an independent member, will do more than anything else to moderate that irritability of desire for change which has attacked some of the younger members of the party, and has gained a certain influence also amongst the people. If any single man can check the premature and eccentric attacks on the constitution which have lately sprung into fashion, Mr Bright is the man. Besides this, he has gained all his influence by his thorough-going Radicalism. He is known as a rather extreme economist. His speeches prove him to be a not unwilling satirist of the House of Lords. He has the Dissenter in his very blood. Hence neither republicans, nor economists, nor reformers of the Peers, nor the friends of secular education can despise his authority; and we may be sure that, on the whole, that authority will be used on the side of moderation. The great "tribune of the people," as he used to be called, has mellowed in later life into a statesman who, though he has not deserted one of his old principles, has gained the reputation of standing on the ancient ways in his mode of supporting them.

But when it is said that Mr Bright's return to Parliament will be of great service to the existing Ministry, we confess that we feel the gravest doubts. That his influence will be, on the whole, a moderating influence, and that it will tend to diminish the power of the left wing of the Liberal party, we have admitted, and so far, it might be supposed, that it must serve the Government. That is exactly what we doubt. Mr Bright can hardly be anything else than what we may call a Radical patron of the Government,—as Sir Roundell Palmer has so long been a Conservative patron of it. In that capacity he may very well contrive to diminish the severity of the attacks upon it, and to win it some victories which it might not otherwise achieve. But it is quite a mistake to suppose that Governments necessarily gain by victories which are not due to their own intrinsic strength, or even that they lose much by defeats which it is admitted that they could not, unassisted, avoid. Governments may lose, and lose greatly, in moral influence by victories which they only obtain through the aid of a powerful ally. And they might easily lose even less by absolute defeat. Of all dangers to a Government supposed to be at all shaky, perhaps the very greatest is the reputation of its living only by virtue of the ægis thrown over it by a private member. And Mr Gladstone's Government will not only certainly incur this danger, it will probably incur it in a far more exaggerated form than the truth will actually warrant. We shall be told on almost every occasion of victory that the Cabinet owed its success to the intervention of Mr Bright or Sir Roundell Palmer. The Government will not get even the credit it really deserves for strength and decision. All its failures will be enhanced by the remark that even Mr Bright could not save them; all its successes diminished by the hint that it was Mr Bright's imputed merit to which the Government owed its escape. A private protector is about the greatest danger any Government can have. It would certainly be far better for it to dispense with the aid, than to have credit for a vast deal more than it really receives.

Nor will the case be much better if on some great questions Mr Bright should disapprove, as he is very likely to disapprove, of the policy of the Cabinet. It is not very easy to suppose, for instance, that he would really have heartily supported the extra military estimates voted last year; and had he then been in the House, his vote thrown into the opposite scale would have had enormous weight against the Government, though his support of these measures would not have had the moral effect of adding any prestige to their policy. It is far from impossible that he may on some points go pretty strongly with the Nonconformists against Mr Forster's education policy; and if he should do so, the adhesion of the Cabinet's "own familiar friend" to the ranks of the malcontents will be held as proof positive, with a large section of the country, that the Government has really played into the hands of the Conservatives. In short, nothing is more difficult, we might almost say more impossible, than for a popular leader of the first rank so to act, *outside* a Government, as to give it any real assistance. If he opposes it, however moderately, he carries all the greater weight with the people, because he is known to be friendly in sentiment. If he supports it he diminishes its prestige by the very act of extending his protection. Mr Bright in the Government, involved in all its responsibilities, was a very powerful auxiliary. Mr Bright, independent of it, but favourable to it so far as he honestly can be, will be likely to do quite as much to relax its cohesion as to diminish the external pressure upon it. In fact, the diminution of external pressure on a Government is not always a service to it. It is by external pressure, and the resistance it elicits, that a Government gains its authority, and by the absence of it that it is apt to lose it.

But Sir Roundell's Palmer's assistance, it will be said, has not had this effect in any great degree on the Government. His interventions have usually diminished the pressure of the Conservatives without really carrying the demoralising effect of patronage. No doubt. But that is because Sir Roundell Palmer, eminent as he is, is really little more than an individual, and not the representative of a popular party. His assistance has helped the Government almost purely by its intellectual force, and the moral respect his character commands. It is always an advantage for a Government to have distinguished adherents whose help tells only by the intrinsic weight of its argument, and not by virtue of any following which it commands. But Mr Bright's help is a very different matter. He is not merely an Achilles whose aid is courted for its individual value,—he is the chief of a great party in the country, and a small party in the House, whose complaints are more or less silenced by his word. Hence no one can really estimate what votes he brings or keeps away, and it is quite certain that a Government which is beginning to lose popularity will be credited with having got a great deal more help from such an alliance than it has, and will be deserted a great deal more freely if the leader of this alliance abandons it, than it would have been without such an example to quote.

On the whole, then, while we are quite sure that Parliamentary debate will gain immensely by Mr Bright's presence, and are disposed to think that direct Radical pressure on the

Government will be reduced by it, we are strongly disposed to think that it will not prove a beneficial influence in the long run. Governments cannot afford to be protected by private influence; nor can a Government that is losing popularity afford to be overruled or defeated by it. There is every reason to think that either the one risk or the other must be incurred by the Government, when Mr Bright returns to his seat in the House, and either of them is of a very dangerous and solvent kind.

M. GAMBETTA AND THE PRIESTS.

It would be difficult or impossible to find a more striking illustration of the difficulty of governing France on constitutional principles than the speech of M. Gambetta, at St Quentin, upon education. It was a declaration of open war between the Radical Republic and the Church. M. Gambetta, though esteemed a "Red" in England, is in France considered rather what we should call a Radical—that is, a politician of somewhat extreme views, which he would rather carry out without recourse to Revolution, through the conversion of the electors. He very decidedly checked Garibaldi when the great partisan, who, moderate on most political subjects, is scarcely sane in his hostility to the priests, endeavoured to use the churches as barracks for his soldiers, and he has never displayed any of the iconoclastic zeal which distinguished some of the advocates of the Commune. Careful observers of his career pronounced that he was the only leading Red with whom the Catholic Church in France could treat, and that his tolerance would be one source of his power; and yet in his speech, which he meant as his final manifesto, he again declared his belief in a policy which is practically a declaration of war upon the Church. He pronounced for a total separation of education from religion, a separation going so far that a parish priest shall be prohibited from taking any share whatever in the instruction of the young.

The Economist will not be accused of wishing to hand education over to the clergy, but M. Gambetta was addressing the people of France, not of England, and his declaration amounts to this, that he will not have the Republic if it is to have the approval of the Church. In every parish of France there is an officer, paid in part by the State, who is called a Curé, who performs all the religious functions required by the people, and who has consequently enormous influence over their opinions. As a rule, he is a man of good, and even of estimable, character, with very few political prepossessions, and very much disposed towards a quiet life. Usually a peasant's son, he shares the ideas of the peasants, and he seeks his society habitually among the minor officials, always in France the best friends of the Government of the day. He is, however, a trifle better educated than either his peasants or his society, and he has two fixed ideas—one being that his State pay must not be withdrawn, lest in order to exist he should be obliged to sell the offices of the Church; and the other, that the young are in some degree at least to be his care. This latter idea is intensified by his conviction, whether well or ill founded, of the profound immorality too common among the secular teachers of France. This immorality is probably exaggerated in his mind, but it is a fact that secular education tends in France to fall into bad hands, that scandals have been very frequent, that throughout the country in 1849, and in a less degree at the present moment, authentic stories have been circulated, giving natural and very deep alarm to parents. At all events, the Curés are very zealous upon the subject; they have the ear of all mothers, and they have much attention from all fathers—that is, from the men whose votes are all-important to the Republic. It would not be difficult to compromise with them, to secure a very strict State supervision, to dictate the books which should be used, to reduce them to the position of visitors, and to place the convents, about which all French Radicals feel so bitterly, under the control of the law. The peasants do not want their children to be "brought up by "priests," and the priests—that is, the regular parochial clergy—do not want a monopoly of the drudgery of education; but instead of suggesting a compromise, M. Gambetta proposes that the young shall be absolutely withdrawn from the control of the Church, that the priests shall be finally disqualified by law for education. Of course the religious feelings of the Curés—and they have religious feelings—and their professional pride, a very natural and in its way justifiable pride, is roused at once, and they become the irreconcilable enemies of a *régime* which, as they think, oppresses their consciences and those of the devout among their flocks. They confound the policy of M. Gambetta with the policy of the Republic, and are ready to welcome any change which, in their own phrase, would rescue them from Voltairian oppression.

We attach the more importance to this speech because it seems to us to illustrate what we believe to be the first difficulty of France, that of reconciling its form of government with the permanent ideas and daily life of its people. France is supposed in this country to be the very home of revolution, but no one can live in it, outside Paris, and not perceive that its people are essentially Conservative, inclined to do to-day what they did yesterday, indisposed to change, doubtful of the expediency of opposing any authority, whether official, religious, or military. They are not precisely devout, but they have a respect for devoutness. They do not want in the least degree to be compelled to choose finally between opinions, to turn either Red or clerical, to be persecuted by the mayor or the vicar of the parish. They want to discover a *modus vivendi* among them all, to have their children educated by laymen with the priest to go and look on contentedly, to be free of the perpetual strife of tongues, and to become prosperous without thinking of difficult subjects too much. That is not a very exalted state of mind, but it is the state of mind with which all French politicians have to reckon, and it has this one advantage, that as the peasant seldom changes, the ruler who can conciliate him has behind him a force of the most available kind, a force before which all temporary or spasmodic opposition must inevitably go down. If the Republic could attract it the Republic would stand; yet M. Gambetta, who knows this, and who is to all Frenchmen the distinctive Republican, deliberately throws away this source of power. If he has done so out of principle, if he honestly believes that no education at all is better than education of which French Curés approve, we have nothing to say, except that a Voltairian fanatic can no more rule France than a fanatic ultramontane; but this view is wholly opposed to his character, which is essentially moderate, practical, disposed to doubt the value of very extreme views. It is much more probable that he has made a simple blunder; and the fact that, in the teeth of circumstances he knows so well, he could make it, is, as we have said, one more proof of the difficulty of establishing solid government in France. The priests may not be more powerful than the landowners in England—that is, the town masses may easily be detached from them; but imagine the difficulty of governing England with every landowner convinced that his safety, here and hereafter, depended upon overthrowing the Government! There must be a compromise of some kind, and we do not perceive in M. Gambetta's speech even a recognition of the idea that compromise would be expedient.

BUSINESS NOTES.

The Caledonian and North British Amalgamation.—The terms of amalgamation which the directors of the Caledonian and North British shareholders propose to their respective shareholders have now been formally stated in a joint circular. They are simply that after the 1st of August next year the two companies will participate in the net earnings of the joint line—1st, as respects the annual sum of 1,818,023*l*, the amount of the aggregate net earnings of the two lines for the year ending 31st July, 1871, in the proportion of 711,329*l* to the North British, and 1,106,694*l* to the Caledonian. These were the actual proportions earned by the two companies in the year named; 2nd, as respects all net earnings beyond the above sum of 1,818,023*l*, in equal proportions. In other words, the companies agree to share and share alike in everything beyond what they made last year. We do not think there will be much objection on the part of the shareholders to these terms. They seem a little unfair to the Caledonian, which is 50 per cent. larger than the North British, judged by the net earnings, and possesses the more profitable half of Scotland, while the accruing increase of receipts is actually larger. In the Caledonian for the current half-year the accrued increase of traffic is 53,797*l*, and in the North British it is 47,650*l*; but the two companies are in future to participate alike in the joint increase of traffic. The difference however is so small as not to be worth disputing about in comparison with the large im-

mediate addition to the net earnings which may be looked forward to as the result of the amalgamation. As the joint circular too truly states the history of the two companies has been one of incessant warfare, varied only by "repeated un-"availing attempts to come to terms, and by the short-lived "joint-purse truce." It is also true that the "railways of both "systems, in fact, are so interlaced in the most important "districts, and have rights in common in so many quarters, "that separate interests are scarcely compatible with har-"monious working, and the companies and the public suffer ac-"cordingly." Even at some sacrifice therefore of his apparent interest, the Caledonian shareholder will do well to secure the great gain to be immediately expected from diminished working expenses. We need hardly point out how strongly this new amalgamation condemns the principle of competition which still lingers among our Parliamentary traditions as the rule to be applied to railways. If the amalgamations of the present year are sanctioned it will be absurd in future to authorise a competing railway, and we should even expect that Parliament will enforce amalgamations when they would be expedient in the public interest, but where they are now prevented by the personal interests of directors and chairmen afraid of losing place and power. The case for the Caledonian and North British amalgamation is not half so strong as it is for the amalgamation of the three passenger lines which connect London and its southern watering places.

A Foreign Bondholders' Association.—It is understood that an attempt will shortly be made, under the auspices of the Council of Foreign Bondholders, to establish on a firm footing a permanent Association of Foreign Bondholders. An experience of several years has now shown the advantages of concerted action among the classes interested in foreign loans, while it has also been found that there is a needless amount of friction and expense in the separate action of independent committees of the holders of particular loans without the support of a central association. The Council of Foreign Bondholders has hitherto discharged most ably the function of supporting each separate committee; but there is a want of permanence in the organisation which it is now proposed to supply. It is suggested that a Foreign Bondholders' Association should be incorporated under a Royal Charter, and that the necessary capital should be raised by a thousand subscriptions of 100*l* each—to be subscribed, if possible, by 1,000 members, and larger subscribers having power to nominate members for each 100*l* subscribed. The interest of 100,000*l* it is thought will constitute a fund for carrying on the business of the association in the most efficient possible manner on the plan now pursued by the Council of Foreign Bondholders, while the new body would also act as agent and receive payment in that capacity from the separate committees of the holders of particular loans where Governments have been in default. From both sources—the interest of the capital subscribed and the receipts from the recovery of claims—it is anticipated that there will be a surplus after paying all the expenses of the association, and the surplus will be applied in repaying by drawings the capital subscribed and a farther sum of 100*l* per bond in consideration of the first outlay. In addition it is proposed to form a library and reading room, to which subscribers will have access, and in which all information as to foreign loans and the dealings with defaulting Governments will be collected, arranged, and made easily accessible to those interested. Such is a meagre outline of a scheme which promises to carry out more fully than has yet been done the objects of the Council of Foreign Bondholders, and we have no doubt it will be warmly supported by those concerned. The original capital is not very great considering the magnitude of the interests involved, and we should say there is a fair chance of the subscription being only nominal, the subscribers being almost certain to receive their money back, while other and very substantial privileges will accrue to them.

An Ineffectual Transfer of Shares.—The Master of the Rolls has just decided that a transfer of shares in the following circumstances was ineffectual to save the transferror from being put on the list of contributories. The company was the European Bank (Limited), in which the defendant Masters, a meat salesman in Newgate Market, had held 280 shares of 50*l* each, on which, as there was only 1*l* paid up, there was a farther liability of 9,800*l*. Shortly before the company stopped payment in 1866, the defendant executed a voluntary transfer to his son-in-law Deering, a journeyman butcher, but then out of employment, Deering being described in the transfer as a gentleman, and the transfer being registered just eight days before the stoppage. The shares were then worth 8*l* a piece, and it was contended for the defendant that the transaction was an out-and-out gift to Deering, and that the directors would not have been justified in refusing his name. His Honour, however, took the view that the transfer was intended to have the effect of relieving Masters of liability if the thing went wrong, while if it went right Masters was to retain the beneficial interest. He also commented on the misdescription of Deering in the transfer as misleading the directors, and preventing them from rejecting a name which they would otherwise have rejected. He therefore decided that "upon the whole the transfer was a "nullity, the transaction being colourable and the description "untrue, and the name of Mr Masters must be placed upon "the list, with costs."

The New German Coinage Bill.—According to despatches from Berlin the Coinage Bill has been farther modified in its progress through Parliament, by "striking "out the groschen and 30-mark piece." As the 15-mark piece was previously struck out the only new gold coins will be the 10 and 20-mark pieces—that is, only the gold coins approximating to our English sovereign and half-sovereign. The Bill will, to all appearance, become law very soon, and the international vexation which must ensue from the use in Germany of coins which approximate so nearly our own gold standard and are yet so different is accordingly inevitable. We cannot but consider it a misfortune that the new coinage of Germany should be attended with so serious a drawback.

B Contributories.—The Lords Justices of Appeal—*re* the Oriental Commercial Bank, Morris's case—have made a farther contribution to the elucidation of the law on the subject of the liability of B contributories. The question arose on appeals from a decision of the Master of the Rolls, in which he had laid down that when a B contributory was made liable for debts due at the time of his transferring and not paid before the winding-up, his liability should be "without any reduction in "respect of the dividends upon such debts already paid by "the liquidator" out of the contributions of the A shareholders. In the present case Mr Morris had transferred shares on which 800*l* of liability remained to Demetrio Pappa, who had not paid, and he became liable in consequence along with the B shareholders in respect of 642*l* of debts existing at the time of the transfer, and still remaining due. The effect of this decision would have been to make him liable along with the others for the whole 642*l*, although the contributions of the A shareholders amounted to 15s per £, and if applied in reduction of the old debt before the B shareholders were made contributories, would have restricted their liability to 160*l* 10s. Hence the present appeal. The B shareholders, it was said, should only be liable to contribute after the A shareholders were exhausted. To this view the Lords Justices gave their assent. The object of the Master of the Rolls had been to provide a larger fund for the general creditors by marshalling the assets, but the Lords Justices held that the liability of a B contributory was a matter entirely between himself and the creditor whose debts existed before he transferred his shares. The Lords Justices, however, decided on another point which was raised, that the B contributories among themselves were not to be exhausted in succession, those who had last transferred being made first liable, and so on. The only difference would be that some would probably be liable for more debts than the others, according to the date of their transfers. The distinction is a little intricate, and should perhaps be stated in the Judge's words. Lord Justice James said:—

The case might be illustrated by supposing that there were three B contributories, A, B, and C, who ceased to be members in that order, and that A was liable in respect of 100*l* of the company's debts, B in respect of 200*l* (which would include A's 100*l*), and C in respect of 300*l* (which would include B's 200*l*). C would have to pay the whole of the 100*l* debt last contracted; he would be liable jointly with B for the 100*l* secondly contracted, and jointly with A and B for the 100*l* first contracted, while B would be liable jointly with C for the 100*l* secondly contracted, and jointly with A for the 100*l* first contracted, and A would be liable jointly with B and C only for the 100*l* first contracted. Assuming that C could not pay the whole amount due

from him, B would have to make it good to the extent of his liability, and so on. What C contributed would be apportioned between the three different 100*l*, what B contributed would be apportioned between the earlier two of them, while A's contributions would go only to payment of the first 100*l*. This would be a species of marshalling as between persons jointly liable to the same debts.

In general the effect of the recent Chancery decisions is to whittle down to the narrowest point the liability of the B contributories. In a few months after a transfer of shares there will not usually be many of the old debts remaining unpaid, and the B contributory, when he is made liable, will only have to make good the difference between the amount and the dividend which the A shareholders will have paid.

THE HONOUR OF KNIGHTHOOD.

TO THE EDITOR OF THE ECONOMIST.

SIR,—The elevation of Lord Mayor Dakin to the honour of Knighthood seems to deserve more attention than it has aroused.

The reasons assigned for this distinction are to be found in the services rendered by the late Lord Mayor to the cause of charity, and especially in the subscriptions raised under his presidency for the sufferers by the siege of Paris, the fire at Chicago, the hurricane in the West Indies, and other calamities, moral and physical.

As a City man and *nolens volens* a contributor to each of these objects, I venture to maintain that even a Lord Mayor should be just before he is generous, and that all his superfluous energy is required for the control and supervision of municipal affairs.

Let the traffic in our crowded streets be organised, the beggars who infest them be dispersed, the expenses of our civic administration be reduced, and a host of useful and long-deferred reforms be initiated.

> "The dull laborious hours of ease [of the Mansion House]
> Were well exchanged for toils, for cares, like these."

Such duties diligently performed might fairly lead to honour, but if it be once understood that to levy subscriptions is the path to fame, and will entitle each outgoing Lord Mayor to be called Sir John or Sir Jacob, what a prospect is open before us, whom he periodically lays under contribution?

Quicquid delirant reges, &c.

—whenever mayors rage for titles the citizens must bleed.

Charity has been defined as the act of A, who, touched by the misfortunes of B, relieves him out of the pocket of C. But our civic benefactor, not content with the moral gratification which he has earned at our expense, claims to be rewarded into the bargain. Upon such conditions it may safely be predicted that charity will never fail.—I am, sir, yours truly,

ANTI-CORPORATOR.

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts on account of Revenue during the week ending Nov. 18 :—

	Receipts of Week Ending Nov. 18.
	£
Customs	410,000
Excise	515,000
Stamps	236,000
Taxes	5,000
Income tax	60,000
Post Office	100,000
Telegraphs	nil.
Crown lands	nil.
Miscellaneous	25,143
Total	1,351,143

The total receipts of the previous week were 1,109,000*l*.

The Exchequer issues to the week on account of expenditure were 529,497*l*, viz. :—

	£
Interest of debt	nil.
Other charges on Consolidated fund	24,497
Supply services	505,000
Telegraph services	nil.
	529,497

During the week the cash balances have increased as follows :—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on Nov. 11	1,922,845	402,056	2,324,901
— 18	2,458,038	623,613	3,081,651
Increase	535,193	221,557	756,750

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, Nov. 23.

The returns of the Bank of France for this week, last week, and for the week ending 8th September, 1870, are as follow :—

	Nov 23, 1871.	Nov. 16, 1871.	Sept. 8, 1870
DEBTOR.	f c	f c	f c
Capital of the bank	182,500,000 0	182,500,000 0	182,500,000 7

A comparison of this week with last, in the principal items, shows :—

DEBTOR.	Increase. francs.	Decrease. francs.
Notes in circulation	...	10,000,000
Treasury balance	11,000,000	...
Deposits	2,400,000	...
CREDITOR.	Increase. francs.	Decrease. francs.
Coin and bullion	300,000	...
Bills discounted	8,800,000	...
Advances on securities	...	1,500,000

The Bank return of to-day is one of the most favourable issued for some weeks past, as although the various items present no great variation compared with the situation last week, the changes are all in a favourable sense, and show an abatement of the crisis and a revival of confidence. The circulation of notes has diminished by nearly ten millions, leaving again a margin of one hundred millions; the private accounts exhibit a slight augmentation, and those of the Treasury an increase of over eleven millions; the advances on public securities and railway shares and debentures show a decrease, and no further sales of rente have taken place. The specie reserve at the same time remains intact.

The rumours of an intention to double the Bank capital and increase the limit for the issue of notes, after being nearly a week in circulation, and being so far accepted as authentic as to influence the price of Bank stock, were at length contradicted in the last sitting of the Permanent Committee of the Assembly at Versailles. The denial is not, however, absolute, and only goes so far as to say that for the present there is no intention of increasing the circulation, and that the regents of the Bank are opposed to an augmentation of the capital. The real value of the contradiction is, that no steps will be taken until the Parliament meets on the 4th December, and that if the regents can obtain authorisation to issue more paper with their present capital they have no desire to increase it. In the absence of the Legislative Assembly, there are no

means of verifying the rumours which constantly arise, excepting by the sittings of the Permanent Committee, and these are held but once a week, consequently reports may remain for several days uncontradicted. One of the latest is, that the Bank of France contemplates selling the whole of its disposable rente, nearly 70 millions, to a syndicate of bankers, but there is probably no more foundation for this than the others.

The public are gradually becoming accustomed to the use of the new paper tokens, although at the commencement of the week the benefits to be derived by the issue were seriously compromised by the announcement that the Paris Omnibus Company and some of the railway companies had given orders to their servants not to accept them. The reason alleged was that, as a large number of different types of notes had been issued in different localities as well as in Paris, the clerks at the ticket offices would be unable to distinguish between those properly guaranteed and others. The profits those companies were making by the constant influx of coin, which could be sold at a premium, no doubt helped to prompt this resolution. The directors have however now recalled those instructions, it is believed, in consequence of a recommendation from the Government. The *Journal Officiel* of to-day moreover contains a note stating that the new tokens will be received at all the public offices for a smaller sum than 20f; the Bank of France will not however give its own notes in exchange for them, as had been expected.

The Bourse, which had been heavy all the week, was firmer to-day, but rente and loan each show a slight depreciation compared with the rates of Thursday last. Railway stock and most foreign securities have, however, improved. The following are the latest quotations:—

	November 16.		November 23.

The premium on gold continues at from 10 to 12 per mille, and the exchange on London at 25f 75c. English banknotes and sovereigns sell at 25f 95c to 26f.

The Prefect of the Seine, in the last meeting of the Municipal Council, gave some details of the City finances, pending the presentation of the complete Budgets. The years 1870 and 1871 would both show a deficit, and in 1872 there would be no surplus in the Ordinary Budget to transfer to the Extraordinary. He hoped that the deficit for 1871 would not exceed the 60 millions that might be covered by the floating debt, but he feared that that resource would be partly absorbed by other requirements. The only receipts that could be applied to the Extraordinary Budget were the instalments remaining overdue on the loan of 1869. As the accounts had been burnt by the Commune, the amount could only be stated approximatively; at the outbreak of the war it was 45 millions, but 33 millions had been paid since. A sum of 12 millions would therefore be received when the unknown holders should come forward to pay, which would probably not be until higher rates than the present permitted them to sell with advantage. The City hoped by means of the anticipated payments of the new loan to be able to reimburse a sum of 21 millions to the Bank before the end of the present year. The estimates for 1872 would, he expected, show a deficit of about 20 millions, which could only be covered by maintaining the additional octroi duty, and the double tenth on the four direct taxes; to do the former a law would be required, and for the latter a decree from the President of the Republic. No new public works would be undertaken next year.

The rumoured intention of the Government to denounce the Treaty of Commerce with England excites but little attention in the French press, the journals confining themselves to publishing an occasional semi-official note on the state of the negotiations, or extracts from the English papers. One would have imagined that a question of such importance would have become a subject of general discussion, but the journals generally appear to avoid the topic, as if fearing to run counter to the popular prejudice, which takes for granted that all the advantages of the Treaty have been on the side of England, and all the sacrifices on that of France. It may be safely said that not one Frenchman in a thousand is even aware of the nature and terms of the Treaty: from the constant use of the words *libre echange* in connection with it they have at last been led to suppose that it consists really of an unrestricted trade on conditions of equality between the two countries, instead of an arrangement by which one side has abandoned everything to obtain only partial concessions. The denunciation of the Treaty would probably not meet with any disfavour among the mass of the people, as for many years past it has been made to bear the odium of the present high cost of living in France. It is quite a stereotyped answer among dealers in articles of food to complaints of dearness, that all the dairy produce and the best wines are now sent to England. As for the native manufactures, the people have no fear of retaliation by the imposing of an English duty on them, for the popular belief is that all articles produced by France are so immensely superior that the English cannot do without them, and will continue to purchase them at whatever the price may be. I do not pretend that this is the opinion throughout France, but it is certainly that which prevails in Paris among the masses, and unfortunately in a great measure among the middle classes.

An exception to my remark on the silence of the French press must however be made for the *Debats*, but even that journal does not defend its former Free-trade principles with the same earnestness since the recent change in its direction, by which the influence of M. Thiers is felt through one of its chief proprietors, the present Prefect of the Seine. M. Michel Chevalier however continues to defend a policy of commercial liberty in it, and has just contributed an article on the yarn and spun cotton duties, which are the question of the moment. The conclusion at which he arrives is, that there are excellent reasons for diminishing the duty on those articles in a large proportion, but not a shadow of a reason for increasing them. He shows that, even under the present tariffs, the duty on yarn varies from 15f per 100 kilos for the No. 20½ to 100f for the No. 100, while for the finer sorts used in the manufacture of muslin it reaches a rate of 250f and 300f; in the Zollverein the duty on yarn of any number is only 15f, and yet the German mills prosper and multiply, and in Switzerland, where the duty is even lower—only 4f the 100 kilos—the home manufacture is becoming developed in still larger proportions. The high rates of duty, he says, are the sole cause why France does not participate in the immense export trade of cotton goods, of which England enjoys the monopoly.

A telegraphic despatch sent round by the Havas Agency on Saturday last, declared, on the authority of the *Times*, that the French Government had denounced the Treaty of Commerce. The statement subsequently proved to be based on the misrepresentation of a passage of the leader in that journal. The report had however the effect of calling forth a note in the *Moniteur*, evidently "inspired," contradicting the rumour, while admitting that the negotiations had been suspended, and adding that the Government was not likely to adopt a measure of such importance without the co-operation of the Assembly, which could be consulted in sufficient time, as it was to meet at the commencement of next month.

The Chamber of Commerce at Lyons has held a meeting on the subject of the proposed duties on raw material, and their probable effects on the silk trade. During the last season delegates were sent to Versailles to protest against the imposition of any duty on silk, and to propose to replace it by various other taxes. These latter were then rejected by the Committee on the Budget, and a sort of compromise was come to that the duty should not exceed 3 per cent., without drawback. Since that time many of the taxes which the delegates had proposed as an equivalent have been voted, or are likely to be, among them being the increased stamp duties, a tax on trade profits, &c. The Chamber now complains that the manufacturers will be doubly taxed, and demands that the 3 per cent. to which it had consented should not be imposed, and that any deficit should be made up by a duty on all incomes, without exception.

The publication of the French Customs return, which had been suspended since the commencement of the war, is about to be resumed. The destruction of all the returns by the burning of the Ministry of Finance had necessitated the procuring of fresh documents from the departments to complete the statistics for the years 1869 and 1870. The work is now nearly completed, and the table for the year 1869 will be issued at the end of the present month. The publication of the monthly returns of imports and exports will also be resumed from the 1st January next; those for December, 1870, and October, 1871, are already in the press; the former will recapitulate the operations of the year 1870, and the latter those of the first ten months of the present year.

The City of Paris is now issuing the provisional titles of the last loan, in exchange for the certificates delivered on subscribing. The delay had been caused by the large number which required to be printed, in consequence of the fractioning of a considerable portion of the bonds into fourths. This loan has now fallen to two francs below par. The premium at one moment was as high as twelve francs. No announcement is yet made of the emission of the permanent titles of the Municipal loan of 1869, the whole of which has been paid up since November of last year, with the exception of the overdue instalments above referred to.

An attempt is being made to introduce the manufacture of beetroot sugar into Italy. A company has been started in 10,000 shares of 250f each.

The Lyons Railway Company announces that it discounts its bonds falling due on January 1st at 5½ per cent. per annum. The Eastern Company will pay its debentures, without deduction, from the 1st December.

The shares of the Usines à Gaz Reunies have been admitted to the official price current; their number is 16,000, at 500f each, paid-up, and 32,000 bonds at 250f.

The Messageries Company announces the payment of a provisional dividend of 15f (coupon No. 15) on the year 1871, payable from the 1st December.

Meetings are announced of the Comptoir d'Escompte on the 11th proximo for the modification of its statutes, and of the Sous-Comptoir des Entrepreneurs on the 9th to fix its dividend, and elect members of the board of directors.

The following are the latest quotations of the produce markets at Havre, per 50 kilos, duty paid :—

Cotton.—Georgia low middling, 114f; New Orleans strict low middling, 123f; low middling, 121f 50c to 122f 50c; good ordinary, 120f 50c; Oomrawuttee very ordinary, 77f; good ordinary, 91f; Tinnevelly good ordinary, 91f; Madras, 87f; Bengal, 83f. Sales last week, 20,915 bales; arrivals, 20,737; stock, 114,670.

Coffee.—Guatimala picked, 153f; Ceylon, 148f; Singapore, 144f; Tellicherry, 155f; Rio, 145f; Santos, 145f; Manilla, 150f. Sales for the week, 41,200 bales; arrivals, 4,323; stock, 147,841 bales and 2,083 tierces.

Sugar.—French West India good, No. 4, 59f; usine, 61f 50c to 64f, according to sample.

Hides.—Monte Video dry ox or cow, 145f; green salt, ox, 85f; cow, 78f; Buenos dry ox and cow, 136f 50c; matadero, 145f; Rio Janiero green ox, 73f; Valparaiso drysalted, 99f. A lot of Buenos horse hides dry, 13f to 15f each.

Wool.—Buenos Ayres unwashed, 180f to 210f; Monte Video, 227½f; Chili, 230f to 250f; Spanish, 210f.

Tallow.—La Plata sheep, 57f 75c; Monte Video ox, 59f 50c.

Cocoa.—Hayti, 95f; Para, 69f, in bond; Trinidad, 125f; Martinique, 107f 50c.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

An Account pursuant to the Act 7th and 8th Victoria, cap 32, for the week ending on Wednesday, the 22nd day of November, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued	38,548,155	Government debt	11,015,100
		Other securities	3,984,900
		Gold coin and bullion	23,548,155
		Silver bullion	...
	38,548,155		38,548,155

Clearing-house returns	...	56,677,000	57,473,000	63,812,000	92,575,000

In 1861, the demand for money continued to decline, but a great deal of caution was exercised by holders of money, in consequence of intelligence being received of the violence of an American captain in arresting the English mail steamer Trent, and carrying off from it the Confederate envoys to Europe, Messrs Mason and Slidell. For a time there was

some fear that this violent act, which met with popular approval in America, would involve us in hostilities.

In 1868, money was easy, at 2½ per cent., but the Bank account showed the reserve to be near the minimum of 10,000,000*l*. The elections for the new Parliament had now been completed, and showed an immense majority against the Conservative Government.

In 1869, the resources of the Bank were accumulating, and the tendency of the rates in the open market was downwards.

In 1870, there was great abundance of money, a great deal of continental money having been deposited here on account of the war, while the suspense of transactions, owing to the Russian difficulty and doubts as to the duration of the war, prevented the free employment of the accumulation. The latest accounts seemed to show that the siege of Paris would be more protracted than was at first expected, while the forced evacuation of Orleans, after a victory by the relieving army of the Loire, revived the hopes of the French.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 2,108,688*l*; in 1868, an excess of 1,440,838*l*; in 1869, an excess of 1,887,409*l*; and in 1870, an excess of 2,666,827*l*. In 1871, there is an excess of 4,970,693*l*.

Discount and Money Market.—The abundance of money, which we have noticed for the last two or three weeks, has increased, and the rates we subjoin are fractionally lower than those we quoted a week ago. The market is again very uncertain, the private and joint stock banks finding it impossible to obtain the rate of 3 per cent., which they allow for deposits, and the discount houses competing with each other for good bills, and so driving down the rates. The market is still farther upset by the competition of foreign houses for six months' bank bills, which have been taken by them as low as 3¼ per cent. The market is in fact once more getting into the condition which existed a few weeks ago, when it became necessary to reduce the allowances for money on deposit without waiting for a reduction of the Bank rate. To-day the demand has been as quiet as at any time during the week, both at the Bank and in the open market.

The changes in the Bank account exhibit a considerable fresh accession of strength. The reserve has increased 595,000*l*, and the bullion in both departments 302,000*l*, the former being now 14,724,000*l*, and the latter 24,194,000*l*—about as high as they were in the beginning of September. The private deposits have also diminished 780,000*l* during the week, the circulation 287,000*l*, and the private securities 430,000*l*—the latter still continuing to be repaid as they mature. In these circumstances, taken in connection with the great abundance of money in the open market and the favourable state of the foreign exchanges, the belief gains ground that notwithstanding the approach of the date when the acceptances to Germany fall due, the Bank is now strong enough to make a farther reduction with safety. The policy of caution has been successful, and as its till is now very full, it is thought that the usual expedient necessary to disperse the hoard of foreign money here may safely and properly be resorted to.

The changes in the Bank of France account are of a favourable nature—the note circulation having been reduced 400,000*l* since last week, though the total issue is still dangerously near the legal limit of 96,000,000*l*.

We subjoin our usual quotations for mercantile paper having various periods to run, subject to the remark which we have already made as to the uncertainty of the market, and the variety of rates at which business is actually done :—

Bank bills—2 to 3 months	3⅜	per cent.
Do 4 months	3½	per cent.
Do 6 —	3¾	per cent
Trade bills—2 to 3 months	3¾	per cent.
Do 4 months	4 ¼	per cent.
Do 6 —	4¼ ½	per cent.

The allowances for money at the private and joint stock banks and discount houses are as follow :—

Private and Joint Stock Banks at call	3	per cent.
Discount houses at call	3	per cent.
Do with seven days' notice	3¼	per cent.
Do fourteen days'	3½	per cent.

These quotations, however, as we have already explained, are becoming to some extent nominal. It would be difficult, if not impossible, to obtain more than 2½ per cent. from the banks and discount houses for any large new sums.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent.		Open Market, per Cent.	
	1870.	1871.	1870.	1871.
Paris	6	6	...	5½
Vienna	6*	7	5½	6¼ ⅜
Berlin	5	4½	4½ ¼	4 ¼
Frankfort	4	4	3½ ¾	3½ ¾
Amsterdam	4½	3	4 ¼	2¾
Brussels	4	5	3½	4⅛
Hamburg	...	...	4¾ 5¼	2¾
St Petersburg	7	8	7	7

* Nominal.

The Stock Markets.—The week has been one of comparative dulness in nearly all departments, but especially in English and Canadian railways, the great rise of the previous fortnight having induced realisations, and weak speculative accounts having been opened under the influence of cheap money, without the investing public coming forward to take the stock off the market. In English railways however, at the beginning of the week, there was some little excitement caused by amalgamations—Great Western and South-Western especially advancing upon the issue of a Parliamentary notice for a working agreement between them and the South Devon and Bristol and Exeter lines; but after the advance in these cases there was an immediate reaction, and the general tone of the market was dull. Yesterday and to-day there was rather more purchasing, both for investment and on account of the bears buying back, while there was fresh excitement upon an announcement of preliminary arrangements being made for a lease of the Sheffield line to the Midland. In the foreign market the weakness of prices has been in sympathy with weaker prices from the continent, especially from Paris in French securities, which are kept down by the report of intended sales of rente by the Bank of France. In the miscellaneous departments there has been no great amount of dealing.

An incident of the week has been the appearance of a new borrowing state—Paraguay—which asks for a "public works loan" of the nominal amount of 1,000,000*l* at 8 per cent. interest, and with a large sinking fund, the return to the investor at the issue price of 80 being estimated at 11¼ per cent. Numerous new companies—principally mining companies—are also announced, but usually only small amounts of capital are asked for.

The following "notice" has been posted in the Stock Exchange :—

Committee Room, 23rd November, 1871.

It has come to the notice of the committee for general purposes that companies have recently invited subscriptions for their capital, both in paid-up shares and shares partly paid, stating in the prospectus that in the allotment preference will be given to applicants for the former class of shares. This practice is in direct contravention of Rule 127, which requires that the prospectus should "set forth the arrangements for raising the capital, whether by shares fully or partly paid-up, with the amounts of each respectively." The committee, therefore, caution members against dealing in shares of companies when the resolutions of the Stock Exchange, which are framed in the general interests of the public, have not been fully complied with.—By order,

(Signed) Francis Levien, Secretary.

This notice, we hope, will do something to check the practice referred to, which is the source of a good deal of scandal, but the real evil is in the Stock Exchange making any rules at all in the matter. The mischief arises from the practice of giving "special" settling days to new companies. Were the rule to be that every bargain made was to be settled for on the usual settling days, promoters of companies would require to be careful, while the committee could act usefully enough in deciding what companies should obtain an official quotation.

English Government Securities.—This market has been so nearly stationary that there is hardly anything to report. Business has been flat, as in most other departments, but prices are sustained by the excessive abundance of money offering for short loans on Consols, the rates being now 1½ to 2 per cent. To-day there has been again a quiet market, and the closing quotation is 93⅜ ½ for money and the December account, and 93½ ⅝ for the January account.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money.		Account.		Exchequer Bills.
	Lowest	Highest.	Lowest.	Highest.	March and June
Saturday	93⅜	93½	93½	93⅝	2s to 7s pm
Monday	93⅜	93½	93⅜	93⅝	2s to 7s pm
Tuesday	93⅜	93⅝	93½	93⅝	1s to 6s pm
Wednesday	93⅜	93¾	93⅜	93⅝	1s to 6s pm
Thursday	93⅜	93⅝	93⅜	93⅝	2s to 7s pm
Friday	93⅜	93⅝	93⅜	93⅝	2s to 8s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.

Ditto New 5 %	105½ 6½	.....	106 7	+ ½

FOREIGN GOVERNMENT SECURITIES.—The market for the week opened rather strongly, Argentine, Egyptian, and Russian stocks continuing to be in demand, but subsequently, on realisations, the tone became dull, and the result of the fluctuations, as will be seen from our subjoined table, is to leave prices very nearly what they were last Friday. In French securities the weakness has been mainly caused by apprehensions of the Bank of France selling its rente, which turn out to be for the present week unfounded; but prices have been weak generally on the continental bourses, indicating a considerable amount of realisation. Spanish were weak in the beginning of the week, but on Tuesday the announcement was made that the sitting of the Cortes had been adjourned without the question of taxing the debt coming before it, and as no Session can be held for some months, the chances against the tax being imposed are considered to be increased. At any rate, there will be no deduction from the next dividend. To-day the markets have continued steady, but with little business doing. Spanish have been exceptionally weak, on account of the previous advance bringing out holders who have acquired a dislike of Spanish stock in consequence of the recent proceedings of the Finance Minister and Budget Committee.

We give below a full account of the prospectus of the Paraguayan loan, to which we have already referred. It is notified to-night by Messrs Robinson, Fleming, and Co., the agents, that in consequence of the large number of applications received, the lists of subscription will be closed to-morrow (Saturday), for London, and on Monday for country applications. The quotation has advanced to-day to 1½ and 1¾ prem.

Annexed are our usual quotations showing the changes for the week :—

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.

ENGLISH RAILWAYS.—This market, with the exception of Great Western and South-Western, was especially dull early in the week—the recent great rise in Dover, Great Eastern, Chatham, and the heavier lines having induced a large number of realisations. Subsequently Great Western and London and South-Western also became dull, the former having a rather sharp fall on Tuesday and Wednesday, from 111½ ¾, the highest point of the week, to 110 ½. North-Eastern, Great Northern, and other heavy lines were also bought before Wednesday in anticipation of good traffics, but although the published returns on Wednesday were good, the advance in prices was not sustained. Yesterday the markets were again better, in consequence of bears buying back, and the partial resumption of investment purchases. To-day there has been comparatively little general business done, attention being mainly directed to the Sheffield and Midland lines, on an announcement being made that preliminary arrangements had been effected for leasing the Sheffield to the Midland. The terms being that the Sheffield ordinary stock is to be guaranteed 3 per cent. for two years, and 4 per cent. in perpetuity, the stock of that line rose rapidly nearly 4 per cent., but Midland were rather weaker, the engagements of the company being considered very onerous. As regards the rest of the market, there was rather a cheerful feeling in the middle of the day, but little business was done, and at the close prices were again weaker—Caledonian and Great Eastern showing a decline of ¾ for the day, and Great Northern A, and Chatham Preference ½ per cent.

The sharp rise in Great Western and South-Western was caused by the issue of a Parliamentary notice for a Bill to authorise working agreements between them and the South Devon and Bristol and Exeter lines, and the various minor lines which go to make up the entire system in the West of England. The notice contains no indication of the exact terms of the proposed agreements, but as the working is at present exceedingly inharmonious and expensive, agreement of any sort can hardly fail to be profitable to all concerned.

A formal announcement has also been made this week by means of a joint circular to the shareholders of the Caledonian and North British Companies of the terms of amalgamation. A statement of these terms is given below, but as they were substantially known beforehand, they have had no effect on the markets.

The definitive announcement which has been made this week of a projected competing railway to Brighton has had very little effect on the existing Brighton Company's stock. The projectors propose to start from Penge, on the South-Eastern and Chatham and Dover Company's lines, and seek to acquire running powers over these lines. The project is therefore considered less formidable than if it had been for a complete line between London and Brighton, and both the South-Eastern and Chatham Companies are likely to object to the proposed interference with them by means of running powers. The London stations of these companies could not accommodate the traffic of an entirely new line, however convenient it might be to receive some of the trains of the existing Brighton line, with which they are working in harmony.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices :

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
Caledonian	118⅛ ⅛	.....	117½ ⅜	— ¼
Great Eastern	49⅝ ¼	.....	48¾ ⅝	— 1⅛
Great Northern	137 38	.....	135½ 6⅜	— 1½
Ditto A	160½ 61½	.....	159½ 60½	— 1

Metropolitan District 6 %	121 2	.....	121 2	... ...

The traffic receipts on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending Nov. 18 to 769,810*l*, being an increase of 66,232*l* on the corresponding week of last year. The aggregate receipts of the half-year to date are now 15,927,100*l*, being an increase of 1,170,548*l* on the corresponding period of last year. The principal increases for the week are—North-Eastern, 12,881*l*; London and North-Western, 8,967*l*; Midland, 7,657*l*; Great Western, 6,434*l*; and Lancashire and Yorkshire, 5,283*l*. The following shows the increase or decrease in each case for the week and for the whole period :—

RAILWAY TRAFFIC RETURNS.

* In these cases the aggregate is calculated from the 1st of August.

FOREIGN AND COLONIAL RAILWAYS.—The feature in this department is the increased demand for India Railway Shares, which, as will be seen from the table below, have risen appreciably. Canadian lines have been scarcely so strong, and Grand Trunks have undergone a decided reaction.

FOREIGN.	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.

Madras 5 %	107 ½	107 ½	... ...

AMERICAN SECURITIES.—There is no interesting feature to notice in this market. A fair amount of business has been transacted, but the quotations for Government bonds have scarcely varied. Railway shares are a trifle lower. Investors in the 5 per Cent. Funded loan of the United States may have their bonds registered in the purchasers' names at the Banking-house of Jay Cooke, McCulloch, and Co., 41 Lombard street, and dividend warrants will be mailed quarterly from the United States' Treasury direct to the holder's address.

The following shows the principal changes in value on the week :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
United States 6 % 5/20 Bonds, exchng. 4/6	91⅛ 2	91⅛ 2	... ...
Ditto 1865 Issue	92 ¼	92 ¼	... ...

Pennsylvania Gen. Mort. 6 % Bonds, 1910	97⅛ 8½	98⅛ 9	+ ¼
Virginia 6 % Bonds	49 51	51 3	+ 2

JOINT STOCK BANKS.—The dealings in this department have been on a fair average scale, and prices have shown steadiness, most of the changes having been in the upward direction. Agra, Anglo-Austrian, Egyptian, and Provincial of Ireland have advanced 1; Standard of South Africa and Union of Australia, 1½; London Chartered of Australia, London and South Africa, ½; Metropolitan, ¼. On the other hand, New Zealand, and English, Scottish, and Australian, have given way ½.

TELEGRAPHS.—This department has shown considerable animation throughout the week, and to-day the market was particularly active. The changes as compared with the quotations given in our last issue are—a rise of 5 in Anglo-American, 2 in French Cables, 1 in Indo-European, ½ in Marseilles, ⅝ in British Australian, ¼ in Falmouth, British India Submarine, British Indian Extension, ⅛ in China Submarine; but West Indian Anglo-Mediterranean shares show a fall of 1, Cuba, of ½, and Mediterranean Extension Preference of ⅛. Telegraph Construction shares have risen 3, but Silver's and Hooper's have fallen 1⅝ and ⅛ respectively.

MINES.—The market for British mines has ruled firm, Devon Great Consols having been done at a rise of 30, while South Caradon shares are nominally 25, and Wheal Bassett 10 higher. Tin Croft shares have risen 8; West Bassett 3; Wheal Seton and South Wheal Frances 2½; Marke Valley 1½; East Caradon 1; Drakewalls ¾; Great Laxey and Wheal Grenville ½; but West Chiverton have declined 1, and Kingston Downs ¼. In the foreign market the changes have been of less importance, but Cape Copper have improved 1½; Russia Copper and Panulcillo Copper ½; Chontales, Don Pedro, and Yudanamutana ⅛, and Pacific shares show a fall of ¼ on the week.

MISCELLANEOUS.—A steady tone has characterised this department. Purchases have predominated, and an occasional advance in values has been the result. Submarine Cables' Trust Certificates are 6 better; Crystal Palace stock has risen 2; while there is an improvement of 1 in Australian Agricultural, Native Guano, Peel River Land, and Roumanian Government Bridges Annuities; ½ in London Financial; ¼ in London General Omnibus, and London Tramways. The adverse movements are a fall of 1 in Nantyglo, and ¼ in North Metropolitan Tramways.

It is stated that the share list of the Leicestershire Ironstone and Smelting Company (Limited) will close on Tuesday, the 28th inst., for London, and on Thursday, the 30th inst., for the country.

The nominal quotations for the new undertakings to-day were :—Limmer Asphalte shares, 3¾ to 4; United Limmer, 2 to 1½ dis.; Anglo-Austrian Bitumen, 3 to 2 dis.; Anglo-Hungarian Bitumen, par to 2 premium; Anglo-German Bitumen, 3 to 2 dis.; Native Guano, 29 to 30; Phosphate Sewage, 20 to 21; Sombrero Phosphate, 1 dis. to par; Patent Gas, 12½ to 13; new shares, 5¾ to 6¼; Glasgow Tramway, ⅜ to ⅝ pm.; Emma Mining shares, 1 to 2 pm., and the paid-up shares 2 dis. to par.

BULLION AND EXCHANGES.—In the foreign exchanges this afternoon, bills on the continent were offered, and rates have risen compared with last week. The bullion market has continued to-day in the condition described in the following circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week :—

Gold.—The imports from France during the week have fallen off considerably, but as there is not the slightest demand for abroad, all amounts lately received have been sent into the Bank, the total purchased being 339,000*l*. Sovereigns to the value of 87,000*l* have been taken out for transmission to Egypt. The Elbe has taken 8,850*l* to the West Indies, and the Mooltan 35,000*l* to Bombay.

Silver.—The market is not now so firm, as purchases for the East have, for the present, to some extent been completed. The price is, however, only fractionally lower, and may be quoted as 60¾d to 60¾d per oz standard. The Elbe has taken 12,300*l* to the West Indies, and the Mooltan 197,800*l* to Bombay. We have received about 66,000*l* from New York during the week, and 175,000*l* Sycee. from China.

Mexican Dollars.—Owing to the scarcity of this coin prices are very firm, and some parcels are held for an advance on the rates lately quoted. About 15,000*l* have come to hand during the week from New York.

Exchange on India for Banks' drafts at 60 days' sight is 1s 11⅜d to 1s 11⅛d per rupee.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; ditto refinable, 77s 10½d to 77s 11d per oz std, last price: South American doubloons, 74s per oz. Silver—Bar silver, fine, 5s 0⅞d to 5s 0⅞d per oz std, last price; ditto containing 5 grains gold, 5s 1d to 5s 1¼d per oz std, last price; Mexican dollars, new, 4s 11⅜d, old, 5s 1d per oz, last price. Five-franc pieces, 3s 11⅛d each, last price none here.

The sum of 45,000*l* in foreign coin was sent into the Bank to-day, while 51,000*l*, in sovereigns, was withdrawn for transmission to the Cape.

According to the *Gazette* return, the imports of the precious metals into the United Kingdom during the week ended November 22 were—gold, 213,172*l*; silver, 337,704*l*. The exports were—gold, 104,525*l*; silver, 288,870*l*.

We are indebted to Messrs J. Allard and Co., of Paris and London, for the following telegram, giving to-day's exchange and bullion quotations in Paris :—

MEETINGS OF COMPANIES NEXT WEEK.

MONDAY, November 27.

South Metropolitan Gas, extraordinary general, London Tavern.
Blackrock and Passage Railway, general, Cork.

TUESDAY, November 28.

Imperial Continental Gas Association, general, City Terminus Hotel.
Eastern Bengal, general, Guildhall Tavern.
Italian Irrigation Canal, adjourned, Turin.
General Mining Association, general, 52 Old Broad street.

WEDNESDAY, November 29.

Illinois Central Railway, general, Chicago.
Italian Tobacco Monopoly, extra general, Florence.
Central Argentine Railway, special, Palmerston buildings.
Madras Irrigation, general, Queen street place.
Waterford and Central Ireland, general, London Tavern.
London and South-Western Railway, special general, Waterloo Station.
Pontgebaud Silver Lead Mining, general, Paris.

THURSDAY, November 30.

Lambeth Waterworks, general, Kennington park road,
Trust and Loan Company of Upper Canada Extension, City Terminus Hotel.

NOTICES AND REPORTS.

STOCKS.

Chilian 4½ per Cent. Bonds.—The sum of 14,089*l* set apart in June has been employed in the purchase of 16,400*l* bonds.

Egyptian—Viceroy's 7 per Cent. Loan, 1865.—The numbers of 3,491 bonds, representing the sum of 95,800*l* have been drawn for redemption at par on the 8th January next.

New Granada Dividends.—Messrs Baring Brothers and Co. notify that the dividend warrants on New Granada 3 per Cents. on Old Active bonds at the rate of 7s 8d per 100*l*, and on the Deferred bonds, at 2s 11d per 100*l*, will be paid on and after the 1st December.

New South Wales Debentures, 1866.—The fifth annual drawing of 100,000*l* will take place on the 11th December.

Swedish 4½ per Cent. Loan for 2,223,000l.—It has been notified that there has been "definitively withdrawn from circulation and destroyed by fire 11,499 bonds, amounting to 1,663,100*l* of the above loan, whereby the total amount of this loan in circulation is 559,900*l*."

RAILWAY COMPANIES.

Great Western — London and South-Western.—The Great Western, Bristol and Exeter, and London and South-Western Railway Companies are applying to Parliament for power to enter into working agreements among themselves and with twenty-five smaller companies, which make up the railway system of the respective districts.

Swedish Central Railway—5 per Cent. First Mortgage Bonds.—Messrs Bischoffsheim and Goldschmidt invite applications for 300,000*l* in 5 per cent. debentures, which are issued at 80*l* per 100*l* nominal. The interest accrues from the 1st September last, and the principal will be repaid by an accumulative sinking fund of 1 per cent. per annum. The works on the line are being rapidly progressed with, and the bonds will form a first charge on a line 60 miles long. With regard to probable traffic, it is stated:—

The Swedish Central Railway traverses the great mineral field of Grangesberget, not only the richest in Sweden, but one of the richest in the world, and abounding in pure iron, copper, lead, and zinc ores. By arrangement for through rates of traffic, entered into with the Köping Hult and State railways, it is expected that these ores can be delivered at the export market of Gothenburg at a price which will enable the ironmasters of the east coast of England to employ them in preference to hematite. A considerable traffic in iron ore, charcoal, and manufactured produce existed in the district previous to the commencement of the railway, and since it has been in progress several large undertakings for the manufacture of Bessemer steel have been projected.

BANKS.

Anglo-Egyptian Banking.—At the adjourned meeting it was resolved to increase the capital from 800,000*l* to 1,600,000*l*, by the issue of 40,000 shares of 20*l* each, of which 20,000 are to be offered to the shareholders on the register on the 16th instant at 5*l* premium per share, payable by instalments extending to August next. The issue of the second half of the new shares, at not less than 5*l* premium per share, is not to take place before the 1st of December, 1872. The premium on both issues is to be carried to reserve.

MISCELLANEOUS COMPANIES.

Anglo-American Oyster, Limited.—Capital, 50,000*l*, in 2*l* shares—one-half to be first issued. It is stated that oysters can be imported from America into England at 12s per bushel, and that they are then readily saleable for from 50s to 60s per bushel. It is announced that Mr Parker Gilmore, the general manager of the company, has perfected a process whereby only 2 per cent. of the oysters are lost during the whole voyage.

Bilbao Iron, Limited.—Capital, 500,000*l*, in 10,000 shares of 50*l* each. The extensive iron mines of Galdames, La Cenefa, Berango, Moruecos, and El Cerilla, near Bilbao, at present conceded by the Spanish Government to Sir John Brown and Mr William Fowler, will be handed over to this company in perpetuity subject only to a royalty of 1s 3d per ton. The Bilbao district is stated to be celebrated for the purity and richness of its iron deposits. The "Galdames" is described as a mountain of iron, readily worked by quarrying, and the other mines contain "immense deposits of the finest quality." Concessions for the construction of a railway from the mines are also acquired, a line of steamers will be established, and a minimum profit of 20 per cent. is estimated as the probable result.

Bombay Gas.—Interim dividend announced at the rate of 6½ per cent. per annum, 1,500*l* is added to reserve, and 1,698*l* carried forward.

[CONTINUED FROM PAGE 1437.]

Bridge Mills Spinning and Manufacturing, Limited.—Capital, 50,000*l*, in 10*l* shares. The purchase of the cotton mill and weaving shed belonging to the firm of Ralph Rawstron will be effected for 22,000*l* (only 2,000*l* in cash). The machinery includes 22,764 spindles and 348 looms, with all fittings, &c., and it is stated there is a constant demand for cloth made at the mill.

Britannia India-Rubber and Kamptulicon, Limited.—Capital, 80,000*l*, in 5*l* shares. An existing business at Bow common will be acquired for 30,000*l*, and it is intended to extend the same.

British and Foreign Patent Fuel, Limited.—Capital, 100,000*l*, in 10*l* shares. This new company has for its object the utilisation of coal dust, and by so doing to convert an at present great waste into a good and valuable fuel. The purchase of the works erected by the Compressed Coal Company, at Whitecroft, in the Forest of Dean, will be effected, together with all patent rights for the sum of 30,000*l*, and it is stated that the advantages afforded by the compressed block coal will give the company an active business and good profits.

British Australian Telegraph.—The cable between Port Darwin and Java has been laid successfully.

Canadian Titanic Iron, Limited.—Capital, 75,000*l*; first issue, 60,000*l*, in 5*l* shares. 25,000*l* will be expended in the purchase of a "practically inexhaustible" deposit of Ilminite or Titanic iron ore, situated on the Gouffre River, about 60 miles from Quebec. A further 25,000*l* will be spent on blast and puddling furnaces, &c., and the company will then, it is calculated, be in a position to supply over 9,000 tons of pig iron annually, at a profit of 20,000*l*. Canada is a large consumer of British iron, and this company will save expenses of shipment and import duty.

Ilfracombe Hotel.—Dividend, 8 per cent. premium.

Indigo Company of London, Cocanada, and Madras, Limited.—Capital, 75,000*l*, in 5*l* shares. It is announced that an increased production and a better quality of indigo are now generally demanded by our manufacturers, and this company will endeavour in some measure to supply the want. Operations will be carried on in the Godavery district of Madras, and the support of the natives is calculated upon as a nucleus for further operations. Ten factories have been purchased.

Midlothian Mineral Oil, Limited.—Capital, 75,000*l*; first issue, 50,000*l*, in 5*l* shares. The purchase of 150 acres of oil-bearing shale, in the county of Edinburgh, near West Calder, will be made, and retorts and machinery will be erected capable o treating 120 tons a day. This industry is stated to be a very thriving one in Scotland, and the property is estimated to contain fifty million gallons of oil.

Paraguayan 8 per Cent. Public Works Loan.—This, the first loan of the Republic of Paraguay, has been offered to the public for subscription by the firm of Messrs Robinson, Fleming, and Co. The bonds, issued in sums of 1,000*l*, 500*l*, and 100*l* each, are redeemable at par by means of an accumulative sinking fund of 2 per cent. per annum in about 21 years, by quarterly drawings. Principal and interest are payable quarterly in London. By special stipulation of the general bond this loan is to be free from all Paraguayan taxes. The issue price is 80*l* per cent., payable by instalments until next March, and interest accrues from the 15th September last. the prospectus states :—

The principal objects proposed to be effected by this l an are to l quidate the floating debt of about 213,000*l*, and to complete the State railway from Asuncion to Villa Rica, and aid generally in the restoration of roads and public works, and the development of the resources of the country.

In order to afford what is considered ample time for this, under the present system of Free-trade and Constitutional Government, the requisite funds to meet the interest coupons and sinking fund for two years, up to the 15th September, 1873, will be set aside and retained in England.

The general bond also provides for the remittance of funds to meet the interest and sinking fund six months before the expiry of this period, and therefore regularly, so as always to place the requisite funds six months in advance in London.

At the price of issue, and taking into account the action of the sinking fund, this loan yields the subscribers a return of about 11¼ per cent. per annum.

The Customs receipts and State property are specially hypothecated.

MINING COMPANIES.

Boscaswell Downs Tin and Copper Mines Association, Limited.—Capital, 54,000*l*, in 18,000 shares of 3*l* each, to be fully paid up at once. The purchase of this "old and extensive set"—1½ miles long by 1 mile wide—at St Just, near Penzance, will be effected for 11,000*l* and 11,000 shares. The mines are already, it is stated, worked at a profit, which can be increased to 12,000*l* a year by a small additional outlay, and the rise in the price of tin will increase the return. There are various lodes, and the royalty is $\frac{1}{24}$th.

Eberhardt and Aurora.—At the meeting the directors were authorised to issue 6,500 new shares of 10*l* each.

Great Mountain Silver-Lead Mining, Limited.—Capital, 10,000*l*. It is proposed to purchase the Pen'allt Silver-Lead Mining Company, now in liquidation, for 2,000*l*, and to lease mining property near Carnarvon.

Redington Quicksilver, Limited.—Capital, 220,000*l*, in 10*l* shares. For the sum of 206,000*l* (65,000*l* in shares) the Redington Quicksilver Mines, situated in Knoxville, Lake County, California, will be handed over to the company. This, "the first quicksilver mine which has ever been placed upon the English market," produced last year 4,546 flasks of quicksilver, only one furnace being at work, and now, with two furnaces in operation, it is calculated that 10,000 flasks can be produced annually, which, saleable at the contract price of 40 dols, would produce 400,000 dols gross, or 256,000 dols net. This is equal to a dividend of 24 per cent.; if sold at 50 dols per flask, it is estimated the dividend would be 34 per cent. The mine is 4,200 feet long by 900 feet wide. Contracts for more than 7,200 flasks per annum have been accepted. The share list closes on Tuesday next.

West Wheal Margaret Tin Mining, Limited.—Capital, 12,000*l*, in 1*l* shares. This mine, situate in the district of Lelant, Cornwall, is held under a 21 years' lease, at a royalty of $\frac{1}{20}$th. The mine is said to contain the same lodes of tin as the "Wheal Reeth," the "Wheal Mary," and the "Wheal Margaret."

The Commercial Times.

POST OFFICE ANNOUNCEMENTS.

The next mail for New Zealand, via San Francisco, will be despatched from London on the evening of Thursday, the 14th December.

The undermentioned offices have been opened for the transaction of telegraphic business since the publication of the last list of postal telegraph offices:—England—Astley Bridge, near Bolton; Cwm Avon, near Taibach; Fairford, near Swindon; Handforth, near Manchester; Lechlade, near Swindon; Norham (Northumberland); Pyle, near Bridgend; Stockton, near Rugby; Turner's Hill, near Crawley; Warley Common, near Brentwood; Wickwar, near Wotton-under-Edge; Wilmslow, near Manchester; Winkfield, near Windsor. Scotland—Ceres, near Cuper (Fife); Moniaive, near Thornhill. Ireland—Ballywalter, near Newtownards; Blacklion, near Enniskillen; Ennistimon; Kinvara, near Oranmore; Milford, near Letterkenny; Nowmarket-on-Fergus (Co. Clare); Ramelton, near Letterkenny; Rathmullen, near Letterkenny; Tulla, near Limerick. Metropolitan district—King's cross (5 Caledonian road), N.; Upper Tooting, S.W.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The grain trade ruled quiet to-day, though factors were not prepared to make any concession. Sales progressed slowly, the receipts from English farmers being small, while the show of foreign was good. Flour was held steadily, at Monday's currencies. Maize and oats fully maintained the late advance; but barley, beans, and peas were neglected. This week's imports of foreign and colonial produce into London have amounted to 36,980 quarters of wheat; 3,780 barley; 33,930 oats; 25,050 maize; 1,800 beans; 6,160 peas; 2,300 sacks and 1,720 barrels of flour.

At Liverpool and Wakefield this morning the wheat trade ruled dull, and rather less money was accepted in some instances.

The Liverpool cotton market has been active during the past week, and a large business has been done at an advance of about ⅛d per lb since last Friday. The total sales are 111,660 bales, of which the trade have taken 79,470 bales, speculators and exporters 32,190 bales. The imports for the week are 75,843 bales; the actual exports, 9,812 bales; and to-day's stock is 525,900 bales. Quotations for American descriptions have advanced $\frac{1}{16}$d per lb, and East Indian $\frac{1}{16}$d to ⅛d per lb since this day week. To-day the market closed strong; sales, 18,000 bales; prices in seller's favour.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended November 23, 1871:—

	Imported.	Exported.
American bales	24,056	847
Brazilian	7,385	991
East Indian	59,958	9,337
Egyptian	7,141	118
Miscellaneous	668	3
Total	99,208	11,296

At New York, on November 23, middling Upland cotton was quoted at 18⅞ cents per lb.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, Oct. 27:—We have to report an exceedingly dull week in our cotton market, the business reported only aggregating some 600 candies of all sorts. The news from England, although it has been sufficiently discouraging to deter shippers from operating with any freedom, has so far had but little effect on prices, to-day's quotations only showing a decline of 5 rs to 8 rs as compared with last mail's. The stock of ready cotton continues very small, as although we have now steady arrivals both of sawginned, Dharwar, and Bhownuggur descriptions, they are for the most part being delivered against contracts made some time since. The quality of the Dharwar does not yet show any improvement, black leaf being particularly complained of. Small samples of new Hingunghat have been received, but they have evidently been picked before maturity and do not fairly represent the quality of the crop, which is likely to be a very fine one. Accounts from the Dhollerah districts report a full crop of Dhollerah cotton, but a deficiency of ⅓rd to ½, or (say) 20,000 bales in the out-turn of Bhownuggur. From Gujerat the reports as to the cotton crop continue good, but grain is likely to be scarce, and from the Berars similar accounts are now being received. From Dharwar we learn that the weather continues favourable, and prospects very encouraging. From Tinnevelly we have a telegram, dated yesterday, which quotes 7¼d, c. and f.

Export of Cotton from Bombay to October 27.

	1871.	1870.
London bales	21,705	1,570
Liverpool	708,649½	812,554
Total, Great Britain	730,354½	814,124
Channel for orders	37,333	10,379
Continent	273,789½	135,112
China	49,491½	48,428
Grand total	1,090,968⅓	1,008,043

Actual exports since last mail left, 6,482½ bales.

The Imperial Ottoman Bank have furnished the following report, dated Alexandria, November 10:—There has been a very active cotton market all the week, and although accounts from Europe continue discouraging, prices here have been supported by a good general demand and large sales. Fair open, with staple, 9½d; good fair, with staple, 9¾d; fully good fair, with staple, 10⅛d to 10¼d per lb, f.o.b. Arrivals from November 4th to November 10th, 60,650 crs. Sales from November 4th to November 10th, 43,692 crs. Shipments from November 3rd to November 10th:—England, 11,402 bales; Italy, 1,417 bales; Austria, 358 bales—total, 13,277 bales.

A steady tone has prevailed in the colonial produce markets throughout the week. Sugar has been especially active, and closes at an advance of 6d on the week. The stock in the United Kingdom is now 112,090 tons, against 155,445 last year, while the quantity of East India sugar afloat for the United Kingdom and continent (not including Government exports from Java) is 36,000 tons, against 23,300 in 1870, and 24,500 in 1869. The result of the Dutch sales having disappointed expectation, the coffee market has ruled somewhat dull, though prices do not close at the worst point. The quantity of East India coffee afloat (not including Java exports) is 12,900 tons, against 7,400 in 1870, and 9,850 in 1869. Cocoa is without material change. Rice afloat has been inquired after, but on the spot has been quiet. Spices generally have been firm, while tallow and oils are rather dearer on the week.

Messrs Southey, Balme, and Co. report:—The fifth series of colonial wool sales this year opened with the following catalogue—Sydney, 1,959 bales; Cape, 1,622; Port Phillip, 1,363; New Zealand, 509; Adelaide, 196—total, 5,649 bales. The attendance of buyers from the home districts is very numerous, and representatives of the continental trade are also here in large numbers, good spirit is shown in the bidding, and prices may be quoted at an advance of about 1d per lb on those of last sale. The supply of Cape wool though large, proportionately with that from the other colonies, is not equal to the quantity usually in the market at this period of the year, and the demand for this sort consequently is good at the full average advance. The arrivals to date are—Sydney, 20,058 bales; Port Phillip, 8,263; Tasmania, 619; Adelaide, 1,399; New Zealand, 6,233; Swan River, 36; Cape, 32,205—total, 68,813 bales; of which some 5,000 bales Cape have already gone forward.

Messrs A. C. Stewart and Co., of Port Elizabeth, writing on Oct. 14, thus refer to the wool trade:—Contrary to expectation, wagons continue as scarce as ever, although the weather has been favourable for some time. The question of transport is a matter of great anxiety to business men, as a large quantity of last season's clip is still delayed in the country towns, and the

new clip is coming in very rapidly. We cannot see at present how it will be brought to the port of shipment. The traffic with the Diamond Fields absorbs nearly all the available means of transport, which is insufficient even for that alone. A Transport Company is being formed here for the Diamond Field line, and we hope to see this extended all over the country in due time. The arrrivals during the past fortnight have been very limited, and consist chiefly of greasy and country-scoured wools. Scoured—The last mail brought out numerous orders, and prices have been driven up fully 1d per lb, both for Uitenhage and country washing. Fleece—Arrivals very trifling. All has been placed immediately at fully ½d advance. Grease—The American demand continues unabated, and for good average parcels of long-stapled 9d is freely paid. Washing descriptions have advanced ½d; the supply is small.

The annexed is dated New York, Nov. 11:—Trade has picked up considerably since the abatement of the excitement over the election, though the markets, with very limited exceptions, cannot be called active. The season is so far advanced that most departments of home trade are settling into the usual dulness incident to the late autumn and winter months, while the export trade does not have that free scope and animation that are usually witnessed when shippers are favoured with fair margins. Nevertheless, the volume of the outward trade is somewhat larger, from which the freight market is deriving some benefit. Some kinds of imported goods are pressed for realization, in expectation of important changes in the tariff at the ensuing session of Congress, with the consequence of a weakness in prices in such cases, especially as the money market continues close, and distributors are loth to enlarge their stocks during the closing months of the year. The money market shows little change, though it appears to be slowly working into a more comfortable position. Call loans are readily obtainable on acceptable collateral at 6 to 7 per cent., while mercantile paper of high grade is negotiated at 9 to 12 per cent., and so on up to 18 to 20 for second class. Gold and foreign exchange have been subject to very little variation in rates, though the former has ruled for the most part rather weak.

THE COTTON TRADE.

Cotton continues in good demand, and prices of every description have had a hardening tendency, in most instances a slight advance being quoted. In Sea Island the business has been chiefly in the commoner qualities, and prices show no change. American has been in good request, and has risen partially ¼d per lb. New York advices to the 23rd instant quote middling Upland 18⅞ cents, costing to sell in Liverpool 10d per lb, by steamer. Brazil continues in good demand, and prices have an upward tendency, but without quotable change from last week's circular. In Egyptian a good business has been done, and prices are fully ¼d per lb dearer than last week. East Indian continues in increased demand, with active buying on speculation and for export, and prices have advanced partially ¼d per lb.

In cotton "to arrive" and for future delivery the transactions have been moderate. The latest quotations are—American, basis of middling, not below good ordinary (from any port), shipment November-December, 9½d—Savannah, ship named, 9½d; October-November shipment, 9½d; loading, 9½d—New Orleans, shipment November-December, 9¾d; December-January, 9¾d—Dhollerah, fair new merchants, shipment October-November, Cape, 7½d; Canal, not below middling fair, 7 7/16d; delivery January-February, not before 20th January, not below middling fair, 7¾d; March, 7½d—Bengal, fair new merchants, September sailing, 6¼d per lb.

The sales of the week, including forwarded, amount to 111,660 bales, of which 19,810 are on speculation, and 12,580 declared for export, leaving 79,270 bales to the trade.

November 24.—The sales to-day will probably amount to about 15,000 bales, with a strong market.

PRICES CURRENT.—November 25, 1869.

	bales.
An increase of import compared with the same date last year of	785,390
An increase of quantity taken for consumption of	495,210
An increase of actual exports of	216,700
An increase of stock of	152,180

In speculation there is an increase of 368,010 bales. The imports this week have amounted to 75,843 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to Nov. 17) is 124,000 bales, against 228,000 bales at the corresponding period last year. The actual exports have been 9,812 bales this week.

LONDON.—November 24

The cotton market has shown a fair amount of activity this week, and a slight upward movement has taken place in the quotations. Our usual parcel having failed to reach us, we are unable to give the detailed statistics this week.

NEW YORK.—Nov. 10.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Nov. 10. From the figures thus obtained it appears that the total receipts for the seven days have reached 105,400 bales, against 96,708 bales last week, 93,969 bales the previous week, and 82,538 bales three weeks since, making the total receipts since Sept. 1, 1871, 565,195 bales, against 678,556 bales for the same period of 1870, showing a decrease since Sept. 1, this year, of 113,361 bales. The exports for the week ending this evening reach a total of 41,151 bales, of which 30,807 were to Great Britain, 5,711 to France, and 4,633 to rest of the continent, while the stocks as made up this evening are now 297,186 bales. Below we give the exports and stocks for the week, and also for the cor-

responding week of last season, as telegraphed to us from the various ports to-night :—

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 11,129 bales, while the stocks to-night are 18,537 bales *less* than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Nov. 3, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph :—

Ports.	Receipts since Sept. 1.		Exported since September 1 to				Coast-wise Ports.	Stock.
	1871.	1870.	Great Britain.	France.	Other Foreign.	Total.

We have had a quiet, uneventful market the past week. Prices have remained without change through the entire week, until to-day, when they were reduced $\frac{1}{8}$c on ordinary and good ordinary. The offerings have at no time been excessive, and yet buyers have found but little difficulty in making selections, holders readily supplying all demands. As the receipts for the first two days of the week were much less than for the two days of the previous week, and in fact have, during the entire week, shown a very considerable falling off from last year, lower crop estimates have generally prevailed, which fact, in the absence of any adverse influence, has imparted a better tone to the market. Still the dulness at Liverpool and our gradually-increasing stocks are heavy weights to carry; hence with a limited inquiry on foreign account, and spinners' takings confined to supplying immediate wants, the close was easier at 18$\frac{1}{2}$c for middling Uplands and 17$\frac{1}{2}$c for good ordinary on the spot. For future delivery the transactions have been less extensive though liberal, with prices about the same as a week ago, low middling closing at 18c for November, 18$\frac{1}{4}$c for December, 18$\frac{7}{16}$c for January, 18$\frac{3}{4}$c for February, 19c for March, and 19$\frac{3}{16}$c for April. The total sales of this description for the week are 83,664 bales, including 864 bales free on board. For immediate delivery the total sales foot up this week 14,387 bales, including 7,320 bales for export, 5,121 for consumption, 435 for speculation, and 1,511 in transit. Of the above, 474 were to arrive. The following are the closing quotations :—

	Upland and Florida.	Mobile.	New Orleans.	Texas.
	c c	c c	c c	c c
Ordinary per lb	16 @ ...	16$\frac{1}{2}$ @ ...	16$\frac{1}{2}$ @ ...	16$\frac{1}{2}$ @ ...
Good ordinary	17$\frac{1}{2}$ ...	17$\frac{5}{8}$ ...	18 ...	18$\frac{1}{4}$ ...
Low middling	18$\frac{1}{8}$ ...	18$\frac{3}{8}$ ...	18$\frac{3}{4}$ ...	19 ...
Middling	18$\frac{3}{4}$ ...	18$\frac{3}{4}$ ...	19$\frac{1}{4}$ ...	19$\frac{3}{4}$ ...
Good middling	19$\frac{3}{4}$ ...	19$\frac{3}{4}$ ...	20$\frac{1}{4}$ ...	20$\frac{1}{2}$ ...

For forward delivery the sales (including 864 free on board) have reached during the week 83,664 bales (all low middling or on the basis of low middling).

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports, receipts and shipments for the week, and stock to-night and for the corresponding week of 1870 :—

	Week ending Nov. 10, 1871.			Week ending Nov. 10, 1870.		
	Receipts	Shipments.	Stock.	Receipts	Shipments.	Stock.
Augusta	6650	6776	13355	8669	5015	8656
Columbus	1511	1953	5110	3300	4124	5560
Macon	3825	2556	8846	5395	4124	8462
Montgomery	3183	1907	7448	3719	2768	6696
Selma	3094	2969	4728	2830	2622	6039
Memphis	14756	10725	19261	16164	13662	15031
Nashville	2049	1386	2048	1188	1154	1746
	35069	28272	60776	41265	33469	52070

The above totals show that the interior stocks have increased during the week 6,790 bales, and are to-night 8,706 bales *more* than at the same period last year. The receipts have, however, been 6,206 bales *less* than the same week last year.

The exports of cotton this week from New York show a decrease since last week, the total reaching 12,357 bales, against 13,922 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1871; and in the last column the total for the same period of the previous year :—

—*New York Commercial and Financial Chronicle.*

NEW YORK, November 17.—According to Messrs Moffatt, Davidis, and Co.'s report, the week's receipts of cotton at all United States' ports have been 102,000 bales, and since the 1st of September, 670,000 bales. Shipments to England, 56,000 bales; ditto to France, 3,000; and to the continent 1,000 bales. Total since the 1st of September, 289,000 bales. Stock at all ports, 331,000 bales. Middling Upland, 9$\frac{9}{16}$d, cost and freight, per steamer.

NEW YORK, Nov. 21.—The receipts of cotton at all United States' ports for the last four days have been 50,000 bales. Shipments to England, 25,000 bales; ditto to the France, 3,000 bales; ditto to the continent, 3,000 bales. Middling Upland, 9d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, Nov. 23.—Throughout the week this market has continued to harden, and prices to-day are $\frac{1}{4}$d per lb on yarns and 3d per piece above those of this day week, and the tendency is still upwards. The business of late going on has been of a quiet nature yet considerable in extent, and whereas lately stocks were numerous and on the increase (especially in cloth), it is now difficult to find staple productions which producers can deliver this year. As the orders lately placed have strengthened the position of producers, they are under no necessity to sell further, unless at extreme rates, which naturally limits business. The market closes with only a moderate business in progress, but prices tending upwards.

BRADFORD.—A more cheerful tone pervades the wool market, though the transactions are only of a limited character and to cover immediate and pressing wants. The demand is apparent in most descriptions of wool. Quotations generally are still very firm, and in some quotations, as in Irish wethers, have an upward tendency. There is no appreciable change in the yarn market. Business is still restricted by the high quotations. The piece market remains quiet. The orders placed for any quarter are very scanty. Prices are very firm.

ROCHDALE.—The only flannels for which there seems any demand are the low-priced, but there are no stocks of either fine or coarse; and moreover the wool suitable for making them is almost unattainable. Yorkshire goods are quiet, but prices are not in the least less firm.

LEEDS.—The woollen cloth market has been quieter. The continued and almost uninterrupted cold weather makes it probable that an active spring trade will not set in until late, and merchants therefore think it advisable to delay their repeat orders. A good business has been done in hair lists, at the full rates of former transactions.

NOTTINGHAM.—Business in the lace trade continues in a healthy state. In the cotton department rice nets are inquired for, as also are narrow edgings. and there is also a good business doing in curtains, while hair nets are in rather better request. In the silk branch there is no material change. The market for lace yarns is firm, and the value of raw silk is stationary. The hosiery trade continues brisk. Hosiery yarns firm, at former quotations.

BELFAST.—Flax—Increased supplies as compared with preceding week appeared in our market. Demand was tolerably active, at unchanged prices. Yarns—Quietness is the prevailing characteristic of this department. Prices remain unaltered. Linens (brown) powerloom—Demand has been of a steady character for many descriptions. Handloom—Transactions have been to a fair extent, especially in heavy linens and medium and fine sets of cloth for dyeing. No change in prices. Bleached linens—Demand has been very good for local consumption. Stocks and prices remain without much alteration.

BIRMINGHAM.—Great activity continues to characterise all departments of the local iron trade, and demand being still in excess of supply, the tendency of prices are decidedly upwards. For finished iron they are again higher. In many cases 9*l* is the lowest price for bars, and Birmingham merchants quote 9*l* 5s to 9*l* 10s retail. Sheets are fetching 11*l* to 11*l* 10s per ton, and nail rods 9*l* 10s; but other descriptions are not relatively so high.

CARDIFF.—The activity in the steam-coal trade is fully maintained, the requirements of the foreign markets being fully equal to what they were a fortnight ago. France is gradually resuming her position as the principal purchaser of the steam-coals of this district, and it is evident that before long the clearances to that country are likely to be larger than before the late war. With several of the other continental markets a large trade is done. The ironworks continue to be fully employed.

DUNDEE.—There has lately been rather more inquiry for flax goods on the spot, but business has been checked somewhat by the continued upward tendency of prices. There has been rather more inquiry for tows. Jute continues dull, and common qualities are saleable with difficulty at prices tending in favour of buyers. Fine and good descriptions, however, are in comparatively better demand, and prices of such are well maintained. The demand for flax yarns continues rather weak, and although the tendency of prices is slightly upwards, spinners find it very difficult to get rates corresponding with present prices of flax. For some kinds of linens the demand is scarcely so active as it was, but manufacturers are still well employed. The canvas trade continues active, and for jute goods the demand is still very extensive.

WOLVERHAMPTON.—The different trading concerns here all report great activity. Certain finished-iron firms are full to Midsummer, and customers find it as difficult as ever to get the goods they need. The iron merchants of this town, following in the wake of those of London and Bristol, have put up the retail prices of finished iron another 10s a ton. This is the third 10s since iron began to go up. This last advance makes merchants' prices 9*l* 10s a ton for merchant bars, and the other sorts in the same proportion.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Nov. 10.

The market has been subject to frequent fluctuations in all the leading articles during the past week, but closes with prices showing a partial improvement. Speculative influences have been operating to some extent, and the legitimate demand has also been better. The receipts of flour show a further increase; for the week they are probably the largest of the season; and under this increase, with the dulness incident to the election, prices were somewhat depressed early in the week; but receivers did not offer on sale very freely, preferring to store the surplus receipts, and on Wednesday a better demand sprung up, followed on Thursday by a pretty brisk business in shipping brands at $6.50 to $6.60 for common Western extras, and $6.90 for prime extra State. To-day shipping extras were stronger, but owing to the wet weather, the trade and family brands were shaded a little to sell from the wharf. Wheat has shown a very firm feeling; some demand has been observed for middling, speculation, and export, and all these influences, with reduced receipts here and at the West, gave a stronger tone to the market. On Wednesday the decline in freights have an impulse to business and strengthened prices; there were large sales for export, and the market closes strong, with sales to-day at $1.51 to $54 for No. 2 spring, $1.55 to $1.56 for No. 1 ditto, and $1.56 to $1.58½ for common to good red winter. Winter wheats are scarce and buoyant. Corn has been in better demand for export, while the home trade has been fair. Receipts have been quite small, and the market mainly dependent upon offerings from store. Prices have consequently advanced, Western mixed selling yesterday and to-day at 78c to 78½c in store, and 81c to 82c afloat, closing quiet. In barley there has been a large movement; within a day or two about 100,000 bushels, prime Canada West have been sold at $1.5, both in store and afloat. No. 2 Western held at 85c. Barley malt has also been more active. Oats have been in active speculative demand. The movement in breadstuffs at this market has been as follows:—

RECEIPTS AT NEW YORK.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

There has been little activity in the grain trade this week. The wintry weather has enabled factors to demand full rates for wheat, but the tone of the market at the actual close to-day was rather weak. To have effected any considerable sales a slight reduction must have been submitted to, though the cheapening tendency of money has the effect of inducing speculators to hold on. Farmers' deliveries of wheat have been more restricted than for some time past, but there is a large supply of foreign in store. It appears probable that the trade will continue in its present languid condition for some little time to come. There is as yet no disturbing feature to influence the market, and there is little disposition on the part of either factors or millers to extend operations. The Russian shipping season is now at an end, and the exports from the United States, as ordinarily at this period of the year, will now be curtailed; while the number of wheat-laden vessels on passage, though still large, shows a considerable reduction on last year's return, the actual figures being 382 against 528. Quotations for flour have been maintained, but the sales have not been extensive.

Maize and oats have supported the advance noted in our last issue, but demand has not been active. Barley has ruled dull, but without change in value; while beans and peas have continued firm. The seed market has been inactive.

The following statement shows the imports and exports of breadstuffs into and from the United Kingdom since harvest, viz., from August 26 to the close of last week, compared with the corresponding periods in the three previous years:—

IMPORTS.

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the last eight days 73 grain and seed-laden ships have arrived at ports-of-call, viz.:—39 wheat, 13 maize, 6 barley, 2 rye, 5 beans, 1 rapeseed, 3 palm kernels, 1 ground-nuts, 2 valonea, 1 rapeseed and barley. The floating grain trade has at first been steady in tone, but later the demand fell off. Wheat—Fine cargoes have been in demand at first at higher prices; to-day slow. Maize has been difficult to sell, and prices tending downwards. Barley—Fine cargoes steady; inferior dull. Rye—Several sales have taken place. The reported sales are as follows:—Wheat—24 arrived cargoes: Marianopoli, 52s 6d to 55s; winter, from Taganrog, 49s; white hard ditto, 47s 6d; Ghirka, from Taganrog, 46s; Rostoff Ghirka ditto, 40s 6d to 50s; New Coast ditto, 47s and 49s; Ghirka, from Odessa, 50s and 56s; ditto Nicolaieff, 52s 6d and 54s 9d per 492 lbs; new Saide, from Alexandria, 46s 9d; Chilian, 62s; palish, 51s 6d; Sandomirca, 53s 6d; red winter Baltimore, 51s 6d and 53s 6d per 480 lbs. Shipped or to be shipped, 1 cargo white winter, from Montreal, 61s 9d per 480 lbs. Maize—9 arrived cargoes: Moldavian, 31s 6d and 34s 6d per 492 lbs; Wallachian, 30s 7½d and 31s; Mayagan, 34s 9d and 34s 10½d per 480 lbs. Barley—8 arrived cargoes: Odessa, 27s; Azow, from Taganrog, 26s 9d; Berdianski, 25s 6d; Danubian, 27s 7½d; Nicolaieff, 26s 3d and 27s 3d; Danubian, 26s and 26s 6d per 400 lbs. Linseed inactive, and rather cheaper. Rapeseed quiet, and prices in buyers' favour. Cotton-seed steady, at late rates.

COLONIAL AND FOREIGN PRODUCE MARKETS

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market continues strong with a further tendency to improvement, and prices are 6d to 1s per cwt dearer in many cases. Of West India about 4,100 casks sold to yesterday, including several parcels of Barbadoes at 29s to 35s 6d, and these sales leave very little sugar on show. Yesterday 53 casks crystalised Berbice sold 1s dearer; Middling to fine yellow but small grain 38s 6d to 39s 6d per cwt. A good business has been done in Manilla and other low qualities. Beet sugar commands higher prices for arrival. Fine French loaves have sold equal to about 42s to 42s 6d per cwt laid down here, but the refined market keeps fine. At the sale of Java held by the Netherlands Trading Company yesterday an advance upon the September prices was established. The stock in London has fallen to 52,100 tons against 81,650 tons last, and 81,380 tons in 1869 at the same date. For the Kingdom the deficiency amounts 44,000 tons. Official returns show the duty payments upon refined in ten months to be 56,140 tons, against 67,870 and 40,050 tons in the two previous years.

Mauritius.—Some parcels of soft brown and yellow sold at 28s 6d to 32s.

Bengal.—146 bags sold at 31s 6d to 32s for good yellow Gurpatta.

Penang.—2,100 bags sold privately; brown, 23s 3d; soft yellow and white, 33s 6d to 35s 6d.

Manilla.—About 25,000 bags have changed hands. Ilo Ilo, at 27s; unclayed, 23s 6d to 25s; clayed, 27s to 27s 6d.

Other Foreign.—At auction 421 boxes Guatimala part sold at 25s to 29s for brown; 612 bags Egyptian sold at 28s to 33s 6d; 1,000 bags fine crystallised white beet sold at 39s. Privately 500 casks Cuba sold at 33s 6d.

Floating Cargoes.—One of Havana, No. 11½ to 12, at 30s 9d, for Bristol. One of Bahia at about 25s 6d, and one of which particulars are not given.

Refined.—Several sales have been reported of fine French loaves, for delivery here, at 34s 9d to 35s, f.o.b. This market is firm for dry goods at 40s 6d to 42s, and prices are rather dearer.

MOLASSES.—No sales reported.

RUM.—The market shows an improving tendency, and some few sales have been made at advanced quotations, including Leewards, &c., at 1s 10s to 1s 11d. Demerara, 2s to 2s 3d per proof gallon, according to packages, including some in course of landing. Jamaica has sold at firmer prices, up to 4s 4d per gallon.

COCOA.—Transactions have been limited this week. There were only 398 bags Trinidad offered by auction on Tuesday, which part sold at former prices, from 60s to 73s; and good at 77s to 84s. 68 bags Grenada and 56 bags foreign bought in.

COFFEE.—In the early part of the week some further advance was paid for native kinds, but the result of the Dutch sale on Wednesday rather disappointed general expectations, and this market showed some reduction, chiefly upon the above sorts. Yesterday the tone became firmer, and plantation Ceylon found ready buyers. The public sales during the week have comprised 806 casks 169 barrels 221 bags, which sold at the latest quotations, being as follows:—Low middling to middling colory, 70s to 76s; good middling and bold, 76s 6d to 80s; grey, 68s 6d to 74s. Some parcels have sold privately. 456 bags native part sold at 70s for very bold. Good ordinary quoted at 66s. The last sales afloat were at 67s 3d, and in native East India, at 67s. A good business in the latter on the spot at 65s to 67s. 93 casks 1,445 cases¼4,268 bags East India by auction chiefly sold. Native as above: Wynaad, &c., 68s 6d to 71s for pale and grey; Courtallam, 61s to 71s 6d. 3,365 bags Manilla, 65s 6d to 66s 6d for good ordinary palish Indan. 406 bags

Bontyne, 68s 6d to 69s. 229 bags Java sold at 69s 6d to 70s. 205 bags 1 barrel Jamaica: good ordinary, 63s to 64s. 2,139 bags foreign chiefly sold: washed Rio, 70s to 76s 6d; Guatimala, 65s 6d to 69s; Central American, 69s to 70s per cwt. At the sale of the Netherlands Trading Company on Wednesday prices were irregular, and frequently below valuations. Good ordinary Java about 42 cents. The stock of coffee here is 9,400 tons less than at same date last year, export deliveries having increased about 18 per cent., those for home use being about 9 per cent. larger.

TEA.—Arrivals have been large, and the supplies brought upon the market heavy, which has led to easier rates in many instances. Common to medium grades of black leaf congou have met with most attention. Some of the red leaf teas have sold at easier rates. 10,350 packages have been offered by auction during the week. At these sales red leaf was cheaper. Old season's black leaf of very ordinary quality sold at 8¼d to 9½d per lb. Indian teas steady.

RICE.—At auction 9,410 bags of Necrancie Arracan part sold at 9s 6d to 10s for sea damaged, the sound portion consisting of fair quality being taken in at 10s 6d. A few parcels of white Bengal have changed hands privately during the week at 10s 9d to 12s, and fine Seeta at 12s 6d to 13s; Askoolie, 10s 10½d; Madras, 10s to 10s 4½d; Siam, 9s 6d. An arrived cargo of Necrancie Arracan reported at 10s 3d ex quay. A floating cargo of Rangoon at 10s 10½d; one arrived at 10s 7½d. 600 tons Ballam at 9s 3d per cwt ex quay. The market is now steady.

IMPORTS and DELIVERIES of RICE to Nov. 18, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imports ..... tons	78100	65350	72200	64860

Stock	39800	48900	50050	33550

Deliveries last week, 3,100 tons.

SAGO.—There is a large stock, but all kinds continued firm. At Wednesday's sales 1,629 bags partly sold from 16s 9d to 17s; a few lots 17s 6d for common to fine small grain. 248 boxes were withdrawn above the previous value.

TAPIOCA.—186 bags pearl tapioca part sold at 20s per cwt for medium to extra bold. 389 bags Singapore at 2¼d to 2½d per lb for good colour, but small.

BLACK PEPPER.—The market is ¼d lower, and remains dull, with further arrivals. 2,346 bags (partly of indirect import), were bought in or withdrawn. 176 bags greyish Trang sold at 6⅛d. 271 bags Singapore at 6⅛d to 6¾d for common grey to fair. 166 bags Batavia withdrawn. Privately the sales have been very limited, including Penang, at 6d to 6⅛d per lb and under.

WHITE PEPPER.—As the stock continues small holders do not press sales, and 176 bags Singapore by auction yesterday were taken in at late nominal rates.

OTHER SPICES.—Mace commands high prices. 19 cases Singapore by auction sold as follows:—Fair reddish, 4s 10d; common, 4s 3d; low and broken, 3s 10d. 26 cases brown nutmeg's, 66's, 3s 10d; 63's, 4s 1d; 73 to 71's, 3s 6d to 3s 7d; 107's, 3s 1d, being about former rates. Pimento is dull, and 323 bags by auction were taken in at 2½d. 214 packages spurious cinnamon were sold at 1½d to 2¾d per lb, including damaged. 189 cases Cochin ginger obtained 56s to 72s for rather small part scraped to middling; one lot bold, 91s per cwt. There have not been any public sales of Jamiaca.

SALTPETRE.—The market is rather quiet, but prices remain steady. A few parcels have sold on the spot, viz., about 1,100 bags refraction, 8¾ to 7, 31s 3d to 31s 9d; 5¾ to 4¾, 32s to 32s 3d per cwt.

IMPORTS and DELIVERIES of SALTPETRE to Nov. 18, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imported ..... tons	9760	9580	10140	6430
Total delivered	10180	12260	9900	9860
Stock	1960	2150	4440	4700

Deliveries last week 155 tons.

NITRATE OF SODA.—Steady, at 16s 6d to 17s per cwt.

INDIGO.—Firm, with a good demand for some kinds of shipping Bengal.

OTHER DRYSALTERY GOODS.—Cutch remains quiet; the last sale of fine was at 24s 9d. Gambier firm; several sales have been made at 17s 6d ex ship: on the spot, 17s 6d to 18s paid for block. China galls have sold at 55s. Myrabolanes of fine quality, at 15s to 15s 3d. 51 bales Bengal safflower sold at 5*l* 12s 6d to 9*l* 5s per cwt. Good marks of lac dye have been in some demand. Madras turmeric was bought in.

SHELLAC.—A further rise of 2s 6d to 5s has been established, the latest transactions including fine orange at 8*l* 10s. 748 chests by auction went as follows: livery and second orange, 7*l* 17s 6d to 8*l* 2s 6d; liver, 7*l* 10s to 7*l* 17s 6d; garnet, 6*l* 15s to 6*l* 17s 6d per cwt. The bulk of the above quantity sold.

METALS.—The leading feature of the week has been another rather important rise of about 3*l* to 4*l* per ton upon copper, with an active demand for consumption. Recent very low prices and the reduced stocks also engaged the attention of speculators. A good business has been done, including Chili, &c., at 72*l* 10s to 76*l*; Burra and Walaroo, 82*l* to 84*l*; English, 81*l* to 83*l*. Yesterday, the market became quiet, Foreign tin was firm for several days at the advance, but afterwards weaker both for Banca and Straits. The latter quoted 148*l*. Yesterday, however, a reaction set in, and the price rose to 147*l*. Tin plates are dearer: I. C. coke, 27s per ton. No change can be quoted in lead. Rails and most other descriptions of iron keep steady at the advance. Scotch pig is rather easier than last quoted, but a good business has been done. Last sales for cash were at 68s 9d to 69s per ton.

JUTE.—There have been several sales made for arrival at full prices, and the market is steady although without activity. Transactions on the spot are moderate, including new jute at 23*l* 12s 6d to 28*l* per ton. There is an active demand for jute yarns in Dundee.

HEMP.—Some arrivals of Manila have taken place. The market continues steady. 1,465 bales by auction about one-third part sold at 42*l* to 48*l* 10s for low brown to fair quality. Privately, small sales, including good roping at 49*l* to 49*l* 10s per ton. 550 bales other descriptions withdrawn.

LINSEED.—The market is rather quiet, and prices about the same as before. Calcutta, 62s 6d to 63s; afloat, 63s 6d to 64s; Bombay, 64s to 64s 6d per quarter.

OILS.—Sperm is steady: fine, 92*l*. Cod has been more in demand. Present quotations, 33*l* to 34*l*. Pale seal, 36*l* 10s to 37*l*. Olive very firm, with several sales on the spot. A cargo of Gioja sold at 50*l* per tun, c. f. and i., for the United Kingdom. Palm firm. Fine Lagos, 40*l* 10s. Fine qualities of Cochin cocoa-nut keep scarce, and are disproportionately high. Ceylon dull. Ceylon, 38*l* 10s. Linseed oil has been flat at 34*l* 15s; for delivery in the first four months of next year, 34*l* 5s. A good deal of business has been transacted in brown rape oil during the week at 44*l* 15s to 45*l* 5s per ton on the spot; 44*l* 15s to 45*l* is now the nearest quotation; December, same price; and there are sellers at 45*l* 10s for the first four months of next year; English refined, 47*l*; foreign, 48*l* to 50*l* per ton.

PETROLEUM.—American refined, 1s 5½d to 1s 6d per gallon.

TURPENTINE.—French has advanced to 46s: American, 48s 6d per cwt.

TALLOW.—Since the public sales last Friday prices of foreign have further declined, but the market is now rather more steady. Petersburg new, 48s 6d; March, 49s 3d to 49s 6d. These prices show 6d to 1s per cwt reduction upon the last quotations.

PARTICULARS OF TALLOW—Monday, Nov. 20, 1871.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market continues firm. 132 casks 533 barrels Jamaica, by auction, sold at high prices; low brown to low yellow, 29s 6d to 32s 6d. Sales of West India to-day, 178 casks; for the week, 4,246 casks. 1,875 bags Bengal sold at 30s to 32s for good brown to middling yellow Gurpatta. Privately, a parcel of grainy yellow Mauritius sold at 36s 6d; 330 casks Porto Rico at 34s to 35s per cwt.

COFFEE.—46 cases 248 bags East India, consisting of small lots, sold without alteration in prices. Several floating cargoes of Bahia were sold, but prices did not transpire.

SALTPETRE.—1,394 bags Bengal were taken in. Privately, refraction 5⅜, has sold at 32s. 75 tons low quality sold for arrival at 30s 3d per cwt.

SHELLAC.—100 chests were chiefly taken in.

METALS.—Tin—English, 153*l* to 154*l*. Straits tin sold up to 149*l*, and 150*l* reported to be refused. Scotch pig iron 68s per ton.

OIL.—150 casks palm were taken in. 168 casks cocoa-nut, 34s 6d to 38s 6d per cwt.

TALLOW.—Town reduced to 49s 6d. Petersburg, 48s 3d; March, 49s 3d. 2,149 casks Australian by auction about half sold at 6d to 1s decline; mutton, 44s 6d to 48s; beef, 43s to 46s 6d; inferior in proportion. 150 casks South American mutton sold at 47s 6d per cwt.

ADDITIONAL NOTICES.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that the increased arrivals of oranges from the Azores have been attended with a reduction in price. The first shipment of Valencia oranges per steamer to hand. Lemons of good quality in request. A parcel of American apples has been sold out of condition; any of sound quality would bring a high price. Shipments of Almeria grapes finished, the supply to England being unusually short. Barcelona nuts improving in price. Brazils in fair demand.

DRY FRUIT.—Currants very dull, the trade only occupying themselves in endeavours to buy cheaper. Deliveries very small. Valencias in brisk demand, and an advance established during the week. Figs lower. Sultanas dull.

ENGLISH WOOL.—Market gradually hardening, particularly for long wools.

FLAX.—Market firm.

HEMP.—Market quiet, and not much business passing during the week.

SEEDS.—The seed trade continues quiet, at late rates.

TOBACCO.—There has been but little doing in North American tobacco, the home trade having purchased sparingly, and only as in need. The last importation has put holders in stock of a useful class of strips for cutting In substitutes and segar tobacco there has been a fair business done.

LEATHER.—The supply of fresh leather at Leadenhall on Tuesday was small, and the wants of buyers were also limited, but the transactions of the past week have again amounted to a full average of the season. The demand has been chiefly for crop hides of the lightest weights and of 40 lbs to 50 lbs, the lightest English butts, light English shoulders, good English bellies, light common dressing hides, light kips, English horse hides, and heavy calf skins. Prices remain unaltered.

METALS.—The metal market has been very active all the week, and prices of most descriptions have advanced. Copper has participated in the activity, and a very large business has been done at advancing rates, principally on speculative account. Straits tin has rapidly advanced since yesterday morning from 143*l* to 150*l* per ton. Spelter firm.

METROPOLITAN CATTLE MARKET.

MONDAY, Nov. 20.—The total imports of foreign stock into London last week amounted 16,243 to head. In the corresponding week in 1870, we received 13,487; in 1869, 12,964; in 1868, 5,996; and in 1867, 13,377 head.

In the cattle trade to-day nothing of interest has transpired. About an average supply of beasts has been on sale, but foreign breeds have predominated in number, and some good farming stock has been exhibited. The trade has been slow for all qualities. A few prime Scots have made 6s, but the best runts and Herefords have been disposed of at 5s 8d to 5s 10d per 8 lbs. The top price of the best foreign breeds has been 5s 6d per 8 lbs. The supply of sheep has been only moderate. Transactions have been restricted, and the tendency of prices has been in favour of buyers, a fall of 2d per 8 lbs having taken

place. The best Downs and half-breds have been disposed of at 6s 8d to 6s 10d per 8 lbs. For calves there has been only a moderate demand on former terms. Pigs have changed hands quietly, at late rates.

SUPPLIES ON SALE.

	Nov. 21, 1870.	Nov. 20, 1871.
Beasts	3,250	5,050
Sheep	21,100	19,900

HOP MARKET.

BOROUGH, Friday, Nov. 24.—Very little animation has been apparent in this market; nevertheless, prices have ruled firm, more especially for choice descriptions. Yearlings have sold steadily at the extreme rates previously current. Mid and East Kent at 10*l* to 16*l* 16s; Weald of Kent, 8*l* 10s to 10*l* 10s; Sussex, 7*l* 5s to 9*l* 9s; Farnham and country, 11*l* to 16*l*. Yearlings: Mid and East Kent, 3*l* to 6*l* 10s; Weald of Kent, 3*l* to 5*l* 15s; Sussex, 3*l* to 5*l*; Farnham and country, 4*l* 10s to 6*l*; olds, 1*l* 5s to 2*l*.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Nov. 24.—Moderate supplies of potatoes have been on sale. The trade has been quiet, as follows:—Regents, 90s to 110s; flukes, 110s to 130s; rocks, 85s to 95s; Victorias, 110s to 130*l*.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 24.—Our East India wool sales, the last series of the year, are going off with considerable spirit at somewhat enhanced rates on last September values, the better classes of white realising from ½d to 1½d per lb more, common kinds ruling rather irregularly, but also with an upward tendency. Total quantity offered, 10,000 bales, very little being withdrawn.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 24.—There was only a poor attendance, and the business in wheat was limited, at about last Tuesday's prices. Flour was quiet, and nominally unchanged. Indian corn was in slow demand, but the feeling was steady, and prices were reported without any important variation. Other articles were quiet, and on the whole business moved very slowly.

WAKEFIELD, Friday, Nov. 24.—At this market to-day the wheat trade was very quiet, owing to the fog. No change to note in values. Barley was steady at late rates. Beans and peas were unaltered.

The Gazette.

TUESDAY, Nov. 21.

BANKRUPTS.

George Parker, Dean street, Soho, victualler.
John Box, Cheltenham, wine merchant.
John Pardoe Ferris, Heybridge, Essex.
Thomas Johnson, Llandudno, Carnarvonshire, hotel keeper.

DUNN'S "ESSENCE OF COFFEE," 1s and 2s a Bottle.

DUNN & HEWETT'S "BROMATINE," a Cocoa deprived of its superfluous Butter, 6d a Packet.

MANUFACTORY—PENTONVILLE, LONDON.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

FINE FLAVOURED STRONG BEEF TEA at about 2½d a pint.

Ask for LIEBIG COMPANY'S EXTRACT OF MEAT, requiring Baron Liebig the Inventor's Signature on every jar, being the only guarantee of genuineness.

Excellent economical stock for soups, sauces, &c.

German and French are constantly spken in his establishment, where the comforts of an English home are provided by an English lady (Mrs Thomas). The highest references given.—Apply to Herrn Director THOMAS Heer Strasse, Bon-on-the-Rhine.—Frequent escorts

---

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER

TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage 1s 10d. Post-office orders to be made payable to John White, Post-office Piccadilly.

NEW PATENT

ELASTIC STOCKINGS, KNEE

CAPS, &c., for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS &c They are porous, light in texture and inexpensive and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

HOLLOWAY'S OINTMENT AND

PILLS.—The scrofulous and consumptive will find in these noble remedies the means of casting out the bad humours which originate and prolong their sufferings. The ointment should be well rubbed twice-a-day over the skin as near as possible to the part affected. It will penetrate and act most wholesomely and energetically on the diseased structure. It manifests a wonderful power in removing all taints from the blood, and consequently in curing a multitude of chronic ailments, which seemed to be almost irremediable. No invalid who carefully studies the plain instructions folded round every packet of Holloway's medicine will be at a loss to know how his preparations can be used to the greatest advantage.

FIVE PER CENT. FUNDED LOAN OF THE UNITED STATES.

Investors in this Loan may have their bonds registered in the purchasers' names at the Banking House of Jay Cooke, McCulloch, and Co., 41 Lombard street; and Dividend Warrants will be mailed quarterly from the United States Treasury direct to the holders' address.

ANGLO-EGYPTIAN BANKING COMPANY (Limited).

At the ORDINARY HALF-YEARLY GENERAL MEETING of this Company, held at the Bridge house Hotel, London Bridge, on THURSDAY, the 16th Nov., 1871,

E. MASTERMAN, Esq., in the Chair.

The Secretary read the advertisement convening the meeting.

The Chairman then read the report and the balance-sheet annexed thereto, and moved that the same be received and adopted.

The motion was seconded by Mr P. Lurscher.

An amendment was then moved by Mr Andrew, that the report be received and adopted, save and except that portion which referred to the raising additional capital.

This amendment, having been seconded by Mr. J. D. Davies, was put to the meeting by the chairman, and carried.

It was then moved by the Chairman, and seconded by Mr Macpherson,

That a dividend of £2 per share, free of income tax, be hereby declared, and be paid on the 1st December next, making, with the interim dividend of £1 per share paid on the 1st of June last, £3 per share, equal to £15 per cent. per annum upon the capital for the year ending 31st August, 1871.

This resolution was then put by the Chairman to the meeting, and carried unanimously.

The proceedings of the ordinary general meeting concluded with a vote of thanks to the chairman and directors, moved by Mr Tyler, and seconded by Mr Andrew, which was carried unanimously.

(Signed) E. MASTERMAN, Chairman.

Extracted from the minutes.

(Signed) OCTAVE FOA, Secretary,

27 Clement's lane, E.C., 20th November, 1871.

ANGLO-EGYPTIAN BANKING COMPANY (Limited).

At an EXTRAORDINARY GENERAL MEETING of this Company, held at the Bridge house Hotel, London Bridge, on Thursday, the 16th, adjourned to Monday, the 20th November, 1871,

It was moved by Mr Masterman, and seconded by Mr Andrew—

That the recommendation of the Directors, in their report of the 6th day of November, 1871, be adopted, modified as follows:—That the capital of the Anglo-Egyptian Banking Company (Limited), be increased from £800,000 to £1,600,000, by the issue of 40,000 shares of £20 each, one-half, that is to say 20,000, of such new shares to be offered to the shareholders on the register on the 16th day of November instant, according to, and in due proportion to the number of their respective shares, at £5 premium per share, payable by the following instalments, viz.:—

£5 per share, of which £2 10s per share shall be treated as paid on account of capital, and £2 10s per share as on account of premium.....	on the 7th Dec., 1871.
£5 per share, of which £2 10s per share shall be treated as paid on account of capital, and £2 10s per share as on account of premium.....	on the 1st Mar., 1872.
£5 on account of capital	on the 1st May, 1872.
£5 on account of capital.....	on the 1st July, 1872.
£5 balance of capital	on the 31st Aug., 1872.

That the holders of such new shares shall have the option of paying up the shares in full on the first of March, 1872, but not afterwards.

That all shareholders who shall not take their proportion of such new shares on or before the 7th December, 1871, shall be deemed to have waived their option to take them, and that the non-payment of any instalment on the appointed day shall subject all previous instalments to forfeiture.

That the Directors be authorised to dispose of any such new shares not taken by shareholders by the appointed day (7th December, 1871), or forfeited for non-payment of instalments, as they shall deem best for the interest of the Company.

That the issue of the second half of the new shares shall not take place before the 1st day of December, 1872, and shall be offered to the shareholders on the register when the same are so offered, according, and in due proportion to the number of their respective shares, and on such terms and conditions as the Directors may deem proper, but at not less than £5 premium per share, and that the capital and premium thereon shall be payable by such instalments as the Directors may think best.

That the new shares shall be entitled to dividend, rateably with the old shares, to the extent of the amount of capital from time to time paid on such new shares.

That the premium on both issues be carried to the credit of a reserved fund provided for by Clause 93 of the Articles of Association.

This resolution having been put to the meeting by the Chairman was passed unanimously.

The proceedings concluded with a vote of thanks to the Chairman, which was moved by Mr Andrew, and seconded by Mr Joseph.

(Signed) E. MASTERMAN, Chairman.

Extracted from the minutes.

(Signed) OCTAVE FOA, Secretary.

27 Clement's lane, E.C., Nov. 20, 1871.

N.B.—The holders of shares to bearer must deposit their share warrants with the Secretary of the Company before the 7th of December next, to entitle them to such their proportion of the new shares, for which a form will be handed to them.

ISSUE OF £300,000 FIVE PER CENT. FIRST MORTGAGE DEBENTURES OF

THE SWEDISH CENTRAL RAILWAY COMPANY (Limited).

In Bonds of £100 each,

Bearing interest from September 1, 1871, and redeemable at par by an accumulative sinking fund of 1 per cent. per annum, in half-yearly drawings.

Issue Price, £80 per bond of £100.

DIRECTORS.

H. L. Bischoffsheim, Esq. (Messrs Bischoffsheim and Goldschmidt), Chairman.
C. Weguelin, Esq. (Messrs I. Thomson, T. Bonar, and Co.)
George Wythes, Esq., Bickley Park, Kent.
J. A. Longridge, Esq., C.E., 3 Poet's corner, S.W.

PROSPECTUS.

Messrs BISCHOFFSHEIM and GOLDSCHMIDT are authorised to open subscriptions for the above £300,000 Five per Cent. Debentures at £80 per bond of £100, payable as follows:—

£5 on Application.
15 on Allotment.
20 on 2nd January, 1872.
20 on 1st February, 1872.
20 on 1st March, 1872, less half-year's coupon (£2 10s), deducting income tax.

£80

Payment in full may be made either on allotment or on any day when an instalment falls due, under discount at 5 per cent. per annum.

The Swedish Central Railway traverses the great mineral field of Grangesberget, not only the richest in Sweden, but one of the richest in the world, and abounding in pure iron, copper, lead, and zinc ores. The iron ores especially are of the very finest class, while they exist in quantities which are practically inexhaustible. By arrangements for through rates of traffic, entered into with the Köping Hült and State Railways, it is expected that these ores can be delivered at the export market of Gothenburg at a price which will enable the ironmasters of the East coast of England to employ them in preference to hematite. A very large traffic is, therefore, confidently anticipated in iron ore for export.

A considerable traffic in iron ore, charcoal, and manufactured produce existed in the district previous to the commencement of the railway, and since it has been in progress several large undertakings for the manufacture of Bessemer steel have been projected, one of which has already been definitely established on the line at Nya Kopparberg.

The works have been in progress under contract with Messrs Wythes and Longridge since July, 1870. The first section, a distance of twelve miles, was opened for public traffic on the 26th August last. The second section, a distance of twenty-two English miles, is nearly completed, and will be opened in March next, and in fulfilment of the terms of the Government Concession, the contractors guarantee that the whole line will be opened for public traffic on or before 1st October, 1873, but it is probable that this date will be considerably anticipated.

The debentures will form a first charge upon the railway from Frovi to Ludvika, which, when completed, will be 60 English miles, or thereabouts, in length.

As guarantee for the due and punctual payment of the interest and sinking fund during the construction of the railway, and for such a period thereafter as will enable its traffic to be developed, the sum of £50,000 has been invested in Consols in the joint names of Christopher Weguelin, Esq., 57½ Old Broad street, E.C. and Thomas Chapman, Esq., 41 Lothbury, E.C. who have consented to act as Trustees for the bondholders, and they will apply the same to the due payment of the interest and sinking fund upon the days appointed for the payment thereof, up to and inclusive of March 1, 1875.

The estimate of the net returns of the traffic, after allowing deduction for working expenses, is £50,600 per annum.

The annual interest and sinking fund for the present issue of debentures, amounting to £18,000, will form the first charge upon the line.

The interest will be payable half-yearly, on 1st March and 1st September, at the London and Westminster Bank, Lothbury, London.

The first coupon will be payable 1st March, 1872.

The debentures will be redeemed at par by an accumulative sinking fund of 1 per cent. per annum on the entire nominal amount to be applied by semi-annual drawings on the 1st June and 1st December, so as to redeem the entire loan in thirty-seven years.

The bonds drawn will be payable 1st March and 1st September next succeeding each drawing. The first drawing will take place on 1st December, 1873.

In default of the payment of any instalment all previous payments will be liable to forfeiture.

If no allotment is made the amount deposited will be returned without deduction; and where only part of the amount applied for is allotted, the balance of deposit will be applied to the 15 per cent. due on allotment, and the remainder, if any, returned.

Scrip certificates to bearer will be exchanged against allotment letters and Bankers' receipts, and bonds issued when ready to the holders of paid-up scrip.

The documents connected with the issue can be seen at the Offices of Messrs W. and H. P. Sharp, 92 Gresham House, Old Broad street, Solicitors to the Company.

Applications for the above debentures must be made in the annexed form, and accompanied by a deposit of £5 per bond.

Forms of application may be obtained at the Offices of Messrs Bischoffsheim and Goldschmidt, of Founders' court, Lothbury; and Messrs P. Cazenove and Co., Brokers, 52 Threadneedle street.

Founders' court, Lothbury, Nov. 23, 1871.

(To be retained by the Bankers.)

No.——

Issue of £300,000 Five per Cent. First Mortgage Debentures of the Swedish Central Railway Company (Limited), in bonds of £100 each bearing interest from the 1st September, 1871, and redeemable at par by an accumulative sinking fund of 1 per cent. per annum, in half-yearly drawings.

FORM OF APPLICATION FOR SHARES.
Deposit 5 per Cent.

To Messrs Bischoffsheim and Goldschmidt, Founders' court, Lothbury.

OFFICES—16 Austinfriars, E.C.

The object of this Company is to establish and carry on, in certain districts of Southern India, which have been found to be specially suitable for the purpose, the lucrative business of indigo manufacture.

The average of profits made by those already engaged in similar enterprises is very large, the nett returns in a single year some times exceeding 100 per cent. on the prime cost of building the factories required to work up the indigo plant.

As this plant is cultivated and supplied by the native peasantry, its failure in bad seasons only very partially affects the manufacturer.

The business may therefore be said to be unattended with any risk, provided the factories are erected in suitable localities—a point which, in the operations of this Company, will be carefully attended to.

Full prospectuses, and forms of application for shares, may be obtained at the offices of the Company, 16 Austinfriars, E.C.

ABRIDGED PROSPECTUS.

This celebrated old and extensive sett—which is nearly a mile and a-half long, and a mile wide—is in close proximity to Levant, Botallack, North Levant, Wheal Owles, Spearne Moor, Balleswidden, and other mines, the great majority of which are dividend-paying mines.

Valuable lodes traverse the entire property. The original lode has been one of the most productive in Cornwall, and the richest tin has been, and still is, obtained from it, and the mines now return nearly 20 tons per month at a large profit.

The mines are held under leases or setts from John Borlase, Esq., the Earl of Falmouth, and other lords, at a royalty of one twenty-fourth.

The following summary will show the remarkable advantages these mines possess, and the substantial grounds that exist for expecting an unusually large dividend from the moderate additional outlay recommended by eminent and practical men, who have recently inspected them, and whose reports are appended:—

1. The mines are already supplied with four large steam engines, including two steam stamps, and a large amount of plant and machinery of the best description, sufficient for all present purposes. For value of machinery and plant, vide Messrs Holman and Sons' letter.

2. One shaft is sunk to the 210-fathom level, four to the 180, and three to the 30, and levels are driven East and West.—(See section.)

3. In the two months ending February, 1868, being the first two months of the working by the present adventurers, the mines returned 12 ton 11 cwt 3 qrs 18 lbs of tin, which realised £550 8s 7d.

June 1871.....	58	12	0	20	.....	4,092	6	4

This last return at a cost per month of between £800 and £900.

The returns up to September last have not yet been made out.

4. The addition of another drawing-engine, and the employment of about 10 more men, at an additional cost of £250 to £300 a month, will, it is reasonably expected, increase the returns from the ground already opened up and in sight to 30 tons per month, leaving a clear profit of £12,000 a year.

5. Even this large profit will, as may be seen by the reports, be further increased by sinking one of the eastern shafts, now at the 180-fathom level, to the 200 or 210 (see Section). As this is one of the finest courses of ore ever opened on in Cornwall (being 400 fathoms in length), and has proved productive from the surface down to the 180-fathom level, it may be regarded as certain to continue so, and thereby greatly increase the returns of this Company beyond those already ascertained.

6. In addition to all this, there is another lode intersecting the one which has produced the tin at the 100-fathom level.

This lode from the surface down to the 100 fathoms is still unworked, and can be commanded by short crosscuts, and as the yield of tin below the 100 fathoms has been unusually large, this part of the lode must be highly productive, and will in itself form an additional mine, and consequently an additional source of profit.

The points, therefore, to which it is desired to draw the attention of investors are:—

(a.) That they have secured a paying and valuable property now in full working operation.

(b.) That a moderate additional outlay will so increase the returns as to double, or more than double, the profits.

It may also be stated that this celebrated and extensive mining property, worth of great value from its own intrinsic merits, is immensely enhanced in value by reason of the extraordinary increase in the price of tin.

Tin from this mine realised in 1856 £47 per ton, and at the present time, under an increasing market, is fetching nearly £90 per ton. From the character of these mines, however, should tin ever recede to the lowest recorded price, these properties could still be worked at considerable profit.

The following contract has been entered into on behalf of the Company, viz., an agreement dated the 16th day of November, 1871, made between Albert Milstead, of the one part, and Robert Garland, on behalf of the Company of the other part, under or by virtue of which the mines, machinery, and leases, will be assigned to the Company for £11,000 in cash, and £11,000 fully paid-up shares, and whereby the said Albert Milstead has engaged to obtain a valid agreement or agreements for a renewal of the several leases, either forthwith or prior to the determination of the several existing terms respectively, from the lords or lessors for further terms of 21 years respectively.

The several leases and the agreement referred to, as well as copies of the reports and the memorandum and articles of association, may be seen at the Offices of the Solicitor, G. Presswell, Esq., 10 Old Jewry chambers, London, E.C., and copies of the reports and memorandum and articles of association may also be inspected at the Offices of the Company, Moorgate street chambers, Moorgate street, London, E.C.

Applications for shares may be made to the Bankers, either in London or Penzance. For prospectuses, &c., apply at the Offices of the Company.

FORM OF APPLICATION FOR ALLOTMENT OF SHARES.

No.——

To the Directors of "The Boscaswell Downs Tin and Copper Mines Association, Limited,"

Gentlemen,—Having paid to your Bankers the sum of £ , I hereby request that you will allot me shares in the Boscaswell Downs Tin and Copper Mines Association, Limited, and I hereby agree to accept such shares, or any less number that may be allotted to me, and to become a member of the Association, and I authorise you to place my name on the register of members in respect of the shares alloted to me, and I further authorise you to forward by post, to my address, the certificate of the shares alloted to me.

Dated this.....day of.....187 .

OFFICES—8 Copthall court, London, E.C.

This Company is formed for the purpose of acquiring and further developing the property of the Redington Quicksilver Company, a Company incorporated according to the laws of the State of California and the United States.

The mines of quicksilver possessed by the Redington Company are of the most valuable nature, while the production is not subject to many vicissitudes usually attendant upon mining operations. The data upon which the terms of the purchase have been arranged are furnished by the vendors. The audited balance sheet and report of the Company for the year 1870 presented to its shareholders at the meeting in January, 1871, are deposited with the Solicitors, with the other documents.

This is the first quicksilver mine which has ever been placed upon the English market; and the principal present proprietors will continue their valuable co-operation in the management, showing their confidence in its future by taking a large portion of the purchase-money in shares.

The price to be paid (subject to the verification of the vendors' statements by the purchaser's agents) is £206,000, of which the amount for real and personal property other than the mines, as per statement herewith (computed at £80,000), together with £81,000 of the balance, is to be paid in cash, and the remaining £65,000 in shares fully paid, and bearing dividend, but of which £45,000 are not to be transferable until dividends equivalent in the aggregate to 50 per cent. of the whole capital have been paid and the balance of £20,000 not to be transferable until April 1st, 1873. The remaining £14,000 will form a working capital.

The purchase includes the freehold as well as the mining rights of the property, which is 2,980 acres in extent, and under a large portion of which the deposits of quicksilver are believed to extend—the area of the mine being 4,200 feet by 900 feet, and surface indications of Cinabar being found on almost its entire length.

The original grant having been confirmed by United States' Government Patent, no better title can be desired.

The Redington Quicksilver Mines are situated in Knoxville, Lake County, California, about 100 miles north of San Francisco, whence they are reached by steamboat to Velajo (1½ hours), and thence by carriage (eight hours' drive) over a good road to Knoxville.

The consumption of quicksilver (so large an essential in mining operations) has increased immensely during the last twenty years, owing to the continuous extension of mining enterprise in both hemispheres; and whilst there is no ascertained limit to the probable further discoveries of the precious metals, the production of quicksilver is still confined to a very few favoured localities.

The Almaden quicksilver mines of Spain and the Styrian quicksilver mines form valuable Government monopolies, supplying the European demand, while the production of California is scarcely sufficient to keep pace with the ever-increasing consumption of the American continent.

The following is an extract from the annual report made in 1870 to the Minister of the Interior of the United States:—"The supply of quicksilver in California is far short of the demand. The total monthly produce of California has averaged probably less than 2,250 flasks per month."

The Redington Company is under contract not to produce more than 7,200 flasks per annum, and to sell the whole quantity produced at 40 dols per flask; this contract runs until the 1st April, 1872. But as the price of quicksilver has risen considerably during the last fifteen months, the produce has been confined to the narrowest possible limits, and has amounted to about 4,500 flasks annually, one furnace only having been kept working. A large amount of work of development has been done, and reserves of ore got ready against the expiration of the contract in April next.

By reference to the accompanying statement, made by the vendors' agent, full particulars of the nature of the property will be found, and it is subject to the verification of this statement and the report and balance sheet above named, and upon which this prospectus is founded, that the purchase by the present Company is proposed to be made.

From these data, however, an estimate of the prospects of this Company may be formed.

During last year, in consequence of the production being restricted, and only one furnace worked, 4,548 flasks were produced, and sold at the contract price of 40 dols. As the two existing furnaces are fully capable of producing 10,000 flasks or more annually, it would be reasonable to assume the future minimum production at 10,000 flasks per annum.

Taking, however, the figures given in the vendors' statement as a basis of calculation—

	dols.
10,000 flasks, sold at 40 dols per flask would give	400,000
Less cost of production.....	144,000
Profit.....	256,000

—or over 24 per cent. on the whole capital. If sold at 50 dols per flask, the net profit would be nearly 34 per cent., and if sold at 57 dols per flask, the present market price, it would be 40 per cent. The addition of one furnace would make these results more sure by providing for the contingency of repairs becoming necessary to either furnace; but the addition of more than one furnace would largely increase the results; and the supply of ore being apparently unlimited, it is a question only of demand, and consequently of price, which will limit the results to be looked for.

In order to proceed to the verification of the vendors' statements, the directors deputed one of their members (Mr J. H. Green) to go to California where he is now engaged, with the assistance of competent mineralogists, in this investigation. Their reports are very shortly expected.

All expenses attendant upon the formation of the Company are defrayed by the vendors, and if the purchase be not carried out, the amount paid will be returned in full.

Applications for shares must be made on the form annexed, accompanied by a deposit of £1 per share.

Prospectuses can be had on application at the offices of the Company, 8 Copthall court, or of the brokers.

The following contract has been entered into:—

Date of Contract:—1st September, 1871.

Parties to the Contract:—Andrew G. Cutler, Thomas Anthony Comstock, and Rivolta Brothers of the one part, and the Company of the other part.

ABRIDGED PROSPECTUS.

This Company is formed to purchase about 1,000 acres of valuable freehold land, situate in Leicestershire, on the borders of Northamptonshire, and contiguous to the Medbourne Bridge Station on the Stamford and Rugby branch of the London and North-Western Railway, and to work, vend, and smelt the ironstone therein.

The estate consists of highly productive arable, pasture, and meadow land, with farmhouses, homesteads, and buildings, and is let to responsible tenants, at a rental of about £2,000 per annum.

The geological position of the estate is in the Oolitic formation, in which are the Northamptonshire beds of ironstone; and the beds of ironstone in this property are calculated to contain more than 16 millions of tons, which is equal to a vend of 300,000 tons of ore per annum for 54 years.

The ore contains 33 to 40 per cent. of metallic iron of good quality, and the result in practical operation, as is shown in the report of Mr Gjers, who is one of the highest authorities on the manufacture of pig iron, is equal to one ton of iron from rather less than 3 tons of ore, being a higher percentage than the Cleveland ores.

It is estimated that the expense of laying out the ironstone beds for an out-put of 300,000 tons yearly will not exceed £6,000, and that the cost of working and delivering into trucks will not average more than 1s per ton, as the ore is obtainable chiefly by quarrying, and can be opened out sufficiently in three months to deliver this quantity.

It is proposed to vend 150,000 tons, and also to smelt 150,000 tons of ore per annum, subject to such deviations as circumstances may render desirable.

The selling price of the ore in Staffordshire is 6s 6d to 7s a ton, and the total cost (calculated at 4s 1d delivered there), would leave a profit of 2s to 2s 6d per ton.

According to the accompanying report, the cost of producing pig-iron from the ore on the spot will not exceed 30s per ton, as the ore can be delivered into the proposed blast furnaces at a less cost than can now be done into any furnaces in the Kingdom, namely, at about 3s per ton of iron produced. Taking the price of pig-iron at only 45s (instead of 55s as now ruling), it will yield a profit of 15s a ton, and by smelting a portion of the ore on the property much more advantageous railway rates may be obtained, owing to the return freights.

The nett profits as estimated would be as follows, viz.:—

From vending 150,000 tons of ore, at 2s a ton profit	£15,000
From smelting 150,000 tons = to 50,000 tons iron at 15s	37,500
From rentals of land, &c., estimated at	2,000
Total	£54,500

which is equal to a profit of 30 per cent. per annum upon the proposed paid-up capital, and it is a novel and important feature in this company that the value of the freehold estate for agricultural purposes is equal to about one-half of the purchase money.

This class of investment has been hitherto but little known to the general public, because local ironmasters have, for the most part, monopolised the enormous profits resulting from ironstone undertakings, but several limited companies which have taken up this branch of industry are paying dividends ranging from 15 to 25 per cent., which proves the very lucrative nature of this description of industrial enterprise.

The demand for first-class iron ores of all kinds exceeds the supply, and prices have advanced accordingly; and never before has there been such an impetus given to ironstone mining. The demand for pig iron is altogether unprecedented. Makers are, in many instances, over-sold, and there is no probability of other than a great expansion of business in the iron trade.

An agreement has been entered into for the purchase of this property for the sum of £110,000 in cash, and £28,000 in fully paid-up shares, a price which is twopence per ton for the ironstone, exclusive of the agricultural value and the lower ironstone bed.

An offer has recently been made by one of the largest rail-makers in the country for 50,000 tons of pig iron to be made from this ore, at a very remunerative price.

Since the issue of the prospectus the price of pig iron has advanced to 65s a ton, which is double the price of the estimated cost of producing it on the Company's property. Cleveland No. 1 iron this time last year was only 50s 6d, and is now 65s a ton.

Prospectuses and forms of application for shares may be had from the Bankers, Solicitors, Brokers, and also from Frederick Williams, Esq., at the Offices of the Company, No. 75 Mark lane, London, and from whom all further information can be obtained.

75 Mark lane, London, November 18, 1871.

SECRETARY (pro tem.)—David Lockhart, Esq.

OFFICES—180 West George street, Glasgow.

PROSPECTUS.

This Company is formed for the purpose of working on an extensive scale a valuable mineral oil property at Chesterfield, near West Calder, in the county of Edinburgh.

This property comprises 150 acres of first-class shale, with an upper and lower seam capable of producing 14,000 tons of shale per acre, which will yield 25 gallons or upwards of crude oil of the finest quality to each ton of shale.

The rise and progress of the manufacture of mineral oil in Scotland is unparalleled by that of any other branch of trade, and there is at present an enormous and increasing demand for what has become one of the leading industries of the country.

At the present time the average weekly production of crude oil in Scotland exceeds 400,000 gallons, about 3,000 retorts being regularly at work, producing 21,800,000 gallons annually. About 10,000,000 gallons are annually refined for burning, besides which an enormous quantity of paraffin wax and other valuable products are obtained from treatment of the shale.

As to the quality of the oil, its superiority to all other oils is apparent from a report issued by the lighthouse authorities in France, in which they state that the Scottish oil presented a marked superiority over all others experimented upon for quality and luminous intensity, and has therefore been authorised to be adopted in all the lighthouses in France adapted for mineral oils.

Captain H. H. Doty, in a paper read before the Royal Scottish Society of Arts in March last, unhesitatingly pronounced Scottish oils superior to all others, and predicted their adoption at no distant date in all the lighthouses in the world. He stated that these oils possess nearly double the illuminating power of an equal quantity of vegetable or animal oils. They are, moreover, kindled with greater facility, and burn for a greater length of time without charring the wicks or cottons. When it is considered that the light emitted from mineral oils is nearly twice that of other oils, at the same time that the price is less than one-half, it will at once be seen that a marked economy is affected by their use, and this circumstance has tended much to their rapidly-increasing consumption.

This Company will be favourably circumstanced for producing oil, having acquired the right to work property of high repute in the West Calder district, which is particularly rich in bituminous shale of superior quality. The Caledonian Railway passes in close proximity to the property, and will be connected with the works by means of a siding, by which the cheap and easy transit of material and produce will be greatly facilitated.

It is estimated that the shale which exists on the property is capable of yielding 50,000,000 gallons of oil.

The estimate of income and expenditure annexed to prospectus will show the highly remunerative character of this undertaking.

The capital will be expended in erecting retorts and refineries, sinking pits, laying down tramways, building workmen's houses, &c.; the whole of the plant and machinery will be of the most approved description.

In estimating the dividends which will accrue it is difficult to avoid an appearance of exaggeration; but after allowing fully for all expenses of manufacture, and in view of the very moderate selling prices which have been taken, and which are confirmed by competent and experienced authorities, dividends of at least 30 per cent. may be reasonably expected. The business is one which is carried on without risk of bad debts, its transactions being almost entirely for cash payments.

The Company proposes to work at first about 120 tons daily, but by the issue of the remaining capital of £25,000 they would be enabled to work 240 tons a day, by which it is at once apparent the dividend would be largely increased.

It is expected that the works will be in active operation in about six months from their commencement.

The Board includes the names of gentlemen having a good knowledge of the business of the Company, and the Directors have secured the services of a Manager who has had great practical experience in the manufacture of mineral oils, and is thoroughly acquainted with every detail of the business.

The only contract entered into is a minute of agreement, dated 14th November, 1871, between John Peter Raeburn of the one part, and William Bell, on behalf of the Company, of the other part, under which a lease of the shale, subject to a stipulated fixed rent or royalty, is to be granted to the Company. The price to be paid for the lease is £8,000, of which the proprietor has agreed to accept £7,000 in paid-up shares. The contract may be inspected at the Office of the Solicitors.

Share warrants to bearer or share certificates, as may be desired, will be issued when shares are fully paid in exchange for Bankers' receipts. Shares may be paid up in full on allotment if desired.

Prospectuses and forms of application for shares may be obtained at the Office of the Company, or of the Company's Bankers or Brokers, where also copies of the memorandum and articles of association may be had.

NEW SOUTH WALES GOVERNMENT DEBENTURES for £850,000,

issued in September, 1866, under the authority of Acts Nos. 4 and 5 of Vic. 29 of the Colonial Legislature.

The Bank of New South Wales, as Agents for the Government of New South Wales, hereby give notice, that the FIFTH ANNUAL DRAWING of £100,000 of the above Debentures for payment will take place (in conformity with the terms of the Loan) at their Office, No. 64 Old Broad street, in the City of London, on Monday, the 11th day of December next, at noon precisely, when holders of the said Debentures are entitled and invited to be present.—By order of the London Board,

JOHN CURRIE, Secretary.

London, 64 Old Broad street, 21st November, 1871.

LOAN OF £10,000.

The Guardians of the East Preston Union, in the county of Sussex, invite TENDERS for a LOAN of the above amount, to be secured on Mortgage of the Poor-rates of the Union, and repayable in 30 annual instalments.

The Guardians would prefer to take the money in instalments, not to exceed 5, completing the Loan within the next 12 months.

Persons tendering must state rate of interest required, and all other terms, and every Tender must be sealed up, endorsed "Tender for Loan," and sent to the undersigned on or before the 5th day of January next.

The Guardians do not bind themselves to accept the lowest or any Tender.

ROBERT FRENCH, Clerk to the Guardians.

ISSUE OF £1,180,000 SEVEN PER CENT. BONDS of the MEXICAN RAILWAY COMPANY (Limited).

Holders of fully paid Scrip Certificates are hereby informed that the same may be exchanged for Definitive Bonds (bearing coupon due 1st December) on and after the 28th instant, at the Offices of the undersigned. The scrip must be left three days for examination. Holders of scrip not fully paid are reminded that on tendering the amount due on the 1st December for the last call, they must present their scrip with the dividend warrant attached, the amount of which, in accordance with the terms of the prospectus, will be deducted from the sum required for such call.

(Signed)

BISCHOFFSHEIM AND GOLDSCHMIDT.

Founder's court, Lothbury, 24th Nov., 1871.

SOUTH AFRICAN DIAMOND FIELDS ASSOCIATION (Limited).

Notice is hereby given, that the LIST OF APPLICATIONS for SHARES in the Association will CLOSE for the General Public on THURSDAY, the 30th inst. Applications will, however, continue to be received up to Saturday, the 9th proximo, from parties proposing to proceed to the Diamond Fields under the auspices of the Association. For prospectuses apply at the Offices of the Association, 84 Lombard street, E.C.—By order,

T. W. TOBIN, Secretary.

COLONIAL TRUSTS CORPORATION (Limited).

Incorporated under the Companies Acts, 1862 and 1867.

Authorised Capital, £300,000.

Issue of 10,000 shares, completing the first series of 30,000 shares.

(With power to add to their number.)

SOLICITORS—Messrs Freshfields.

BANKERS—Messrs Glyn, Mills, Currie, and Co.

SECRETARY—E. J. Burgess, Esq.

The Colonial Trusts Corporation (Limited) has been established for the purpose of making advances upon first mortgages of freehold estates in various colonies, either for the Corporation direct, or on behalf of other parties for whom it may act as agent, of negotiating Government and other securities, and generally for the transaction of business in connection with the British colonies or elsewhere.

Full prospectuses and all information can be obtained at the Offices of the Corporation, 31 Palmerston buildings, Old Broad street, E.C.

THE COLONIAL TRUSTS CORPORATION (Limited).

Notice is hereby given, that the LIST of APPLICATIONS for the issue of 10,000 shares herein, will be CLOSED on THURSDAY NEXT, November 30, 1871, for London, and on FRIDAY, December 1, 1871, for the Country.—By order,

E. J. BURGESS, Secretary.

24th November, 1871.

GLASGOW, COATBRIDGE, AND AIRDRIE TRAMWAYS COMPANY.

To be incorporated by Special Act of Parliament, the liability of the shareholders being limited to the amount of their shares.

Capital, £100,000, in 10,000 shares of £10 each.

Deposit, £1 per share on application and £1 on allotment, and the remainder by calls not exceeding £1 per share, and at intervals of not less than three months between each call.

If no allotment is made the deposit will be returned in full.

PROVISIONAL DIRECTORS.

Robert Craig, Esq., Newbattle Mills, Dalkeith, and Caldercruix, and Moffat Mills, near Airdrie.
Hugh Neilson, Esq., of Messrs Wilsons and Co., Summerlee Iron Works, Coatbridge.
Thomas Jackson, Esq., of Coates Iron Works, Coatbridge.
James Scott, Esq., 1 Woodside place, Glasgow.
Alexander Fraser, Esq., Merchant, Prince's square, Glasgow.
Robert Henderson, Esq., of Messrs Henderson and Dimmack, Drumpellier Iron Works, Coatbridge.
William Ferrie, Esq., Manager of the Monkland Iron and Steel Company, Calderbank, Airdrie.
Isaac Beardmore, Esq., Parkhead Forge, Parkhead, Glasgow.

(With power to add to their number.)

ENGINEER.

George Cadell Bruce, Esq., C.E., Glasgow and Edinburgh.

SOLICITORS.

Messrs Burns, Allson, and Aiken, 151 St Vincent street, Glasgow.

PARLIAMENTARY AGENTS.

Messrs Simpson and Wakeford, 11 Great George street, Westminster, S.W.

BROKERS.

Messrs A. H. and J. Grahame and Spens, 128 St Vincent street, Glasgow.
Messrs Rhenius and Lawrie, 4 St Andrew square, Edinburgh.
Charles Gordon Robertson, Esq., 2 Copthall court, London, E.C.
Messrs Speakman and Son, Exchange chambers, Half-Moon street, Manchester.
Messrs James Black and Co., 23 King street, Aberdeen.

SECRETARY (PRO TEM.).

Edward B. Bruce, Esq., Accountant, 63 Bath street, Glasgow.

BANKERS.

The National Bank of Scotland, Glasgow and Edinburgh; Branches in Scotland, and 37 Nicholas lane, Lombard street, London, E.C.

TEMPORARY OFFICES—63 Bath street, Glasgow.

PROSPECTUS.

This Company is proposed to be incorporated with the view of obtaining the necessary Parliamentary authority to construct and work tramways, commencing by a junction with the authorised "Glasgow Street Tramways," at a suitable point near "Parkhead," and passing through "Shettleston," "Barrachnie," "Baillieston," "Langloan," and "Coatbridge" to "Airdrie," being a distance of about ten miles.

It is also proposed to obtain powers to construct branch tramways from the main line, so as to establish tramway connections with the public railways and the various public works, &c., in the district and on the Clyde, thus enabling waggons to run direct along the railway and tramway system, and from work to work.

The district has long been known as one of the great centres of iron production and manufacture, and as a focus of railway communication to all parts of the country.

The population along the line of proposed tramways may be moderately estimated at 100,000, and is rapidly increasing.

There is a large traffic in goods and minerals capable of being developed by the tramways, which offer a cheap, speedy, and easy mode of conveyance, and it is expected that these will prove feeders to the railway system, and also carry a considerable portion of the goods and minerals, for which the present railway and canal communication is neither convenient nor adequate.

The tramways will place the ironworks and mineral fields of the district in direct communication with most of the public works throughout the City of Glasgow, and the various shipbuilding yards on the Clyde. As is well known, scarcely any of the shipbuilding yards have any communication with the existing system of railways, so that the tramways will necessarily command a great portion of the traffic between them and the ironworks of the district.

Tramways have now been successfully used for several years both in this country and on the Continent of Europe, as well as in America and Canada. There is no prejudicial interference with the streets and roads, as carriages and other conveyances can cross and re-cross the rails without inconvenience.

The district is remarkably well suited for tramways. The roads are wide and regular, and the gradients are unobjectionable, so that the traffic can be worked very economically.

The adoption of the grooved rail, which is laid flush with the road, has removed the objections which formerly existed to the general formation of tramways.

By the system of brakes employed, the tramway carriages can be stopped, while running, within the distance of their own length.

The difference in the question of working expenses between tramways and omnibuses is much in favour of tramways, the average in the case of a tramway being about 60 per cent., while omnibuses can only be worked at a much higher percentage.

Tramway companies recently started in this country, where the traffic has been almost exclusively passengers, have proved very successful; and, looking to the field proposed to be occupied by this Company, where there is a large traffic in goods and minerals, also passengers, the Directors are satisfied that this is an undertaking of unusual promise.

It is estimated that the proposed capital will suffice for the construction and equipment of a double line of main tramways, and branches of single line.

Forms of application for shares, and sketch plan, shewing the proposed main line of tramways, may be obtained at the Temporary Offices of the Company, or from the Brokers and Bankers of the Company.

GLASGOW, COATBRIDGE, AND AIRDRIE TRAMWAYS COMPANY.

The LIST of APPLICATIONS for SHARES will be CLOSED for applications from Scotland on THURSDAY NEXT, the 30th current, and for applications from England, on Friday, 1st proximo.

ED. B. BRUCE, Sec. (pro tem.),
Glasgow, Coatbridge, and Airdrie Tramways Company.

63 Bath street, Glasgow, Nov. 23, 1871.

THE BILBAO IRON COMPANY, (Limited).

Incorporated under the Companies' Acts, 1862 and 1867.

Capital, £500,000, in 10,000 shares of £50 each.

£2 to be paid on application, and £8 on allotment.
£5 in six months; £5 in nine months; £5 in twelve months.

Further calls, not exceeding £5 per share, may be made at intervals of not less than three months.

The whole or any portion of the uncalled capital may be paid up by shareholders, and interest at 5 per cent. per annum will be allowed on the amount so contributed in excess of calls due.

DIRECTORS.

Sir John Brown, Endcliffe Hall, Sheffield.
William Fowler, Esq., Whittington Hall, Derbyshire (Chairman of the Sheepbridge Coal and Iron Company, Limited).
William Thorburn, Esq., Eskett Iron Ore Company, Whitehaven; and Ditton Brook Iron Company, Warrington.
John Galloway, Esq., Knott Mill Ironworks, Manchester.
John James Barrow, Esq., Ringwood Hall, Staveley, Derbyshire.
Robert Lockhart, Esq. (Robert Lockhart and Dempster), Liverpool.
Frederick Braby, Esq. (of Frederick Braby and Co. Limited), Mount Henley, Sydenham Hill.
H. R. F. Jameson, Esq., 10 Petersham terrace, South Kensington.

BANKERS.

Messrs Brown, Janson, and Co., 32 Abchurch lane, London.
Messrs William Williams, Brown, and Co., Leeds.
The Sheffield Banking Company, Sheffield.

SHIPPING AGENTS.

Messrs N. Griffiths, Tate, and Co., Fenchurch House, Fenchurch street.

SALE AGENTS.

Messrs Lockhart, Tozer, and Co., 2 Storey's gate, Westminster, and Liverpool, Manchester, and Wolverhampton.

ENGINEER.

Edward Woods, Esq., 3 Storey's gate, Westminster.

SOLICITORS.

James Crowdy, Esq., 17 Sergeants' inn, Fleet street.
Messrs Pattison, Wigg, Gurney, and King, 50 Lombard street.

STOCK BROKERS.

Messrs Shepherd and Grieveson, 10 Old Broad street, E.C.

AUDITORS.

Messrs Chadwicks, Adamson, Collier, and Co.

PROSPECTUS.

This Company has been formed for the purpose of acquiring the concessions from the Spanish Government, held by Sir John Brown and William Fowler, Esq., of the extensive and valuable iron mines known as the Mines of Galdames (called La Escarpada), La Cenefa, Berango, Moruecos, and El Cerrillo, near Bilbao, all in the province of Biscay, and for working the same, and for making and working railways in connection therewith, and for other purposes, as set forth in the memorandum of association.

The mines of the Bilbao district have been worked from time immemorial, are celebrated for their purity and richness, yielding from 50 to 60 per cent. of metallic iron, and the analysis of the ores proves they are the nearest approach in composition to the Hematites of Cumberland.

The ironstones of South Wales, South Staffordshire, and Scotland are becoming exhausted, insomuch that the necessary supplies for these districts has for many years been supplemented by the Hematite ores of Cumberland and Lancashire; but owing to the great and constantly increasing demand for Hematite pig iron, for admixture with iron made from inferior ores, and the extension of the Bessemer steel manufacture, nearly the entire produce of Hematite ores is absorbed by the iron works in the Cumberland district alone, and the price of these ores has advanced within the last two years 70 per cent., and Hematite pig iron for the Bessemer process 50 per cent.

Not only are the ironmasters of Wales, Scotland, and Middlesbro' compelled to seek supplies of Hematite ore elsewhere, but the production of Bessemer steel, the demand for which is daily increasing, is partially suspended, from the impossibility of obtaining an adequate supply of suitable ore for the process.

In addition to the British requirements, there is a constant and large demand for these ores in France, Belgium, and Germany.

Under these circumstances there can be no doubt that a practically unlimited demand must permanently exist for supplies of ore suitable for the best class of Hematite pig iron at fair market prices.

The most important of the mines in the province of Biscay is believed to be that of Galdames (Escarpada) from the immense quantity comprised, the purity of the ore, and the cheapness and facility with which it can be worked. This mine may be described as a mountain of iron. It is about 1,200 yards in length and 170 yards in height, with an unknown depth, and estimated to contain many millions of tons of ore.

This ore can be worked by quarrying at the mere cost of breaking up and loading into trucks in sidings (which can be at once laid the whole length of the mine of 1,200 yards) in quantities only limited by the labour employed at a cost, it is believed, including all charges, of 9d per ton. Labour is cheap and can be obtained to any required extent.

The other mines acquired by the Company also contain immense deposits of ore of the finest quality, which can be worked at a very cheap rate.

Concessions have been obtained for the construction of railways from the mines to the river at Sestao, at the entrance of Bilbao, and for an extensive shipping port, including about 12 acres of wharfage ground granted by the Government. The cost of the railway from the mines of Galdames (12 miles), the construction of the shipping port, with rolling stock, shoots, and all necessary appliances for the speedy loading of steamers, is estimated at £200,000 to £220,000.

The property has been surveyed and examined by William Lockhart, Esq. (of the firm of Lockhart, Tozer, and Co.), of London and Liverpool, by William Thorburn, Esq., of Eskett Iron Ore Company, Whitehaven, and Ditton Brook Iron Company, by Edward Woods, Esq., civil engineer, Westminster, and by T. W. Jeffcock, Esq., F.G.S., mining engineer, Sheffield.

The ore can be raised and placed free on board at an estimated cost of 3s 6d to 4s a ton, inclusive of royalty.

The Company purposes to build steamers specially adapted for carrying the ore, so as to insure regular deliveries. The maximum estimated cost of freight is 10s per ton, so that the ore can be delivered into South Wales ports at a cost price of 13s 6d to 14s per ton. English hematites cannot now be bought under 32s, and for many years the price has not been under 18s per ton at the same ports.

Taking, therefore, the very low estimate of 18s per ton as the selling price (although contracts for Bilbao ores are now being made at considerably higher rates), delivered at ports in South Wales, and other places in proportion, there would be a profit of at least 4s per ton. With an annual shipment of 500,000 tons, the profit would be £100,000, or 20 per cent. on the subscribed capital of £500,000; but the Directors have every reason to believe that the trade will much exceed this amount, and that the price of these ores must ere long approximate more nearly to the values of the English Hematites.

It has been agreed that £5,000 shall be paid by the Company to the vendors in respect of preliminary expenses and the costs of surveys, investigations, plans, analyses, &c., connected with the railways and mines, and this is the only purchase consideration in addition to the royalty already mentioned.

The Company, have by their articles of association, adopted an agreement, dated the 21st day of November, 1871, made between Sir John Brown and William Fowler, Esq., and Frederick Oldershaw Smithers, Esq., Trustee for the Company, whereby the Company will acquire the mines in perpetuity, subject to a royalty of 1s 3d per ton of 21 cwts, which royalty is guaranteed not to be less than £2,500 per annum for 21 years from the first shipment of ores.

Copies of the agreement above mentioned, the memorandum and articles of association, and of the reports and analyses, may be seen at the Offices of Messrs Chadwicks, Adamson, Collier, and Co., 65 Moorgate street, London, and 64 Cross street, Manchester, or of the Solicitors to the Company.

The total charge to the Company for its establishment, including brokerage and agency, has been fixed at one per cent. on the subscribed capital, in addition to legal, printing, and other strictly necessary expenses.

Applications for shares may be made on the prescribed form, to the Bankers, or to Messrs Chadwicks, Adamson, Collier, and Co., 65 Moorgate street, accompanied by a deposit of £2 per share on the number applied for. If no allotment be made the deposit will be returned in full. If a smaller number of shares be allotted than are applied for, the balance of the deposit will be applied in payment of the amount due on allotment.

London, 23rd November, 1871.

THE NANTYGLO AND BLAINA IRONWORKS COMPANY (Limited).

Notice is hereby given, that the FIRST ORDINARY GENERAL MEETING of the Company will be HELD at the Terminus Hotel, Cannon street, in the City of London, (This Day) SATURDAY, the 25th day of November, at Twelve o'clock noon.—By order of the Board,

JOHN ROBERTS, Secretary.

Offices, 8 Great Winchester buildings, E.C.
Dated 25th November, 1871.

ESPINOSENA SILVER MINING COMPANY (Limited).

Notice is hereby given, that the LIST of APPLICATIONS for FIRST MORTGAGE DEBENTURES CLOSES THIS DAY, the 25th inst., for London, and on MONDAY NEXT, the 27th inst., for the Country.

G. HEWLETT POTTS, Secretary (pro tem.)
70 Bishopsgate street, E.C., Nov. 21, 1871.

THE BRITISH AND FOREIGN TRAMWAYS COMPANY (Limited).

Subscribed capital, £300,000.

DIRECTORS.

H. G. Erichsen, Esq. — William Sheldon, Esq
L. Floersheim, Esq. — Lieut.-Colonel C. Napier Sturt, M.P.
William Morris, Esq. — James M. Walker, Esq.
Philip Rose, Esq.

BANKERS—Messrs Glyn, Mills, Currie, and Co.

Messrs Baxter, Rose, Norton, and Co.
Messrs Ashurst, Morris, and Co.

OFFICES—No. 7 Lothbury, E.C.

This Company is prepared to entertain proposals for Tramways either in the United Kingdom or elsewhere.—Address, with full particulars, to

J. BARBER GLENN, Secretary.

MADRAS RAILWAY COMPANY.

Notice is her by given, that the Nineteenth Half-yearly General Meeting of the Madras Railway Company will be held at the London Tavern, Bishopsgate street, London, on Friday, the 15th day of December next, at one o'clock precisely, in conformity with the terms of the Company's Deed of Settlement. And notice is hereby further given that the Transfer Books of the Company will be closed from the 11th day of December to the 4th day of January next, both days inclusive, for the above purpose, and for making up the interest accounts to the 31st proximo.

The interest warrants will be forwarded to the proprietors whose names are registered on the 11th proximo in the books of the Company.

Deeds of Transfer are to be received at the offices of the Company while the books are closed. By order of the Board,

(Signed) JULIAN BYRNE, Secretary.

Company's Offices, 31 New Broad street, London, E.C., 24th November, 1871.

Registered at the General Post Office as a Newspaper and for Transmission Abroad.

On November 25 was Published, No. XI., New Series, Price 8d and 8½d,

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL for November gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains

A FINANCIAL RECORD OF THE MONTH;

New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to November 22.

Advertisements for the next Number, to be published on December 30, must be sent, to insure insertion, on or before December 28.

The December Number of the INVESTOR'S MONTHLY MANUAL will give, in addition to the usual information, the Highest and Lowest Prices of all Stocks and Shares for the last Three Years, the latest quotations for 1870 (so as to indicate the Exact Movement during the Twelve Months), a Complete Directory, the names of the Markets where each Security is chiefly dealt in, a Financial History of the Year 1871 (including a Tabulated Chronicle of Events), besides Memoranda relating to the Financial Position of Foreign and Colonial Governments, to Railways, &c., &c. A copious Index will be added for purposes of reference.

This Double Number will be published on Saturday, the 30th of December. Price 1s 4d; by Post, 1s 4½d.

OFFICE—340 Strand.

THE REDUCTION OF THE BANK RATE OF DISCOUNT.

The success of the Bank of England in accumulating a large reserve has necessarily led to a reduction of the rate of discount. The account stands—

	£
Public deposits	7,255,000
Private deposits	21,022,000
Seven-day bills	482,000
Total	28,759,000

reserve 15,179,000*l*, which in former times would have been thought fabulous, and which, coupled with the expected imports of bullion, is sufficient for every probable demand. As we are now able to repay the German money which is lodged with us, there can be no reason why we should keep it here a day longer than we find an advantage in it. Our situation in the money market of the world is new. Till now there were two exchange centres in the world, and now there is only one. The suspension of specie payments by the Bank of France has driven all the exchange business to England. Bullion transactions are based on such fine calculations, that they are practically prevented by an inconvertible paper currency. Exchange bills drawn on Paris would now be paid in such a currency, and accordingly they are not drawn. Except in Germany, which has been so divided that it has no exchange centre suited to its magnitude, there is inconvertible paper-money all over the world, both in Europe and America. A bill drawn on London is still payable in gold, but a bill drawn either on Paris or New York is not so paid. And this is in the main exceedingly beneficial to us. We gain a monopoly of *exchange brokerage* such as the nation has never before enjoyed. All the accounts of the commercial world must come here for final settlement and adjustment, and that at a time when the commerce of the world is very much greater than it ever was before. We shall have too, from time to time, much foreign money lodged here to meet payments of continental origin, which, in the former state of the world, would not have been sent here, because the liquidations they are to subserve would have been made in Paris and not in London. And that importation of foreign capital is, as far as we can rely on it, so much added to our domestic resources.

But it is to be observed that we cannot rely on it very well. In the course of time it may assume an average and calculable amount, but it has not yet assumed it. Especially all the time the great "French indemnity" payments are in progress, and as long as a large part of these payments are settled by bills on England, we shall constantly be in some difficulty. Either, as now, we shall have more money than we know what to do with, or, as a few weeks back, we shall be under large liabilities, which we have not money enough to meet, and for which we must find more money. We must always provide money to pay our creditors, and then when we have so provided it, if our creditors do not ask for it, we shall seem to have laboured in vain, and to have more than we want.

Under these circumstances, the principles which should guide the Bank of England are plain, though their application is sometimes matter of doubt and difficulty in detail. First, the Bank ought to fill its till sufficiently to meet every probable demand on it; and next, when it has filled it, it ought to give no encouragement to foreigners not to empty it. We ought not to give a farthing more interest for continental

money than it is advantageous for us to give. If we have enough to pay our debts, we should let our creditors take the money, if it does not answer our purpose to keep it. At present we have too much foreign money—that is, too much, because it is only lodged with us temporarily, and we cannot safely make any fixed use of it; the sooner, therefore, we get rid of it the better, and the more the rate of interest is reduced, so as to get rid of the accumulation, the better.

It is no doubt a misfortune that the rate of discount should fluctuate so much. But that is the price England pays for being, as we have explained, the sole first-class exchange centre. In that capacity it will often be necessary that we should raise the rate of interest, so as to attract money and keep us safe, and then lower it again, because it suits us better to pay off our creditors than to give them a high rate of interest in order to retain their money in our hands. Sharp variations in the rate of interest are necessary results of this state of things, and are the price we pay for obtaining what may also be called a monopoly—or what is at any rate a very unusually large share—of the international money trade.

THE GERMAN NAVY.

The recent debate in the Reichstag on the Navy affords a new evidence of the wonderful common sense which, upon many subjects, penetrates and governs the political mind of Germany. Before the war, nothing was held in England to be so certain as that Germany would one day strive to build a first-class Navy; and after the war, nothing would have been more natural than such an aspiration. A nation which has suddenly altered its position in the world is almost certain to be carried away by self-importance, by the desire to continue its dramatic successes, or by the wish to make its influence felt throughout the entire world. A nation like Germany, with an extensive foreign trade, with great numbers of subjects scattered all over the world, and with strong ideas of the value of its own civilisation, is peculiarly liable to this form of temptation, which is, in some respects, by no means an ignoble one. The German professors are probably right when they say that a transatlantic Prussia might be an advantage to the world, that the absorption of the entire overspill from the German reservoir into an English-speaking community involves the loss of a great deal of power, which had much better be preserved. A free Republican State, with an extremely strict organisation, would, for instance, be an experiment in government of very unusual value, and it could be tried only in a colony belonging to Germany herself. It would have been most natural for Germany to feel this temptation, and to have insisted on devoting a large part of the French indemnity to the rapid creation of a formidable fleet; yet no such attempt was made. The German statesmen found that such a fleet would be very nearly useless. They must, they said, have enough ironclads to repress semi-civilised attacks, and to impose respect upon the secondary maritime powers, who were apt to defy powerless remonstrances—the allusion, it is believed, was to Brazil,—but there was no particular use in rivalling the great maritime states. America could not attack them or they America, even if they had a great fleet; and rivalling England on the seas was a work of almost unendurable expense. Every other great power could be reached much more effectively by land. These ironclads, said the Minister at War, cost a great deal. The German Government would therefore go forward slowly, would complete the harbours of Jahde and Kiel, and fortify them thoroughly, and would lay up maritime material, would build or buy vessels sufficient to make Germany a well-equipped maritime power of the second rank, quite able, that is,—though the Minister did not say so,—to hold its own in the Baltic, and defend its own Northern ports against any probable attack. Time would be taken even in effecting this much, and the Government therefore asked for no increase in the Naval Budget, except in the shape of a salary for a separate Minister of Marine, the work of supervision having been hitherto entrusted to the Minister of War.

This very prosaic view of the Navy of the future proved quite satisfactory to the sensible German deputies, chiefly, we imagine, for two reasons. They have lost through the events of the war their fear of naval attacks, and indeed probably exaggerate their own immunity. They see that no Navy in existence, not even that of England, could carry an army to their coasts numerous enough to hold the field; and they have learnt to believe, what the events of the Russian War might have taught them before, that an effective blockade of a Power located, as Germany is, in the centre of Europe, amidst States all communicating with the sea, is next to an impossibility. And they are perfectly shocked, not without reason, at the expense of a modern Navy, in which a single ship may represent three-quarters of a million, a sum sufficient to equip a whole *corps d'armée* with all needful appliances for movement. They were therefore quite ready to submit to the official advice, to wait patiently for a scheme of accumulating a moderate share of naval power, and to surrender a very favourite dream. They were ready in fact to limit their wishes by common sense—a readiness which we suspect would have been shown under the circumstances by no other nation, unless it were the British, who, in 1816, after a quarter of a century of victory, insisted that Lord Castlereagh's idea of retaining a great military armament should be given up. It is in this limitation of effort, which has been marked throughout the history of Prussia, that much of her strength consists, and much also of her immunity from universal attack. She has never had a colony, or a great fleet, or any armament whatever, costing more than was necessary in time of peace. Her very army was composed in large part of reserves, and much of her painful organisation is arranged with a view to avoid constant expenditure of treasure. Everything, even success, is to be achieved cheaply, and German Ministers seem to have found what English Ministers have so long been seeking—the secret of being strong without an excessive revenue. Certainly in their hands weakness and cheapness have not been synonymous, and Mr Gladstone might gather from their practice strong evidence that parsimony carried to the point of meanness does not invariably injure States.

The resolve to dispense with an enormous Navy is the more important, because we may regard it as certain that had the Government and people come to a different decision, had they resolved upon realising the old popular dream, the new weapon would, sooner or later, have been used. It is always supposed that a resource of that kind can be laid up in ordinary till wanted, but its existence diminishes the reluctance to use it, while the desire to find an opportunity is increased by one very definite kind of pressure. A Navy to be efficient requires a history. Without one it is always apt to be a depreciated service, overlooked in favour of its military rival, and entirely without influence on the current of affairs. This would be the case in England but for our real dependence upon our Navy for defence, and our consequent anxiety about its condition; it is the case in France, where the Navy has always been an unpopular arms; and it would be the case in Germany to an extent which the advisers of the Crown, with their strong wish for the efficiency of their departments and habit of minute inquiry, would very soon view with annoyance or alarm. The desire to give the Navy a lesson as well as the enemy would gradually increase, until it would become, not indeed a cause of war, but a solvent of many of the obstacles which at present prevent war, and especially wars at a great distance from the centre of power. The Germans in limiting their fleet do not only avoid present expense which would be nearly useless, but future occasions of expense of the most incalculable kind.

THE RISE OF PRICES IN INDIA IN THE LAST HALF CENTURY.

Everybody knows of the remarkable rise in prices which has taken place in Western India during the last fifty years, and which became so conspicuous a fact in the great cotton years 1860-63. It is known in a general way how the peasant of Western India was suddenly transformed from a serf to some village money-lender into a real peasant-proprietor, with capital to carry on his business and large savings besides—how the labouring classes were benefited by increased wages—how permanent difficulties were created for the Government by the greater expense of the services consequent on the increased scale of living, and the necessary increases of pay. It will be one of the good services, which the Select Committee on Indian Finance now sitting will have performed, that it has secured the collection, in an easily accessible shape, of the facts relating to the extraordinary economic change we have referred to. The subject was mentioned in the evidence of Sir Bartle Frere, and he has written a memorandum, printed in the appendix to the Committee's report, summarising the

statistics and evidence collected by the Bombay Government on the subject in 1863. Notwithstanding the period which has elapsed since the evidence was collected, the facts are altogether so remarkable that our readers, we are sure, will thank us for calling attention to Sir Bartle Frere's memorandum. We have only space to show some of the leading results of a document which cannot but form a most interesting contribution to the study of economic science and statistics.

The memorandum summarises the report of a Commission which the Bombay Government appointed—consisting of Messrs Hart and Ellis, two Revenue Commissioners and Lieut.-Colonel Dunsterville, Commissary-General of the Bombay army—and which Commission reported in 1864. They procured most elaborate tables of prices for a long series of years and the general result of their inquiries was that prices had been rising for about a quarter of a century, but principally and with most suddenness in recent years, and that this rise was not confined to one class of articles. The average rise between 1829 and 1863 in several principal articles is thus shown :—

	In Guzerat. Rise %	In the Deccan. Rise %	In the Southern Maharatta Country. Rise %
Ghee (clarified butter) cost more in 1863 than in 1829 by	93	147	165
Milk ditto	115	30	200
Sweet oil ditto	76	119	122
Coarse cloth, such as is used by the poorer classes, ditto	167	167	400

This table of averages is confirmed by another, in which the highest and lowest price of wheat in each year is shown by a statement of the number of "tolas" purchasable per rupee, the tola being equal to 180 grains troy :—

WHEAT.

Province.	Averages of 1824-29.		Averages of 1830-39.		Averages of 1860-63.		For 1863.	
	Max.	Min.	Max.	Min.	Max.	Min.	Max.	Min.
Guzerat	2,163	1,648	2,033	1,692	1,304	984	773	533
Maharatta Country	1,427	3,074	3,073	2,265	2,149	1,302	1,662	541
Bombay	No returns.		1,335	1,284	988	860	995	736

The articles, it will be observed, are common articles, and it requires only a little reflection to show how profound an economic change they imply. A rise of 100 to 150 per cent. in the price of principal articles of food, and of 167 to 400 per cent. in the price of coarse cloth, cannot but mean an essential disturbance of the conditions of existence among the classes affected.

The facts thus shadowed out are shown in still greater detail in the memorandum. A table, which we subjoin, is drawn up, comparing, in respect to a considerable variety of articles, the highest average purchasing power of a rupee (*i.e.*, the lowest price) in 1829, or some other early year, with the lowest average purchasing power (*i.e.*, the highest price) in 1863. The table is a little complicated, and perhaps a little imperfect, through its being necessary to select different years for comparison owing to the scantiness of information, and because too the comparison of the early and later years does not always apply to the same localities. In such cases however we must take the best information obtainable, and the facts are quite sufficient at least to justify the summary above given. Extracting the figures relating to the South Mahratta country only, we find that there have been the following changes in the purchasing power of a rupee between 1829 and 1863 :—

QUANTITIES of FOLLOWING ARTICLES PURCHASABLE per Rupee in SOUTH GUZERAT, INDIA. [Tola=180 grains troy.]

	1829.	1863.
Jowaree, a kind of millet, a common food of the poorer classes of natives	4,992 tolas.	573 tolas.
Rice, second sort, used by natives and Europeans	2,985	562
Grain, a kind of vetch, the ordinary food for horses	3,423	536
Toor dhall, a kind of pulse, much used by all classes of natives	2,888	474
Wheaten bread, first sorts	17 lbs	5 lbs

In other words, the rise in prices in South Guzerat was so great between 1829 and 1863 that the purchasing power of the rupee in the latter year was only one-ninth what it was in 1829, as respects millet; one-fifth as respects rice; one-sixth as respects vetch; one-sixth as respects ordinary pulse; and one-third as respects wheaten bread. The wideness of these limits of fluctuation is immense, and is not accounted for by the fact that common necessaries of life always fluctuate most—the peculiarity here being that the last year named was not a famine year, though prices, it is noticed, almost rose to the famine point of former years. Thus the highest price of wheat in the famine year of 1860-61 in the North-Western provinces was 7½ to 8½ seers the rupee, but in Guzerat the range of price in 1863 was from 6⅝ to 8½ seers, and in the Southern Mahratta country from 6⅓ to 7¼ seers.

The above facts relate chiefly to the outlying country districts, but very striking figures, though not quite so striking, are given in another table, showing the annual variations in the purchasing power of the rupee in the four chief towns of the Bombay presidency between 1824 and 1863. We regret that we have not space for this table, but the progressive increase of price may be fairly exhibited without giving all the years. The changes thus noted are—

		TOLAS PURCHASABLE PER RUPEE IN— Bombay.	Poona.	Belgaum.	Ahmedabad.

	1863	2	2½	5	...

These figures mostly show a reduction of the purchasing power in the rupee to the extent of one-half or two-thirds—in some cases much more. In other words, prices, as a rule, had more than doubled, and though this is a much smaller change than the one above described in the country districts, it is nevertheless immense.

The statements in the memorandum as to the causes and social effects of this immense change in prices are full of interest. The leading general cause is asserted to be the great importation of silver—11,529,711*l* officially recorded between 1848 and 1863, besides private imports, the importation of course being largely stimulated by the enhanced value of the cotton exports after 1861. This account of the matter we believe to be sound. The improvement in the means of communication, and the high wages paid to labourers in making railways and other public works, had no doubt contributed to the changes, which is shown by their being greater in the country districts than in the towns; but the phenomena were not general over India and in all parts of the country which had been extensively opened up, so that there must have been a special cause operating in Western India. Now the only special cause operating was the large import of silver, which remained in the country because of the want of a foreign commerce to create outlets for it, and of the want of any home arts to absorb it. The case was therefore a very special one of the increase of currency causing a rise in prices, and as such it is one of the most remarkable in economic history.

The statements as to the effect of these great changes on the masses of the people may as well be quoted in the *ipsissima verba* of Sir Bartle Frere's memorandum :—

As regards the effects of the rise of prices on the people, one collector (Mr Propert, Ahmedabad) states, "the labourers are rich, and for every 500 consumers of superior kinds of grain* in bygone years there are now 10,000.

Another (Mr Golafinch, Belgaum) points out that the prosperity of the cultivating classes in the South Mahratta country commenced with the introduction of the revised rates of assessment about 30 years ago.

It was furthered by the rise in prices consequent on the Russian War in 1854-55, by the mutinies in 1857-58, "which caused an enormous expenditure in the country, and it has been brought to an incredible pitch by the American War."

* Pulse (Dallore) is one of these superior kinds of grain, and contains much more nutriment in proportion to its bulk than cereals. The consumption of meat by natives has everywhere in Western India greatly increased.—H.B.E.F.

"The cultivators now, in fact, occupy the position formerly held by the grain dealers. They command the grain supply of the country, and sell or withhold as it pleases them."

Mr Shaw Stewart states that in Canara, a coast district, prices had been rising since 1841. "Now (in 1863) for the first time within memory, rice is being imported into Canara," from ports lower down on the Malabar coast, to supply the market in the South Mahratta country, which always before used to export grain.

Mr Ingle, at Kurrachee, in Scind, notices the abolition of statute labour as having raised the wages of labour in Scind.

In the South Concan, Mr J. Robertson notices the greatly increased value of land, which had become saleable for high prices, where it was hardly ever saleable before.

In Sholapoor (Deccan), Mr Duff says, "the poorer classes are now far better off than they were ten years ago. It is an uncommon sight to witness the rags and misery which were common enough formerly; every one willing and able to work can easily earn enough to support himself and family in comparative comfort."

This is the general testimony on all sides and from all provinces.

Everywhere in the vicinity of railway works the collectors remark on their great and immediate effect in raising prices, especially the wages of labour. Many thousands who were formerly producers of grain have, since the railway works began, become consumers. The demand for labour on the railways reached even districts very remote from the railways.

There was a great difference not only in the numbers of labourers employed, but in the mode of paying them. Formerly, agricultural labourers were very generally paid in kind, and rarely received money wages. They were almost universally in debt to the village money-lender and grain dealer. The practice on railway works of promptly paying for all labour in liberal money wages, caused an important social revolution in the habits of all who live by labour, even at a great distance from the actual railway works. The labourers often travelled from their homes 200 miles, or even more, to obtain work so paid, returning to their fields at the cultivating season and harvest time.

The following tables of average monthly wages put the facts as to the improvement in the labourers' condition, notwithstanding the rise in prices, in a statistical form :—

CARPENTER.

	Averages of 1824-29.		Averages of 1830-39.		Averages of 1860-63.		For 1863.	
	Max.	Min.	Max.	Min.	Max.	Min.	Max.	Min.
	s d	s d	s d	s d	s d	s d	s d	s d
Guzerat	21 3	10 3	23 3	22 10	30 0	29 6	30 7½	30 0
S. Maharatta Country	22 6	15 0	22 6	15 0	45 0	37 0	60 0	40 0
Bombay	No returns.		30 4	...	49 8½	46 6	58 0	54 3½

Masons seem generally to have been paid about the same rates, and their wages rose in nearly the same ratio. The same was the case with the wages of tailors and washermen, who were usually paid at about the same rates, approximating to three-fifths of the wages of a carpenter or mason.

COOLIE, OR COMMON DAY LABOURER.

	1824-29.		1830-39.		1860-63.		1863.	
	Max.	Min.	Max.	Min.	Max.	Min.	Max.	Min.
	s d	s d	s d	s d	s d	s d	s d	s d
Guzerat	10 0	9 0	10 0	8 6	15 0	13 0	17 7½	15 0

Bombay	No returns.		14 9½	11 3½	19 4½	15 6	27 0	15 6

The incidental evil of this great change was the suffering of persons with fixed incomes. This is shown by the following interesting table of the actual cost of living in Deccan (Poona) in 1829 and 1863, of three families of Brahmans, the class from which the educated native servants of Government are chiefly drawn :—

	First Class.			Second Class.			Third Class.		
	Food.	Clothing.	Total.	Food.	Clothing.	Total.	Food.	Clothing.	Total.
	s d	s d	s d	s d	s d	s d	s d	s d	s d
In 1829	10 7¾	3 3¼	13 10¾	7 1¾	1 9	8 10¾	6 0	1 9	7 9
In 1863	23 0	6 4¾	29 4¾	15 10¾	3 4¾	19 2¾	12 4½	3 4¾	16 9
			Pr. Ct.			Pr. Ct.			Pr. Ct.
Increase in '63	...	...	111·71	...	...	113·89	...	...	112·70

Similarly, the principal banks and mercantile firms in Bombay had been obliged to raise the salaries of their establishments from 17 to 50 per cent., to enable them to meet the increased cost of living; and the Commission appointed by the Bombay Government concluded by reporting in favour of an addition to the salaries of civil servants at a decreasing scale from 30 per cent. on salaries under 500*l* per annum, to 15 per cent. on salaries above 2,000*l* per annum.

Such appear to be the principal facts summarised in this very interesting memorandum concerning the great rise in prices in Western India in 1860-63. We hope that our notice may direct some of those who are interested in such inquiries to the memorandum itself, which will well repay the most attentive study.

PURCHASING POWER of RUPEE of ARTICLES of FOOD in the Districts of India and years undermentioned.

MR LEATHAM ON THE HOUSE OF LORDS.

MR E. A. LEATHAM is a clever speaker, but the importance attaching to his speeches is sometimes increased by a general impression that he is apt to take counsel with his brother-in-law, Mr Bright, before communicating his views on any vexed problem of politics to the world, and so to indicate the tendency of Mr Bright's own views. We hope this may not be the case in relation to the proposal for getting over the difficulty of collisions between the two Houses of Parliament, for Mr Leatham's suggestion appears to us in several respects the most unsatisfactory, if not the most dangerous, which has yet been mooted. What he says practically amounts to this—"Leave the House of Lords alone, don't strengthen it by "life peerages, which might give it nerve to resist the people; "but define its function so as to restrict it to the right "of delay. Let the Lords have the power to reject any "Bill passed by the Commons as often as they please during "any one Parliament, but after 'an appeal to the people,' if "the House of Commons pass it again, then let it pass without "the consent of the House of Lords." Now, we are strongly of opinion that this suggestion would be practically unworkable and theoretically mischievous, and for this we will give our reasons.

First,—as to the enormous difficulty there would be in so defining such a solution as to render it workable at all. We should have to define both what was a rejection by the House of Lords, and what was a repassing of the measure by the House of Commons—both very difficult matters. Would such a rejection as that of the Ballot Bill last year, grounded solely upon want of time to discuss it, constitute a rejection? Would the delay of the University Tests Abolition Bill two or three years ago, on the ground that a committee was investigating the subject of a possible substitute for the tests, consti-

tute a rejection? If so, the House of Lords would often use up its power of delaying a really undesirable measure, simply by exercising what in many cases might be a most legitimate discretion in declining to consider it when there was no longer adequate time and opportunity to discuss it. Yet if such rejections on the ground of time are *not* to count as an exercise by the Lords of their power of rejecting for a single Parliament, we should be liable to strategic delays of the most mischievous kind on mere excuses, in order that the House of Lords might retain as long as possible its right to reject the measure for a single Parliament. It would then be an extremely difficult matter to decide what kind of rejection should use up the power of the Peers in this matter, without either wasting their legitimate right to delay a measure unripe for legislation, by a vote taken before the House had really considered the matter, or putting a premium on the practice of pretending to postpone a measure for more complete consideration, when the only object was to delay without a loss of the privilege to reject it. Nor would this be the chief formal difficulty. There would also be the great difficulty of deciding what was in effect the repassing of a measure by the House of Commons after a dissolution. Would it, for instance, be a repassing of the Ballot Bill, if the clauses throwing the expense of elections on the rates were embodied in it next time? Might not the Lords fairly say that such a change was so great as to make the Bill quite a new Bill, and demand the right of considering it again? Or could we require that absolutely no change, even of a verbal kind, should be permitted in the Bill to be repassed by the House of Commons, that it should pass the new House of Commons in the very words in which it passed the old House of Commons, and, if otherwise, that the Lords' right to reconsider it would revive? Such a stipulation, we submit, would be a mere impossible condition. No House of Commons ever yet took exactly the same view of all the provisions of an important measure as any of its predecessors. The suggestion would be simply absurd. And yet allow of any element of variation, and how are you to define the permissible limits of variation so as not practically to concede the power to the House of Commons to pass a new law, which is not even to be revised by the Second Chamber?

So much for the formal difficulties. But even if these could be got over, the real difficulties remain behind. Perhaps the worst result of the collision of feeling between the two Houses is not the delay of great measures but of small, on which no dissolution can be taken, and no appeal to the country is possible. Now would there be any sort of reason in deciding that a Parliament elected on such an appeal to the country as Lord Palmerston's of 1857, with regard to his Chinese war policy, should be regarded as enjoying a bit more of the confidence of the people on the great number of minor questions on which the Commons might differ from the Lords than their predecessors? Suppose there had been a struggle about a Judicial Committee Bill or a Bankruptcy Bill in the previous Parliament, and that the Lords had found either or both of these Bills so immature in principle that they had rejected them, and then another Parliament elected on a question of foreign policy, and without the slightest regard to either of these questions, had repassed these Bills, would there be any kind of sense in saying that the Lords had been overruled in the matter by a House of Commons elected on a question of war or peace in the East, or of an alliance and treaty in Europe? Of course there would not. It might perfectly well happen that if the dissolved House of Commons had been wrong on such matters as these, the new House of Commons would be still more wrong, and that yet there would have been no more of an appeal to the people or of an endorsement by the people of the policy of such Bills, than if such Bills had never been passed at all. What we want a Second Chamber for is to revise the blunders of the First, and we do not desire to take away its power of doing so, except we are sure that the will of the people is with the First and against the Second Chamber. But a dissolution and a repassing of the Bill would give us no pledge of this at all in case the dissolution had taken place on an issue quite remote from the objects of the Bill. Again, it would be a most dangerous thing to tell a Second Chamber that it might delay all legislation till after a new general election but no longer, on the following ground:—Whenever the Chamber was in pique at some measure of great importance being passed against its wish, it would be apt to take a petty revenge by dealing reckless destruction among the smaller measures of the Ministry which had carried the unwelcome law; and still worse, it would be tempted to use its power to do this, by way of threat, as a motive for stopping the House of Commons from unwelcome legislative acts. A massacre of the innocents by the hereditary Chamber would be the natural menace held out to prevent the Commons from riding roughshod over it. A Chamber that had the absolute privilege of rejecting anything for a single Parliament and no more, would certainly not hesitate much about threatening so to use that power as to enlarge it into the exercise of a considerable influence over the legislation withdrawn from its purview. What we want is a second Chamber more or less closely in sympathy with the aims of the first, or at all events so politic as to assume to be so, and yet able to revise well and carefully the means to be used. There is no gain in this direction in Mr Leatham's proposal. The constitution of the Assembly is to be left the same. But its temper is to be embittered by depriving it of even the semblance of power whenever a measure passed in a former Parliament by the House of Commons is passed again in a subsequent Parliament. Of course such an Assembly would be less disposed than ever to come to terms with the House of Commons, and would be likely to use the power still left it in the most warlike manner. We cannot see in Mr Leatham's proposal the least element of success.

BUSINESS NOTES.

Spurious Tea.—Mr Lowe, we think, should be supported in the sturdy opposition he makes to the suggestions which have been made to him for converting a Revenue Department into one for sanitary purposes. The particular business with which he was asked to interfere was the importation of spurious tea, which has no doubt become a great abuse, to the extent even of endangering the health of many people who buy cheap tea, and get an article which is not tea at all. It would be a pure misfortune, however, if our Revenue Departments were set to work on any other than commercial principles, even for the sake of preventing the importation of adulterated articles of food. If they were to do so, we should never know what the real expense of collecting the revenue was, as it would be mixed up with other expenses, and the assumption of other duties would interfere with the revenue officials in their work. Mr Lowe is clearly right in taking duty upon whatever articles are presented to him as dutiable and asking no questions, except with a view of preventing frauds upon the revenue. Upon the more general question as to what the Government should do in the matter of spurious tea and other adulterations there is more difficulty. We should despair of a Government being able to define, with any success, what is wine, or tea, or almost any other article, the shadings of intermixture and adulteration being altogether too refined for legislative tests. In general, too, the maxim of *caveat emptor* is a very sound one, and we do not see that any real good is done in securing individual purchasers against their own remissness in buying articles upon the faith of the names only, when they can protect themselves by sampling, and similar expedients. Such transactions are matters of pure contract, and if purchasers have anything to complain of, the law courts are open to them. The only case where, as it appears to us, the legislature could fitly interfere, is in the sale of articles manifestly and gravely injurious to the health of the people. In such a case, the community has a right to be protected against the carelessness or inability of individuals to protect themselves; but the line even there is very difficult to draw. But whatever the Government ought to do, it is at least quite certain that the Customs and Inland Revenue Departments are most unfit to be entrusted with any sanitary duties.

The German Coinage Law.—We translate from the Berlin *Börsen-Zeitung* the full text of the new Coinage Law, as it has finally passed through the Imperial Parliament of Germany. We have already noticed the principal variations from the original measure—especially the introduction of a 10-mark piece, and the elimination of the pieces of 15 and

30-marks, which were in the project of law, the only coin common to both the project and the measure as finally passed being the 20-mark piece. The new Act appears also to be more explicit than the old in ordering the entire loss through wear and tear to fall on the Imperial Treasury, instead of on the last holder, which is the English rule. The provisions (§8) as to the amount of the old standards, chiefly silver, for which the new coins shall be legal tender, are also new, and will be of the utmost practical importance :—

1. An Imperial gold coin will be struck, of which 139½ pieces will contain a pound of fine gold.

2. The tenth part of this gold coin will be named a "mark," and be divided into one hundred pfennigs.

3. Besides the Imperial gold coin (§1), there shall also be struck Imperial gold coins of 20 marks, 69¾ pieces of which will contain a pound of fine gold.

4. The mixture of alloy in the coins will be fixed in the proportions of 900 parts gold to 100 parts copper. Accordingly 125·55 ten-mark pieces, and 62·775 twenty-mark pieces, will respectively weigh a pound.

5. The Imperial gold coins bear upon the one side the Imperial eagle, with the inscription "Deutsches Reich," and a statement of the value in marks, as well as the year of the coinage; on the other side the likeness of the Sovereign Princes or the symbols of sovereignty of the free towns, with a corresponding device and the stamp of the Mint. The diameter of the coin and its quality, and the inscription of the rim, will be fixed by the Imperial Council.

6. Until the passing of a law for the withdrawal of the large silver coins, the coining of the gold coins will proceed at the cost of the Empire for all States of the Confederation at the existing Mints of those States which have declared themselves prepared. The Imperial Chancellor, under the sanction of the Imperial Council, fixes the amounts of gold to be coined, the division of these amounts between the different sorts of coin and the various Mints, and the proper proportionate compensation of the latter for the coinage of each particular description of coin. He supplies the Mints with the gold which is necessary for the coinage allotted to them.

7. The rules for the coinage will be determined by the Imperial Council, and are subject to supervision on behalf of the Empire. These rules will assure the perfect exactness of the coins in contents and weight. As absolute exactness is not obtainable in separate pieces, the difference more or less shall not amount in weight to more than 2½ thousandth parts of its weight, and in fineness to more than two thousandth parts.

8. All payments which by existing law are made in silver money of thaler currency, of South German currency, of Lübeck or Hamburg customary currency, or in thalers of the Bremen gold reckoning, may be effected in the Imperial gold coins reckoned at—the 10-mark piece for the value of 3½ thalers, or 5 fl 50 kr of South German currency, 8 marks 5⅛ schillings of the Lübeck and Hamburg currency, 3 1/35 thalers of the Bremen gold reckoning; the 20-mark piece for the value of 6⅔ thalers, or 11 fl 40 kr South German currency, 16 marks 10⅜ schillings of Lübeck and Hamburg currency, 6 2/35 thalers of Bremen gold reckoning.

9. Imperial gold coins whose weight is not deficient more than five thousandth parts from the normal weight (§4) (Passirgewicht) and which have not been diminished by violent or illegal injuries, shall be accepted as full value in all payments. Imperial gold coins which do not come up to the before-mentioned pass-weight and have been taken by the Imperial, State, Provincial, or Communal treasuries, or by money and credit institutions and banks, are forbidden to be issued again by these treasuries and institutions. The Imperial gold coins, when in consequence of long circulation and loss of weight they have so much deteriorated as not to come up to the pass-weight, will be withdrawn for account of the Empire to be melted. Further these worn gold coins will be taken at all the treasuries of the Empire and the States of the Confederation at the full value for which they were issued.

10. The coinage of other gold coins besides those introduced by this law, as well as of large silver coins, with the exception of memorial medals, is prohibited.

11. The gold coins now current in the States of the Germanic Confederation will be withdrawn for the account and at the cost of the Empire in proportion to the issue of the new coins. (§6.) In like manner the Imperial Chancellor is empowered to order the withdrawal of the large silver money of the States of the Confederation hitherto current, and for this purpose to employ the most available funds in the Imperial Treasury. An account is annually to be given to the Imperial Assembly in its first regular session of the execution of the above regulations.

12. Standards for adjusting and stamping will be established, showing the normal and pass-weights of the coins to be struck, according to the present law, as well as of multiples of these coins. For adjusting and stamping these standards the provisions of Articles 10 and 18 of the Weights and Measures Law of 17th August, 1868 [Imperial Statute Book, §473], will apply.

13. In the territory of the kingdom of Bavaria a subdivision of the pfennig into two half-pfennigs can take place if necessary.

English and French Trade.—In confirmation of our remarks a fortnight since as to the importance in a Protectionist view of English trade to France, compared with the importance of French trade to England, the detailed statistics obtainable from the Annual Statement of the Trade and Navigation of the United Kingdom, just issued by the Board of Trade, come in very *apropos*. We learn from it that in 1870—

	£
The total exports of the United Kingdom [illegible]	199,586,000
The exports to France only were	14,643,000

So that France is our customer for only about 5 per cent. of our exports. On the other hand—

	£
Our total imports in 1870 were	303,257,000
— imports from France only	37,607,000

—so that upwards of 12 per cent. of our foreign purchases are made from France. The Protectionist view of the matter is of course very childish; but it may nevertheless prove of practical importance that, in a Protectionist view, the trade of France with England must be considered far more beneficial to France than to ourselves, though on Free-trading principles we believe that each country benefits by the gain of the other. The imports from France, it may be observed, were larger last year than they have ever been. The figures for the last five years are :—

	£
Imports in 1866	37,017,000
— 1867	33,735,000
— 1868	33,896,000
— 1869	33,527,000
— 1870	37,608,000

American Criticism on the Recent Action of the Bank.—Our acute American contemporary—the New York *Commercial Chronicle*—makes a remark on the recent action of the Bank, which appears to us to indicate in rather a striking manner one of the most important differences between a convertible and inconvertible currency. The proper course for the Bank to have followed in order to replenish its reserve, says our contemporary, was to have made purchases of bullion. Such a remark is no doubt very natural to people familiar with the American usage. In New York gold is purchased daily with greenbacks, and if a bank wanted to get gold and to keep it its course would be very simple. But what an American could hardly be expected to notice is that the possibility of increasing a banking reserve by gold purchases depends entirely on the inconvertibility of the paper currency. Where the paper is inconvertible, the bank gets the gold for its notes or greenbacks, and cannot be compelled to part with it. But where the paper is convertible, the effect of the so-called purchase of gold is of the most momentary description. The bank gives its paper for the gold, but as the notes are payable on demand they are immediately returned to the bank, so far as not required in circulation, and the bank finds that any premium it may have paid has been advanced for nothing. In a convertible currency, in fact, the purchase of gold in the sense of our contemporary is a contradiction in terms, the gold and the notes being interchangeable. The question is not one of mere theory, the Bank of France having made an experiment on the largest scale in 1865-6, and having then lost about 410,000*l* in premiums paid for gold, which would not stay in its coffers, viz. :—

Period.	Dates.	Premiums Paid. £	Gold Purchased at 1½ pm. £
6 months...	1855—July 1 to Dec. 31 ...	160,000 ...	10,660,000
6 months...	1856—Jan. 1 to June 30 ...	120,000 ...	8,000,000
3½ months..	July 1 to Sept. 11 ...	60,000 ...	4,000,000
1 month ...	Sept. 11 to Oct. 9 ...	25,000 ...	1,700,000
2 months...	Oct. 9 to Dec. 11 ...	45,000 ...	3,000,000
18⅓		410,000 ...	27,360,000

This table is given in "Tooke's History of Prices" (Vol. 6, p. 88), which contains farther information as to the inutility of the device. Of course if the Bank sold property and got money for it, its reserve would be strengthened, just as it would have been strengthened by its borrowing on property, which was the course we recommended, but these are very different measures from the purchase of gold with its notes. We need hardly add that under a system of inconvertible paper, in which gold would be purchasable, the necessity for a bank to purchase it, in order to replenish its reserve, could not arise. On the other hand, as we pointed out last week, the effective instrument under a convertible currency for bringing gold to a country—viz., the raising of the rate of interest—is available to a very narrow extent only in a country whose currency is inconvertible.

The New Sovereign.—We beg to offer Mr Lowe and the subordinate Mint authorities our congratulations on the new sovereign which has been lately issued to the public. In appearance, as all can see, the new coin is a decided improvement upon the old. The deeper tinge of colour gives it a healthier look—more like real gold, and less like the sickly

yellow of the commoner alloys which the jewellers have so much accustomed us to. If the sovereign only familiarises the public with a standard by which the gold in their ornaments and plate may be tested, it will do some public service indirectly. Another merit is the design of St George and the Dragon on the obverse, instead of the meaningless quarterings which made a mere blotch, in an artistic sense, of one side of the old coin. A third advantage of the new coin is the raised and milled edge, which makes it nicer to touch and handle. Altogether these improvements constitute a change for the better in the familiar standard of our small payments and receipts, and should contribute a little, we hope, to the international popularity of the coin, and the consequent extension of English credit abroad. The matter is comparatively a small one, but if the thing is worth doing at all, it is worth doing thoroughly well, and the Mint is to be congratulated on the zeal and success with which they are carrying out the work. The success is all the more gratifying, because, according to the testimony of the best authorities, the improvement is partly connected with a real improvement in the intrinsic composition of the coin, which will make it wear better.

Loss by Exchange.—The Lombardo-Venetian Railway.—A complaint made by the shareholders of this large company, whose shares and obligations are so largely held in England, brings out very clearly one of the dangers of investments in foreign lines. The complaint is of the "loss by "exchange," and the figures have only to be stated to show how enormous the loss may be to investors in foreign countries which have a depreciated currency. In 1870 the accounts of the company stood as follows:—

	£
Total receipts, including 426,000*l* from previous year, and 280,000*l* from Italian Government to make up guarantees	5,861,000
Working expenses	2,415,000
Surplus	3,446,000

Allowing for 357,000*l* carried over to the following year, here was a total sum of upwards of 3,000,000*l* for division, the proportion falling to the ordinary shareholders being about 800,000*l*, which, on a total ordinary share capital of 15,000,000*l*, gives rather more than 5 per cent. But in fact the dividend was only 3 per cent., the remainder being lost in the exchanges, as follows:—

	£	
Interest on bonds and sinking fund		2,285,000
Dividend on 750,000 shares at 12s per share = 3 per cent. on 15,000,000*l*		450,000
Loss by exchange		354,000
Balance to 1871		357,000
Total surplus, as above		3,446,000

The loss in exchanges is in fact upwards of 10 per cent. on the total amount divisible, and as it falls exclusively on the ordinary shareholder, made a difference last year of about 2 per cent. in his dividend. As the traffic has increased greatly in 1871, the loss by exchange will be still more serious, the accounts, it is probable, coming out nearly as follows:—

Receipts.		£
Balance from 1870		357,000
Total receipts in 1870	£5,435,000	
Actual increase in 1871 to 21st Oct. (42 weeks)	590,000	
Proportional increase to end of year (14,000*l* per week)	140,000	
		6,165,000
		6,522,000
Working expenses—(say) 43 per cent. on gross receipts		2,650,000
Surplus		3,872,000

Division of Surplus.	£
Interest and sinking fund of loans, including new issue	2,380,000
Divisible to ordinary shareholder at 1*l* per share (= 5 per cent.)	*750,000
Loss by exchange (= 2½ per cent. on ordinary capital)	390,000
Balance to 1872	352,000
Surplus, as above	3,872,000

* It appears doubtful however if this amount will be actually divided, as it will be necessary to appropriate a large sum in future years for the redemption of the share capital.

Thus, but for the loss by exchange, the accounts on the present traffics would show a dividend of 7½ per cent. for the current year, instead of 5 per cent. Unfortunately, though the evil is so evident the remedy is far from clear. Shareholders must simply keep the danger in view when they invest. But the Governments of the countries concerned are not free from blame in the matter. By depreciating the currency, which is their own act, they in fact take something from the value of any industrial concession they have granted. They authorise certain charges to be made, on the faith of which foreign capital is obtained, and then lower the value of the currency in which these charges are fixed. In obtaining such concessions from foreign Governments it would only be reasonable to stipulate to have rates and fares all upon a gold basis. The foreign investor would from time to time gain or lose by the exchanges, but he would no longer lose by depreciated paper.

The Forged Telegram.—We fear that very little will come of the fuss which is being made about the forged telegram relating to the Sheffield and Midland amalgamation. It is not the first of similar Stock Exchange manœuvres which have made a sensation for a time and then be forgotten. It is so difficult to connect the despatch of the telegram with any particular sellers of Sheffield stock last Friday, though some must have had a hand in the conspiracy, that the search is practically hopeless, and we doubt even if the labours of the Committee of the Stock Exchange, which has been anxiously considering the matter, will yield any result. There are one or two side questions of some interest, however, on which we should like to see some light. One is the mysterious silence preserved by the officials of the company for some hours after the whole world knew of the information in the telegram. It was published throughout the country on Friday morning, but not contradicted till two hours after the opening of business on the following day. In fact a day and a-half's business was transacted on the faith of it without any one of a score of gentlemen on the boards of the respective companies, who must each have known of its unauthenticity, whispering a word in contradiction. The silence was probably accidental or inconsiderate, but it was most unfortunate, and the comments which have been made on it should be a warning to all those having the management of large interests not to permit similar false news to remain uncontradicted. Another question of interest is how the publication of such false news is to be prevented? For that we can see no course but the vigilance of the receivers of telegrams. If they conduct important correspondence by telegram with known correspondents, they should have frequent and varying signals for mutual recognition; and if they receive important messages from strangers, or from acquaintances with whom they have arranged no code of signals, they should invariably telegraph back for confirmation. As the business is now managed, half-an-hour or an hour's delay would suffice to bring back the knowledge that the telegram had come from its pretended source. The Post Office would do some good by insisting on the signature of every telegram; but this would be an illusory security, compared with what the public may obtain from their own vigilance.

Stock Exchange Transfers.—The Court of Common Pleas—*re* Case *v.* McLennan—has decided that a person selling stock at a certain price is bound to sign a transfer acknowledging the receipt of a larger price, where the transfer contains the usual memorandum explaining that the price mentioned is that paid by a sub-purchaser. The Judges held that this memorandum had the effect of an interpretation clause, and that a seller who objected to the words "paid to me" and caused damaged by refusing to sign, so that the transaction had to be completed otherwise, was without a case. The usual Stock Exchange transfer is thus sanctioned; but as the words in question are too frequently a stumbling-block to the miscellaneous public, it might perhaps be advisable for the Stock Exchange Committee to consider whether a clause could not be framed getting over the difficulty more simply. Could it not be made to say expressly, "Paid to me, or to "intermediate purchasers from me?"

THE PUBLIC REVENUE AND EXPENDITURE.

THE following are the Receipts into and Payments out of the Exchequer between April 1, 1871, and Nov. 25, 1871 :—

REVENUE AND OTHER RECEIPTS.

	Budget Estimate for 1871-72.	Total Exchequer Receipts To Nov. 25, 1871.		Same time last year.	
	£	£	£	£	£
Balance on 1st April, 1871—					
Bank of England	...	5,678,915		7,633,761	
Bank of Ireland	...	1,344,520		972,887	
			7,023,435		8,606,648
REVENUE.					
Customs	20,100,000	12,945,000		13,069,000	
Excise	22,420,000	13,737,000		13,364,000	
Stamps	8,750,000	6,226,000		5,695,000	
Taxes	2,330,000	415,000		802,000	
Income Tax	8,820,000	1,807,000		1,552,000	
Post Office	4,670,000	2,412,000		2,460,000	
Telegraph Service	750,000	475,000		340,000	
Crown Lands	375,000	195,000		200,000	
Miscellaneous	4,100,000	2,798,538		1,823,368	
Revenue	72,315,000		41,040,538		39,305,368

Advances, under various Acts, repaid		1,641,266		1,485,235	
Money raised for fortifications		...		...	
Money raised by Exchequer Bonds		...		...	
Temporary advances not repaid		1,000,000		...	
			2,641,266		1,485,235
Totals			50,705,239		49,397,251

EXPENDITURE AND OTHER PAYMENTS.

	Budget Estimate for 1871-72.	Total Exchequer Issues To Nov. 25, 1871.		Same time last year.	
EXPENDITURE.	£	£	£	£	£
Interest of Debt	26,910,000	18,396,843		18,372,806	
Other charges on Consolidated Fund	1,820,000	1,197,755		1,530,133	
Supply Services voted by Parliament	43,253,000	25,374,075		22,814,677	
Telegraph Service	420,000	280,000		240,000	
Expenditure	72,433,000		45,248,673		42,957,616
OTHER PAYMENTS.					
Advances under various Acts		1,045,272		909,466	
Expenses of fortifications		...		...	
Exchequer Bonds and Bills, &c., paid off		145,800		25,500	
Surplus income, to reduce Debt		739,179		2,464,526	
			1,930,251		3,399,492
Balances on Nov. 25th, 1871—					
Bank of England		2,799,115		2,239,176	
Bank of Ireland		727,200		800,967	
			3,526,315		3,040,143
Totals			50,705,239		49,397,251

The following are the Receipts on account of Revenue during the week ending Nov. 25 :—

	Receipts of Week Ending Nov. 25.
	£
Customs	484,000
Excise	292,000
Stamps	183,000
Taxes	nil.
Income tax	24,000
Post Office	nil.
Telegraphs	nil.
Crown lands	nil.
Miscellaneous	14,477
Total	997,477

The total receipts of the previous week were 1,351,143*l.*

The Exchequer issues of the week on account of expenditure were 513,000*l*, viz. :—

	£
Interest of debt	nil.
Other charges on Consolidated fund	nil.
Supply services	513,000
Telegraph services	nil.
	513,000

During the week the cash balances have increased as follows :—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on Nov. 18	2,458,038	623,613	3,081,651
— 25	2,799,115	727,200	3,526,315
Increase	341,077	103,587	444,664

SAVINGS' BANKS RETURN.

THE following Return shows the amounts received from, and paid to, Savings' Banks, and Post Office Savings' Banks, in the United Kingdom, by the Commissioners for the Reduction of the National Debt, during the four weeks ending Saturday, Oct. 28, 1871 :—

	Total Amount received by the Commissioners.	Total Amount paid by the Commissioners.
SAVINGS' BANKS :—	£ s d	£ s d
In money and interest credited	59,466 16 2	70,571 6 1
To transfer certificates from Post Office Savings' Banks to Savings' Banks	315 12 6	...
By transfer certificates from Savings' Banks to Post Office Savings' Banks	...	46,697 6 6
Total	59,782 8 8	117,268 12 7
POST OFFICE SAVINGS' BANKS :—		
In money and interest credited	129,605 1 0	...
To transfer certificates from Savings' Banks to Post Office Savings' Banks	46,697 6 6	...
By transfer certificates from Post Office Savings' Banks to Savings' Banks	...	315 12 6
Total	176,302 7 6	315 12 6

	£ s d
Total amount on Oct. 28, 1871, at the credit of—	
The fund for the Banks for Savings	38,073,980 11 7
The Post Office Savings' Bank fund	16,700,930 14 0
Total	54,774,911 5 7
Ditto—by last monthly account	54,656,410 14 6

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, Nov. 30.

The returns of the Bank of France for this week, last week, and for the week ending 8th September, 1870, are as follow :—

	DEBTOR. Nov. 30, 1871.	Nov 23, 1871.	Sept. 8, 1870.
	f c	f c	f c
Capital of the bank	182,500,000 0	182,500,000 0	182,500,000 7
Profits in addition to capital (Art. 8, Law of June 9 '57)	7,378,450 27	7,377,252 2	7,045,160 82

The Bank return for this week shows a large increase in the circulation of notes, which has now reached within about forty millions of the limit, the highest point yet attained. The augmentation is represented almost entirely by the discounts, which exceed 750 millions, and render some prompt measures absolutely necessary, as the demands for accommodation are not likely to decrease in presence of the great movement of business which occurs on the approach of New Year's day. The contradiction to the rumours relative to an increase of the Bank circulation of notes appears really to have meant no more, as I suggested last week, than that no steps would be taken until the Chamber met. The semi-official summary of news sent each evening from Versailles by the Havas agency, announced last night that one of the first acts of the Assembly on meeting next week will be to raise the maximum of the emission of paper, and to authorise the issue of notes of five francs. This last measure will give general satisfaction, as although the tokens of the Comptoir d'Escompte and Société Générale have proved of great utility, some over-scrupulous people declined to receive them, on the ground that they are not guaranteed by the Government; they besides only circulate in places where those two establishments have branches.

The Bank return shows an increase of nearly thirty millions in the Treasury account, but a slight decrease in the private deposits, which is explained by the recurrence of the monthly settlement.

The Minister of Finance attended at the last meeting of the Permanent Committee at Versailles. Referring to the monetary crisis, his Excellency said that the circulation of coin in France was estimated at 6,000 millions of francs, while 410 millions only had been exported, of which 210 millions had been furnished by the State, and 200 millions by private firms. The portion of the indemnity paid to Prussia now amounted to 1,510 millions. His Excellency believed that he would be able to go to the end of the year with his present resources. Being asked if the Government intended to exercise its right of claiming from the Bank of France the entire sum of 1,500 millions of francs, which that establishment had engaged to advance, and in which case it would have to furnish a further sum of 200 millions, the Minister declined to give a positive answer, but admitted the possibility of the Treasury requiring the full sum.

The Chamber will also have laid before it on an early day the Budget for 1872, and other financial documents. The Government is believed to be still indisposed to give up its project of a duty on raw material, notwithstanding the large majority of the committee in favour of a tax on incomes. It is not improbable that the final result will be that the Government will find itself under the necessity of having recourse to both those means. The last peace Budget of the Empire, that of 1870, only amounted to 1,812 millions, while that of 1872 is already estimated at 2,500 millions, or an increase of nearly 700 millions; on the other hand, the new taxes proposed by the Government, including the Customs duties, were only calculated to produce 488 millions, and that sum is probably overstated. The war estimates are expected to exceed by 80 millions those of the Empire, and the reductions of expenditure in other chapters will probably not more than compensate for the decrease in the produce of the taxes. Moreover, the sum of 2,500 millions for 1872 does not include the extraordinary expenditure required for the liquidation of the past, the purchase of arms and military stores, and the departmental Budget, or together about 300 millions. The rebuilding of the forts will also entail an outlay of 500 millions, which will be either spread over a series of years, or be provided for by a loan. The new items to be added to the future Budgets, the result of the late events, amount to a sum of about 640 millions, composed as follows:—Interest of loan of 1870, and Morgan loan, 55 millions; last loan of two milliards, 140 millions; interest on three milliards still due to Prussia, 150 millions; interest on advances by the Bank, 9 millions; annual reimbursement to the Bank, 200 millions; interest and amortization of 325 millions due to the Eastern Railway Company, 20 millions; keep of army of occupation, 46 millions; interest and amortization of indemnity to invaded provinces, 20 millions.

The Bourse throughout the week has been dull, with little business doing. The announcement of the further reductions in the Bank of England rate of discount failed to give any impetus to affairs, pending the monthly settlement. The following are to-day's prices:—

Premium on gold, 14f to 16f per thousand; English bank-notes and sovereigns, 25f 75c; exchange on London, 25f 80c.

The Italian funds of the French market bear up triumphantly against the damaging rumours repeatedly put in circulation respecting them. A short time back the statement was busily put about that a new loan was to be issued, and that the rise was only the result of a manœuvre to ensure for it a favourable reception. The next report was that M. Sella would not raise a public loan, but would obtain the resources he required by a fresh mortgage of ecclesiastical property. The stock continued to rise notwithstanding. A fresh rumour has now been started, which is that a new 4 per cent. stock is to be created, exempt from taxation, and for which holders of the present five per cents., producing 4f 34c, might exchange their titles at par. In order to drive the holders to make the conversion, a fresh tax will, it is said, be put on the present rente, so that the public may be led to prefer the certainty of a four per cent. stock to one of five per cent., which might be brought to less than four by fresh reductions.

The newly-constituted Credit Mobilier Company has held its first general meeting. The chairman, Baron Haussmann, announced that on the 25th instant 180,000 of the total of 240,000 old shares had been presented for exchange at the rate of five for two of the new company, which proved that the resolutions adopted in the meeting of the 11th had obtained the adhesion of three-fourths of the proprietors. 48,000 of the 64,000 shares by which the new working capital is raised had been reserved for them, and of that number the old proprietors had exercised their right of priority for 33,600. The remaining 14,400 had been placed at the disposal of the bankers who had engaged to take the complement 16,000 with any others for which the shareholders should not exercise their privilege. The law of July, 1867, on limited liability companies requires that when the quota of any of the partners does not consist of money, a company is not definitively constituted until the value of the equivalent has been verified and approved of by a general meeting. The assembly in consequence chose a committee of three of the new proprietors to ascertain that the assets of the old company were worth the 48 millions at which they are estimated, then draw up a report, which must be distributed five days before the next meeting, after which the company will be legally constituted.

The *Journal Official* has published a notice relative to the new penny receipt stamp on all payments above ten francs, to come into operation to-morrow. The law comprises not only the usual discharges written at the foot of invoices, &c., but railway tickets, admissions to theatres, payments on the waybills of carmen, receipts for securities deposited, delivered, or sold, &c. Receipts for rente are, however, exempted. Blank cheques must be embossed at the Stamp Office, the adhesive heads not being permitted for them.

The overcrowded state of the goods' traffic on the railways continues to give rise to loud complaints. Some factories in the neighbourhood of Marseilles, which receive their coal from the neighbourhood of the Loire, have been actually forced to cease working from the absolute impossibility of obtaining fuel. The subject was also brought yesterday before the Municipal Council of Paris, and the Prefect of the Seine, at the desire of several members, promised to apply to the Minister of Public Works to obtain an extension of the hours during which the goods stations are open, and the reception and delivery of merchandise on Sundays. Unfortunately at this moment the navigation on the Seine between Paris and Rouen is entirely suspended. The river had already been closed at Mantes over the great portion of its breadth, for the reconstruction of the locks, when a few days back a barge laden with 400 tons of stone struck against the bridge and sank, blocking up the only channel left open. The removal of this obstruction presents such difficulties, that the Government engineer has ordered a passage to be opened on the other side of the river.

A drawing has taken place of bonds of the City of Paris

loans of 1855 and 1860. The prizes were gained as under in each of the three series, the loan of 1860 being divided into two—one of blue paper, the other pink:—No. 44,085, 100,000f; Nos. 2,450, 19,923, 14,111, and 95,239, each 10,000f; Nos. 17,375, 98,932, 88,389, 69,582, 68,354, 107,065, 138,172, 97,837, 119,848, 84,754, each 1,000f. 4,401 other bonds were drawn for reimbursement at 500f each.

An official return gives the following statement of the production of alcohol in France during the year which ended the 30th September last:—Manufactured by the trade from farinaceous substances, 2,194,698 gallons; beetroot, 4,663,912; molasses, 9,341,948; wine, 6,577,296; various substances, 759,704—total, 23,537,558 gallons. Private stills, from home-grown produce, formerly not subject to duty: from wine, 5,790,070 gallons; wine lees and fruits, 619,168—total, 6,210,338 gallons. Imported, about 1,650,000 gallons. General total, 31,597,896 gallons. The stock remaining on the 1st October last was 11,760,166 gallons. The exportation for the year is estimated at 6,600,000 gallons.

Several commercial cases have been heard before the Tribunals this week. One was a suit brought by two shareholders of the Caisse des Chemins de Fer to obtain admission to a general meeting of proprietors. An order for the winding-up of this company was made in 1866, when M. Mires was appointed liquidator. He died in June last, and MM. Halbronn and Hue were appointed provisionally in his place, on condition of drawing up an inventory, and calling a meeting of shareholders. According to the statutes the meeting could consist of only the two hundred largest proprietors who should have deposited their shares within a stated time. One plaintiff, M. Hans, held five only, and was not qualified; the other, M. Pauffin, as owner of fifty would have been entitled to attend, but had not made the deposit as required. They now claimed to be admitted to the meeting on the ground that the statutes had ceased to have any effect since the winding-up order in 1866. The Civil Court admitted the application, and prolonged the powers of the provisional liquidators for four months to enable them to call a fresh meeting.

A judgment of the Tribunal of First Instance had decided that the Roman Railway Company, after the payment of the interest on its debentures, should apply the surplus of its available receipts to the arrears of interest on the preference shares, now outstanding for six years and a-half, and amounting to 165f. The company wished to employ those resources to the repair of the line, and appealed against that decision. The new judges have given a verdict to the effect that as the privileged shares were created to complete the capital, the holders of them could not be considered as creditors but as shareholders, and could only share with the original proprietors.

A manufacturer of decorations for orders of merit brought an action against the Emperor of Austria, the Archduke Charles, and the Archduchess Sophia, as heirs of the Emperor Maximilian, to recover a sum of 51,477f due by the last-named. The defendants pleaded the incompetence of the court, which has, however, decided that, "if the principle of the reciprocal independence of States towards each other excludes the jurisdiction of the tribunals with respect to foreign sovereigns, such is not the case when the prince has contracted the debt in his own name and private interest; that by the terms of the citation the plaintiff Lemaitre claims of the heirs of the Emperor of Mexico the payment of goods for which he had made himself personally responsible; that such a demand is not contrary to the rules of international law." The court in consequence rejected the plea of incompetency, and postponed the case for a fortnight for the plaintiff to furnish proofs of the personal obligation of the Emperor Maximilian, and to show that the defendants are the real heirs of the debtor.

Another case arose out of the increase in the sugar duties. M. Say, the large refiner, had sold in March, 1870, to MM. Vinit and Co., 18,000 loaves, to be delivered at the rate of 3,000 a month between July and December of that year. The war broke out, and in December M. Say was three months in arrear; a fresh arrangement was made, by which the monthly deliveries were to be resumed from the twentieth day after the cessation of the investment of Paris. The Commune formed a fresh obstacle, the works of M. Say being stopped, and the director imprisoned for a certain time by the insurgents. Soon after the suppression of the insurrection the duty was increased, and Mme. Say (her husband having died in the meantime) refused to deliver 3,800 loaves still remaining due except at an increased rate of 14f 10c per 100 kilos. Hence the present action. The Tribunal of Commerce decided that MM. Vinit and Co. ought not to be made to suffer from the neglect of M. Say to carry out the original engagement, and cancelled the contract so far as it was unexecuted, condemning Mme. Say to pay 1,500f damages and the costs.

The Belgian Railway Plant Company's profits for the year amount to 306,672f on a capital of 2,600,000f, which are to be distributed as follows:—A first dividend of five per cent. to the shareholders; 15 per cent. of the balance to the reserve; 26 per cent., or 15,351f, to be divided among the board of directors and *employés*; and 59 per cent. for a second dividend of 20f per share.

A meeting just held by the Tug and Transport Company of the Seine shows the undertaking to be in an embarrassed situation. The results of the year's operations have been a further loss of 138,406f, making a total deficit of 843,854f. The directors proposed to reduce the capital by exchanging two of the present shares for one new one, and to decrease the working expenses and the salary of the chief engineer. The meeting was adjourned for two months for an examination of the accounts.

The International Line of Italy announces that in consequence of an invitation from the Government of the Valais, from which it derives its concession in Switzerland, it is compelled to postpone the payment of the half-yearly coupon of interest which fell due in October.

Several towns have obtained authorisation, in consequence of the monetary crisis, to discharge claims on them from private individuals by bonds of the loans issued by them.

MM. Delahante and Girard have applied to the Council General of the Manche for the concession of a branch of railway from Carentan to Carterets to facilitate the exportation of farm and dairy produce to Jersey. They wish for no subvention, but ask the department to guarantee five per cent. interest on the part of the capital raised by debentures.

The Northern Railway Company has fixed its dividend for the 1st January, 1872, at 20f (interest 8f on account of profits 12f), which will be paid from the 1st December, with the bonds falling due at the same date, less discount at the Bank rate.

The report of the Lille to Bethune Railway Company shows that although the returns have increased by 17,510f the sum is still insufficient to cover the expenses and pay the interest on the shares. A fresh series of debentures to consolidate the floating debt is to be issued.

The Algerian Cotton Company also is not able to distribute any dividends. The directors hope, however, that with time the undertaking may prosper. The sums due to the company exceed by 175,664f those owing by it.

The Société Industrielle has invited subscriptions for 15,000 shares of 500f, of which 300f to be paid up. This company, which was established four years back, has branches in eleven of the principal towns of France.

The Banque des Chemins de Fer d'Intérêt Local has held a meeting of shareholders. The report read showed that the capital was intact and that the profits of the year had amounted to 314,266f. A dividend of 5f per share was declared to be paid from the 1st December in exchange for the coupons 1, 2, and 3.

A convention for the working of the Calabro-Sicilian lines during a period of fifteen years has been passed between the Meridional Company and the Minister of Public Works in Italy. This arrangement requires to be ratified by the Italian Parliament.

The General Glass Works Company of the Loire and Rhone have declared a dividend of 30f per share, 20f to be paid immediately, and 10f from the 10th May next.

A meeting of shareholders of the La Wied Slate Works has voted the winding-up of the company by the sale of the mines belonging to it.

The following are the latest quotations of the produce markets at *Havre* per 50 kilos, duty paid:—

Cotton.—New Orleans middling, 125f to 127f; low middling, 122f to 124f 50c; Georgia low middling, 117f to 119f; Oomra good ordinary, 94f to 95f; Tinnevelly good ordinary, 92f; Bengal same mark, 83f; Madras, 88f. Sales last week, 23,498 bales; arrivals, 4,270; stock, 133,347.

Coffee.—Hayti, 144f 50c to 145f; Rio, 142f; native Ceylon, 147f 50c; Gonaives, 148f; Santos, 145f 50c; Manilla, 150f; Tellicherry, 155f. Sales for week, 9,100 bales: arrivals, 17,030 and 605 tierces; stock, 158,166 and 2,685 tierces.

Sugar.—French West India good No. 4, 58f 50c, old duty; usine, 1st jet, 70f; 3rd, 57f, new duty.

Hides.—Monte Video fresh salted cow, 78f; ditto dry ox, 135f; La Plata good dry ox, 142f to 145f; salted, 85f.

Wool.—Buenos Ayres unwashed, 200f; Spanish, 220f; Monte Video, 222f 50c; Levant, 177f 50c to 182f 50c.

Tallow.—La Plata sheep, 57f 87½c; New York, 61f; New Orleans, 63f 50c.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

An Account pursuant to the Act 7th and 8th Victoria, cap 32, for the week ending on Wednesday, the 29th day of November, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued	38,691,420	Government debt	11,015,100
		Other securities	8,984,900

In 1861, the demand for money was quiet, as it had been the previous week; but owing to the uncertainties arising from the Trent difficulty, there was an indisposition to enter into long engagements. There was great fear that war was unavoidable.

In 1868, the Bank rate was raised from 2½ to 3 per cent., the previous advance to 2½ not having been effectual in stopping the drain of bullion. In consequence of the success of the Liberal party at the recent elections, Mr Disraeli's Ministry had resigned, without awaiting the meeting of Parliament.

In 1869, money was a little more in demand, owing to the usual requirements at the end of the year, but the rates in the open market were only fractionally higher. There had been several failures in the grain trade owing to a recent fall in prices, but trade generally was improving. The new French Assembly, containing a large Radical minority, had just met.

In 1870, money was in moderate demand, and the rates in the open market were fractionally lower than they were the previous week. The difficulty which had arisen in consequence of the Russian denunciation of the Treaty of Paris still contributed to aggravate the suspense and increase the accumulation of money in Lombard street. Great progress was being made in the French attempts to raise the siege of Paris, but a check had been received by the Loire army at Beaune-la-Rolande, in the neighbourhood of Orleans, in an attempt to force a passage to Paris.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 2,951,236*l*; in 1868, an excess of 892,499*l*; in 1869, an excess of 1,486,490*l*; and in 1870, an excess of 2,344,200*l*. In 1871, there is an excess of 4,816,890*l*.

Discount and Money Market.—The Bank of England reduced its rate on Thursday from 4 to 3½ per cent., but as the open market rates were already well under the latter figure, the movement had comparatively little effect. Thursday being pay-day for the Stock Exchange settlement, there was rather more demand for the moment, so that a downward move in the open market after the reduction in the Bank rate was checked. To-day the abundance of money has been more felt, and the rates are a shade easier than they were a week ago, with a drooping tendency, the market being again a little unsettled. The minimum rate for the best short-dated bank paper is now 3⅛, the other rates being in porportion, but there are many special transactions. At the Bank there has been a slightly improved demand, compared with the inactivity which has prevailed lately, but the movement does not arise from any stringency in the open market.

The Bank account clearly justifies the reduction of rate, and would probably have justified an immediate reduction to 3 per cent., which is now so nearly touched in the open market. The reserve has increased 458,000*l*, being now 15,179,000*l*, and the bullion has increased 199,000*l*, being now 24,394,000*l*. On the other hand, the private securities have been repaid to the extent of 948,000*l*, while the private deposits have decreased 1,102,000*l*—the public deposits, however, having increased 690,000*l*. The circulation has also diminished 291,000*l*. These changes show another great improvement in the Bank's position, the reserve being now very nearly double what it was on the 11th of October, when the Bank rate was raised to 5 per cent. As there is a large amount of bullion to

arrive, out of which the numerous anticipated demands on us may be met in part, if not altogether, there is certainly some reason why a reduction to 3 per cent. might have been made, or may shortly be looked forward to. It appears likely however that some of the foreign money now with us is certain to go, the German and Paris exchanges to-day having fallen, and a demand for bullion having sprung up, sufficient to take away the anticipated arrivals next week.

The changes in the Bank of France account are again unfavourable, the note circulation having increased 2,360,000*l*, and the discounts nearly as much; the latter owing probably to the demand for the Bourse at the monthly liquidation. The legal limit of the note circulation is now very nearly attained. In any event it appears improbable that the state of affairs in France can cause a drain of bullion to it, its currency not being gold but inconvertible paper.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—2 to 3 months	3½	per cent.
Do 4 months	3⅝	per cent.
Do 6 —	3¾	per cent.
Trade bills—2 to 3 months	3¼ 3½	per cent.
Do 4 months	3½ 3⅝	per cent.
Do 6 —	3⅝ 4	per cent.

The allowances for money at the private and joint stock banks and discount houses have been reduced ½ per cent., in accordance with the reduction in the Bank rate. They now are :—

Private and Joint Stock Banks at call	2½ per cent.
Discount houses at call	2½ per cent.
Do with seven days' notice	2⅝ per cent.
Do fourteen days'	2¾ per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent.		Open Market, per Cent.	
	1870.	1871.	1870.	1871.
Paris	6*	6	5½	5⅝

Amsterdam	4	3	3½ ⅝	2½ ⅜
Brussels	...	3½	...	4¼ ⅓
Hamburg	...	...	4¾	2¾
St Petersburg	7	8	7	7

* Nominal.

The Stock Markets.—The transactions in the stock markets this week have been generally of a very limited character, and prices, on the whole, have been weak, the approach of the last settlement showing the existence of a large bull account, and the tendency of operators being rather to "unload" than to enter into new engagements. At the same time there has been no material fall of prices, the state of the money market enabling speculators to carry over with ease, and a tolerable certainty existing that in nearly every department a month or two will bring a higher level of prices than has yet been reached. The amount of money seeking investment is increasing every day, and as yet the commitments on new undertakings are not very large, so that the resort to old investments must continue. At the same time the prosperity of every description of industrial enterprise is so great, and the real value of the property, judged by the usual standards, is increasing so rapidly, that there are all the elements for a further great advance in prices, although the present period of speculative suspense may continue for a week or two, or longer. The feature of the last account has been the magnitude of the purchases in the miscellaneous market. In foreign securities there has been comparative little business done, and in the railway market the transactions for the account are moderately large, but in the miscellaneous market—including banks, credit companies, telegraph companies, and insurance companies—there has been a large amount of new business. The settlement has been a large one, though not so large as on the previous occasion.

An exception to the quiet tone of the week has been the excitement in the railway market in connection with the supposed official telegram, posted on the Stock Exchange last Friday morning, announcing an amalgamation between the Midland and Sheffield Companies. As we notice below, it was officially intimated the following day that the telegram was forged, but the purchases on the faith of it, and the reaction on the discovery of its falsity, have caused great losses, and the deception has naturally given rise to many comments—especially on the long-continued silence preserved by all those who should have been in a position to publish a contradiction.

In the foreign market the Paraguayan loan has proved a remarkable success, the applications being for three times the amount of the issue.

English Government Securities.—The dealings in this department have been very limited, but the abundance of money maintains prices. To-day the tone of the market has continued steady, and the closing prices are 93⅛ ⅝ for money, and 92⅞ ¼ *ex div.* for the January account.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money. Lowest	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March and June
Saturday	93⅜	93⅜	93⅜	93⅜	2s to 7s pm
Monday	93⅜	93½	93½	93⅝	2s to 7s pm
Tuesday	93⅜	93⅜	93½	93⅝	2s to 7s pm
Wednesday	93½	93½	93½	93⅝	2s to 7s pm
Thursday	93½	93⅝	91½	93⅝	1s to 6s pm
Friday	91½	91½	91½	91½	1s to 6s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices this day.	or Inc. Dec.

Victoria 6 %	112 13	112 13	... ...
Ditto New 5 %	106 7	106 7	... ...

Foreign Government Securities.—As we have stated, the market has been very quiet, the account showing that no large amount of business had been done. Prices, though rather weak just before the settlement in sympathy with the weaker prices from the continent, rallied in the course of it, and have been well maintained. There is still an amount of *bona fide* investment going forward, and as there is no real pressure to sell, owing to the abundance of money, the preponderance of purchases has a most perceptible effect. To-day the market has continued steady, but there is little business doing, and prices are occasionally, when sales happen to be pressed, a shade weaker.

The allotment letters of the Paraguayan loan were issued on Thursday, the amount applied for having been thrice the amount of loan. The premium advanced from last week, and the price to-day is 2⅜ ½ pm.

A question of some interest has arisen this week in connection with the overdue drawing on the Turkish 6 per Cent. loan of 1865. The drawing, by the terms of the contract, takes place in November, and the customary quotation for the account at the end of the month is made *ex* drawing. On the present occasion, however, there has been a slight delay in fixing the drawing, which is only announced for Monday next, so that a question has arisen as to how transactions for the last account are to be settled. Are sellers to have the drawing or not? In most cases, we understand, brokers and dealers have been careful to make their contracts *ex* drawing, and in these cases there should be no question; but there are other cases where the point was only understood, the assumption being that the drawing would take place before settling day, and in these the doubt has arisen. The decision of the Stock Exchange Committee—that the bonds are to be delivered without any question about the drawing—appears to us very dubious. The understanding was clear enough, the money price in the course of the account having ruled higher than the account price, thus showing that sellers and buyers for the account were dealing in what was considered a less valuable article than the one that was dealt in for money. The obvious remedy would be to order the purchaser to return such bonds as may happen to be drawn on Monday in exchange for undrawn bonds, which would give the drawing to the seller, as the contract intended. The difficulty which has arisen, we need not say, is another illustration of the loss of credit which Turkey suffers by want of punctuality. A good many people are

thrown out by the consequent confusion of their bargains. Some explanation of the circumstances should in any case be given by the agents, who, it is stated, were bound to have drawn the bonds for payment, and were not obliged to wait till money was provided to pay them.

Mr John Bell, of Madrid, has consented to act as agent for the General Committee of Spanish Bondholders.

Annexed are our usual quotations showing the changes for the week :—

ENGLISH RAILWAYS.—But for the excitement connected with the false intelligence of the Sheffield and Midland amalgamation this would have been a very quiet week. The weakness to which we referred a week ago continued to the first morning of the settlement, the pressure to realise exceeding for the moment the amount of purchases for investment, while numerous operators kept aloof. Immediately on the arrangement of the account however there was a strong rally, and though this was again checked, partly by a fresh pressure to realise, and partly by bear sales, the tone until to-day has, in the main, been good. The traffic returns of the week are again singularly favourable, and as the aggregate increase for the half-year in the eighteen principal railways, of which we give an account below, is now 1,235,000*l*, or about 200,000*l* in excess of the accrued increase in the whole of the previous half-year, which, nevertheless, yielded such extraordinary additions to the dividends, it is evident that we may now certainly look forward to still more startling improvements in the next dividend declarations. An excess of 200,000*l* already, with five weeks to spare, equal to between 200,000*l* and 300,000*l* more, should make the improvement next dividend period one-half more than the improvement shown in the last declaration of dividends. It is not likely, therefore, that, barring accidents, there can be any serious fall at present in the prices of English railways, while as the dividend period approaches the tendency to discount the expected announcements will increase. To-day the market has been rather weaker, especially towards the close, but the drop in prices is not considerable.

The greatest weakness lately has been shown in the southern lines, though the recent traffic returns are quite as favourable as could have been fairly reckoned on beforehand. The weakness is thus merely the result of a market operation, and ought not to affect investors who have made a careful calculation of the prospects of the lines, and are certain of being under no necessity to sell for some months to come.

The excitement in the market last Saturday in connection with the Sheffield telegram was very great. Early in the day the price of Sheffield stock moved up to 78⅓, but at this point a telegram was published announcing an official contradiction of the telegram of the previous day, and there was an immediate relapse—the weakness increasing afterwards from day to day notwithstanding a lingering belief in the truth of the fact alleged in the forged telegram. On the Stock Exchange there is of course a strong wish that the forger may be discovered and punished, and that the operators who acted with him should also be got at; but such manœuvres have been too often successful to give any hope of discovery. We discuss elsewhere the expediency of some suggestions, with a view to preventing the success of such tricks in future.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices :

A prospectus is issued this evening of the London Central Railway Company (Charing cross, Oxford street, Euston square, and St Pancras). Capital, 1,500,000*l*, in 150,000 shares of 10*l* each. The company was empowered last Session to construct a railway, 2½ miles in length, connecting the Charing cross station of the South-Eastern Railway with the London and North-Western Railway, at Euston square, and the Midland Railway, at St Pancras, and the prospectus states that "agreements have been made and confirmed "by Act of Parliament, by which the Midland Railway Com- "pany engages to pay 30,000*l* a year, and the South-Eastern "Railway Company 20,000*l* a year, both in perpetuity, for "the privilege of running their trains over the company's "line, those two companies working their own traffic, and in "addition paying to the Central Company agreed tolls for all "passengers taken up or set down at any station on the Cen- "tral line. The right is reserved to make a similar agree- "ment with the London and North-Western Railway Company, "or any one other railway company now existing and having "its terminus north of Leicester square, on terms not lower "than those agreed with the Midland Company." The company thus starts with a perpetual guarantee of nearly 4 per cent. on its capital, without any expense for working, apart altogether from the profit it may get from its own trains, or the tolls which other companies may pay to it. Certificates are appended from the company's engineers and others, to show that the line may be constructed for the capital stated.

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending Nov. 25 to 757,117*l*, being an increase of 59,537*l* on the corresponding week of last year. The aggregate receipts of the current half-year to date are now 16,664,217*l*, being an increase of 1,235,891*l* on the corresponding period of last year. The principal increases for the week are—London and North-Western, 10,510*l*; Midland, 10,145*l*; North-Eastern, 7,243*l*; Great Western, 5,651*l*; and Lancashire and Yorkshire, 4,731*l*. The following shows the details of the increase or decrease in each case for the week and for the whole period :—

AMERICAN SECURITIES.—Owing to the receipt of favourable advices from America, United States' Five-Twenty bonds have advanced on the week. By to-day's mail we learn that when Mr Boutwell last purchased Governments, there was a great scarcity prevailing, only 1,397,000 dols being offered at prices ranging from 111.10 dols to 111.58 dols. Gold was quoted then at 111¼ dols, and, as the directions of the secretary were interpreted to mean that no bonds were to be bought above 111.24 dols, all were rejected but 21,000 dols. For the first time, therefore, Mr Boutwell has found that he cannot buy the uncalled Five-Twenties below par in gold in the amounts ordered for the Sinking Fund. This is a significant fact, and will greatly assist in the gradual conversion of the United States Debt. The following shows the changes for the week :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
United States 6 % 5/20 Bonds, exchng. 4/6	91⅞ 2	92⅛ ¼	+ ¼
Ditto 1865 Issue	92 ¼	92⅜ ⅜	+ ⅛
Ditto 1867 Issue	94⅛ ⅜	94⅜ ½	+ ⅛

Virginia 6 % Bonds	51 3	52 4	+ 1

JOINT STOCK BANKS.—The market has shown much firmness during the week, more particularly with regard to foreign and colonial banking institutions, and the movements have nearly all been favourable. Australasia shares show an advance of 1½ ; Egypt and Chartered of India, 1 ; Anglo-Austrian, Chartered Mercantile of India, City, Oriental, and Union of Australia, ½ ; while Standard of British South Africa are 3 higher. On the other hand, several of the London banks have given way, an erroneous idea apparently prevailing that the reduction in the rate of interest adversely affects the value of their shares. Agra A shares are down ¼ ; London Joint Stock, London and San Francisco, London and Westminster, ½.

TELEGRAPHS.—There has been considerable speculation in this department, and numerous fluctuations have taken place during the week. The chief feature is a rise of 3 in Anglo-Mediterranean ; British Indian Extension, Marseilles, and Reuter's, have fallen ½ ; Anglo-American and French Cables, after undergoing various fluctuations, closed the same as last week. Telegraph Construction shares were in demand at one time, and rose 1, but to-day the price fell on large selling orders, and there is now a reduction of 1 on the week. Hooper's Construction shares have risen ¾.

MINES.—The mining share market calls for little remark, except that there has been an improvement in some copper mines, owing to the rise in the price of copper. In British mines, North Roskear and Wheal Bassett are quoted 15 higher, and South Wheal Frances 7 ; but Devon Great Consols and Herod's Foot are marked at a reduction of 10 and 3 respectively. Margaret Uny Lelant have given way 1½, Wheal Buller 2½, South Condurrow, Great Laxey, and Great Wheal Vor ½. Van shares show a rise of 2½, Wheal Mary Ann and Tankerville of ½. In the foreign market there is an improvement of 1 in St John del Rey and Eclipse, ¾ in Pacific, ¼ in Almada and Vancouver Coal. Cape Copper have given way ½, Colorado, Pacific, and Sweetland Creek ¼.

MISCELLANEOUS.—The dealings in this market have been of fair average extent, and the result of the week's operations is favourable to holders. Scottish Australian Investment have risen 5 ; Submarine Cable Trusts, 2¾ ; Peninsular and Oriental, 1 ; Berlin Waterworks, North Metropolitan Tramways, and Rhymney Iron (new), ½. Credit Foncier, Fore Street Warehouse, London Tramways, Natal Land, and National Discount, ¼. London General Omnibus have given way 1.

The following were the nominal quotations to-day for some of the new undertakings :—Limmer Asphalte, 3⅞ to 4½ ; United Limmer, 2¼ to 1⅝ dis. ; Anglo-Austrian and Anglo-German Bitumen, both 3 to 2 dis. ; Anglo-Hungarian Bitumen, 1½ to 2½ prem. ; Montrotier Asphalte, par to 1 prem. ; Belgian Dutch Paving, 3 to 2 dis. ; Native Guano, 28 to 30 ; Phosphate Sewage, 26 to 26½ ; Sombrero Phosphate, 1 dis. to par ; Patent Gas, 13 to 13½ : the New Shares, 5¾ to 6¼ ; Emma Mining, 1 to 2 prem. ; and the paid-up shares par to ½ prem.

BULLION AND EXCHANGES.—In the foreign exchanges this afternoon bills upon Paris and upon Germany were rather more in demand. During the week the inquiry for bullion has been inactive, but to-day a demand has sprung up, and it is anticipated that the bulk of the arrivals next week will be taken abroad. The demand for silver for the East still continues firm, though it will probably be abated somewhat by the increased supply of Government bills on India, in consequence of the fortnightly sales of drafts being increased from 400,000*l* to 500,000*l*. The Bank of Bombay, however, has increased its rate of discount 1 per cent., following the lead of Bengal, and it is possible that the increased supply of Government paper may not meet the Indian demand.

The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week :—

Gold.—The total sent into the Bank since our circular of the 23rd instant is 289,000*l*. and as there is but little demand for abroad the greater part of all arrivals will also be sent in. Sovereigns to the value of 172,000*l* have been taken for transmission to the Cape and the Brazils. The Pera has taken 76,700*l* to India, and we have received 20,000*l* from the West Indies, per Nile, and 8,500*l* per Wild Deer, from Otago. The overland mail due the end of the ensuing month is bringing 562,086*l* from Australia.

Silver.—Some rather considerable purchases have been made for the East at prices ranging from 60⅞d to 61d per oz standard, for immediate delivery ; the market is now quiet, and buyers are holding off until the 500,000*l* of India Council Drafts are tendered for on the 6th proximo. We have received about 50,000*l* from New York, and 20,000*l* from the West Indies during the week. The Pera has taken 67,000*l* to Bombay.

Mexican Dollars have been sold at an increased price on the rates lately quoted, the last transactions having been at 59½d for new, and 61¼d for the old coinage. The market is now quiet, intelligence having been received that a Conducta, with about $2,300,000, had left Mexico for the coast on the 29th October ; this specie may, therefore, be expected here by the end of the year. The Pera has taken 103,000*l* to China and the Straits, and the Hong Kong has also sailed with about 70,000*l* to China.

Exchange on India for Banks' drafts at 60 days' sight is 1s 11⅝d per rupee.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std ; ditto refinable, 77s 10½d to 77s 11d per oz std, last price ; South American doubloons, 74s per oz. Silver—Bar silver, fine, 5s 0⅞d per oz std, last price ; ditto containing 5 grains gold, 5s 1d to 5s 1⅛d per oz std, last price ; Mexican dollars, new, 4s 11½d, old, 5s 1⅛d per oz, last price. Five-franc pieces, 3s 11½d each, last price, none here.

According to the *Gazette* returns the imports of the precious metals into the United Kingdom during the week ended November 29 were :—Gold, 156,317*l* ; silver, 216,600*l*. The exports were :—Gold, 321,102*l* ; silver, 191,691*l*.

The sum of 30,000*l* was sent into the Bank to-day, while 10,000 sovereigns were withdrawn for South America.

We are indebted to Messrs J. Allard and Co., of Paris and London, for the following telegram, giving to-day's exchange and bullion quotations in Paris :—

NOTICES AND REPORTS.

STOCKS.

Sardinian 5 per Cent., 1851.—Bonds representing 45,000*l* have been cancelled on account of the sinking fund.

RAILWAY COMPANIES.

Central Argentine.—At the meeting resolutions were adopted expressing the "surprise and indignation" of the shareholders that the House of Congress of the Argentine Republic should have approved the Bill abrogating the Government guarantee of 7 per cent., and calling upon the directors to take the necessary steps to secure the defeat of the measure should it be re-introduced.

Eastern Bengal.—The report states that the gross receipts for the half-year ended the 30th June amounted to 119,168*l*, the working expenses to 67,530*l*, and the net receipts to 51,638*l*, against 36,011*l* in the corresponding half of 1870. The gross receipts in the current half-year up to the time of the break on the line in the first week in September, caused by floods, amounted to 48,488*l*, against 23,641*l* in the corresponding period. The floods were said to be higher than any that had previously occurred in Bengal during the present century. Arrangements were promptly made for the continuance of the passenger traffic, which was stopped for a few days only; but the goods traffic was not resumed until the 28th October. Capital expended, 2,710,001*l*, exclusive of stores, and powers have been taken to raise a further 250,000*l*.

Midland—Manchester, Sheffield, and Lincolnshire.—The announcement, by telegram, made on Friday, the 24th ultimo, that an amalgamation had been arranged between these two companies was the next day discovered to be a forgery, and a reward has been offered for the discovery of the guilty parties.

Philadelphia and Erie Railroad—6 per Cent. General Mortgage.—Messrs J. S. Morgan and Co. have received subscriptions for $5,000,000, or 1,000,000*l*, in $1,000 (200*l*) bonds of the Philadelphia and Erie General Mortgage, the total of which is limited to $20,000,000. Both principal and interest are payable either in London or Philadelphia, and the principal is due in 1920. The issue price is 87½, or 175*l* per bond, payable by instalments extending over four months. The money is required to construct a duplicate line of 110 miles in length; and the bonds are endorsed by the Pennsylvania Railroad Company, to which the Philadelphia and Erie is leased in perpetuity.

Waterford and Central Ireland.—The revenue for the half-year ended 29th September exceeded that for the corresponding period by 1,329*l*. The amount available for dividend was 4,544*l*, out of which the directors recommended the payment of a dividend on the preference stock of the company at the rate of 4 per cent. per annum, being an increase of 1 per cent. over that of last year, leaving a balance of 607*l*.

BANKS.

Bank of British North America.—A dividend for the current six months, at the rate of 8 per cent., free of income tax, is to be paid to the shareholders.

London and River Plate.—A dividend at the rate of 10 per cent. per annum has been announced.

National Bank of Australasia.—A telegram announced a dividend at the rate of 10 per cent. per annum.

Royal Bank of Scotland.—The dividend declared for the half-year ending Christmas is at the rate of 8½ per cent. per annum, which absorbs 85,000*l*, leaving 30,000*l* for addition to the reserve, and 13,049*l* as balance.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

Financial Co-Operator, Limited.—Capital 100,000*l*, in 5*l* shares, The object of the company is to afford facilities to the professional, trading, and middle classes, and it "will transact all the business common to bankers, and, in addition, will open drawing accounts without requiring a credit balance, provided the customer give satisfactory security for the repayment of his drafts, with interest, as may be previously agreed." No loans are to exceed 1,000*l*.

Trust and Loan of Upper Canada.—At the meeting a dividend at the rate of 8 per cent. per annum was declared, less income tax.

ASSURANCE COMPANIES.

Clerical, Medical, and General Life.—The report stated that 430 new policies were issued during the year, assuring 260,013*l*, at premiums amounting to 8,187*l* per annum. The income was larger than that of last year by 6,207*l*, and reached 236,563*l*; the death payments were smaller by 7,232*l*, and fell to 133,487*l*. The assurance fund was increased by 75,176*l* to 1,826,458*l*. A bonus meeting will be held on the 4th January.

Liverpool Marine Insurance, Limited.—A resolution will be proposed at the meeting to-day in favour of voluntary liquidation.

MISCELLANEOUS COMPANIES.

Imperial Continental Gas.—A half-year's dividend of 2*l* per share has been declared.

[CONTINUED FROM PAGE 1471.]

Madras Irrigation and Canal.—The works between Soonkasala and Caddapah were finished by the 1st July and within the estimates.

Moyar Coffee.—A dividend of 6 per cent. for the year has been declared.

Oriental Gas, Limited.—At the meeting the revenue account showed a balance of 11,471*l*, out of which a dividend of 5 per cent., free of income tax, was declared, making, with 4 per cent. paid in June last, a total distribution of 9 per cent. for the year.

Peninsular and Oriental Steam.—Half-year's dividend 3 per cent., together with 1 per cent. from the underwriting account. This makes 7 per cent. for the past year.

Redington Quicksilver.—The letters of allotment were posted on the 30th November.

MINING COMPANIES.

Crescent Gold Mining, Limited.—Capital, 100,000*l*, in 10 shares. The purchase of the Crescent Gold Mine, stated to contain four very productive veins, together with a 32-stamp mill, buildings, dwelling-houses, steam engines, and appliances, is to be made for 80,000*l*, of which 25,000*l* is in shares. Reports by Mr Ashburner, Hon. J. Ross Browne, and others are printed, as well as the certificate of the President of the Mining Bureau of the Pacific Coast. These are favourable, and amongst other matters, the reserves are stated to be sufficient to employ a 50-stamp mill for many years to come.

Devonshire Great Consols.—A dividend of 6*l* per share for six months absorb 6,144*l*, leaving 16,673*l* in cash and ore bills.

Emma Silver.—Warrants for the first interim dividend at the rate of 18 per cent. have been issued.

Flagstaff Silver Mining of Utah, Limited.—Capital, 300,000*l*, in 10*l* shares. For the sum of 300,000*l*, of which 200,000*l* is in shares, the vendors agree to sell this property, and Messrs Field, Wood, and Haynes receive subscriptions for the remaining 10,000 shares. The mine, situated at Little Cottonwood Canyon, Utah Territory, is stated to be close to the "Emma" Mine, the same vein running through both, and the ore is reported to be of great richness. Smelting works and ample water power are also, it is announced, to be handed over, and it is intended to keep daily records of ore raised, ore smelted, bullion realised, and profits made. The first monthly dividend of 2 per cent. is to be paid on the 1st February. No money will be given to the vendors until all reports have been duly verified.

Sweetland Creek Gold.—A quarter's dividend of 4s per share is payable on the 30th instant.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The corn trade ruled very quiet to-day, and the tendency of prices was downwards for all descriptions of cereal produce. English wheat was in short supply, but there was a good show of foreign, the quality of the samples being generally good. Demand ruled very inactive for both red and white parcels, and important sales could only be effected at some concession. Flour was neglected, and prices showed weakness, while there was scarcely any business passing in feeding stuffs. Maize and oats were rather cheaper to buy. This week's imports of foreign and colonial produce into London have amounted to 22,360 qrs of wheat, 6,460 barley, 57,670 oats, 1,300 sacks and 2,700 barrels of flour.

At Liverpool and Wakefield this morning wheat sold slowly at a reduction of about 1s per quarter.

The Liverpool cotton market opened on Friday last with an active demand, which continued until Tuesday, when an advance of $\frac{1}{32}$d per lb had been established. There has since not been so much inquiry, and the above advance has been barely supported. The total sales for the week are 123,420 bales, of which the trade have taken 78,060 bales; speculators and exporters, 45,360 bales. The imports are 46,195 bales; the actual exports, 9,382 bales; and to-day's stock is 486,260 bales. Quotations for American and East Indian descriptions have advanced $\frac{1}{16}$d per lb, and Bengals are unchanged since this day week. To-day the market closes firm; sales, 12,000 bales.

The following return shows the quantities of cotton im-

ported and exported at the various ports of the United Kingdom during the week ended November 30, 1871:—

	Imported.	Exported.
American.....bales	18,819	1,515
Brazilian	12,888	3,343
East Indian	19,814	12,346
Egyptian	3,829	92
Miscellaneous	3,343	240
Total	58,693	17,536

At New York, on November 30, middling Upland cotton was quoted at 19c per lb.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, Nov. 3:—The business done here during the past week, which only reaches a total of about 2,200 candies, has been confined almost entirely to ready cotton, and prices have, in sympathy with the dull accounts from Liverpool, given way from 2 rs to 3 rs per candy. Old Bhownuggur has been arriving pretty steadily, and purchases to the extent of 900 candies have been reported, at prices ranging from 218 rs to 225 rs, according to quality, which is exceedingly irregular. The best parcels are, as a rule, picked up by the local spinning companies, whose stocks are now very much reduced, and who have been paying very full prices for suitable cotton. Of sawginned Dharwar the arrivals have been small, but large receipts are reported on the coast, which will doubtless reach this market very shortly. We trust that we shall then be able to report some improvement in the selection, which is so far very indifferent. In new cotton, for forward delivery, there have been no transactions, and quotations remain nominally the same as for last mail. Reports from the districts as to the growing crops, although still favourable on the whole, point to reduced estimates in some quarters, owing to the scarcity of water. In the immediate neighbourhood of Broach the plants are looking dwarfed and weakly; but the rainfall throughout Gujerat generally has been very irregularly distributed, and the out-turn of the old Broach crop is likely to be up to the average. In Kandeish there has been no rain, and as it is now too late to expect any, we fear the yield, both of cotton and grain, will not be more than half. From Hingunghaut and the Berars report are uniformly favourable, and the crop is rapidly approaching maturity. Samples, both of new Hingunghant and new Oomrawuttee, have been seen by us, and although the cotton had been picked before it was ripe, it promised well, both for staple and colour.

Export of Cotton from Bombay to November 3.

	1871.	1870.

China	49,491½	48,428
Grand total	1,104,134½	1,012,775½

Actual exports since last mail left, 13,166 bales.

The Imperial Ottoman Bank have furnished the following report, dated Alexandria, Nov. 17:—There has been another very active week, with gradually hardening prices, the demand running principally upon good fair, fully good fair, and extra fine qualties, all of which are consequently very scarce for the moment. We have seldom known a season when the crop has gone forward so rapidly, it is estimated that there are 30,000 to 35,000 bales of Egyptian cotton afloat between Alexandria and Liverpool. There is already a falling off in the better qualities. The market closed firmer to-day, and we quote:—Fair open, with staple, 9½d per lb, f.o.b.; good fair, ditto, 9¾d to 9⅞d, ditto; fully good fair, ditto, 10½d, ditto. Shipments from Nov. 11 to Nov. 17:—England, 14,252 bales; Italy, 1,457; Austria, 1,145—total, 16,854 bales.

The colonial produce markets have ruled somewhat quieter this week, and sugar closed dull. Refined goods tended in favour of buyers. The unfavourable reports in regard to the Dutch trade depressed the coffee market, but a reaction took place on the receipt of satisfactory advices from America. Cocoa remains without change. Rice has ruled dull, both afloat and on the spot. Among metals tin has been excited.

The following report, dated Oct. 30, has been forwarded by Messrs Fryer, Schultze, and Co., of Colombo:—The weather during the fortnight just elapsed, has been unsettled, notwithstanding which a good deal of coffee has been exported, and to date the figures show that shipments are in advance of the amounts exported at the same time last year, notwithstanding which the amount of this article to be shipped during the current season, will be small. The distribution to date is as under noted:—

Plantation Coffee.

	1871. cwts.	1870. cwts.
To Great Britain	39,895	5,437
Foreign ports	875	...
Australia and India	300	2,465
	41,070	7,902

Native Coffee.

	1871. cwts.	1870. cwts.
To Great Britain	6,176	...
Foreign ports	724	1,020
Australia and India	1,049	308
	7,949	1,328

The business during the fortnight in parchment coffee, has again been on an extensive scale, but for some days past there has been rather less business, as growers are advancing their pretensions. The scarcity of native coffee on the spot, and favourable advices from home, have forced the prices of unpicked to 48s to 49s, whilst picked and dried for shipment has been done at 54s.

The following is from Messrs Schmidt, Son, and Co.'s market report, dated Havana, Nov. 7:—During the whole of the past month the sugar market remained exceedingly quiet, as holders showed little or no inclination to sell at a reduction. The few sales effected now and then were made on the basis of 10 rs for No. 12 quality of the season, whilst dry sugars obtained ¼ rl to ½ rl above that figure. The demand for low-graded descriptions having almost entirely subsided, in consequence of unfavourable advices from the United States, these classes can be obtained at about 9¾ rs for No. 12; on the whole, however, planters do not press their stocks on the market, being still in hope of realising higher prices later on. Derosne sugars are very scarce, in fact the market is almost bare of them, and the few small lots lately offered for sale commanded very full prices, say about 10¼ rs for No. 12. Bright yellow sugars are no longer to be met with in the market. Our general quotations must be placed as follow, viz:—Nos. 7 to 10, 24s 1d to 26s 3d; 11 to 12, 26s 9½d to 27s 4d; 13 to 14, 27s 11d to 28s 5d; 15 to 17, 29s to 29s 6½d; 18 to 20, 29s 6½d to 36s 1d; whites, inferior to superior, 36s 1d to 40s 5½d. The stock here and at Matanzas amounts to 131,604 boxes, against 87,492 boxes in 1870. Molasses sugars have been in demand; several large lots were sold quite lately at 7¼ rs and 7⅛ rs for Nos. 7 to 8, whereas offers of 8¼ rs for Nos. 9 to 9½ were rejected by holders. The exports from here, Matanzas, Cardenas, and Sagua la Grande, during the last month were distributed as follows:—To the United States, 31,778 boxes 309 hhds; Great Britain, 4,822 boxes; Spain, 1,703 boxes; Central and South America, and other parts, 2,465 boxes—total, 40,768 boxes 309 hhds, against 36,300 boxes 958 hhds same month last year. And the aggregate of exports from the above-mentioned ports sum up to 993,658 boxes 239,482 hhds, against 1,594,232 boxes 342,867 hhds in 1870. The Crop.—The weather having continued favourable throughout the month, and as all apprehensions of a hurricane have ceased, there is now every probability of the crop being an abundant one; grinding will not commence, however, as early as in former years, owing to the continuance of rainy weather, by which the work on the estates will naturally be retarded.

Messrs Southey, Balme, and Co., report:—The fifth and last series of wool sales of the current year have been in progress since the 23rd inst. The arrivals of wool were 68,813 bales, of which some 5,000 or 6,000 bales were forwarded direct to the manufacturing districts, or privately sold before the sales opened. This reduction, however, has been more than made up by the considerable parcels of second-hand wool—roughly estimated at 7,000 to 8,000 bales—which the rapid rise in the value of our staple during the last few months has again brought back to the central market. The enormous increase in the consumption of wool appears to be but one instance of the remarkable phase of prosperity which, since the close of the continental war, has set in in every branch of industry, and the small supply of raw material offering to meet the demands of an extended trade has led to a further enhancement in value for some time past regarded as inevitable. It is satisfactory to be able to observe that this revival in trade is, as far as we can judge, of a perfectly legitimate character, and that its influence therefore upon the price of our article is calculated to prove of more than temporary importance. We quote an average advance in all descriptions of wool of 1d to 1½d per lb on the rates of September-October. The first series for 1872 are fixed to commence on the 8th February.

Annexed is Messrs William Moran and Co.'s indigo report, dated Calcutta, Oct. 31:—There is nothing to add to our re, marks of the 10th on the state of the crop, and we leave our estimate of 90,000 maunds unchanged for the present. A few small parcels of native indigo have already arrived from up-country, but we do not expect the sales to open for another fortnight or three weeks. The following transactions "for arrival" are reported, viz:—J F C, Burhowlea, Chuprah, about 220 maunds, at 320 rs per fy. maund; G W L L & Co., Rajahputty, Chuprah, about 280 maunds, at 315 rs ditto; J A S, Singytolla, Malda, about 100 maunds, at 310 rs ditto; Mc D & F, Lowurreah, Chumparun, about 160 maunds, at 297-8 rs ditto.

The annexed is dated New York, November 17:—The volume of trade is moderate, though about as large as usual on the winding up of the active business season. The staple products

of the soil show little change in value, though moderate supplies of grain, and the prospect of a revival of the export trade later in the season, give the market rather a firm undertone. A prominent cause of the dulness in the foreign grain markets, which reacts upon our own, is the heavy floating supplies, the imports into Great Britain alone being about fifty per cent. in excess of last year. The home trade is very moderate in most departments, distributors being very conservative in their purchases, evidently intent upon keeping stocks from becoming unwieldy and their liabilities small. Values are for the most part steady, though, as usual at this stage of the season, and with the monetary pressure, slight concessions are here and there made by sellers, in order to close out stocks. The financial situation presents little change. The supply of currency is more liberal and more readily obtainable on sound collateral than a week or two ago, though as there is still a considerable drain to the interior to move the crops, the rates of discount continue to rule high—8 12 to 15 per cent. for prime and good commercial paper, and 5 to 6 per cent. on call. Foreign exchange has been more active, and rates are higher, importers being induced to cover contracts by the relatively low price of gold, and also by an apprehension that the remittance of twenty millions on the 1st of December to cancel that amount of Government bonds of 1862 held in Europe, may lead to a reaction of the premium. Advices from London to the effect that the arrangements for closing up the new Five per Cent. Government bonds, through the syndicate, will be made according to contract, without difficulty or disturbance of the money market, tends to strengthen confidence in financial circles.

THE COTTON TRADE.

LIVERPOOL.—November 30.

Cotton has again been in good demand, and in the early part of the week the business was very large at ⅛d to ¼d per lb advance. Since Tuesday the market has been comparatively quiet, but the quotations generally are raised about ⅛d per lb. The Bank rate has been reduced this day to 3½ per cent. For Sea Island the demand has been good, principally for the commoner qualities, at former prices. American has been in general request, and after rising fully ⅛d per lb is now more freely offered, and the extreme advance is not supported. New York advices to the 28th inst. quote middling Upland 19c, costing to sell in Liverpool 10⅛d per lb, by steamer. Brazil has been in good demand, at ⅛d per lb advance. In Egyptian a large business has been done, and prices in the early part of the week were fully ⅛d per lb dearer, but this advance has since been partially lost. East Indian continues in active demand, chiefly on speculation and for export, and a very extensive business has resulted at ⅛d advance in the medium and higher, and ⅛d to ¼d on the lower, qualities.

In cotton to arrive the demand was active in the early part of the week, and prices advanced about ⅛d per lb. During the last few days the business has been limited, and prices have given way nearly ⅛d per lb in American descriptions. The latest quotations are:—American, basis of middling, New Orleans, not below good ordinary, November-December shipment, 9 1/16d; from any port, not below good ordinary, shipments November-December, 9 7/16d; December-January, 9 7/16d; Texas, ship named (without clause), 9⅛d; Dhollerah, fair new merchants, not below middling fair, February delivery, 7½d; February-March, 7½d; Rangoon, fair merchants, ship named, 6 3/16d per lb.

The sales of the week, including forwarded, amount to 123,420 bales, of which 22,980 are on speculation, and 22,380 declared for export, leaving 78,060 bales to the trade.

December 1.—The sales to-day will probably amount to about 12,000 bales, the market quiet.

The above figures show:—

	bales.
An increase of import compared with the same date last year of	745,500
An increase of quantity taken for consumption of	519,800
An increase of actual exports of	212,040
An increase of stock of	95,630

In speculation there is an increase of 368,340 bales. The imports this week have amounted to 46,193 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to Nov. 24) is 142,000 bales, against 242,000 bales at the corresponding period last year. The actual exports have been 9,382 bales this week.

LONDON.—November 30.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

During the early part of the week a good demand prevailed, and prices were generally ⅛d dearer; yesterday and to-day there has been less inquiry, the advance not being maintained.

NEW YORK.—Nov. 17.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Nov. 17. From the figures thus obtained it appears that the total receipts for the seven days have reached 101,494 bales, against 105,400 bales last week, 96,708 bales the previous week, and 93,969 bales three weeks since, making the total receipts since Sept. 1, 1871, 666,608 bales, against 799,329 bales for the same period of 1870, showing a decrease since Sept. 1, this year, of 132,721 bales. The exports for the week ending this evening reach a total of 59,889 bales, of which 55,680 were to Great Britain, 3,252 to France, and 957 to rest of the continent, while the stocks as made up this evening are now 329,165 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night :—

Week ending Nov. 17.	Exported to		Total this week.	Same week 1870.	Stock.	
	Great Britain.	Continent.			1871.	1870.
New Orleans	14726	...	14726	21701	95054	103927

Total	55680	4209	59889	87655	329165	342507
Total since Sept. 1	257085	32350	289435	369968	...	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 27,766 bales, while the stocks to-night are 13,332 bales *less* than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Nov. 10, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph :—

Total last year	...	677146	259136	1494	21683	282313	283319	316751

The market the past week has been more active, and prices have advanced about ⅛c. This improvement has been due in part to the firmer tone and upward tendency at Liverpool, but chiefly to the falling off in the receipts at the ports and the unfavourable weather and rumours which have been current of frosts throughout a large portion of the South. Under these influences spinners have been led to increase their purchases, and the advance at Liverpool has enabled shippers to execute some outstanding orders. The results, therefore, are increased sales, and an improvement of ⅛c in prices here, as noted above. Holders have shown less willingness to dispose of their stock as the week advanced, and yet the offerings have been fair of all grades, but at the close there is a growing indisposition to sell except at full prices. The movement for forward delivery has been less active, but prices have advanced to about the same extent as for spot cotton for all the winter months except November, and for November there being a special demand to cover contracts before close of the month the improvement has been fully $\frac{5}{16}$c, closing for low middling at 18$\frac{5}{16}$c for November, 18$\frac{1}{2}$c for December, 18$\frac{5}{8}$c for January, 18$\frac{3}{4}$c for February, 19c for March, 19$\frac{1}{4}$c for April, and 19$\frac{1}{2}$c for May. The total sales of this description for the week are 67,600 bales, including 300 free on board. For immediate delivery the total sales foot up this week 21,431 bales, including 11,078 for export, 7,928 for consumption, 423 for speculation, and 2,002 in transit. Of the above, 608 bales were to arrive. The following are the closing quotations :—

	Upland and Florida.	Mobile.	New Orleans.	Texas.
	c c	c c	c c	c c
Ordinary.....per lb	15$\frac{7}{8}$ @ ...	16 @ ...	16$\frac{3}{8}$ @ ...	16$\frac{1}{2}$ @ ...
Good ordinary	17$\frac{1}{4}$ ...	17$\frac{5}{8}$ ...	17$\frac{7}{8}$ ...	18 ...
Low middling	18$\frac{1}{2}$ ...	18$\frac{3}{4}$ ...	18$\frac{3}{4}$ ...	19 ...
Middling	18$\frac{3}{4}$ ...	18$\frac{7}{8}$ ...	19$\frac{1}{8}$ ...	19$\frac{5}{8}$ ...
Good middling	19$\frac{1}{8}$ ...	19$\frac{3}{4}$ ...	20$\frac{1}{4}$ ...	20$\frac{1}{2}$ ...

For forward delivery the sales (including 300 free on board) have reached during the week 67,600 bales (all low middling or on the basis of low middling).

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports, receipts and shipments for the week, and stock to-night and for the corresponding week of 1870 :—

	Week ending Nov. 17, 1871.			Week ending Nov. 17, 1870.		
	Receipts	Shipments.	Stock.	Receipts	Shipments.	Stock.
Augusta	6549	5320	14654	8130	8146	8640
Columbus	1660	1147	5623	3225	2915	5510
Macon	3040	2306	9580	4701	4437	8696
Montgomery	2109	2028	7529	3300	2896	7100
Selma	2429	1988	5240	4325	3083	7281
Memphis	15294	15730	18825	20534	16378	19187
Nashville	1863	1756	2155	2279	2229	1796
	32944	30185	63606	46494	40054	58510

The above totals show that the interior stocks have increased during the week 6,870 bales, and are to-night 5,096 bales *more* than at the same period last year. The receipts have, however, been 13,550 bales *less* than the same week last year.

The exports of cotton this week from New York show an increase since last week, the total reaching 13,104 bales, against 12,357 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1871; and in the last column the total for the same period of the previous year :—

—*New York Commercial and Financial Chronicle.*

NEW YORK, Nov. 24.—According to Messrs Moffatt, Davidis, and Co.'s report, the week's receipts of cotton at all United States' ports have been 105,000 bales, and since 1st of September 775,000 bales. Shipments to England, 38,000 bales; ditto to France, 11,000 bales; and to the continent 4,000 bales. Total since 1st September, 342,000 bales. Stock at all ports, 354,000 bales. Middling Upland, 9$\frac{3}{16}$d, cost and freight, per steamer.

NEW YORK, Nov. 28.—The receipts of cotton at all United States' ports for the last four days have been 62,000 bales. Shipments to England, 33,000 bales; to France, 3,000 bales; to the continent, 3,000 bales. Middling Upland, 9$\frac{7}{16}$d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, Nov. 30.—The tone of the market has continued strong throughout the week, and prices have further advanced, but the market to-day is not so strong as on Tuesday last. Buyers having pretty well supplied their wants are averse to paying the advance asked, whilst sellers, on the other hand, being generally deep under contract, are indifferent about accepting further orders. The home trade demand continues good, and fine printers are in much request; and so are all kinds of light goods. India shirtings are quieter. In yarns a moderate business has been done at extreme rates.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—The reduction in the Bank rate of discount caused a rather more cheerful tone in the market. A fair quantity of business, however, has been effected since Monday last, and prices are again the turn against the buyer. The demand is still mostly confined to the better classes of wool. There is little if any change in the yarn market. Single yarns are still greatly neglected. Offers are frequently made in two-fold 32's and 40's, and a few transactions have occurred at slightly enhanced rates. The business doing in the piece-market is very restricted. Stocks are low. Prices are extremely firm.

LEEDS.—The woollen market has been flat. The home trade was only represented by a few of our local merchants, who have for the present put aside buying unless goods were pressed upon them, and they are not to be charged in this year's current account.

ROCHDALE.—There are few buyers in the market of anything but low-priced goods. There have been some assortments required of medium goods, but the best class of goods are worth more money than the present state of the demand seems to justify. The season for Yorkshire goods is fast passing away. The wool market is more composed, no further fluctuation in price is looked for just at present.

BELFAST.—FLAX—Supplies by no means extensive; all offered changed hands freely at steady rates. Yarns—Increased inquiries have appeared, still transactions entered into reached a merely moderate amount. Little alteration in prices. Linens (brown), powerloom—For heavy linens, diapers, damasks, drills, and medium and fine sets of cloth for dyeing demand has been of a fair character. Stocks stationary. Prices firm. Handloom—Linens have undergone little alteration either in regard to demand or value since last report. Bleached linens—Sales have been to a fair extent. Stocks stationary. Prices tend upward.

DUNDEE.—In our flax market there has been a large amount of business doing throughout the past week, and prices of all kinds have a strong upward tendency. Consumers have operated more freely in goods on the spot, and although they yield to the advantage very reluctantly, higher rates have in some instances been submitted to. There has lately been an increased demand for tows, for which higher prices have been paid. For fine and good qualities of jute there is a fair demand, and in these kinds a considerable amount of business has been doing at comparatively steady prices. The yarn market has been very firm, and some rather extensive transactions have taken place in flax yarns at slightly better prices, although still not in proportion to the enhanced rates required for flax. For linens the demand from some markets is not quite so active as it was some time ago, but manufacturers are still well supplied with orders. The canvas trade continues active, and in jute fabrics a very extensive business continues to be doing.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Nov. 17.

Firmer markets abroad have stimulated speculation. and increased the demand for export, upon which there has been a pretty general improvement, but with some depression at the close. Flour has continued to arrive freely, and declined early in the week, but most of the receipts have been ordered to store. Millers feel confident of a considerable advance in prices later in the season, and are unwilling to sell except at pretty full prices. There has been an improving export demand, commencing at $6.40 to $6.75 for shipping extras, Western and State, and advancing to $6.60 to $7, while in the medium and better grades there has been a corresponding improvement. Rye flour and corn meal have shown little change. To-day, good extra State sold at $6.85, but the market generally was dull and weak. Wheat has ruled higher, with a good export as well as some milling and speculation. Receipts have been liberal, but as it is too late for boats to make another trip to Buffalo and back, there has not been so much pressure to sell and unload them. Besides, holders have shown great confidence, and shippers have been compelled to pay more money. But the market has not been buoyant, and it has been found difficult to effect free sales any day at the current quotations. This has been especially true of spring wheat, but white wheats are becoming scarce. The receipts at the Western markets have been greatly reduced since the Chicago fire, by the interruption of banking facilities and the destruction of the means of transportation, but have latterly compared favourably with former years. To-day the market was dull, and in spring wheat some weakness was perceptible, No. 2 Chicago selling at $1.52, but winter wheats were scarce and firm. Corn has fluctuated a little every day, and we may almost say every hour. Receipts have been moderate, and there has been a fair trade and export demand. The receipts of new corn from Ohio by rail have increased, and the condition thereof has been excellent, selling to the local trade almost as high as old corn. To-day, with a decline in Liverpool, the market was dull and lower. Prime old Western mixed sold at 78c in store, and 78½c to 79c in store and afloat, closing firm at the decline. The movement in breadstuffs at this market has been as follows:—

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The corn trade has ruled dull this week, notwithstanding the announcement of the closing of the navigation in the Baltic and Black Sea and on the American canals. This is

owing chiefly to the return of milder weather, and to the liberal supplies of produce afloat. The transactions at Mark lane have been on a most restricted scale in all descriptions of produce, and sale of wheat could only be effected at a slight concession. Millers have shown great disinclination to extend their operations, and have confined their purchases to their immediate requirements. The supply of English wheat has been small, but there has been a good show of foreign on the stands, and the samples generally have come to hand in good condition. Flour has ruled steady in sympathy with the wheat market.

Contrary to usual experience at this period of the year the demand for feeding stuffs has been inactive, and both maize and oats have ruled easier off the coast. Secondary barley has given way in value, but fine malting parcels would command 42s if offered. Beans are nominally unchanged in the absence of important business. Grey peas are 1s per qr cheaper.

The following statement shows the imports and exports of breadstuffs into and from the United Kingdom since harvest, viz., from August 26 to the close of last week, compared with the corresponding periods in the three previous years :—

IMPORTS.

	1871. cwts.	1870. cwts.	1869. cwts.	1868. cwts.

Mr George Dornbusch thus reports the state of the floating grain and seed trade :—During the last eight days 29 grain and seed-laden vessels have arrived at ports-of-call, viz. :—20 wheat, 4 maize, 3 barley, 2 palm kernals. The floating grain trade has been dull in tone, and prices have been tending downwards. Wheat—Slow sale; and even fine cargoes 6d to 1s cheaper. Maize has been difficult to dispose of. For barley lower prices than last week have been accepted. Rye—Two cargoes have been sold at cheaper rates than last week. The reported sales are as follow :—Wheat—18 arrived cargoes: Berdianski, 53s; Marianopoli, 50s; Ghirka Taganrog, 44s to 56s 6d; Rostoff Ghirka, 46s to 47s; new Ghirka Odessa, 55s; old palish ditto, 48s 3d per 492 lbs; red winter, from Baltimore, 58s; ditto, from Montreal, 57s 9d to 58s 6d; white winter, 61s 6d; white Canadian, 62s 6d per 480 lbs; spring, from New York, 55s 9d per 480 lbs. On passage, 1 cargo white winter, from Montreal, 63s per 480 lbs. Maize—8 arrived cargoes: old and new mixed Galatz, 35s; Foxanian, 31s 1d per 492 lbs; yellow, from New York, 34s 3d; mixed, from New York, 34s to 34s 3d; Mazagan, 34s 3d per 480 lbs. Shipped or to be shipped 4 cargoes; mixed from New York, 34s and 34s 3d; Galatz from Dunkirk, 35s 6d per 492 lbs; Danubian, 31s 6d per 480 lb. Barley—3 arrived cargoes: New Danubian, 26s 9d and 26s 10½d; Azow from Taganrog, 24s 9d per 400 lbs. Rye—2 arrived cargoes: Azow from Taganrog, 30s to 31s 3d. Linseed dull, and to sell cheaper. On passage 100 tons high mixed Calcutta, 59s 6d. Shipped or to be shipped, 200 tons mixed Calcutta, 59s 6d per 410 lbs. Rapeseed inactive, at about late rates. Arrived 1 cargo Odessa, 36s 8d; 100 tons ordinary brown Calcutta, 67s 9d; on passage, 100 tons ditto, 70s. Cotton-seed quiet, and prices tending downwards. Arrived: 100 tons Egyptian from Alexandria, 9*l* 5s per ton. On passage, 200 tons ditto, 9*l* 2s 6d per ton. 100 tons new seed have been sold at 9*l* 2s 6d, and to-day 200 tons at 9*l* 1s 3d per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—Transactions this week have been upon rather a limited scale, owing to the indifferent assortment and firm rates demanded, but the market is less buoyant. A steady tone prevails, refined being rather dearer on the continent; and all kinds of raw sugar fully support the advance quoted at the date of our last. There is very little West India on show, consequently only 75 casks sold to yesterday. Barbadoes by auction at 29s to 32s for barrels and bags for soft brown and yellow. Of low brown descriptions there are few sellers, upon former terms. Further contracts have been made in beet sugar to arrive at full prices, to some advance. A parcel of fine crystallised white by auction realised 39s per cwt, 6s duty. The decrease in the stock continues to make progress, is now about 49,750 tons, against 79,200 tons last year, and about the same quantity in 1869. Imports and consumption of beet sugar are large.

Mauritius.—5,103 bags partly sold at full rates: brown, 27s to 30s 6d; soft grey and yellow, 31s 6d to 33s; grainy, 31s to 36s; white, 41s. Privately 500 bags grainy at 36s 6d.

Bengal.—1,650 bags brown Dulloah are reported at 26s 6d to 28s 6d.

Penang.—303 bags soft brown by auction went at 30s 6d to 31s.

Madras.—170 tons ordinary Jaggery to arrive sold at 21s 6d per cwt, landed terms.

Natal.—1,093 bags 56 sacks sold: brown and yellow, 27s to 33s; grainy, 33s 6d to 37s.

Manila.—There have been 4,980 bags Taal sold, ex last week's sale, at 23s.

Floating Cargoes.—One of brown Bahia in bags for the United Kingdom, at 26s 3d per cwt.

Refined.—The market is steady, but last week's improvement barely maintained for dry goods. Fine French loaves have sold up to 35s, f.o.b., or equal to nearly 43s here. 5,565 Dutch loaves by auction at 40s to 41s per cwt.

MOLASSES.—Business in West India, but no particulars. 600 barrels fine American treacle by auction were taken in at 16s per cwt.

RUM.—West India descriptions are getting scarce, and the market still shows an improving tendency. Good to fine Demerara has sold at 2s 1d to 2s 3d and Leewards at 1s 10d per proof gallon. The stock of rum in puncheons is about the same as last year. Of hogsheads 3,000 less.

COCOA.—A few parcels of Guayaquil sold during the last ten days at 52s, with a portion at 53s. Stocks of West India are now moderate. There were only 169 bags Trinidad offered by auction on Tuesday, which sold without alteration in prices, and 327 bags of foreign were bought in.

COFFEE.—The market was flat until yesterday, when the receipt of higher prices from Rio and America gave a firmer tone. During the week prices have occasionally ruled in favour of the buyers. 1,108 cask 428 barrels and bags plantation Ceylon partly sold, and went rather irregularly: low middling and small berry to middling colory, 69s 6d to 76s; bold, 76s 6d to 78s; grey, 69s to 73s. 189 bags real good ordinary native were bought in at 66s 6d. A sale has been made for arrival at 67s. 206 packages Mocha were partly disposed of at 110s for superior quality. 10 cases 653 cases East India were chiefly bought in. 1,081 bags partly sold at 65s to 66s 6d for native kinds, being rather lower. 1,345 bags African sold chiefly at 62s to 62s 6d for small brown berry. 2,134 bags Costa Rica at 65s to 73s 6d. 1,861 bags Rio were taken in above the value. 206 bags Central American sold at 64s to 70s. A floating cargo of St Domingo at 65s 6d per cwt for a near port. The deliveries last week were 1,230 tons, the landings about 615 tons, and the stock at the close had further decreased to 18,200 tons, against 27,820 tons in 1870. Some parcels arrived are not included in the

present return, and the quantity afloat from Colombo is larger than in the previous season.

TEA.—Since last Friday the market has been rather dull by private contract, and there is not any new feature to notice. 3,912 packages by auction went at rather irregular prices for Ping Suey, and Moyune green teas sold without reserve. In Indian growths there has not been so much activity as of late, and quotations for all kinds, except common broken sorts show a fall of fully 1d per lb. Public auctions were held on Tuesday, comprising 4,152 packages. Assam Company's growth met with fair competition, and averaged fair prices. The remainder, of which 1,500 had been placed previously, went flatly at about the reduction above quoted.

RICE.—Transactions during the week have been rather limited. Of 8,676 bags Necrancie Arracan the sound portion was bought in; some of the damaged sold upon former terms. Privately white Bengal sold at 11s to 12s 10½d; Madras at 10s 4½d to 10s 7½d. 200 tons Ballam at 9s 3d per cwt. ex quay.

IMPORTS and DELIVERIES of RICE to Nov. 25, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imports ....tons	78250 ...	67200 ...	72700 ...	66350
Deliveries	93600 ...	67800 ...	55800 ...	49200
Stock	38050 ...	49400 ...	49600 ...	33750

SAGO is firm. 2,346 bags partly sold at former rates. Small grain, 16s 6d to 17s; bold medium and bold, 17s 6d to 18s per cwt.

SAGO FLOUR.—705 bags were withdrawn.

TAPIOCA.—1,773 bags, chiefly Singapore, went at 1¾d to 2¼d per lb for common to good quality.

PEARL TAPIOCA.—230 bags sold at 20s per cwt for bold grain.

BLACK PEPPER.—The market is not so dull as last quoted. A few sales reported privately. Penang, 5⅞d to 6d, and subsequently at 6d; Singapore, 6¼d to 6⅜d. 673 bags Penang by auction on Wednesday were chiefly bought in. A few lots of Trang sold at 6d per lb. 166 bags Malabar withdrawn.

WHITE PEPPER.—There has been business at 1d to 1½d reduction. 1,068 bags, chiefly Singapore, sold by auction at 1s 1d to 1s 1¾d; a few lots of Penang at 1s to 1s 0⅞d per lb.

CINNAMON.—The periodical sales on Monday went off with fair spirit, the result being better than anticipated. Prices ruled rather irregular for medium sorts. The fine and superior first sorts occasionally went rather dearer, also fourth sorts, of which the supply was limited. The Tellicherry sold 2d to 3d per lb higher. Of 1,991 bales Ceylon, about 1,700 found buyers in the room: 1st sort, 2s 11d to 3s 10d; 2nd sort, 2s 9d to 3s 6d; 3rd sort, 2s 6d to 3s; 4th sort, 2s 4d to 2s 7d. 51 bales 5 cases Tellicherry sold at 3s 2d for 1st, 2s 11d for 2nd, and 2s 8d for 3rd sort. 1,649 bags chips part sold at 3¼d to 6d, and 2d to 3d per lb for bark.

OTHER SPICE.—75 cases Cochin ginger sold at easier rates for the middling qualities at 51s to 56s, but these were slight wormy; a few lots middling part scraped at 72s to 75s. 60 bags Malabar withdrawn. 277 bags pimento were taken in, the market being flat. 129 bags Zanzibar cloves were taken in at 3⅜d. 54 pkgs other kinds withdrawn. 4 cases Penang nutmegs sold: 87's, 3s 4d; 76 to 72's, 3s 5d to 3s 6d per lb. 5 cases low mace were bought in above the value.

SALTPETRE.—The market is flat, and transactions during the week have been limited. Low Bengal has sold at 30s 6d, and fine now worth only 31s to 31s 6d per cwt.

IMPORTS and DELIVERIES of SALTPETRE to Nov. 25, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imported ....tons	10130 ...	9740 ...	10580 ...	6640
Total delivered	10450 ...	12500 ...	10100 ...	10220
Stock	2060 ...	2050 ...	4700 ...	4550

Deliveries last week, 270 tons.

COCHINEAL.—There has been an arrival of 1,120 packages Teneriffe. At the sales on Wednesday this description went rather dearer, viz., 745 bags as follows: silvers, 2s 4d to 2s 7d; blacks, 2s 6d to 2s 11d; and finest 3s to 4s. 118 bags Honduras without material alteration in prices: silver, 2s 4d to 2s 8d. 35 bags Mexican: silver, 2s 3d to 2s 4d per lb. Stocks are now much smaller than last year.

INDIGO.—Some business has been done in Kurpah at rather higher prices. Other shipping kinds are in demand.

OTHER DRYSALTERY GOODS.—Gambier is firm at last week's quotations. Business at 17s 6d ex ship. 760 bags turmeric were bought in, the market being dull. Cutch has been quiet. 200 bags cutch were bought in; fair quality reported at 22s. 88 bales Bengal safflower about half sold at 4*l* 10s to 8*l* 10s per cwt for low to middling quality, being easier rates. China galls were bought in above the value.

SHELLAC.—In the early part of the week fine orange sold at 8*l* 12s 6d to 8*l* 15s, but subsequently declined 5s to 7s 6d. 404 chests by auction went as follows: D. C. orange, 8*l* 7s 6d to 8*l* 10s; second orange, 8 5s; native orange, 7*l* 7s 6d. A few lots fine button, 8*l* 15s to 9*l* per cwt.

CAMPHOR.—Speculative business has been done at 70s to 77s 6d per cwt for China.

METALS.—A great deal of business has been done in Straits tin and chiefly speculative. Yesterday the prices had risen to 152*l* to 155*l* on the spot, but sales reported for delivery and afloat at 147*l* to 149*l*. English is several pounds per ton dearer. Tin plates have advanced. A steady demand for copper. Chili being now up to the highest point attained last week, viz, 74*l* to 77*l*. Burra and Walaroo, 84*l* to 85*l*. No material change can be quoted in British copper. Scotch pig iron in good demand, the latest sales being at 68s 6d to 69s per ton cash. The market for spelter is steady. Silesian quoted 20*l* per ton.

JUTE.—Supplies afloat are now rather large, and the trade have not extended their operations. The public sales on Wednesday, comprising 17,410 bales, went off flatly. Common to medium qualities, including the old crop, were easier in price, but the small portion of good to fine new sold realised full rates, touching 29*l*. A few parcels have sold afloat upon former terms.

HEMP.—In Manila the sales have been moderate at lower rates, from 40*l* 10s to 46*l*. 365 bales by auction yesterday were bought in. 48 tons Russian withdrawn. Petersburg clean is quoted 34*l* 10s to 35*l* per ton.

LINSEED.—There has been a limited business this week. Calcutta, 62s 9d to 63s. Quotation for arrival, 63s 3d to 64s, according to date of sailing. Black Sea and Azoff cargoes, 63s to 64s per quarter.

OILS.—Sperm quiet, at 90s to 92s per crude. Refiners have advanced their price of bright oil to 95*l*. The American market keeps higher than this. Common fish oils steady. Pale seal, 36*l* 10s; cod, 34*l*. Olive firm. A cargo of Gioga and one of Candia sold at 50*l* 15s and 49*l* respectively c. f. and i. On the spot a few sales at 49*l* to 51*l* per tun for low and common qualities. Palm firm. For fine Lagos 40*l* required. Cocoa-nut has been dull. Arrivals of Cochin may tend to bring down prices more in proportion to Ceylon oil. 100 tons of the latter sold to arrive at 38*l* 5s. Linseed oil lower. Present value about 34*l* 5s on the spot or for delivery to April. Extensive sales in English brown rape oil at uneven rates, ranging from 44*l* to 44*l* 15s on the spot and first four months of next year. Refined quoted 46*l* 10s; foreign ditto, 48*l* to 50*l* per ton, according to quality.

PETROLEUM.—The dealers are making very small purchases. American refined has sold at 1s 5½d. There have been sellers for delivery this month at 1s 5d per gallon

TURPENTINE.—French, 45s 6d; American, 48s to 48s 6d per cwt.

HIDES.—The sales of East India have gone off at steady prices for kips, buffalo, and tanned. Total quantity offered 110,758 hides, of which the bulk sold.

TALLOW.—The market is rather firmer, and the statistics favourable, the deliveries being good, stocks less than last year, and the supplies afloat moderate. About 1,800 casks Australian are declared for public sale to-day. Petersburg new, 48s 6d to 48s 9d; March, 49s 9d to 50s per cwt.

PARTICULARS OF TALLOW—Monday, Nov. 27. 1871.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is quiet. Sales of West India, 85 casks: At auction 1,555 bags Mauritius sold at previous quotations for brown sorts. Of 528 bags Penang two lots sold at 35s for soft pale grey. 868 bags Bengal were taken in above the value. 12,243 bags Manila withdrawn, at 25s to 25s 6d for Zeba. A small parcel of grainy Mauritius sold privately at 36s. 5,000 clayed Manila at 27s 3d. 120 tons Taal afloat at 24s 6d per cwt.

COFFEE.—407 casks 106 barrels and bags plantation Ceylon were disposed of at steady prices. 89 casks 370 bags Courtallam sold at 67s to 73s 6d. 48 bags Guatimala at 68s.

RICE.—1,354 bags white Bengal were taken in at 11s to 11s 6d. 7,500 bags Necrancie Arracan at 10s 6d.

SAFFLOWER.—172 bales Bengal by auction sold at steady prices, from 5*l* 15s to 11*l* 5s per cwt.

SHELLAC firmer. 57 chests second orange sold at 8*l* 5s per cwt.

METALS.—Scotch pig iron, 70s cash. Copper higher.

OIL.—87 tuns American sperm by auction went at 90*l* to 90*l* 10s per tun. 527 casks cocoa-nut chiefly sold: Ceylon, 38*l* 10s; Cochin, 45*l*. 465 casks palm part sold at 37*l* 10s to 38*l* 5s per ton.

TALLOW.—Town unchanged. At auction to-day 1,830 casks Australian went at steady prices to 6d advance for the better qualities. Mutton, 46s 6d to 48s 6d; beef, 44s 6d to 45s 6d.

ADDITIONAL NOTICES.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that the market for oranges has improved, arrivals from the Azores, Spain, and Portugal being limited. A good inquiry for Seville sours; shipments daily expected. Messina and Palermo lemons of fine quality realise a high price. More business doing in black Spanish, Brazils, French chestnuts, and West India cocoa nuts.

DRY FRUIT.—Currants are of very slow sale, and great difficulty is experienced in bringing sellers and buyers together, the consequence is the loss of the most invaluable portion of the year's consumption. In face of prospective large arrivals of steamers and sailing ships, there will be little chance of any recovery this year, and the season is virtually at an end. Valencias are a steady trade without alteration in prices. Sultanas are lower. Figs firm, after a great fall. Muscatels cheaper.

FLAX.—Market firm.

HEMP.—Market quiet for Russian; more business doing in Manila.

SILK.—Market dull and declining.

SEEDS.—The seed trade continues quiet for all descriptions.

TOBACCO.—During the early part of the week there was but little inquiry for North American tobacco, but within the last few days there has been a better demand, which has resulted in a fair amount of business. Prices continue firm for all descriptions. For substitutes and segar tobacco there has been a good inquiry, for which full prices have been paid for eligible descriptions.

LEATHER.—The leather market has shown rather more of the customary dulness of the season during the past week than it had previously, but the supplies at Leadenhall on Tuesday were small, and very little increase of stocks has occurred. Crop hides, the lightest English butts, light English shoulders, light shaved hides, and heavy calf skins were the articles most in request. Scarcely any variation in prices can be quoted.

METALS.—There has been a good business doing again this week. Copper has been in request at the close, and higher prices have been paid, the week having opened a little quieter. Tin continues its upward course, and whilst the speculators are still ruling the market there is a great chance of higher prices. Spelter is steady at late quotations. Iron has become dear, being from 5s to 10s a ton. Lead is quiet. Tin plates are in great demand, and dearer.

METROPOLITAN CATTLE MARKET.

MONDAY, Nov. 27.—The total imports of foreign stock into London last week amounted 15,653 to head. In the corresponding week in 1870, we received 12,463; in 1869, 12,471; in 1868, 3,817; and in 1867, 11,533 head.

The cattle trade has been in an unsettled state, and the tendency of prices has been decidedly in favour of buyers. Owing to the falling off in foreign receipts, the show of beasts has been less extensive, nevertheless there has been a want of animation in the inquiry for all breeds, and prices have been barely maintained. The best Scots and crosses have sold at 5s 10d, Runts and Herefords at 5s 8d, and the choicest foreign at 5s 4d to 5s 6d per 8 lbs. A moderate supply of sheep has been in the pens, and some good stock has been noticed amongst the English breeds. Sales have progressed slowly, and prices have receded 2d per 8 lbs. The best Downs and half-breds have sold at 6s 6d to 6s 8d per 8 lbs. Calves have changed hands quietly, at about late rates. Pigs have been disposed of at about previous quotations.

SUPPLIES ON SALE.

	Nov. 28, 1870.	Nov. 27, 1871.
Beasts	3,585	3,890
Sheep	16,300	22,380
Calves	130	236
Pigs	120	90

METROPOLITAN MEAT MARKET.

Prime small ditto	4	10	5	2	Large pork	3	0	4	2
Veal	5	0	5	8	Small pork	4	0	4	4

HOP MARKET.

BOROUGH, Friday, Dec. 1.—Transactions in new hops have been restricted, but prices have been maintained. Yearlings have been firm, although less eagerly sought after:—Mid and East Kent, 10*l* to 16*l* 16s; Weald of Kent, 8*l* 10s to 10*l* 10s; Sussex, 7*l* 5s to 9*l* 9s; Farnham and country, 11*l* to 16*l*. Yearlings: Mid and East Kent, 3*l* to 6*l* 10s; Weald of Kent, 3*l* to 5*l* 15s; Sussex, 3*l* to 5*l*; Farnham and country, 4*l* 10s to 6*l*; olds, 1*l* 5s to 2*l*.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, DEC. 1.—The public sales of sundry kinds of foreign, held here from the 28th ult. to 1st inst., comprised about 21,000 bales, but only about one-third of this quantity found buyers, although there was a very fair attendance of them. All good, clean clothing wools met with good demand, but common waste kinds were neglected. All that was disposed of realised fully late current rates.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 1.—Market closed dull. Wheat 1d lower. Corn ruled quiet. Flour steady, at 32s 6d.

WAKEFIELD, Friday, Dec 1.—At this market to-day the wheat trade is quiet, and little business is transacted at Tuesday's rates. Barley is generally lower, owing to the large foreign supply, sales of which are pressed. In beans and other articles no material alterations.

The Gazette.

TUESDAY, Nov. 28.

BANKRUPTS.

John Adrian Benit, Addington road, Bow, and Savage gardens, commission agent.
Robert William Bilby, Lorrimore square, Walworth, mantle maker.
Alfred Fereday, Bedford row, attorney-at-law.
Charles Miller Brown, Witney, Oxfordshire, chemist.
William Cummings Buck, Fairlight, Sussex, lieutenent in the Royal Navy.
Edward Johnson, Bank buildings, Moseley street, and Camden street, Sheffield, Newcastle-upon-Tyne, house and land agent.
Edmund Lord, Samuel Lord, and John Lord, Littleborough, Rochdale, woollen manufacturers.
Frederick Rosier Mitchell, Cardiff road, Aberdare, Glamorganshire, pawnbroker.
John Pearn Regare Lezant, Cornwall, farmer.
William Hawke Reynolds, Ridgeway, Devonshire, watchmaker.
George Oke Rowe, Plymouth, hemp merchant.
William Scott, Earlsheaton, Dewsbury, Yorkshire, blanket raiser.
Thomas Young, Croxley green, Rickmansworth, Hertfordshire, journeyman baker.

THE GAZETTE OF LAST NIGHT.

BANKRUPTS.

Henry Hunt, Marsh Gate lane, Stratford, manufacturer of vegetable and mineral oil, varnish and grease.
Edward Thomas, Albion chambers, Bristol, attorney and solicitor.
Joseph Harrison, Silly Oak, formerly secretary to the Birmingham Gas Light and Coke Company.
George Price, Alfred terrace, Boston lane, Hanwell, brickmaker.
Joseph Leakey, High road, Tottenham, shoemaker.

SCOTCH SEQUESTRATIONS.

William Watt, sen., Laurencekirk, mason.
John Anderson, Largs, Italian warehouseman.
James Macnab, Edinburgh, commission agent.

STATEMENT

Of Imports, Exports, and Home Consumption of the following articles in the 47 weeks ending Nov. 25, 1871, showing the Stock on Nov. 25, compared with the corresponding period of 1870.

FOR THE PORT OF LONDON.

*** Of those articles duty free, the deliveries for Exportation are included under the head Home Consumption.

DUNN'S "ESSENCE OF COFFEE," 1s and 2s a Bottle.

DUNN & HEWETT'S "BROMATINE," a Cocoa deprived of its superfluous Butter, 6d a Packet.

MANUFACTORY—PENTONVILLE, LONDON.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

FINE FLAVOURED STRONG BEEF TEA

at about 2½d a pint. Ask for LIEBIG COMPANY'S EXTRACT OF MEAT, requiring Baron Liebig the Inventor's Signature on every jar, being the only guarantee of genuineness.

Excellent economical stock for soups, sauces, &c.

OXYGENATED WATER HOLDS IN

Solution pure Oxygen Gas, the vital element that sustains life. It is a decided tonic and alterative drought, and from its special action on food during the process of digestion and assimilation is peculiarly suitable for invalids. Price 4s per dozen half-pints.

Laboratory, 36 Long Acre, and all Druggists.

DINNEFORD'S FLUID MAGNESIA.

—The medical profession for thirty years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion; and as the best mild aperient for delicate constitutions, especially adapted for ladies, children, and infants.

DINNEFORD and CO., Chemists, 172 New Bond street, London, and of all other chemists throughout the world.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER

TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage 1s 10d. Post-office orders to be made payable to John White, Post-office Piccadilly.

NEW PATENT

ELASTIC STOCKINGS, KNEE

CAPS, &c., for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS &c. They are porous, light in texture and inexpensive and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

In bringing the Crescent Gold Mine before the public, the Directors desire to call attention to the fact that the value of this property is certified by the independent examination of the authorities of the Mining Bureau of the Pacific Coast at San Francisco (see extracts), and they feel that the reputation for independence and integrity enjoyed by the Mining Bureau gives a peculiar value to their report, and affords investors a means of gauging accurately not only the present value of the property, but also the soundness of its future prospects.

This Company is formed for the purpose of purchasing the Crescent Gold Mine, with the mill works, and other buildings and machinery, and for continuing the working. The property is situated at Crescent Mills, in Plumas County, California, and practically consists of four mines, the "Crescent," the "Horseshoe," the "Union," and the "Pet." These four veins vary in width from 5 to 15 feet, the average being about 15 feet, and they form one of the largest and most uniform and productive bodies of "pay gold ore" in California.

In addition to the mines, and about 30,000 tons of valuable "tailings," there is comprised in the sale the freehold of the whole property, including the sites of the numerous buildings, practically embracing the whole of the village of "Crescent Mills." There is an excellent steam crushing mill, of 32 stamps, worked by 100-horse power engine; hoisting works with a 30-horse power engine; powder house, stores, and offices, boarding-houses for the workmen, barns, waggon sheds, quartz house, and 26 private dwellings, together with all machinery, mining apparatus, tools, and everything on the premises pertaining to the property or works.

The mine has been worked for several years, and although only carried to a depth averaging about 200 feet, a depth at which many mines only commence to pay, has already realised over 800,000 dols, the ore, according to the estimate of Mr Ashburner, who carefully examined the books at the time of his visit to the property, having averaged about 16 dols per ton. The cost of milling and mining has not in the past exceeded 5 dols per ton, but during greater part of the time wages and supplies were very much higher than at present. The future expenses of working are estimated by Hon. J. Ross Browne and the Mining Bureau of the Pacific not to exceed 4 dols per ton. The lowest value ever placed upon the low grade unselected ore, taken indiscriminately from wall to wall, was 8 dols per ton, while it is safe to calculate that the richer stratas of 20 dols, 30 dols, 40 dols, and 100 dols ore, frequently met with, will ensure an average equal at least to that of the past.

The reserves (as shown by the report and survey) are sufficient to supply a 50-stamp mill with ore for many years to come.

Upon signing the preliminary contract early in the year the vendor agreed that the mine should not be worked during the time occupied in the negotiations and in making the necessary surveys, so that the amount of reserves and tailings given in the reports could not be diminished, nor the mine unfairly worked before the Company should take possession.

The increase of the milling capacity would only cause a suspension of operations for a short time. On taking possession profitable operations could at once be commenced with the present mill, and by working the mine systematically, the "ore in sight" would be increased much faster than that taken out can be worked by the mill. It is stated by Hon. J. Ross Browne that the capacity of a 50-stamp mill, working 22 days per month only, will be 19,000 tons of ore per annum, and he estimates that, taking the lowest value of the ore, at 8 dols only, the net profits would be £15,840 per annum, while, if the ore should prove of equal value to that of the past workings, the net profit would be £41,580 per annum, while an additional profit of over £2,000 per annum would be obtained by changing the motive power from steam to water. This calculation is based upon working 22 days per month only, but the mill would probably be kept in operation for 28 days, which would increase the returns above 25 per cent.

The proposed capital will be sufficient to increase the stamps to fifty, to convey water to work the mill, to provide a general working capital, and for any unforeseen contingencies. (See reports.)

Extracts are appended from full and favourable reports on the mine made in 1867 by Mr William Ashburner, M.E., a gentleman of the highest reputation, and widely known from his connection with the Bank of California as examiner of mines, and by Mr S. E. Holcombe, of San Francisco, in 1870.

Recognising the importance of thoroughly testing the statements made respecting the property, and of having the reports brought down to the present year, the greatest care has been taken to have the mine further examined by most competent authorities on the subject, and accordingly exhaustive reports have been obtained from Hon. J. Ross Browne, late United States' Government Commissioner of Mines, and finally by the Engineer of the Mining Bureau of the Pacific Coast. These reports fully agree in the valuable character of the mine, and extracts are appended.

Messrs Ashburner and the Hon. J. Ross Browne reported on the Sierra Buttes Mine, which has paid 20 per cent. regularly in dividends, and whose shares are now at above 100 per cent. premium.

The last examination was made under the supervision of Col. J. Berton, Vice-Consul of France, and President of the Mining Bureau, who also personally examined the mine, and has given his certificate, dated October 25th, 1871, corroborating the official report from the Mining Bureau. A careful survey of the mine was also made during the month of September last, by Mr A. W. Keddie, County Surveyor of Plumas County, whose plans showing the workings and reserves of ore are incorporated in the report of the Mining Bureau of the Pacific. Extracts from these reports, and an attested copy of Mr Ashburner's report, and the originals of the other reports and inventory can be seen at the Offices of the Company, with the plans of the mine, a sketch of the buildings comprising the village of "Crescent Mills," owned by this Company, and the Articles of Association.

The title of the property is freehold and free from royalties or dues. The purchase consideration is £80,000, of which the vendor is willing to take £25,000 in fully paid-up shares.

Applications for shares must be forwarded, together with the deposit of £1 per share, either to the Bankers of the Company, or to F. R. Wilson, Esq., the Secretary of the Company, 20 St Helen's place.

Contract entered into on behalf of the Company:—23rd October, 1871.—Between James Henry Richardson, of the one part, and Francis Reed Wilson, on behalf of the Company, of the other part.

Prospectuses and forms of application may be obtained at the Offices of the Company.

TEMPORARY OFFICES—3 Victoria street, Westminster.

The London Central Railway Company has been empowered by Act of Parliament of the present year to construct a railway, about 2¼ miles in length, commencing by a junction with the South Eastern Railway at Charing cross, proceeding thence to the London and North-Western Railway at Euston square, and terminating by a junction with the Midland Railway near St Pancras Station; thus establishing a direct communication through the heart of the metropolis between the great highways of traffic from the north and the railway systems south of the River Thames.

There will be stations at the Lowther Arcade on the north side of the Strand, at Leicester square, at the corner of Oxford street and Tottenham court road, at Goodge street, at Gower street (where the line adjoins the Metropolitan Railway and Euston square), and at St Pancras.

The great importance of this undertaking, and the facilities it will afford for local as well as general traffic and passenger accommodation, can scarcely be over-estimated.

Agreements have been made, and confirmed by Act of Parliament, by which the Midland Railway Company engages to pay £50,000 a year, and the South-Eastern Railway Company £20,000 a year, both in perpetuity, for the privilege of running their trains over the Company's line, those two companies working their own traffic, and in addition paying to the Central Company agreed tolls for all passengers taken up or set down at any station on the Central line.

The right is reserved to make a similar agreement with the London and North-Western Railway Company, or any one other Railway Company now existing and having its terminus north of Leicester square, on terms not lower than those agreed with the Midland Company. When such an arrangement is made the Central Company will have a guaranteed income of £80,000 a-year, or 4 per cent. on the total capital of the Company, in addition to the tolls payable under the agreements, which are estimated to produce upwards of £40,000 a-year, and all payments for advertisement space, refreshment rooms, &c., which are to be retained by the Central Company. Until such agreement be made with the London and North-Western Company, the junction with their railway will not be carried out, and until that or some other third company be brought into the combination the Central Company will itself use the line jointly with the Midland and South-Eastern Companies, in which case the profits on the traffic carried by the Central Company will, it is estimated, equal the sum to be paid by a third working company.

Incidental to the construction of the railway, a new line of street will be formed over the railway, from Oxford street to Leicester square, and thence to Castle street, near Trafalgar square; in respect of which the Metropolitan Board of Works have agreed to pay to the Company a subvention of £200,000. Out of this sum the interest on share capital during construction is to be paid, and the necessary arrangements will be made for this purpose.

The surveys and specifications for the works have been made by Messrs John Hawkshaw and John Wolfe Barry, and the estimates of the cost of land, &c., by the Company's surveyor, Mr Edward Ryde. The latter are confirmed by some of the most competent authorities in London, viz., Messrs Hunt, Stephenson, and Jones, Mr E. N. Clifton, and Messrs F. and R. Vigers. The certificates of the engineers and surveyor as to the sufficiency of the estimates are appended hereto.

A contract for the construction of the railway, including all stations, sidings and junctions, and the new streets, has been made with Messrs Geo. Smith and Co., of 22 Great George street, who have the advantage of the great experience of Mr T. Marr Johnson (a member of the firm) in the construction of Metropolitan railways.

	£
The total net cost of the line and streets, including land and compensations, Parliamentary and other expenses, interest during construction, brokerage, commissions, and all contingencies, is estimated at	2,075,000
Of this amount, £200,000 will be contributed by the Metropolitan Board of Works, and £500,000 by the issue of debentures; together	700,000
Net amount required	1,375,000

Applications on the annexed form, accompanied by a deposit of £1 per share applied for, will be received by the Bankers, Messrs Glyn, Mills, Currie, and Co., 67 Lombard street.

Where no allotment is made the deposit will be returned in full.

In case a less number of shares is allotted than is applied for, the surplus of the deposit will be applied in whole or part, as the case may be, to the payment of the amount due on allotment.

In default of payment of the amount due on allotment, the deposit will be liable to forfeiture.

Scrip certificates to bearer will be issued in exchange for allotment letters and Bankers' receipts as soon as possible after the payment on allotment has been made; and will be exchanged for the share certificates in due course.

The Act of Parliament, plans of the railway, and agreements entered into by the Company, can be inspected by intending subscribers at the Offices of the Solicitors.

Prospectuses and forms of application may be obtained at the Company's Offices and from the Brokers.

London, 1st December, 1871.

(To be retained by the Bankers.)

THE LONDON CENTRAL RAILWAY COMPANY.

No.——

To the Directors of the London Central Railway Company.

I request that you will allot me shares of the London Central Railway Company, upon which I have paid the deposit of £1 per share, and I agree to accept the said shares or any less number you may allot me, and to make the remaining payments thereon in accordance with the prospectus and the Act of Parliament.

Name at full length .....
Address .....
Occupation .....
Date .....

33 Great George street, Westminster, November, 1871.

LONDON CENTRAL RAILWAY.

GENTLEMEN,—The plans and specifications for the works of railways Nos. 1 and 2, and of streets Nos. 1 and 2, authorised by "The London Central Railway Act, 1871," as prepared by us for the contract with Messrs Geo. Smith and Co., comprise all the works required for these lines and streets, except station and sewerage works, which cannot at present be defined sufficiently for contract purposes.

The contract sum is	£321,362
The sum reserved for stations and sewerage works is	144,550
	465,912
We advise that for contingencies should be provided	50,000
	£515,912

We are of opinion that these sums are sufficient for the completion of the proposed works.

Yours faithfully,

JOHN HAWKSHAW.
JOHN WOLFE BARRY.

To the Chairman and Directors of the London Central Railway.

17 Parliament street, Westminster, November, 1871.

LONDON CENTRAL RAILWAY.

Having surveyed and valued the whole of the land and buildings which will be required for railways Number 1 and Number 2 and streets Number 1 and Number 2, as shown upon the plans prepared by the engineers, and having estimated the amount of compensation which may be payable in consequence of the exercise of the powers of the Act, I am of opinion that the net ultimate cost to the Company will not exceed (£1,160,000) one million one hundred and sixty thousand pounds.

EDWD. RYDE.

Having surveyed and valued the whole of the land and buildings which will be required for the railways and streets referred to in the estimate of Mr Ryde, the surveyor to the Company, and having very carefully examined his valuations, we are of opinion that the ultimate cost of (£1,160,000) one million one hundred and sixty thousand pounds, as estimated by him, is a full and ample amount at which to estimate the cost of the property, including compensations.

HUNT, STEPHENSON, & JONES.

Price 3s 6d,

FOURTH EDITION, WITH ILLUSTRATIONS BY GILBERT,

MY NEW YEAR'S GIFT TO MY SON.

"We cannot find language sufficiently strong to express our favourable opinion of this handsome volume, nor can we recommend a New Year's Gift so admirably adapted for the rising generation, on whom it is calculated to have a living and a lasting influence."

"A more profitable and mind-elevating New Year's Gift for a father to give his son, a guardian his ward, or a schoolmaster his pupil, could scarcely be devised."

LONDON: WARD, LOCK, AND TYLER, WARWICK HOUSE, PATERNOSTER ROW;

And to be had at 340 Strand; or sent post free for 45 Stamps.

SHIRTS.—FORD'S EUREKA "DOUBLE SHRUNK" FLANNEL SHIRTS.—Messrs R. FORD and CO. have all their new patterns of double shrunk flannel shirts now ready. Patterns sent free, with self-measure. The "Eureka Double Shrunk" are the perfection of flannel shirts. No quantity of washing will ever shrink them.—Richd. Ford and Co., 38 Poultry; Branch, 308 Oxford street, W.

MR LEWIS AND SON, 113 Strand.—The Royal Lewisham systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as Taught for upwards of 50 years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, ensure perfection after a few easy and interesting lessons. Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution 113 Strand.

EDUCATION.—"ONE YEAR'S Good Schooling" at the English and Continental College, Harrow (close to the station).—A few ANNUAL VACANCIES.—Parents anxious to give their boys, before they put them into any business, a year's finishing instruction in a highly recommended boarding school, of limited number, near town, to be perfected (even if backward) in penmanship, commercial and polite correspondence, arithmetic, bookkeeping (or mathematics and drawing), French conversationally, and gentlemanly manners, are invited to address the Principal, who is assisted by efficient and hard-working masters. Younger boys, to be prepared for public schools, the professions, and competitive examinations, are received for a longer period. Dry playground, with a gymnasium and a splendid cricket field, close to the house, which latter is replete in all its appointments. Highest references as to liberal board, kind treatment, excellent health, and first-class progress of the pupils. Eight first-class masters are engaged to secure the success of thirty pupils. Terms—30 guineas under 12, 35 guineas under 14, and 40 guineas per annum under 15 years of age. 10s for laundress, 10s for books and stationery, and for tuition of dancing, drilling, singing and brass band instruments. 10s per quarter are the only extras. Established 1857. Address Dr VELLERE Harrow

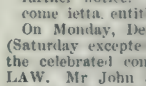
THE FLORIST AND POMOLOGIST

A Pictorial Monthly Magazine of Flowers, Fruit and General Horticulture.

Conducted by Robert Hogg, LL.D., F.L.S., Thomas Moore, F.L.S., and William Paul, F.R.H.S., supported by a staff of able contributors.

Beautiful Coloured Plates of New Flowers and Fruits By Walter Fitch, James Andrews, and other Leading Artists.

The Annual Volumes are complete in themselves.



Communications for the Editor, Books for notice new plants or flowers for description or criticism, &c. should be addressed to Mr Thomas Moore, Botanic Garden, Chelsea, London, S.W

Publishing Office—171 Fleet street, London, E.C.

ROYAL STRAND THEATRE. Sole Lessee and Manageress—Mrs Swanborough. Great attraction for the Cattle Show week. Unprecedented run of an old Comedy. 146th, 147th, 148th, 149th, 150th, and last five nights of the HEIR-AT-LAW, and of Mr John S. Clarke as Doctor Pangloss, LL.D., and A.S.S. Mr John S. Clarke, by general request, will appear as Toodles every evening until further notice. Production of a new and original comedietta entitled AN ELIGIBLE BACHELOR.

On Monday, December 4th, and during the week (Saturday excepted), commence at seven o'clock with the celebrated comedy by Colman, THE HEIR-AT-LAW. Mr John S. Clarke, Messrs H. Crouch, H. J. Turner, W. Joyce, J. Wallace, E. Chamberlaine, and Harry Paulton; Mesdames L. Claire, Raymond, and Ada Swanborough. After which the comic drama TOODLES. Mr John S. Clarke, and Mrs Raymond. To conclude with the grand burlesque, by H. J. Byron, IVANHOE. New scenery, dresses, and appointments. Musical director, Mr John Fitzgerald. The burlesque produced under the direction of Mrs Swanborough and Mr J. Wallace. Characters supported by Messrs Edward Terry, H. J. Turner, J. Wallace, E. Chamberlaine, H. Carter, T. Edge, and Harry Paulton; Mesdames Augusta Thornton, T. Venn, O. Armstrong, R. Cullen, C. Bateman, Pascall, Lennox, and a numerous corps de ballet. On Saturday commence at Seven o'clock with a new and original comedietta, called AN ELIGIBLE BACHELOR. Messrs W. H. Swanborough, Turner, Wallace; Mesdames Fanny Hughes, Cullen, Raymond, &c. After which, TOODLES and IVANHOE. Doors open at half-past six. Secure your seats at the box office. Acting Manager—Mr Arthur Swanborough.

BRINDISI MAIL ROUTE TO Egypt, India, China, Australia, Rome via Falconara, Naples via Foggia, Shortest and Cheapest Route. For through tickets and information apply to the SOUTH ITALIAN RAILWAY.—Agents, Lebeau and Co., 5 Billiter street, London, E.C.

OVERLAND ROUTE via MARSEILLES.—COMPAGNIE DES MESSAGERIES MARITIMES DE FRANCE.—French Mail Steam Packets leave Marseilles as follows:—

Every four weeks from March 10. For Port Said, Ismailia, Aden, Suez, Mauritius, Point de Galle (Ceylon), Pondicherry, Madras, Calcutta, Singapore, Batavia, Saigon, Hong Kong, Shanghae, and Yokohama (Japan).

To ALEXANDRIA fortnightly from December 8.

For passage, freight, and information apply to the Agents, 97 Cannon street, London; G. H. FLETCHER and CO., Liverpool; at the offices of the Compagnie des Messageries Maritimes de France in Paris, Lyons, Bordeaux, and Marseilles; or to Smith and Co., Rotterdam.

* Passengers Eastward of Suez, securing their berths in London, are entitled to the conveyance of their luggage free to Marseilles.

CAPE OF GOOD HOPE, ALGOA BAY, and NATAL.—The UNION STEAMSHIP COMPANY'S ROYAL MAIL PACKETS SAIL from SOUTHAMPTON on the 10th and 25th of the month, calling at Madeira. The packet of the 10th calls at St Helena. The packet of the 25th corresponds with Natal.

Fares to Cape Town, 30 Guineas and 20 Guineas; to Algoa Bay, 33 Guineas and 22 Guineas; to Natal, 37 Guineas and 25 Guineas; to St Helena, £28 and £18.

Passengers and their luggage are taken from London to Southampton free of railway, dock, and agents' charges, and the rates of freight include all charges of shipping and agency from Nine Elms.

Apply to Falconer and Mercer, 23 Leadenhall street, London; or at the Union S. S. Co.'s Offices, Southampton.

SAN FRANCISCO AND SYDNEY. MAIL LINE. The UNITED STATES, NEW ZEALAND, and AUSTRALIA MAIL STEAMSHIP LINE, under their new Postal arrangements, will despatch their splendid Steamers:—

NEVADA, | NEBRASKA, | DAKOTA,

2,500 tons each, from San Francisco to Sydney, on Dec 6, Jan 3, Jan. 31, Feb. 28, March 27, and April 24,

calling at HONOLULU, S.I., and AUCKLAND, N.Z., en route. Branch steamers will convey passengers from Auckland to Wellington, Lyttleton, and Port Chalmers, and from Sydney to Melbourne immediately on the arrival of the California boat.

For THROUGH FARES from England, apply to H. STARR and CO., Agents, 23 Moorgate street, London.

OVERLAND ROUTE.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY book Passengers and receive Cargo and Parcels by their Steamers for—

	From Southampton.	From Brindisi.
GIBRALTAR ... MALTA	Every Saturday, at 2 p.m.	—
ALEXANDRIA.. ADEN ..... BOMBAY	Every Saturday, at 2 p.m.	Every Tuesday, at 2 a.m.
GALLE..... MADRAS..... CALCUTTA ... PENANG..... SINGAPORE ... CHINA..... JAPAN.....	Saturday, Dec. 9, at 2 p.m. And every alternate Saturday thereafter.	Tuesday, Dec. 19 at 2 a.m. And every alternate Tuesday thereafter.
AUSTRALIA ... NEW ZEALND.	Saturday, Dec. 23, at 2 p.m. And every fourth Saturday thereafter.	Tuesday, Jan. 2, at 2 a.m. And every fourth Tuesday thereafter.

And all Ports touched at by the Steamers of the British India and the Netherlands India Steam Navigation Companies.

An abatement of 20 per cent. from the charge for the Return Voyage is made to Passengers who have paid full fare to or from ports eastward of Suez re-embarking within six months of their arrival, and 10 per cent. to those re-embarking within twelve months.

Through tickets to Brindisi can be obtained of Lebeau and Co., 6 Billiter street, E.C. (South Italian Railway Office.)

For Rates of Passage Money and Freight, WHICH HAVE BEEN MUCH REDUCED, and all other information, apply at the Company's Offices, 122 Leadenhall street, London, or Oriental place, Southampton.

STEAM SHIPS.—The GENERAL STEAM NAVIGATION COMPANY'S powerful and first-class STEAM SHIPS leave from St Katharine's Wharf for—

HAMBURG—Every Wednesday and Saturday. Dec. 6 at 8; 9 at 9 a.m. Saloon, £2; fore cabin, £1 5s. Extra vessels, carrying cargo only, leave also every Tuesday, Thursday, and Sunday morning. For particulars of freight apply to F. Stahlschmidt and Co., 90 Lower Thames street.

HAVRE—Every Thursday. Dec. 7 at 9 a.m. Saloon, 11s; fore cabin, 8s.

ROTTERDAM and the RHINE—Every Wednesday and Saturday. Dec. 6 and 9 at 11 a.m. Chief cabin, £1; fore cabin, 15s. Return Tickets, 30s and 22s 6d.

ANTWERP, BRUSSELS, COLOGNE, and the RHINE—Every Tuesday and Thursday at noon. Chief cabin, £1; fore, 15s. Return Tickets, 90s and 22s 6d. Brussels, 17s 3d; Cologne, 30s 6d. Leaving Antwerp for London every Sunday and Friday at noon.

OSTEND, BRUSSELS, COLOGNE, and the RHINE—Every Tuesday Wednesday and Saturday. Dec. 5 at 6; 6 at 7; 9 at 10 a.m. Leaving Ostend for London every Tuesday, Thursday and Friday night. Chief cabin, 15s; fore, 12s. Brussels, 18s 10d; Cologne, 32s.

BOULOGNE—Daily (except Monday). Dec. 3 at 4; 5 at 6; 6 at 7; 7 at 8; 8 at 9; 9 at 10; 10 at 11 a.m. Chief cabin, 11s; fore, 8s.

From Irongate Wharf for:—

CALAIS—Every Wednesday and Saturday. Dec 6 at 7; 9 at 10 a.m. Chief cabin, 11s; fore 8s.

EDINBURGH—Every Wednesday and Saturday at 10 morning. Fares: Chief cabin, 15s; fore, 12s; deck, 7s.

NEWCASTLE—Every Wednesday and Sunday at 9 morning. Saloon, 12s; fore, 8s.

YARMOUTH—Every Wednesday at 3 afternoon. Saloon, 8s; fore cabin, 5s.

From Custom House Quay.

HULL—Every Wednesday and Saturday at 8 morning. Chief cabin, 8s; fore 5s.

From London Bridge Wharf for:—

MARGATE and RAMSGATE.

Offices, 71 Lombard street, and 37 Regent's circus, Piccadilly.

On November 25 was Published, No. XI., New Series, Price 8d and 8½d,

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL for November gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains

A FINANCIAL RECORD OF THE MONTH;

New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to November 22.

Advertisements for the next Number, to be published on December 30, must be sent, to insure insertion, on or before December 28.

The December Number of the INVESTOR'S MONTHLY MANUAL will give, in addition to the usual information, the Highest and Lowest Prices of all Stocks and Shares for the last Three Years, the latest quotations for 1870 (so as to indicate the Exact Movement during the Twelve Months), a Complete Directory, the names of the Markets where each Security is chiefly dealt in, a Financial History of the Year 1871 (including a Tabulated Chronicle of Events), besides Memoranda relating to the Financial Position of Foreign and Colonial Governments, to Railways, &c., &c. A copious Index will be added for purposes of reference.

This Double Number will be published on Saturday, the 30th of December. Price 1s 4d; by Post, 1s 4½d.

OFFICE—340 Strand.

THE ADDITIONAL TWO MILLIONS OF BANK POST BILLS.

The Bank return of this week is an example of the dangers of plausible conjecture. When the return was issued almost everyone imagined that its one very singular feature—the increase of 2,000,000*l* in the Bank post bills—was connected with the payments now in progress to Germany on account of France. But this is an entire mistake. They were connected with a large American operation, to which we a week or two ago alluded as likely to cause a considerable demand for funds in the market. The bills were issued to Messrs Jay Cooke, MacCulloch and Co., in furtherance of this operation, and not to the agents for any continental house.

The operation we understand to be this:—Messrs Jay Cooke and Co., negotiated a loan of 15,000,000*l*, at 5 per cent., to be applied to the redemption of 5-20 bonds, and agreed to take 5-20 bonds in payment of the subscriptions. To the extent that 5-20's were so subscribed the operation was merely one of conversion, and no money need have passed; but probably the bonds have not come forward in sufficient quantity, and in this, or some other way, a sum in cash, amounting to 2,000,000*l*, has to be remitted to the American Government. This has to be done in some form, and therefore there is a demand on our cash to that extent. For the moment, at any rate, the 2,000,000*l*, is taken out of the money market; it has ceased to be in the lendable form of private deposits, and has taken the comparatively inefficient and unlendable form of Bank post bills.

We believe that the Bank post bills have not yet left London, and that it is not thought that they will leave it. But the effect on our market is the same; the 2,000,000*l* is taken away from our market, is deducted from our lending powers just as much, though it may be locked up here, as if it had gone abroad. And as we understand the operation, the Bank post bills are to be held here as a security against drafts from America; acceptances have been given on the deposit of them, and for the purpose of the general balance of payments between America and England, this is exactly the same as if the post bills had themselves been sent to America.

By way of a further complication, however, it is thought that a counter-credit may be established in England in favour of America. A new set of 5-20 bonds is to be called in. And although these are only due in March, yet it is probable, judging from our experience of the last set, that many will be sold here, and bought on American account. But of course this, as it relates to the future, is only hypothesis. The immediate fact is that 2,000,000*l* are for a short time removed from our market, and so far will render money dearer.

This curious operation comes on at a time when we have so many other singular phenomena in the money market that we want no additional perturbing element. Happily, the German difficulties, on the other hand, are much less than they were. The Imperial Government is now lending its resources on good terms, and is likewise engaged in extensive plans for paying off Treasury bills when due, and for buying up the current obligations. And this somewhat tardy adoption of a rational policy contributes to the present ease of our money market, and makes any future acute disturbance of it much less likely.

THIS YEAR'S RAILWAY TRAFFIC, AND THE COMING DIVIDENDS.

So much of the current half-year has now passed that the results of the increased business done by our home railways are no longer doubtful. In the four weeks which remain before the accounts are made up by the majority of the companies, a slight check to the past rate of increase in the traffic, which does not seem very probable, would not make any material difference in the dividends calculated on the assumption that the past rate will continue to the end of the year. In the case of one or two companies, there are still eight weeks' traffic to come, and consequently a greater chance of error; but a minimum calculation for the time that has to elapse is almost certain not to err on the side of excess. We propose, therefore, to analyse the increase of railway business which has taken place during the half-year, and generally during the whole year, and see what prospects of profit are held out to the ordinary shareholder.

The facts, as they now appear, more than confirm the most sanguine expectations which have been formed during the half-year as to the increase of business in progress. It is still evident that the increase is continuing at an accelerated rate, and this year will certainly be one of the most remarkable in railway history. We pointed out on the 21st of October that the traffic of the eighteen principal companies, of which we give the weekly returns in our money article, had been increasing during the half-year at the rate of 7·8 per cent., and that this was a higher rate of increase than had taken place in the two previous half-years. This improvement has continued without a check to the present time. Reckoning to the 25th of November we find that the rate of increase since the middle of October must have been a shade higher than before, the improvement for the whole half-year to that date having been almost exactly 8 per cent. The figures are :—

	£
Traffic of second half-year, 1871, to 25th November..... ...	16,664,217
— 1870 —	15,428,326
Increase in 1871	1,235,891

There has thus been no falling off since October, and the returns for the week ending 2nd December, which have been issued as we write, show a continuance of the same accelerated rate of increase. The rate of increase in the last three half-years would thus compare as follows :—

In second half of 1870, over corresponding half of previous year	5 per cent.
In first half of 1871 over ditto	6 —
In second half of 1871, over ditto...	8 —

We are justified, therefore, in concluding that the present half-year is likely to show a much greater improvement in the dividends than the two previous half-years, in which the present great advance in the value of railway property commenced.

As we found before too, the accelerated rate of increase is still more remarkable if we look at particular companies, as the following comparison shows :—

Rate per Cent. of Increase of Gross Traffic over Corresponding Periods of Previous Year.

	In 1st Half of 1871.	In 2nd Half of 1871 to 25th Nov.
Great Eastern	3·3	5·3
North-Eastern	8·6	10·0
Midland	8·5	10·0
Lancashire and Yorkshire	9·0	10·9
Chatham and Dover	1·9	14·1
Brighton	6·4	8·4
Sheffield	5·7	8·8

So great a change in the rate of increase cannot but have an important effect on the coming dividends.

The matter may be looked at in a still more general way. Had the above increase been due to the opening of new lines, we could not expect it to be so profitable as it promises to be. But the increase is not due to any such cause. This will be shown by our leaving out the totals, and looking only at the average increase per mile. This increase, as will be seen from one of the subjoined tables, has been on the average at the rate of 3*l* 3s 11d per week during the present year, which would give an average increase of 166*l* per mile for the whole year. This is a very different rate of increase from what has been going on during the last few years. From the Board of Railway Statistics, just published, we learn that—

	£
The annual *decrease* per mile in 1869 was	163
The annual increase in 1870 was	82

And now the annual increase in 1871 is at least 166*l*, and this figure will probably be exceeded. Such an addition to railway business in one year is most unusual, and has only been equalled three times in the last twenty years, viz., in 1851, when the increase was 183*l*; in 1853, when it was 204*l*; and in 1854, when it was 165*l*. The present increase is, however, the most remarkable. In the above years the railway system was composed, to a far greater extent in proportion than is now the case, of trunk lines. The present rate of mileage increase is in a system full of branches and competing lines. What the mileage increase would have been now, without competing or superfluous lines, we forbear to speculate. On the whole, this mileage increase is the most satisfactory fact to the railway shareholders. It shows how much they have gained by the wise policy of abstention from new enterprises.

It is also important to notice, in connection with this mileage increase, that it has been most remarkable in the second half of the year. Dividing the 47 weeks ending 25th November into two nearly equal periods, we find that the average weekly increase—

	£	s	d
In 23 weeks ending 10th June was	2	17	9
In 24 weeks ending 25th Nov. was	3	9	9
Improvement in rate of weekly increase in second period	0	12	0

Everything, therefore, points to the conclusion that the present year has not only been the most prosperous for railways for a period of twenty years, but that a large part of the improvement is very recent, and within the course of the current half-year. A third point in connection with the exceeding profitableness of the increase of railway business, is the large share of it contributed by passenger traffic. A passenger increase is always more profitable than a goods increase, as the additional passengers cost little more to carry, whereas the cost of conveying goods is always in proportion to the weight. The proportion contributed by passengers is, as we anticipated, less now than in a comparison made just after the autumn traffic was over, being 50·5 instead of 53·5 per cent., but this is a very trifling reduction. Roughly speaking, passengers are now contributing equally with goods to the increase of railway traffic, and the increase must be more profitable than an equal increase confined to goods only. As we are dealing with a larger increase than before, this is another reason for anticipating very important additions to the profits of ordinary shareholders.

In the case of the particular companies which we referred to in October, the proportion of passenger increase is still very much larger than the proportion contributed in the previous half-year, though less than the proportion as it stood in October :

Share of Passenger Increase in Increase of Gross Traffic.

	In 1st Half of 1871. Per Cent.	In 2nd Half of 1871 to 25th Nov. Per Cent.
London and North-Western	15·7	50·
North-Eastern	16·7	27·
Midland	25·0	36·
Lancashire and Yorkshire	19·0	42·
Great Northern	57·0	96·
Great Eastern	18·2	54·
Sheffield	9·1	26·
Brighton	67·6	81·
Chatham and Dover	100·0	82·

When it is considered what the additional dividends yielded in the first half of the year were, and that the gross increase we are now dealing with is much greater, it is obvious that unprecedented additions to the dividends may now be looked forward to.

The test of everything to the shareholders and the public will be the actual declaration of the greatly improved dividends, which all the facts seem to promise. So far as we can see, there need be little doubt about the matter, even in anticipation. Making as careful and moderate a computation as we can in each particular case (see Table V. below), we believe that, on the whole, the additional amount to be divided among the ordinary shareholders of the leading railways will be 752,000*l*, or very nearly at the rate of 1 per cent. per annum on the ordinary share capital of these railways. This is allowing for an average deduction from the increase of traffic at the rate of 38 per cent. for working

expenses, which appears to us ample enough, considering the nature of the traffic, and is certainly in accordance with the results of the last half-year. How important an addition of 1 per cent. per annum to railway dividends will be, it is unnecessary to point out. As to the improvement in particular cases, we must refer our readers to the table which we subjoin. It will be remarked, however, that the most striking improvements are very special indeed—viz., in the case of the southern lines—the South-Eastern, the Chatham, and the Brighton—the two former benefiting by the receipt of the traffic lost by the war, as well as the increased prosperity of the year, and the Brighton gaining by the wiping out of the last effects of the New Cross accident. Apart from these special causes of improvement, the increase in the case of these companies would still have been remarkable.

What should be the present value of railway property in the face of such rapid improvements in the income derived from it? There has been a great rise in railway shares, coincident with the past improvement in the dividends, and in anticipation of the future increase. As we have before pointed out, an investor in present circumstances, who looked only at last year's dividends, and judged the companies by them, would be quite unable to invest. He would see only a poor return for his money, and he must judge in some way what is the expectation of future income, as well as what the present income is. So far as we can judge, there is still room to expect a considerable advance upon present prices. From the subjoined tables it will be seen that in many cases an investor at present prices at the beginning of the year would have received 5 per cent. on his investment—the price not yet being equal to 20 years' purchase of the estimated dividend for 1871. Assuming however that 1872 improves as much upon 1871 as 1871 has done upon 1870, there is a large margin to be covered in every case, within which an investor at the beginning of 1872 would probably be able to receive 5 per cent. on his investment. Of course there can be no certainty that 1872 will increase like 1871, as the improvement entirely depends upon the exceptional prosperity of the country, but we believe there is at least a reasonable probability that no check will occur next year. Good traffics, as a rule, run in cycles of four years, and we are still only at the end of the second year. On the average, too, railway business increases between 4 and 5 per cent. per annum, so that even if there is a check to business in a year or two, an increase is sure to come sooner or later. Indeed but for accidents we should consider an investment in ordinary stock of railways to pay 5 per cent. at once as much too good, compared with other investments, considering how great is the expectation of future increase. No doubt there is a farther drawback to the expectation of profit in the rise of wages, which accompanies our present prosperity, and the rise in the prices of material used in repairs and renewals. But it is not likely that any such rise in wages and prices will absorb all the future profits.

The one doubtful point about the future will always be the possibility of directors' mismanagement. At present there seems less room than formerly for mistakes, each Board having now got a district of its own, but past experience may well excuse investors for being distrustful to the utmost of the folly of their managers. Were it not for this doubt, we are certain that the ordinary stock of railways would stand at a much higher figure than 20 years' purchase of the probable dividend of the current or even of the next year.

I.—Aggregate Increase of Railway Traffic in 2nd Half-year of 1871, to 25th November.

	1871.		1870.		Increase. Amount.		
	£		£		£		
Bristol and Exeter	190,760		183,486		7,274		3·8

* Allowing for special causes of improvement in the current year.
† It is especially difficult to estimate for the South-Eastern, owing to the change in the date of making up the accounts, and the confusion caused by the loss of traffic through the war.

THE TRANSLATION OF SIR R. COLLIER.

It is impossible for the best friends of the Government to deny that a very serious and very gratuitous blunder has been made in the translation of the ex-Attorney-General, Sir R. Collier, from a Judgeship in the Common Pleas, filled only *pro forma* and for a few days, to the Judicial Committee of the Privy Council, in clear contravention of the spirit of the Act of this year. The facts of the case are perfectly clear and simple. The Judicial Committee Bill of the previous year contemplated making even barristers of sufficient eminence Judges of this Supreme Court of Appeal. In the Judicial Committee Bill of last year, which passed into law, this provision was cancelled, nor were the offices of the Attorney and Solicitor-General mentioned as directly qualifying for a seat on the Judicial Committee of the Privy Council. The qualification entitling to that office was very carefully and explicitly described:—"Any persons appointed "to act under the provisions of this Act as members "of the said Judicial Committee must be specially quali- "fied as follows; that is to say, must at the date of "their appointment be, or have been, Judges of one of Her "Majesty's Supreme Courts at Westminster, or a Chief Jus- "tice of the High Court of Judicature at Fort William, in "Bengal, or Madras, or Bombay, or of the late Supreme Court "of Judicature at Fort William, in Bengal." No provision could be more explicit. The Lord Chief Justice's remark in his really quite unanswerable as well as unanswered letter to Mr Gladstone, that if, as might have easily happened, an Indian Chief Justiceship had chanced to be vacant, the appointment of the Attorney-General to that office, with no intention of sending him out to India, but simply for the purpose of qualifying him, according to the letter of the Statute, to sit on the Judicial Committee of the Privy Council, would have been in no degree more objectionable in principle than what has now actually occurred, brings out the completely evasive and in fact discreditable nature of the arrangement in the strongest light. The Lord Chief Justice does not speak too strongly when he says that such a palpable evasion of the spirit of an Act of Parliament in relation to a judicial appointment is a real degredation of the judicial office.

It is not the least defence to say, as the Government probably will say, that when the eligibility of eminent members of the bar for this office, as proposed in the Bill of the previous year, was rejected, it was not expressly intended to exclude the Attorney and Solicitor-General, who have always ranked above ordinary members of the bar, and who usually expect, if they accept a seat on the Bench at all, a seat higher than one of the puisne Judgeships. That may be so. We might even concede as much as this, it may have been due to a mistake—possibly even to a mere oversight—that the Attorney and Solicitor-General's names were not included in the list of officers eligible directly to the Judicial Committee of the Privy Council, though of course this cannot be proved, and to all appearance the Act positively requires a real experience as a Judge in some lower Court. But as the Lord Chief Justice points out, the fault of this appointment does not consist in selecting a man who is not *fit* for the office he is called upon to fill, but in selecting one who cannot legally accept it without a contrived and deliberate evasion of an Act passed only last year, the plain meaning of which is that only men with the real experience of a Judge are to be appointed to the Court of Appeals, though of course it is open to anyone to maintain that the Act would have had some different meaning, if the attention of Parliament had been called to an omission in it. If you may disregard the obvious drift of the law only because you think the law would have been different if more attention had been paid to a particular point, there is no limit to the number of tricks and evasions by which the letter of the law might be covered and the spirit evaded, and which it might even become the direct office of the Law Officers of the Crown to recommend. For a Government to set the example of such evasions, and to set that example in relation to the qualification of a Judge, is unquestionably to strike a serious blow at the respect for law on which we English justly pride ourselves.

And the blunder is quite as bad in relation to the prospects of the particular administration now in power, as it is in relation to the plain laws of administrative morality. If anything in the world is dangerous for Mr Gladstone's Government it is to confirm the impression popularly, and, on the whole, falsely formed of it, that it is given to subtlety and double dealing. Mr Gladstone himself has a dangerous skill in fine distinctions, which has often created this impression when his mind and purpose were as simple and innocent as a child's. There is something fascinating to him in drawing a very fine distinction, and foiling an adversary's attack by a hair's breadth of deviation from the point at which he had aimed. There is no quality which Parliament less likes, or which the country itself more actively disapproves. Yet this naked adherence to the letter and evasion of the spirit of the Judicial Committee Act for the purpose of elevating Sir R. Collier to the Judicial Committee, will produce a widespread impression of unscrupulousness and of the artfulness of Mr Gladstone's administration all over the country, and will put a feeling of something like contempt into the hearts of numbers of his most loyal followers in Parliament. And this impression, bad enough in itself, will be greatly strengthened by the very unfortunate note in which Mr Gladstone refers the Lord Chief Justice to Lord Hatherley for the answer to his protest. In that note Mr Gladstone refers to the double transaction, the election of Sir R. Collier to the Common Pleas for the purpose of his subsequent election to the Judicial Committee of the Privy Council thus:—"As the "transaction to which it [the Lord Chief Justice's letter "refers is a joint one, and the completed part of it, to

"which you object, is the act of the Lord Chancellor, I have "referred your letter to him." Now, the Lord Chief Justice only objected to "the completed part of it," on the hypothesis that it was done only as "a means to an end." He did not in the least object to Sir R. Collier becoming a Judge in the Common Pleas; he did object to his becoming a Judge in the Common Pleas for a few days only, to satisfy the letter of the Judicial Committee Act. The real objection, therefore, was not to "the completed part of the transaction," but to the purpose for which that completed part of the transaction had been carried out. No doubt the Lord Chancellor had given his authority both to the elevation of Sir R. Collier to the Common Pleas, and to the intent of that elevation, merely to qualify him for the Judicial Committee. Still that intent could never have been entertained without the consent of the Prime Minister, and it is therefore the Prime Minister who ought to answer for it,—or, if he does not, at least to take the full responsibility of the Lord Chancellor's answer. Mr Gladstone's note amounted to an evasion of that responsibility, and an evasion under a sort of quibble, which gave to that other evasion, the evasion of the Act itself, a still more unpleasant prominence. Mr Gladstone had really nothing to gain and much to lose by this unnecessary distinction. He did not, and could not, for a moment suppose that he escaped any real responsibility by putting it forward. It was for the mere pleasure of taking a distinction which would stave off any necessity of an immediate answer, that Mr Gladstone must have insisted on this distinction between "the completed part of the transaction," for which Lord Hatherley has to answer, and the subsequently to be completed part for which he himself must answer. Yet no pleasure could have been dearer bought. It will go far to persuade the world that Mr Gladstone delights in the ambiguities of an indirect strategy, that he heartily approves of a *ruse*. He steals a march on the law, and then he steals a march on the Judge who vindicates the plain meaning of the law, by an apparently wilful misunderstanding of his exact meaning—and all for no real end. The Government have gained very little by the promotion of Sir R. Collier. The Prime Minister has gained nothing by inducing Lord Hatherley to say that he will explain and defend his own advice when the proper time comes. But he has gained a new reputation for what is not the highest kind of finesse, and for which he unfortunately had beforehand a far more widespread reputation than he deserved. The translation of Sir R. Collier has been a blunder from beginning to end, and will win for the Minister the credit of delighting in political stratagem and the finer subtleties of excuse. There is no cast of charac'er the credit of which could, in the eyes of ordinary political English critics, be in reality a greater discredit than that. And the discredit which no doubt the Government really deserves for this series of elaborate mistakes, will be a trifle to that which it will actually incur. People will not believe that errors so patent could have been made with purposes so innocent as those which all who really understand the sinuosities of the Prime Minister's mind will see to have been his real purposes.

BOARD OF TRADE RETURNS.

THE Board of Trade Returns for November were issued this week, and again show very satisfactory results, both as regards the inward and outward clearances. It is worthy of remark that the increase in the transactions, as will be seen from the figures below, has been fairly distributed over all the leading branches of trade. The declared value of the articles imported during the eleven months was in—

	£
1869	254,566,716
1870	264,784,324
1871	301,613,633

And in November only—

	£
1869	25,375,286
1870	25,273,450
1871	29,109,744

The exports during the eleven months compare as follows:—

	£
1869	174,450,252
1870	182,462,925
1871	202,353,778

And in November only—

	£
1869	15,287,820
1870	16,177,935
1871	18,816,513

The following statement shows the increase or decrease in the value of the leading articles imported into the United Kingdom during the eleven months ended November 30, as compared with the corresponding period in 1870:—

Articles.	1870. £	1871. £	Increase. £	Decrease. £
Coffee	4,648,604	5,156,616	508,012	...
Wheat and flour	14,879,335	21,580,316	6,600,981	...
Cotton	46,068,769	50,526,259	4,457,490	...

	Red	6,504,556	7,148,168
	White	7,424,984	7,968,297

The following is an account of the quantities of certain principal articles of imported merchandise (subject to duties of Customs) remaining in the bonded warehouses of the United Kingdom on the 30th November, 1871, compared with the quantities in warehouse on the 30th November, 1870:—

	1870.	1871.
Cocoa lbs	7,943,547	8,311,720
Coffee	73,342,892	62,467,766
Fruit—Currants cwts	299,120	295,230
Raisins	96,103	98,520
Spirits—Rum proof gallons	*6,648,630	*7,885,650
Brandy	*10,328,843	*12,243,522
Sugar—Refined and candy cwts	165,530	77,127
Unrefined	2,527,721	1,894,658
Molasses	298,328	192,423
Tea lbs	75,922,662	84,080,318
Tobacco—Unmanufactured	55,373,824	70,960,904
Manufactured and Snuff	2,278,857	3,491,356
Wine—From France gals	1,331,366	1,492,871
Portugal	4,118,676	4,246,794
Spain	7,221,893	6,884,654
Other countries	1,059,552	1,050,406
Total of wine	*13,731,977	*13,674,725

* Including the stock in the Excise warehouses of spirits and wines received under bond from the Customs warehouses, under Act 32 and 33 Vic., c 103.

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts on account of Revenue during the week ending Dec. 2:—

	Receipts of Week Ending Dec. 2. £
Customs	493,000
Excise	290,000
Stamps	196,000
Taxes	10,000
Income tax	25,000
Post Office	50,000
Telegraphs	50,000
Crown lands	50,000
Miscellaneous	596,029
Total	1,760,029

The total receipts of the previous week were 997,477*l.*

The Exchequer issues of the week on account of expenditure were 1,488,757*l*, viz. :—

	£
Interest of debt	613
Other charges on Consolidated fund	47,500
Supply services	1,440,644
Telegraph services	nil.
	1,488,757

During the week the cash balances have increased as follows :—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on Nov. 25	2,799,115	727,200	3,526,315
— Dec. 2	2,860,409	790,901	3,651,310
Increase	61,294	63,701	124,995

BUSINESS NOTES.

M. Thiers and French Finance.—We have not yet the full text of President Thiers' message, but the telegrams leave very little doubt that he is bent on committing almost every capital error open to him, in respect of his financial and fiscal policy. In the first place, he is resolved on denouncing the commercial treaty with England. Not having been able to secure Protectionist alterations in it so as to make it a treaty of the old type, which was followed in the negotiation of the recent Alsace and Lorraine convention, he has resolved on getting rid of it altogether. In the *second* place, in conformity with this obstinate adherence to Protectionist policy exemplified in denouncing the Anglo-French Treaty, he proposes to increase the Customs' duties, including, we observe, a duty of 12 to 15 per cent. on fabrics of mixed cotton and wool. If M. Thiers has his way, France will thus be hindered in dealing with its best customer, besides being doubly taxed—for the benefit of the protected home producer more than of the State. A *third* blunder of M. Thiers is the policy which he announces respecting the circulation of the Bank of France. Instead of following the manifestly sound policy of paying off the State debt to the Bank, and so enabling it to resume specie payments, he chooses to involve the country in all the evils of an inconvertible currency, which produces mischief enough already, and will become additionally mischievous with each percentage of depreciation. France is paying dearly for the privilege of having a politician of the old school at its head, when fiscal errors are in danger of being adopted at so critical a moment. Great as the material injuries of the war have been, we doubt if they will be so serious as the aggravated injuries which these errors of policy will inflict.

The Insurance Companies and the Chicago Losses.—The New York *Commercial Chronicle* publishes the following table, showing the number of insurance companies losing by the Chicago fire, the amount of the losses, and the number of companies which have been obliged to suspend payment in consequence. It will be observed that the number of companies suspending is very small, only a sixth of the total number affected, although the losses on the average are more than half the gross assets :—

State.	No. of Companies	Aggregate Capital.	Total Gross Assets.	Total Losses.	No. Suspend'd
		dols.	dols.	dols.	
New York	103	30,161,232	54,675,350	21,637,500	20

Brokers and Principals.—Several recent cases, one of which was heard last week and is still undecided—viz., the case of Mollett *v.* Robinson—have given rise to some discussion about the position of brokers in the City. Various customs have grown up regarding the disclosure or non-disclosure of principals, and the best Judges confess themselves hardly able to tell what is the liability of a broker to his client or to the people with whom he deals on behalf of, his client. The case to which we have referred was one of the most difficult of these, the point being whether a broker, having an order to purchase a certain quantity of tallow, was bound to make the purchase all at once, or could make it up by separate purchases, the latter being the course objected to by the client in the case in question, on the ground that the broker had really acted as a merchant. The cases are obviously full of difficulty. When things go well the broker and his principals prefer that the principals' names should not be disclosed; but the broker, if anything goes wrong, objects to being made liable as a principal, though he has disclosed no client's name. On the other hand, a broker who makes up his orders by purchases from different people whose names in turn he does not disclose to his client, may find his client turn round and say that he had not been strictly acting as broker, but had acted as a merchant, the latter charge being strengthened by the very natural suspicion that the broker, in distributing his purchases among various orders to buy, had used a discretion for the apparent disadvantage of some customers compared with the others. Without prejudging the cases still *sub judice*, it may be remarked that some of the complaints are incidental to the natural competition of business. To do business the broker, in good times, practically guarantees the credit of the buyers and sellers for whom he acts, disclosing no names; but this is unfortunately done without any proper understanding, which the broker himself would shrink from, sheltered as he believes himself to be by the character of agent. With regard to the complaint of a broker making up his orders by various purchases and distributing his purchases, it is obvious both that in practice a broker could not do well for his clients without executing his orders in various lots, and yet that this practice in reality puts him very much in the position of a merchant, which was the accusation against the broker in the case to which we have referred. We should say that the difficulties are really insoluble; but as it is the broker who gives occasion for legal difficulties by occupying an ambiguous position, we doubt if he is the sufferer who ought to be pitied. The clients or dealers, who find themselves saddled with an insolvent principal, or are prevented from having any principal responsible at all, are those who suffer most by the existing arrangements.

New Railway and Tramway Bills.—There are symptoms of enough restlessness among our railway companies to dissipate a large part of the existing prosperity if directors are not properly looked after. The railway and tramway notices for the ensuing Parliamentary Session are much more numerous than they have been for the previous three or four years, the bare statistics being :—

Notices in 1867	171
— 1868	109
— 1869	78
— 1870	129
— 1871	137
— 1872	198

The number, 198, is more than twice the number in the Session which followed the 1867 and 1868 disclosures, though it is happily short of the number, 450, which crowded the notice book of 1866. Unfortunately we fear the bare statistics do not show the whole extent of the mischief, as the companies have grown in dimensions since 1867, and notices embrace a larger field, on the average, than they did in the days of contractors' lines before 1866. We have a distinct impression at any rate that the notices show a very considerable amount of engineering activity, of which shareholders should beware. The notices for the Metropolis alone would occupy a long description. Two of the great companies ask for new modes of access into London. The Great Eastern and the Great Northern both propose a connection with the North London line, the Great Northern also asking for running powers over the North London to Broad street. It is also proposed to incorporate new companies having similar objects in view. Two of these are to give the Midland access to the western parts of the Metropolis—one from Cricklewood to Praed street and the Edgware station of the Metropolitan Railway, and the other by way of the St John's Wood Railway to Oxford street. Other companies are proposed to construct

railways from the Waterloo station of the South-Western Railway to Blackfriars; from the Metropolitan District Railway at West Brompton (1) to Roehampton, (2) to Barnes, and (3) to Burlington street, Fulham, and the West London Extension Railway; from the west end of Oxford street to the Chatham and Dover Railway, near Farringdon street; from the west end of Oxford street to the London and North-Western Railway at Willesden; from the Great Eastern, North London, and East London Railways to the Metropolitan District Railway, and to complete the inner circle; besides a railway from the South Kensington station on the Metropolitan District Line to the Royal Albert Hall. Not for some years has it been proposed to cut up the Metropolis so much as is now done, and the engineering activity thus exemplified is apparently only a specimen of the schemes throughout the country. Railway companies are now so big and prosperous that it will take a great deal to hurt them, and the existing companies are apparently responsible for very little; but we do not like to trust very much to the present abstinence from enterprise, and fully expect that next year will produce a much larger crop of projects, which will, sooner or later, tell upon existing companies.

METROPOLITAN DISTRICT DEBENTURES.—We receive the following communication from a correspondent:—

TO THE EDITOR OF THE ECONOMIST.

SIR,—Some time since you called attention to the relative low price of the above security. Will you allow me, with the light now before us, to confirm your views? The earnings for the current half-year we may place at 78,000*l*.—double that of last year (the figures for 21 weeks are—15,000*l*. 1869; 30,000*l*. 1870; 60,000*l*. 1871). 78,000*l*. at 45 per cent. working expenses,* would give 43,000*l* net, sufficient to pay the debenture interest, and 5,500*l* for working-stock, rent, &c., &c. This for the first six months of opening would seem to me practically to secure the dividend, and indeed give promise of making it hereafter as secure as any debenture-dividend in the kingdom. If this be so then, being 6 per cent. and irredeemable, it should (if other railway 4 per cents. are not out of range) be worth 150*l*, now selling at 123, with 3 per cent. dividend about due.—Yours, &c., W.

London, Dec. 6, 1871.

* The chairman of the Metropolitan stated that they had a profit on the working at 45 per cent., although the traffic was half only of that at present.

THE UNITED STATES' MINISTER.—The American newspapers unite in expressing an unfavourable opinion on the conduct of the United States' Minister in this country in joining the board of a new mining company. According to the New York *Commercial Chronicle*, this act of the Minister is not only considered unbecoming, but it is an actual breach of the rules of the American diplomatic service, which forbid a Minister to engage "in any commercial speculation whatever." The existence of such a rule is creditable to the good sense of American statesmen, and the obvious inconvenience of General Schenck's recent action shows its propriety. Whatever evils are in store for us during the coming speculative mania, we hope the abuse of the names of diplomatists by promoters and speculators will be prevented by the most stringent rules of the Governments which the diplomatists represent.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, Dec. 7.

The returns of the Bank of France for this week, last week, and for the week ending 8th September, 1870, are as follow:—

A comparison of this week with last, in the principal items, shows:—

DEBTOR.	Increase. francs.	Decrease. francs.
Notes in circulation	...	63,666,000
Treasury balance	333,000	...
Deposits	12,500,000	...

CREDITOR.	Increase. francs.	Decrease. francs.
Coin and bullion	1,000,000	...
Bills discounted	...	48,800,000
Advances on securities	50,000	...

The Bank return for the week shows a considerable increase in the margin of notes, due to the reimbursements of commercial bills at the end of the month of November and an augmentation of the private deposits. The disposable rentes remain without change, showing that the sales were limited to the five millions exhibited in the returns of the 9th and 16th ult. The fears entertained that the settlement at the end of the month would disclose larger realisations, sold for the account, now appear to have been groundless. With the exception of the decrease in the discounts from the cause abovementioned, the other items present little variation compared with the last statement.

The week has so far been passed in a state of expectation from the postponement of the President's address. This afternoon has been fixed for the reading, but up to post hour no accounts have been received from Versailles of its contents. Snow has been falling heavily since noon, rendering the roads impracticable, and delaying the arrival of the trains; it is even very doubtful whether this letter will reach you in time for publication, for our London mail has arrived to-day six hours late. The President's message is anxiously looked for, not only for its own contents, but for the important measures which are to be presented to the Assembly immediately afterwards, namely the Budget and the Bank Bill. The former will be the chief measure of the Session, and will probably give rise to a lengthy discussion, for the Minister of Finance and the Committee are as far as ever from coming to an understanding. As, however, the Minister wishes to levy the new taxes from the 1st January, he is said to intend, pending a decision as to the mode in which the increased revenue is to be raised, to adopt the system adopted in Italy, and ask the Chamber to allow the duties to be collected provisionally for the first three months of the year. The Minister will besides propose taxes on several articles not comprised in the Budget of last Session which is now seen to be insufficient. The lucifer-match tax will be increased to five centimes the hundred, as originally demanded; it is found that for the tax of half-a-sou the retail price has been increased by a sou, the difference going to the pockets of the intermediaries without profit to the Government or the consumer.

The Government and the Bank of France are believed to have come to an understanding on the measures to be adopted for the relief of the establishment. The issue of notes will be increased to 2,800 millions immediately, and eventually, if found necessary, to 3,000 millions, with the proviso that the authorisation of the President of the Republic shall be obtained each time that a further emission is necessary. This measure can however be only looked on as an expedient, for until some part of the advances made to the State shall have been reimbursed, the danger of a further depreciation of the Bank paper will not have been removed. The greater part of the resources of the establishment consist, in one form or other, of claims deriving their security from the credit of the State; the

Treasury bonds, advances to the Government, rentes, loans on the public funds amount to about 1,460 millions, to which may be added 210 millions due from the City of Paris, making in all 1,670 millions, and leaving under 1,350 millions represented by the specie and discounts to guarantee liabilities composed of notes, deposits, &c, of over 2,800 millions. The idea that the only remedy for the present difficulties is the reimbursement of the advances to the State by means of a loan, is slowly making its way, and in a certain measure accounts for the heaviness of rente during the week. Its principal adversary is the Minister of Finance, who would have to provide an additional sum of 50 millions to meet the increased interest. This project of a partial reimbursement has been put in a definite form by M Wolowski, who has presented to the Chamber a Bill to repay to the Bank a sum of 600 millions to be raised by means of 5-30 bonds, bearing five per cent. interest; other articles of this Bill limit the increase in the Bank circulation to 100 millions, to be issued in five and ten-franc notes, and require the reimbursement of the balance due to the Bank in tenths annually.

The Bourse during the week has reflected the state of uncertainty in the Assembly, and the business has been of the most limited character. The high rates demanded for carrying over at the last settlement have besides restricted the speculative operations. The following are to-day's prices:—

	November 30.		December 7.

Premium on gold 12f to 13f per thousand; English sovereigns and banknotes 25f 75c; exchange on London, 25f 75c to 25f 80c.

A project has been started to create a Clearing-house in Paris, and a committee of five members has been chosen to organise this new institution. The want of such an establishment has, however, scarcely been felt hitherto, as the system of current trade accounts with bankers and payments by means of cheques has made but little progress.

The Board of Customs have just issued the return of the trade of France for the year 1870. The tables are not so detailed as those formerly published, as the total amounts are alone given without the classification into countries. The rates on which the estimated value of the imports and exports are based, and which are fixed by the Permanent Committee, have not been changed, those for the year 1869 having been retained in the present tables. The total value of the imports and exports was as follows:—

VALUE OF IMPORTS for CONSUMPTION.

	1870. francs.		1869. francs.		1868. francs.
Articles of food	720,884,000	...	693,828,000	...	933,070,000
Raw materials and natural productions	1,679,988,000	...	2,030,618,000	...	1,989,381,000
Manufactures	218,560,000	...	264,616,000	...	235,585,000
Other articles	161,918,000	...	164,009,000	...	145,693,000
Total	2,781,370,000	...	3,153,071,000	...	3,303,729,000

VALUE OF EXPORTS of FRENCH PRODUCTION.

Manufactures	1,562,429,000	...	1,756,320,000	...	1,577,115,000
Articles of food, raw materials, and natural productions	1,181,848,000	...	1,185,667,000	...	1,097,437,000
Other articles	115,850,000	...	132,954,000	...	115,362,000
Total	2,860,127,000	...	3,074,941,000	...	2,789,914,000

The movement of the precious metals during the same years was as under:—

IMPORTS.

	1870. francs.		1869. francs.		1868. francs.
Gold bullion	69,183,725	...	156,596,375	...	200,366,075
Gold coin	240,745,839	...	298,000,200	...	293,079,300
Silver bullion	32,107,262	...	63,524,494	...	64,009,726
Silver coin	73,001,665	...	129,290,260	...	129,047,260
Total	415,038,491	...	647,411,329	...	686,502,361

EXPORTS.

Gold bullion	99,420,149	...	36,001,749	...	29,418,636
Gold coin	91,109,232	...	144,260,430	...	251,165,393
Silver bullion	25,510,027	...	36,871,844	...	26,979,354
Silver coin	45,899,260	...	44,516,693	..	56,802,904
Total	261,938,668	...	261,650,716	...	364,364,287

The exports being deducted from the imports, the stock of gold and silver will be found to have increased in 1870 by 153,099,823f, or at the rate of 25f per pound sterling, to 6,123,996*l*. During the decennial period 1861 to 1870, the excess of the importations of the precious metals exceeded the exportations by 2,205,660,000f, or more than 88 millions of pounds sterling. Copper coin is included in this total, but represents only an insignificant sum.

The Bill for fixing the new sugar duties, deferred from last Session, has already been distributed to the deputies. The rates per 100 kilos (2 cwts) now proposed are as follows:—Native or colonial sugar, or the produce of the countries which signed the convention of the 8th November, 1864—refined in loaves, 64f; candy, 68f 40c; crystallised, equal to the English type No. 3, 64f; raw sugar superior to No. 18, 61f 45c; Nos. 15 to 18 inclusively, 60f 15c; Nos. 11 to 14, 53f 30c; Nos. 7 to 10, 51f 20c; below No. 7, 42f 90c. Sugars from countries out of Europe, imported by foreign vessels, or from the European bonding warehouses by any mode of carriage, to pay an additional duty of 2f per 100 kilos.

The Prefect of the Seine has brought forward the Extraordinary Budget for 1871, which shows a deficit of 50½ millions of francs. The sum may be still further increased by the sum of 9½ millions of francs, forming the old current account of the city at the Bank of France. Although set down as resources, the Bank refuses to reimburse that sum, on the ground that it was taken by requisition, in the name of the city, during the Commune. The city, however, repudiates all liability, declaring the State responsible for the depredations committed during the insurrection. The Prefect announced that he will propose, in a future sitting, various new taxes which he requires to be voted before drawing up his Budget for 1872.

The East Hungarian Railway Company has called for the payment of the last instalment of 60f in gold on its shares of 500f, or 200 florins.

The Orleans to Chalons Company has also made a call of 250f, payable between the 25th and 31st inst., to complete the total of 500f per share.

The following are the latest quotations of the produce markets at Havre per 50 kilogs, duty paid:—

COTTON.—New Orleans, very ordinary, 127f; good ordinary, 135f choice, 141f; Georgia, same marks, 113f, 130f, and 135f; Oomra, good ordinary, 95f; Scinde, 83f; Tinnevelly, 95f; Madras, 90f; Bengal, 83f. Sales last week, 46,922 bales; arrivals, 7,127; stock, 124,305 bales.

COFFEE.—Rio, 143f; Hayti, 83f (in bond); Malabar, 147f 50c; Native Ceylon, 147f 50c; Wynard, 147f 50c. Sales last week, 13,000 bags; stock, 161,327 bags and 2,683 tierces; arrivals, 7,222 bags.

SUGAR.—French West India on sample, 63f to 64f.

HIDES.—Monte Video, dry ox, 136f; fresh, cow, saladeros, 78f; ox, 81f 50c; Buenos Ayres dry ox and cow, 122f 50c, light; 135f heavy; Rio Grande, fresh, cow, 75f.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap 32, for the week ending on Wednesday, the 6th day of December, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued	38,730,040	Government debt	11,015,100
		Other securities	3,984,900
		Gold coin and bullion	23,730,040
		Silver bullion	...
	38,730,040		38,730,040

BANKING DEPARTMENT.

	£		£
Proprietors' capital	14,553,000	Government securities	15,001,028
Rest	3,077,389	Other securities	16,077,462
Public deposits, including Exchequer, Savings' Banks, Commissioners of National Debt, and dividend accounts	6,917,400	Notes	14,320,320
		Gold and silver coin	681,205
Other deposits	18,943,147		
Seven-day and other bills	2,589,079		
	46,080,015		46,080,015

GEORGE FORBES, Chief Cashier.

Dated the 7th December, 1871.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result :—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills).....	26,998,799	Securities	31,525,490
Public deposits.....	6,917,400	Coin and bullion	24,411,245
Private deposits	18,943,147		
	52,859,346		55,936,735

The balance of Assets above Liabilities being 3,077,389*l*, as stated in the above account under the head Rest.

FRIDAY NIGHT.

The preceding accounts compared with those of last week exhibit—

	Increase.	Decrease.
Circulation	£2,302,533	...
Public deposits	...	337,343
Other deposits	...	2,078,738
Government securities	...	...
Other securities.....	...	127,533
Bullion	17,721	...
Rest.....	3,736	...
Reserve	...	177,809

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house :—

	Week ending Dec. 6, 1871.	Week ending Nov. 29, 1871.	Week ending Dec. 7, 1870.
Thursday	£39,741,000	11,624,000	15,107,000
Friday	25,162,000	13,088,000	12,213,000
Saturday	22,066,000	13,783,000	17,259,000
Monday.....	18,230,000	12,883,000	10,573,000
Tuesday	15,264,000	14,241,000	11,151,000
Wednesday	13,030,000	14,595,000	10,685,000
Total.....	133,493,000	80,214,000	76,938,000

Bankers' Clearing-house. G. DERBYSHIRE, Chief Inspector.

The total since the 4th of January, 1871, is 4,406,384,000*l*, compared with 3,610,506,000*l* for the corresponding period last year, showing an increase of 795,878,000*l*.

The following shows the amount of the Circulation, Bullion in both departments, Banking Deposits, Banking Securities, Reserve, and Rate of Discount, for three months ending 6th December, 1871 :—

Date.	Circulation.	Coin and Bullion.	Deposits.	Securities in Banking Departmnt	Reserve.	Rate of Discount
	£	£	£	£	£	%
Aug. 30	25,381,497	25,044,463	27,149,414	30,397,028	15,196,108	2
Sept. 6	25,631,434	24,816,585	26,624,200	30,628,460	14,727,040	—

In 1861, money still continued in moderate demand. War with America, on account of the Trent difficulty, appeared very probable, as it had done for two weeks.

In 1868, the effect of the recent advance in the Bank rate was beginning to be sensibly felt in the exchanges, and the rate was not farther advanced, although the stock of bullion had diminished during the week. The composition of the new Gladstone Cabinet, succeeding to Mr Disraeli in consequence of the Conservative failure at the elections, had just been made known. A paper read by Mr Jevons at the Statistical Society had awakened public attention to the depreciation of a large part of the gold coinage.

In 1869, the demand for money was moderate. A large new Turkish loan was anticipated. President Grant had just issued a message, which was considered very conciliatory on foreign affairs.

In 1870, money was easy, the suspense of the war and the Russian difficulty continuing. Arrangements were being made at Versailles, while the siege of Paris was in progress, for a Germanic Confederation, embracing the whole of Germany, and with the Prussian sovereign as Emperor.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 3,232,391*l*; in 1868, an excess of 229,742*l*; in 1869, an excess of 1,220,558*l*; and in 1870, an excess of 2,706,480*l*. In 1871, there is an excess of 2,865,685*l*.

Discount and Money Market.—The money market has continued easy during the week, the tendency at one time being to lower rates, though the market is rather stiffer at the close than it was a week ago. There is still however a great superabundance of money. At the Bank for the last two days there has been a rather better demand.

The tendency early in the week to lower rates was such that it was believed in some quarters the Bank rate would be reduced to 3 per cent., but the Bank on Thursday made no change. The account which has since been published shows the Bank to be in the usual important points as strong as it was a week ago, the reserve, the bullion, and the private securities being substantially without change. But there is one change of an unusual kind. The private deposits have diminished 2,079,000*l*, but this has been effected by a sudden addition of 2,147,000*l* to the amount of the Bank post bills, which usually fluctuate at about 500,000*l*. It has been stated that these bills have been issued to the extent of 2,000,000*l* on German account, but we understand that this is not the case, and that they have really been issued on American account in connection with the recent American loan. It is believed that they will not be sent out of the country, but in any case the money is taken out of the market for the time, and the fact has had something to do with the rather firmer tone to-day. The great abundance of money however prevents any pressure for discounts, notwithstanding the increase of apprehensiveness. The continental exchanges still continue in favour of this country, the Paris exchange having rather risen to-day, and French money still coming here, while there is no demand for gold for export.

The changes in the Bank of France account are of a more favourable character, the unfavourable symptoms in the previous week's return—the increase of the discounts and the note circulation—being almost exactly corrected. The note circulation has diminished 2,540,000*l*, rather more than the increase in the previous week, and the discounts have diminished 1,952,000*l*, the increase in the previous week having been 3,280,000*l*.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—2 to 3 months	3 3¼	per cent.
Do 4 months	3¼ 3½	per cent.
Do 6 —	3½ 3¾	per cent.
Trade bills—2 to 3 months	3¼ 3½	per cent.
Do 4 months.....	3¾ 4	per cent.
Do 6 —	4	per cent.

The allowances for money at the private and joint stock banks and discount houses are as follows :—

Private and Joint Stock Banks at call.....	2½ per cent.
Discount houses at call	2⅝ per cent.
Do with seven days' notice	2¾ per cent.
Do fourteen days'.....	2¾ per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent.		Open Market, per Cent.	
	1870.	1871.	1870.	1871.
Paris	 6	.....	... .	5½

	Bank Rate. Per cent.	Open Market. Per cent.
Vienna	6	6
Berlin	5	4
Frankfort	4	3½
Amsterdam	4	3
Brussels	...	3½
Hamburg	...	...
St Petersburg	7	6

* Nominal.

THE STOCK MARKETS. — The week has been without almost any special feature. The inactivity characteristic of the last two or three weeks before the close of the year has again been manifest, and there is now a decided absence of new speculation. Still, the tone of the markets is good, as there is a steady amount of purchasing for investment in progress, and the speculative bull account is being gradually curtailed. There are, however, many very sensitive holders, and to-day has been most unquiet, in consequence of renewed apprehensions about the money market, and the political complications feared as the result of the alarming illness of the Prince of Wales.

In the course of the week a good many new companies have been introduced, including a Submarine Telegraph Company for a cable between Portugal and Brazil, which has occasioned a somewhat angry correspondence in the daily papers as to the ownership of the original concessions from various European Governments.

ENGLISH GOVERNMENT SECURITIES.—The improved tone in this market, which was noticeable a week ago, continued until Wednesday, when an improvement in Consols of ⅛ to 92⅛ ¼, which had occurred the previous day, was somewhat suddenly lost in consequence of a pressure of sales. Since then the feeling has been weaker, and to-day, under the influence of apprehensions about the money market and the illness of the Prince of Wales, the money price was at one time 91⅝ ¾; for the account, 91¾ ⅞. In the afternoon there was a reaction, and the closing price is 91⅝ ¾ for money, and 91¾ ⅞ for the account.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money. Lowest	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March and June
Saturday	92	92¼	92¼	92 15/16	1s to 6s pm
Monday	92	92½	92¼	92½	1s to 5s pm
Tuesday	92	92½	92¼	92⅝	1s to 6s pm
Wednesday	91⅞	92¼	92	92⅝	2s to 6s pm
Thursday	92¼	92½	92¼	92¼	2s to 6s pm
Friday	91⅝	92¼	91⅞	91¾	1s to 6s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices this day.	or Inc. Dec.
Consols for money	92 ¼ xd	91⅝ ¾	− ⅛
Ditto January	92¼ ¼ xd	91¾ ⅞	− ⅛
Reduced 3 %	91⅞ ⅝	91⅞ ⅝	... ...

FOREIGN GOVERNMENT SECURITIES.—The prevailing feeling in this department has been one of weakness, especially in French securities, and stocks largely dealt in on the Paris Bourse. The magnitude of the account at the last carrying over, in Paris and on the continent generally, has disposed speculators to realise, the disposition that way being in any case strong towards the close of the year, and being assisted for the moment by a vague fear of the action of the Versailles Assembly, which has resumed its sittings during the week. In some classes of foreign securities, however, there was rather an improved demand during the week, but the improvement was partly lost in the disquiet of to-day.

To-day was fixed as a special settling-day for the Paraguayan loan, and as the allotments had been much within the applications, there was an advance of the premium in preparation for the settlement to 2⅜ ½. At the settlement it was found that the speculators for the fall had oversold themselves, and as there was no stock in the market, there was rather a heavy backwardation to pay, but subsequently to the settlement, the market almost immediately went flatter, and the closing quotation is 2⅛ ¼ prem.

Annexed are our usual quotations showing the changes for the week :—

ENGLISH RAILWAYS.—The tone in this market early in the week was good. There have been small but continuous purchases for investment, and the traffic returns were again beyond expectation favourable—especially North-Western, Midland, and Great Western. It is now so near the close of the year, besides that the dividends can in most cases be calculated, and as the calculations are of the most sanguine kind, and the money market is quiet, the foreseeing are beginning to make purchases in anticipation of a great rise in prices next spring. This change of tone led especially to an improvement in the stocks we have named on Wednesday and Thursday, Midland advancing to 140½; Great Western to 111½, nearly the highest point touched upon the recent announcement of a working agreement with the South-Western; North-Western to 149½; and Great Northern A to 164½. The heavy lines generally shared in this improvement of tone. There are evidently, however, a great many weak holders, and the alarms of to-day have produced a fall of nearly 1½ to 2 per cent. all round from the highest point of the week. The southern lines, which had not participated so much in the improvement, have been among the weakest; Chatham ordinary and preference being especially very largely pressed for sale.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices :

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Caledonian	117⅞ ⅛	115⅞ 16½	− 1½
Great Eastern	48⅜ ½	47⅞ 8½	− ⅝
Great Northern	136 37	137 8	+ 1
Ditt A	160 61	162 3	+ 2

London and Brighton 4½ %	104 6	104 6	... ...
London, Chat., & Dover Arbitration 4½ %	101 3	101 3	+ 1
Metropolitan District 6 %	121 2	121 2	... ...

Subscriptions are invited this evening for 18,000 shares of 10*l* each, of the Louth and Lincoln Railway. The price of issue is 92*l* 10s and interest at 6 per cent. is guaranteed by a deposit of Consols up to 1st July, 1873. The new line is intended to supply a direct connection between Great Grimsby and the Midland counties, and the Great Northern has agreed to work it for 50 per cent. of the gross receipts. It is also stated that there are no preference shares in the company.

The traffic receipts on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending Dec. 2 to 772,976*l*, being an increase of 62,039*l* on the corresponding week of last year. The aggregate receipts of the half-year to date are now 17,457,192*l*, being an increase of 1,298,099*l* on the corresponding period of last year. The principal increases for the week are — North-Western, 13,598*l*; Midland, 11,174*l*; North-Eastern, 7,929*l*; Great Western, 6,122*l*; and Lancashire and Yorkshire, 3,747*l*. The Metropolitan has again decreased 114*l* for the week. The following shows the details of the increase or decrease in each case for the week and for the whole period :—

RAILWAY TRAFFIC RETURNS.

AMERICAN SECURITIES.—United States' securities ruled firm during the week, and a steady upward movement was apparent until to-day, when a reaction occurred on forced realisations. The results of the week's operations, however, are favourable. The following shows the changes on the week :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
United States 6 % 5/20 Bonds, exchng. 4/6	92⅜ ½	92½ ⅝	— ¼
Ditto 1865 Issue	92½ ¾	92¾ 3	+ ¼
Ditto 1867 Issue	91⅝ ¾	92⅝ ⅝	+ 1

Panama General Mortgage 7 % Bonds, 1897	78 81	78 80	... ...
Pennsylvania Gen. Mort. 6 % Bonds, 1910	97⅛ 8½	97¼ 8½	... ...
Virginia 6 % Bonds	52 4	53 5	+ 1

JOINT STOCK BANKS.—Foreign bank shares have been in good demand, and close at improved prices, notwithstanding the reaction which occurred to-day. Home banks have also risen in value. National Provincial 20*l* shares, and Hong Kong New have advanced 1½; Anstralasian 1; Anglo-Austrian, New Zealand, Chartered of India, English and Scottish Australian, London and County, London Joint Stock, London and Westminster, and Union of Australia ½; Anglo-Italian, Rio de Janeiro, and Metropolitan ¼. Anglo-Egyptian and Anglo-Hungarian, however, have given way ½.

TELEGRAPHS.—Prices in this department have been subject to considerable fluctuation, but the market closed dull to-day at about the lowest point of the week. Anglo-American and Anglo-Mediterranean show a fall of 3; French Cables, of 1; Marseilles, ¼; while British Australian, British India, Submarine, and Falmouth, are all ⅛ lower. West India shares have risen ⅜, and Cuba ¼. Hooper's Telegraph Construction shares have receded ½ on the week, it being asserted that some difficulty has arisen in connection with the concession for the Brazilian Cable, for which the company has secured the contract. Silver's Construction have risen 1½.

MINES.—British mining shares have undergone some important alterations in value, there being a nominal advance of 20 in Devon Great Consols, South Caradon, and West Seton, and of 15 in Wheal Bassett. Providence and West Bassett have risen 3; South Wheal Frances, 5; East Bassett, 4; Hingston Downs and Marke Valley ¾; Margaret, ½. On the other hand, North Roskear have given way 5; Herod's Foot, 3; East Lovell and West Chiverton, 1; and Tankerville, ½. In the foreign market Cape Copper have risen 2; Panulcillo and Sao Vicente, ½; but Eberhardts close 2, St John del Rey 3, and Sierra Buttes ½ lower on the week.

MISCELLANEOUS.—The changes in credit shares have been of little importance this week, but London Financial have receded ½, and Financial Credit ⅛; while National Discount have risen ¼, and Credit Foncier ⅜. Peninsular and Oriental shares have given way 2; Submarine Cables' Trust and Native Guano 1; and Rio City Improvements ½. Copper mines of England and Crystal Palace have advanced 1; Natal Land Colonization ½; and Roumanian Government Bridges Annuities ¼. Phosphate Sewage shares, after suddenly advancing to 29 30 on Monday, have since been flatter, and close at 26½ 27½. There were some strong purchases early in the week. Patent Gas close at 12 to 12½, new shares 6 to 6½.

A prospectus is issued this evening of the Marbella Iron Ore Company. Capital, 300,000*l*, in 30,000 10*l* shares. The company is formed to take over mines and quarries at Marbella, in Spain, situated between Malaga and Gibraltar—the ores being suitable for the manufacture of steel by the Bessemer process. The vendors guarantee a minimum dividend of 15 per cent. for five years. The purchase-money is to be 250,000*l*, together with a royalty of 6d per ton on the ores worked.

A prospectus is issued this evening of the Stranton Iron and Steel Company. Capital, 100,000*l*, in 10,000 10*l* shares. The company is formed to take over iron and steel works situate at West Hartlepool and enlarge the same, the purchase-money being 35,000*l* cash and 3,500 fully paid-up shares—the purchase also including "certain important patents." A profit of 25 cent. per annum is anticipated.

The Mammoth Copperopolis Mining Company of Utah (Limited) is announced with a capital of 150,000*l*, in 10*l* shares. It is proposed to purchase the Armstrong claim on the Mammoth vein in Utah.

The nominal prices of some of the new undertakings were :—Limmer Asphalte shares are quoted 3¾ to 4; United Limmer, 2¾ to 2¼ dis.; Anglo-Austrian Bitumen, 2 to 1 dis.; Anglo-Hungarian Bitumen, 3½ to 4½ prem.; Anglo-German Bitumen, 2 to 1 dis.; Montroiter Asphalte, ½ dis. to ½ prem.; Emma Mining, 2 to 3 prem.; the paid-up shares, 2 to 3 prem.; and the River Plate Meat-Preserving Company, 1 to 2 prem.

BULLION AND EXCHANGES.—In the foreign exchanges this afternoon bills were more offered, the exchange on Paris especially having risen. The New York exchange is still very much in favour of this country.

There is no demand for gold, and the arrivals next week, except what goes to the refiners, will probably be taken to the Bank. Silver is still in good demand for the East, notwithstanding the larger supply of Indian Government bills.

According to the *Gazette* returns the imports of the precious metals into the United Kingdom during the week ended December 6 were :—Gold, 551,625*l*; silver, 471,538*l*. The exports were :—Gold, 59,800*l*; silver, 436,217*l*.

The sum of 54,000*l* in gold was sent in to the Bank to-day, and 137,000*l* in sovereigns was withdrawn for South America.

The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week :—

Gold.—The 433,110*l* per Simla from Australia, came to hand on the 4th instant, and about half of the sum has been taken for export; the the demand for abroad is not at all active, and the Bank has purchased the balance of the amount, together with sundry parcels of gold coin received from France, the total sent in during the week being 177,000*l*. The Poonah has taken 21,300*l* to Bombay, and sovereigns to the value of 188,000*l* have been withdrawn for transmission to the Cape and the Brazils.

Silver.—The market is now quiet, and for the moment there are no fresh orders; the rate remains nominally at 60⅞d per oz standard, sellers. The Poonah has taken 305,100*l* to Bombay, and the Calcutta 50,000*l* to Calcutta; the Tasmanian has also taken 9,400*l* to the West Indies. The Simla has brought 93,000*l* Sycee, from China; and we have received during the week about 110,000*l* from New York.

Mexican dollars are not now in much request at the late rise in prices, and as all existing orders seem to have been filled up, the rates quoted below may be considered as nominal.

We have received during the past few days from New York and New Orleans about 35,000*l*.

Exchange on India for Bank drafts at 60 days' sight is 1s 11⅝d per rupee Application for the India Council bills were received yesterday —the minimum, as before, was 1s 11d per rupee. Tenders on Calcutta and Madras at 1s 11⅛d received 37 per cent., and on Bombay at the same rate, in full.

The amounts allotted were:—To Calcutta, 363,100*l*; Madras, 5,900*l*; Bombay, 131,000*l*; total, 500,000*l*.

On the last occasion (15th Nov.) the allotments were 18 per cent. at 1s 11½d to Calcutta and Madras, and 22 per cent., also at 1s 11½d to Bombay.

We are indebted to Messrs J. Allard and Co., of Paris and London, for the following telegram, giving to-day's exchange and bullion quotations in Paris :—

MEETINGS OF COMPANIES NEXT WEEK.

MONDAY, December 11.

Pacific Steam, general, Liverpool.

WEDNESDAY, December 13.

African Steam Ship, general, 14 Leadenhall street.
Grand Junction Waterworks, general, 65 South Molton street.

THURSDAY, December 14.

Bombay Gas, general, City Terminus Hotel.
Crystal Palace, general, Sydenham.
London and River Plate Bank, general, City Terminus Hotel.
Southwark and Vauxhall Water, general, Southwark.

FRIDAY, December 15.

Bombay, Baroda, &c., Railway, general, London Tavern.
Great Indian Peninsular Railway, general, City Terminus Hotel.
Madras Railway, general, London Tavern.

NOTICES AND REPORTS.

STOCKS.

Danubian Principalities 8 *per Cent. Loan*, 1867.—Bonds representing 28,250*l* have been drawn for repayment at par on the 1st proximo.

Egyptian Railway Debenture Loan, 1866.—Bonds of the series D (numbered 15,001 to 20,000) have been drawn, and will be paid off on the 1st January.

Paraguayan 8 *per Cent Loan.*—Special settling day—Friday, the 8th instant—officially quoted.

Spanish Quicksilver Mortgage.—On account of the third drawing, which took place on the 1st instant, the numbers of 179 bonds, representing 17,900*l*, have been published for redemption on the 1st January.

Turkish 6 *per Cent Loan*, 1865.—Bonds representing 101,000*l* have been drawn in Paris for repayment on the 1st January.

RAILWAY COMPANIES.

Austrian—Committee's Certificates.—It is stated that a proposition has been made by the Syndicate of the new Hungarian Government loan, for an arrangement of the claims of the Anglo-Austrian certificate holders, on the basis of a payment of 5*l* for each certificate of 100*l*. The Committee of Certificate Holders have convened a meeting, to be held at the offices of the Council of Foreign Bondholders on Monday next, for the purpose of considering such proposition.

Bay of Havana and Matanzas Loans of 1861 *and* 1865.—Certificates, representing the unpaid coupons due this month, will be issued at Messrs Schröder's.

Bombay, Baroda, and Central India.—Capital received on the main line account, 7,378,733*l*; unexpended balance, 47,007*l*. Capital received on the extension account, 487,970*l*; balance, 254,339*l*. The directors regret the damage done by the monsoon floods in the early part of August to several of the embankments and small bridges on the northern division. Through the energy of the staff the immediate repairs of the line were quickly effected. The gross traffic on the main line for the half-year ended June amounted to 302,636*l*, compared with 318,561*l* in the corresponding period of 1870, showing a falling off of 15,925*l*. The working expenditure, including the charge for collection and delivery of goods, was 155,026*l*, compared with 168,026 in 1870, showing a decrease of 13,000*l*. Notwithstanding the falling off in gross revenue of nearly 16,000*l*, the net earning was only less than that in the corresponding period in 1870 by 2,926*l*, having been 147,609*l*, as compared with 150,535*l*. The net earning was equal to about 4*l* 7s per cent. per annum on the capital expended on the main line. Of the extension 14½ miles were opened in May and 22½ miles in November.

Matanzas and Sabanilla 7 per Cent. Loan.—The half-yearly interest is announced by Messrs Schröder's.

Ottoman.—It is notified that the arrears of interest at 6 per cent. per annum up to and including the half-year's interest to the 1st ult., will be paid on the first debentures on and after the 11th inst., in addition to 20*l* on each debenture of 100*l*.

Victoria Railway of Natal, Limited.—Capital, 100,000*l*, in 10*l* shares. A line of 15 miles from the River Umgeni, near Durban (Port Natal), northward to Verulam, is to be constructed, the contract price being 100*l* for completion and equipment of the line, and for the paying of 6 per cent. interest during construction. Natal having only one port the growers of sugar, coffee, cotton, arrowroot, tobacco, and maize are entirely dependent upon carriers for the conveyance of produce, and the company will not, therefore, have to submit to sea competition. Extensions to the coal and iron fields may hereafter be undertaken.

BANKS.

Bank of British North America.—At the meeting a dividend at the rate of 8 per cent. per annum was declared.

Bank of New Zealand.—A telegram has been received to the effect that the bank has declared a dividend of 10 per cent., and a bonus of 5 per cent. per annum, for the half-year ending 30th Sept. last, being at the same rate as the previous half-year.

Hibernian.—Half-year's dividend declared at the rate of 10s per cent. per annum; surplus, 4,543*l*.

National Provincial of England.—The usual dividend at the rate of 8 per cent. per annum, and a bonus of 6 per cent. for the half-year have been declared.

ASSURANCE COMPANIES.

Gresham Life Assurance.—Year's new premiums, 30,533*l*; annual income, 416,022*l*; realised assets, 1,607,497*l*.

Imperial Marine Insurance, Limited.—Capital, 300,000*l*, in 10*l* shares. It is stated that a large and profitable business can be transacted by this new company in Liverpool alone, where it is proposed to take over the business of the "Liverpool Marine Insurance Company, Limited," for an allotment of 5,000 shares, with 2*l* per share paid thereon.

London Guarantee and Accident, Limited.—Capital, 250,000*l*, in 5*l* shares, of which a portion has already been subscribed, and 30,000 shares are offered to the public. The London Guarantee and Accident Company takes over the guarantee business of the European Assurance Society, with, however, "no liabilities whatever," and the directors "consider this a favourable opportunity, by a further issue of capital and an introduction of influential support, to extend the operations of the company both at home and abroad." Both classes of the business are stated to be profitable, and the existing accommodation is announced not to be sufficient.

Scottish Union Insurance.—At the annual meeting, it was stated that during the past year 685 life policies had been issued, insuring sums to the amount of 568,130*l*, yielding in new premiums 16,492*l*. The net fire revenue is 62,381*l*, and the invested funds amount to upwards of 1,200,000*l*. A dividend was declared of 14 per cent. per annum. The half-yearly payment in July last having been at 6½ per cent., the balance of 7¾ per cent. will be payable on the 2nd of January next, free of income tax.

MISCELLANEOUS COMPANIES.

African Steamship.—The report recommends a dividend of 8s 6d per share for the half-year, leaving a balance of 638*l*.

Amoor River Navigation, St Petersburg.—Issue of 210,000*l* six per cent. bonds at 87 per cent., or 86½ per cent. allowing for discount on prepayment of instalments. Messrs. J. H. Schröder and Co. received subscriptions on the 7th and 8th instant for these bonds of 100*l* each, which are redeemable within 20 years by a cumulative sinking fund. The River Amoor, navigable for 2,000 miles in Eastern Asiatic Russia, has been for many years navigated by Government steamers; but the State requiring the trade to be further developed, has handed over their steamers and barges to the new company, who raise this money to enable them to purchase additional vessels and machinery. The subsidy of 410,000 roubles (56,000*l*) to be paid to the company for carrying mails, &c., is more than sufficient to cover the sum required for the service of this loan, which is 18,310*l*.

Crystal Palace.—There remains to the credit of revenue, including 2,157*l* brought forward, the sum of 52,843*l*. After deducting the interest on debenture and preference stocks, 30,848*l*, there remains 21,295*l*, which would appear to justify the directors in recommending a dividend of 2 per cent. on the ordinary stock; but looking to the large expenditure rendered necessary by the wear and tear of the building, they do not recommend a division of more than 1½ per cent., leaving 6,955*l*. The aquarium is stated to be justifying expectations.

Food Preserving, Limited.—Capital, 100,000*l*, in 5*l* shares. 16,000 A shares offered to the public, and 4,000 B shares taken by the patentees. The B shares receive no dividend till 10 per cent. has been paid on the A shares. The company will develop the system of meat-preserving known as "Richard Jones' Vacuum System," secured by patent rights. The prospectus states:—

The special feature of the process is, that poultry, game, fish, and whole joints of beef and mutton, chops or steaks, can be readily preserved with as without bone, thus obviating the hitherto unsatisfactory appearance of preserved meat. At the last Exhibition at Sydney, an early sample of meat, prepared by the vacuum process, carried off the only prize medal awarded. It has also stood the test of numerous voyages to and from the tropics, as stated in the testimonials.

It is intended to establish factories for the preservation of meat in Australia and South America.

The directors hope to supply meat at 6d a pound; and Messrs Forbes and Co.'s business will be purchased for 10,000*l* in cash, and 4,000 B shares.

Gas Light and Coke.—At a meeting it was resolved to create 300,000*l* new A Five per Cent. shares, for the purpose of extending the works at Beckton.

Grand Junction Canal.—Half-year's net profits, 20,944*l*; available total, 26,117*l*. A dividend of 1*l* 17s 6d per share, free of tax, leaves a balance of 4,930*l*.

Peninsular and Oriental Steam Navigation.—No casualty occurred during the financial year, and the sum of 130,000*l* placed to the underwriting account is not subject to any charge. But the loss of the Rangoon will show itself in the next annual account in the shape of a charge of 78,000*l* against the premiums of 1872. With this fact before them the directors have not thought it prudent to recommend a distribution of more than 1 per cent, equal to 27,000*l*, from the underwriting account, and have carried 103,000*l* to the general reserve fund. The gross revenue for the year ended Sept., including 7,343*l* brought forward, amounted to 2,092,656*l*, and the expenditure to 1,923,881*l*, leaving a net profit of 168,775*l*. Deducting the payment of 3 per cent. for the half-year ending March, and the dividend at the same rate now recommended, the sum of 6,775*l* remains as balance. Total distribution for the year 7 per cent.

River Plate Pressure Meat-Preserving, Limited.—Capital, 150,000*l*, in 10*l* shares. For the sum of 10,000*l* and 4,000 paid up shares, the patent rights of Mr T. F. Henley will be acquired (which have already been secured in Great Britain, France, and Belgium, and will be applied for elsewhere), that gentleman having, it is stated, perfected a process for preserving meat by pressing out that excess of moisture "which under ordinary circumstances interferes with its preservation." The juice thus squeezed out is also prepared in the form of "extract." It is stated that the fibre and the albuminous and extractive principles are retained by this process. Works will be erected on the River Plate for treating 200 oxen daily, and large profits are calculated upon.

United Kingdom Railway Rolling-Stock, Limited.—4*l* 10s per share has been returned to the contributories, and Mr Cash, the liquidator, states that a further 2s 6d per share may be expected.

West India and Panama Telegraph.—The Jamaica and Porto Rico section has been completed.

MINING COMPANIES.

Alvarez Silver.—Call, 2*l* 10s per share.

Mineral Hill Silver Mines, Limited.—A telegram has been received, stating that the new mill erected has, after four days' working, been stopped, owing to a part of the furnace chambers having given way.

Richmond.—The directors have been empowered to declare a dividend when the accounts come to hand.

The next mails for Australia will be despatched from London as follows:—Via Southampton, on the morning of Saturday, the 23rd December; via Brindisi, on the evening of Friday, the 29th December.

The undermentioned offices have been opened since the publication of the last list of Postal Telegraph Offices, or were to be opened for the transaction of telegraphic business on the 6th December:—England: Ashburton, near Newton Abbot; Bampton, near Tiverton; Birstall, near Leeds; Brighton, Victoria road, Clifton terrace; Bristol, Queen's road; Cinderford, near Newnham; Dinas Cross (Pembrokeshire); Drybrook, near Ross; East Hendred, near Wantage; East Ilsley, near Newbury; Fishguard (Pembrokeshire); Hambledon, near Horndean; Harlington, near Hounslow; Hurstmonceux, near Hawkhurst; Ironville, near Alfreton; Llanfyllin, near Oswestry; Llanymynech, near Oswestry; Lydbrook, near Ross; Manea, near March; Mashfield, near Chippenham; Newport (Pembrokeshire); Newton-in-Cartmel, near Carnforth; Newton-on-Trent, near Newark; Olney, near Newport Pagnel; Rotherfield, near Tunbridge Wells; Turvey, near Bedford; Whichurch, near Micheldever Station; Wombwell, near Barnsley. Scotland: Chance Inn, near Arbroath; Cromarty, near Inverness; Davidson's Mains, near Edinburgh; Friockheim, near Arbroath; Kilcreggan, near Greenock; Newmains, near Coatbridge; Rhynie, near Aberdeen; Uddingstone, near Glasgow; West Wemyss, near Kirkcaldy. Ireland: Ardrahan, near Oranmore; Ballyborough, near Kells, Blackrock, near Dundalk; Carrigaholt, near Kilrush; Castlederg, near Strabane; Collon, near Drogheda; Craughwell, near Athenry; Drumquin, near Newtown Stewart; Emyvale (Co. Monaghan); Florence Court, near Enniskillen; Flurrybridge, near Newry; Forkhill, near Dundalk; Glanmire, near Cork; Headford, near Tuam; Mount Nugent, near Virginia; Newtown Hamilton, near Castleblayney; Portaferry, near Down; Waterford, the Mall. The undermentioned railway stations have been opened for the transaction of telegraphic business on behalf of the Postmaster-General:—England: Cattal Station (N.E. Railway); Lamphey Station (Pembroke and Tenby Railway); Manorbier Station, ditto; Narberth Station, ditto; Pembroke Station, ditto; Pembroke Dock Station, ditto; Saundersfoot Station, ditto; Tenby Station, ditto.

Barley	94,872	6	36	10
Oats	6,060	2	23	8

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The grain trade, under the influence of frosty weather, showed more firmness to-day, though the transactions were on a limited scale in all descriptions of produce. There was a fair show of English wheat on offer, the samples being in generally good condition, while the supply of foreign wheat was liberal. Trade ruled quiet, but in the few sales effected factors were enabled to realise full currencies. Flour was inactive but firm in price; while maize and oats sold on fully former terms. Beans and peas were not inquired for, and were nominally unchanged in the absence of important business. The seed market was very dull. This week's imports of cereal produce into London have amounted to

At Liverpool and Wakefield to-day there was more inquiry for wheat, and values were well supported.

The Liverpool cotton market opened quiet on Friday last, but on Monday the demand became more active, and a large business has since been done at an advance of ⅛ per lb. The total sales are 115,670 bales; of which the trade have taken 75,960 bales; speculators and exporters 39,710 bales. The imports for the week are 48,286 bales; the actual exports 13,716 bales; and to-day's stock is 445,220 bales. Quotations for American and East Indian descriptions have advanced ⅛d per lb, and Bengals are unchanged since this day se'nnight. To-day the market closes with less animation, but steady. Sales, 15,000 bales.

The week's imports of foreign produce into London have amounted to 18,230 quarters of wheat; 2,260 barley; 33,710 oats; 2,990 maize; 900 sacks and 420 barrels of flour.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended December 7, 1871:—

	Imported.		Exported.
American	bales 20,894	.....	2,341
Brazilian	11,283	.....	1,001
East Indian	1,648	.....	23 159
Egyptian	13,968	.....	242
Miscellaneous	1,079	.....	157
Total	48,872	.....	26,900

At New York, on December 7, middling Upland cotton was quoted at 19¼ cents per lb.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, Nov. 10:—There has been but little business done in cotton during the week. Prices remain too high to admit of exporters operating freely in ready cotton, and as dealers are not desirous to sell forward, except at very extreme rates, business is necessarily limited. The sales for the week foot up 2,250 candies, of which about one-third is of ready cotton, such as Bhownuggur and other Dhollerah descriptions; the remainder consists of sawginned Dharwar, for delivery in all next month, of 100 candies new Oomrawuttee, February delivery, sold early in the week at 230 rs, and of 500 candies new Broach M. G., March delivery, sold on the 9th instant at 245 rs. Arrivals have been on a fair scale, and a certain quantity of old cotton is now exposed for sale on the green. Dhollerah and Bhownuggur have furnished the greater part of the supplies received, and from Carwar and Compta also some cargoes have reached us. We regret to say that the quality of these arrivals shows but little improvement. Some of the Bhownuggur and Dhollerah is tolerably satisfactory, and one or two small parcels of Compta we have seen, though very leafy, are of a good style of cotton. The sawginned Dharwar however is still very poor, and a great deal of false picking is discovered in this description. These arrivals, coupled with the dull accounts of the home markets, have induced dealers to lower their rates a little, though as yet far from enough to put us on a level with Liverpool quotations. Report from the cotton districts show no great change. We are indebted to the Mofussil Company for the following, which

we trust will prove of interest to our readers:—Wurdha (Hingunghat) 8th—The weather continues fine, and picking is general. The arrivals at Wurdha for the past week number about 60, and at Hingunghat about 160 bohjas. These being of the very first pickings are slightly stained, but as the discolouration is mostly caused by insects, the appearance of the cotton should improve as the picking progresses. Akote, 7th—The general impression now is that the crop in this district will not be much more than half what it was last year. The quotation for delivery in February is equivalent to about 235 rs per Bombay candy. Khamgaum, 8th—Since my last report there has been no change in the weather, although for the last two days it has looked and still looks like rain. Some new cotton is now coming into the market, but in small quantities. The best is grown from American seed, the use of which seems to be pretty general in the neighbourhood of this place. Sheagaum, 8th—We have had another week of fine dry weather, but not quite so hot as the previous one. I notice in many fields on the higher-lying ground that some of the cotton plants have suffered from the drought just as they were beginning to flower. There are bolls on nearly all the plants now, and many of them have burst, but it will be about three weeks before any picking commences in this district. Oomrawuttee, 9th—We have now a little new cotton coming in daily. The quality continues very good. Purchases are being made at equal to 240 rs in Bombay. Some old cotton, now coming in daily, is being bought at equal to 210 rs.

EXPORT of COTTON from BOMBAY to November 10.

	1871.		1870.
London.. .....bales	21,705	.....	2,075

Grand total	1,115,309½	.....	1,016,703½

Actual exports since last mail left, 11,175 bales.

The Imperial Ottoman Bank have furnished the following report, dated Alexandria, November 24:—We have had an excited and daily hardening cotton market all the week. The sales, though large, would have been much greater if the selection offering had not been so poor, consequently business has been somewhat checked. The favourable accounts received from Liverpool have caused a further rise in our market. Fair open, with staple, 9¾d per lb, f.o.b.; good fair, ditto, 10¼d ditto; fully good fair, ditto, 10¾d ditto; extra fine, 14d to 18d ditto. Arrivals from Nov. 18 to Nov. 24, 71,080 crs; sales, ditto, 33,280 crs. Shipments from Nov. 18 to Nov. 24:—England, 14,212; Italy, 1,146; Austria, 892—total, 16,250 bales.

The colonial produce markets have not been very active this week, and sugar has declined from 6d to 1s per cwt on all descriptions, the market closing with a dull appearance. Tea has remained without change; but coffee has met a steady inquiry on rather higher terms for good colory plantation. Rice has sold quietly on former terms, both on the spot and afloat. Spices generally are cheaper. Oils here ruled flat.

The annexed is dated Rangoon, Oct. 30:—For Natsain rice our market has maintained its upward tendency, till about a week age, and prices gradually rose to 68 rs to 69 rs per 100 baskets paddy, equal to 146 rs to 148 rs per 100 baskets, or 6s 3¾d to 6s 4¾d per cwt, free on board, for 5 to 6 parts rice, which are our to-day's quotations. A very lively demand prevailed during the first half of the month; but there has been less activity in our market since then, as exporters have secured the greater part of their requirements. Supplies, which had been pretty fair since issue of our last report, have become very small of late, on account of some Burmese festivals; but it is expected that the same will soon increase again. The vessels loading for Europe aggregate 7,000 tons, and the exports to that quarter amount to 9,290 tons since our last. Other qualities—The demand for the Straits has been very active throughout the month, and prices for soft kinds of rice have, for the last two weeks, been ruling firm at 144 rs to 146 rs per 100 baskets, 5 to 6 parts slipping quality, equal to $1 70c to $1 72c per picul of 133⅓ lbs, free on board. Exports of rice during the last six years compare as follows:—

* The stock of sugar in Holland is in first hands only; in all other countries in first and second hands.

Annexed is Messrs Durant and Co.'s circular:—We have to report a month of only moderate business in silk. During the first two or three weeks the transactions were of the most limited nature, but latterly home buyers have come forward to replenish their stocks, and have taken fairly in extent, limiting themselves however to the preferable parcels in any particular class, without especial reference to price. This has given general tone to the market, and although in the continued abstention of foreign buyers, partly on account of the adverse exchanges and partly because they are working up their direct importations, the actual business is not large, prices are fully supported. The deliveries are only moderate, and stocks show an increase, but we feel we may fairly look to altered figures, as home consumers are working to the full extent of their power, and arrivals will soon naturally begin to fall off, and European stocks and importations will soon become more or less exhausted. Japan silk unfortunately remains as much neglected as ever, and at the moment with little prospect of improvement. Canton silk continues in good consumption. Bengal silk is still in the same unhappy position as for some months past.

According to Messrs Arles Dufour and Co. of Lyons, dulness has been created by the American markets for silk piece goods having been affected by the destruction of Chicago. At the same time the Parisian consumption has not yet recovered from the shock of political circumstances and the monetary crisis. Under these various influences, and looking at the extent of the purchases effected from May to October, surprise is expressed that prices of silk have not experienced a greater decline than from 1 to 3 per cent. in the best grades, and 4 to 5 per cent. in common sorts.

Messrs A. C. Stewart and Co., of Port Elizabeth, writing on October 31, thus refer to the wool trade:—Since our last circular was printed the arrivals of wool have been more liberal, and we are likely to have better supplies through the whole summer. The shares in the Transport Company alluded to in our last have been taken up very spiritedly, and there is every probability of its being fully established by the end of the year. This will lead to more extended operations in this line, and render us in a measure independent of the present insufficient means of transport. Scoured—The supply of Uitenhage scoured has been small. We quote this description ½d higher. Considerable quantities of country scoured have come to hand, and have been easily disposed of at 1d above former rates. Fleecewashed—Several clips of the new season's wool have come in from the immediate neighbourhood. The competition for these has been remarkably keen, and prices have run up from day to day, as high as 15d being paid for superior lots. All other descriptions have improved fully 1d per lb. Grease—The demand for America continues unabated, with small stocks and active inquiry, but little regard is paid to selection. There is no stock of wool in town, every parcel being sold immediately on arrival to eager buyers.

Messrs Thomas and Cook report:—The last series of sales of colonial wool wool for the present year commenced on November 23rd, and closed yesterday, the total quantity catalogued being 71,452 bales. The sales have been numerously attended both by home and foreign buyers, and the biddings throughout have been remarkably spirited. At the commencement there was a general advance of 1d per lb upon the rates of October, and during the progress of the sales there was a further slight improvement in most classes. Towards the close, however, fine scoured Australian and clothing wools generally sold rather more in favour of buyers. The small proportion of greasy offered has sold at ½d per lb above last sales' rates.

We extract the following from Messrs T. J. and T. Powell's circular:—The leather trade of the past month has amounted to a full average for November. The demand has not been so active as during the previous months, but the supply has also been restricted by the unfavourable weather for drying. The effect on prices has been very slight. The high rates which some articles have attained have made the buyers in general cautious, and they usually avoid increasing their stocks at this season. Nevertheless there is scarcely any accumulation of stocks in the hands of tanners and factors, and there are indications of the wants of dealers and consumers which promise well for a good prospective demand for home use, while there are still buyers of some articles for exportation. The market for raw goods presents scarcely any new feature. Sole leather hides have slightly declined in value, as might be expected with so large a stock of River Plate hides in Liverpool. East India kips, with small supplies, have brought higher prices. Stocks of all articles are moderate.

Messrs Churchill and Sim have published the following statistics:—

Annexed is Messrs William Moran and Co.'s indigo report, dated Calcutta, Nov. 7:—Since our last circular a few hundred chests of native up-country indigo have arrived, but in the absence of any European indigo, public sales will probably not open for a week or ten days. We have at present no fresh advices from the various districts to cause us to alter our previous estimate of 90,000 maunds as the out-turn of the season. Exports of indigo from Nov. 1, 1870, to Oct 31, 1871:—To Great Britain, 16,750 chests; France, 515; Trieste, 2,790; Foreign Europe, 268; America, 2,555; Gulphs and Levante, 1,784—total, 24,662 chests.

Messrs Van Houten and Ebeling thus review the position of the Dutch tin trade in November:—Tin has been in unusually extensive demand this month for export as well as on speculation, and prices have steadily advanced. To-day, after the publication of the monthly returns, considerable excitement prevailed, and a farther important rise was established. In Banca the business has been large, and with little offering, the price gradually hardened from 81¼fl to 85fl. Last week the market was less strong, and declined to 84¼fl; since then, with an improved demand, the price rallied to 86fl, whilst to-day a sudden advance to 88¼fl took place. Ex the Spring sale 1872, a few transactions at 82fl to 86fl are reported. Billiton, which continues scarce, advanced from 81fl to 84fl Several lots to arrive changed hands at 81fl to 86fl. The following statement shows the position of Banca tin in Holland on the 30th November, from the official returns published by the Dutch Trading Company:—

	1871.	1870.	1869.
Import in November .....slabs	5,990	8,901	5,646
Previously this year	107,922	166,301	95,757

Total stock	79,832	166,974	121,557
Stock of Billiton	1,756	1,600	9,100
Import in November	6,700	100	6,000
Delivered and shipped in November	8,000	4,800	6,550
Quotation Nov. 30 ... Banca	88½fl	73½fl	67fl
Billiton	87½fl	72½fl	66fl

The quantity of Banca tin now afloat for the Dutch Trading Company is 8,000 peculs, equal to 500 tons, against 10,100 peculs, equal to 631 tons, last year. We estimate the quantity of Billiton tin now afloat at 1,183 peculs, equal to 74 tons, against 9,212 peculs, equal to 576 tons, last year.

The annexed is dated New York, December 4:—The volume of trade continues up to fair average proportions, though sinking a little as the season for activity draws to a close. The exchange of commodities between the east and west and north and south keeps money in active circulation, and those who had been counting upon tight times about this period are agreeably disappointed. The local money market is exceptionally easy, and as the currency supply at the principal western and southern centres is ample, there is only a light drain hence, which is about balanced by a return current. The reserves of the banks are steadily augmenting, and borrowers in good standing have no difficulty in obtaining monetary accommodation at moderate rates, namely, 5 to 7 per cent. call, and 7 to 9 per cent. discount on high grades of commercial paper. The gold and exchange markets remain steady.

THE COTTON TRADE.

LIVERPOOL.—DECEMBER 7.

The cotton market was quiet on Friday and Saturday; but became active on Monday, and the business has since been large, though with only a moderate advance in prices. Sea Island has been in steady request at previous rates. American continues in good demand, and has risen ⅛d per lb in the current qualities, and ¼d per lb in the lower descriptions. New York advices to the 7th inst. quote middling Upland 19½c, costing to sell in Liverpool 10½d per lb, by steamer. In Brazil a large business has been done, at an advance of ¼d per lb. For Egyptian the inquiry has again been good, but freely supplied, and prices are without quotable change. East Indian has been in very active demand, particularly for export, and quotations are generally advanced 1/16d to ⅛d per lb.

In cotton to arrive the business has been considerable, and prices have advanced about ¼d per lb. The latest quotations are:—American, basis of middling, not below good ordinary (from any port), November-December shipment, 9⅝d; December-January, 9⅝d; Savannah, not below good ordinary, at sea, 9 1/16d; New Orleans, due, 9⅝d; November-December shipment, 9 1/16d; December-January, 9 1/16d per lb.

The sales of the week, including forwarded, amount to 115,670 bales, of which 19,380 are on speculation, and 20,330 declared for export, leaving 75,960 bales to the trade.

DECEMBER 8.—The sales to-day will probably amount to about 15,000 bales, with a strong market.

The above figures show:—

	bales.
An increase of import compared with the same date last year of	750,400
An increase of quantity taken for consumption of	543,990
An increase of actual exports of	211,160
An increase of stock of	74,470

In speculation there is an increase of 402,250 bales. The imports this week have amounted to 48,286 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to Dec. 1) is 174,000 bales, against 276,000 bales at the corresponding period last year. The actual exports have been 13,716 bales this week.

The following is a return showing the quantities of cotton in stock, the quantities imported, exported, and forwarded inland for consumption:—

NEW YORK.—Nov. 24.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Nov. 24. From the figures thus obtained it appears that the total receipts for the seven days have reached 104,743 bales, against 101,494 bales last week, 105,400 bales the previous week, and 96,708 bales three weeks since, making the total receipts since Sept. 1, 1871, 770,274 bales, against 918,663 bales for the same period of 1870, showing a decrease since Sept. 1, this year, of 148,389 bales. The exports for the week ending this evening reach a total of 52,428 bales, of which 37,661 were to Great Britain, 12,082 to France, and 2,685 to rest of the continent, while the stocks as made up this evening are now 350,813 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:—

Week ending Nov. 24.	Exported to Great Britain.	Exported to Continent.	Total this week.	Same week 1870.	Stock. 1871.	Stock. 1870.
New Orleans	5803	10567	16370	37057	110615	99643

Total	37661	14767	52428	88433	350813	339734
Total since Sept. 1	287969	47146	335115	459508	...	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 36,005 bales, while the stocks to-night are 11,079 bales *more* than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Nov. 17, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph:—

Ports.	Receipts since Sept. 1. 1871.	1870.	Exported since September 1 to Great Britain.	France.	Other Foreign.	Total.	Coast-wise Ports.	Stock.

Total last year	...	799964	342814	1494	26767	371075	282178	339229

The market the past week has been a gradually improving one, increasing in strength day by day. This has been due to

the smaller receipts at our ports, which, acting on Liverpool as well as upon our own market, have again through Liverpool reacted upon us; and as the prevailing estimates of the crop appears to be wholly under the influence of the current receipts, the estimates at present are less than they were two or three weeks since, when they were generally raised on account of the larger receipts. Spinners appear to be taking hold rather more strongly during the past two weeks, apparently concluding that there is little use waiting longer for the market to decline. In fact the general feeling favours higher rates, based as stated above, on the decreased crop estimates, and should the receipts continue small the market is likely to show a further improvement. The close to-night was quiet, at an advance of $\frac{1}{16}$c. For forward delivery there has been considerable business doing at better prices, the market closing for low middling at 18$\frac{3}{4}$c for November, 18$\frac{7}{8}$c for December, 18$\frac{3}{4}$c for January, 19$\frac{1}{16}$c for February, 19$\frac{1}{8}$c for March, 19$\frac{1}{16}$c for April, and 19$\frac{1}{4}$c for May. The total sales of this description for the week are 69,100 bales, including 600 free on board. For immediate delivery the total sales foot up this week 17,514 bales, including 7,081 for export, 6,586 for consumption, 492 for speculation, and 3,355 in transit. Of the above 264 bales were to arrive. The following are the closing quotations :—

	Upland and Florida.	Mobile.	New Orleans.	Texas.
	c c	c c	c c	c c
Ordinary.....per lb	16$\frac{1}{4}$ @ ...	16$\frac{3}{8}$ @ ...	16$\frac{3}{4}$ @ ...	16$\frac{3}{4}$ @ ...
Good ordinary	17$\frac{1}{4}$ ...	18 ...	19$\frac{1}{4}$ ...	18$\frac{3}{8}$ ...
Low middling	18$\frac{5}{8}$ ...	18$\frac{3}{4}$ ...	19$\frac{3}{4}$ ...	19$\frac{1}{4}$ ...
Middling	19 ...	19$\frac{1}{4}$ ...	19$\frac{3}{4}$ ...	20 ...
Good middling	19$\frac{7}{8}$ ...	20$\frac{1}{4}$ ...	20$\frac{5}{8}$ ...	20$\frac{7}{8}$ ...

For forward delivery the sales (including 600 free on board) have reached during the week 69,100 bales (all low middling or on the basis of low middling).

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports, receipts and shipments for the week, and stock to-night and for the corresponding week of 1870 :—

	Week ending Nov. 24, 1871.			Week ending Nov. 24, 1870.		
	Receipts	Shipments.	Stock.	Receipts	Shipments.	Stock.
Augusta	6077	5529	15202	9880	7480	11040
Columbus	1983	1852	5754	3200	2410	6800
Macon	2595	2311	9864	4640	4190	9148
Montgomery	3082	2188	8423	4187	3554	9445
Selma	3355	2405	6190	3316	2132	8465
Memphis	18177	16138	20864	24250	17520	25017
Nashville	2199	2710	1644	1854	1449	2201
	37468	33133	67941	51327	38735	72424

The above totals show that the interior stocks have increased during the week 4,335 bales, and are to-night 4,883 bales *less* than at the same period last year. The receipts have also been 13,859 bales *less* than the same week last year.

Below we give our usual table of exports from New York for the week :—

—*New York Commercial and Financial Chronicle.*

NEW YORK, Dec. 5.—According to Messrs Moffatt, Davidis and Co.'s report, the week's receipts of cotton were 123,000 bales, and since 1st of September 900,000 bales. Shipments to England, 52,000 bales; ditto to France, 8,000 bales; and to the continent 3,000 bales. Total since the 1st September, 390,000 bales. Stock at all ports, 400,000 bales. Middling Upland, 9$\frac{3}{16}$d, cost and freight, per steamer. The receipts of cotton for the last four days at all United States' ports have been 55,000 bales. Shipments to England, 23,000 bales; to France, 4,000 bales; to the continent, 5,000 bales. Middling Upland, 9$\frac{3}{8}$d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS

MANCHESTER, Dec. 7.—Our market during the past week has continued strong. In the early part of it some slight giving way in price was perceptible, but since then, owing to the heavy business transacted in cotton, prices have hardened. This is more noticeable in yarns for the home trade. In export there is very little change; prices remain steady, but with only a small business doing. In cloth we have nothing fresh to report. Prices are unchanged; but the advices from our eastern markets continue so unfavourable that our large buyers have no alternative but to keep out, therefore the buying is only of a retail character.

ROCHDALE.—The wintry weather is doing some good to the flannel trade, but all classes of goods are so high in price that buyers give more attention to the commoner kinds of goods than to others. The new business doing is mostly in fancies and cloths for printing designs upon, which will be in readiness for the spring trade. There is no change as regards Yorkshire goods, and the wool market is almost paralysed by the prospect of dearness which is so plainly before the eyes of all concerned.

LEEDS.—In the coloured cloth hall the business done has been quite unimportant. Neither home nor export buyers wanted more than very low stocks could provide them with. The black cloth trade is in a healthy state, some large orders having been quietly given out.

NOTTINGHAM.—Business in the lace trade continues healthy for the time of the year, and during the past few days a full average amount of business has been transacted. The yarn market is still very firm. There is not much change to report in the hosiery trade this week, business being in a healthy state.

BELFAST.—Flax—Supplies were more abundant, and the quality, too, was of a better description. Prices generally ruled steady, but had something of an advancing tendency. Yarns—The business of the week has not been of an extensive character. Prices generally rule firm. Linens brown (power-loom)—A good fair steady business, at full prices, has been transacted on light linens for bleaching, heavy linens, cloth suitable for the foreign clothing trade and for dyeing and hollands. Handloom—A moderate demand has prevailed for light and heavy linens, diapers, damasks, drills, and cambric handkerchiefs. Very little change to announce in prices. Linens (bleached and finished)—A fair amount of transactions on home account have been entered into, taking the season of the year into consideration.

CARDIFF.—Briskness continues to characterise the steam-coal trade, and both the railways and docks are crowded with traffic. Not for a long time past has the demand for coal been so large as at present, the requirements of the principal home and foreign buyers being far in excess of what was the case at the corresponding period of last year. For house coals there is an improving sale, and prices tend upwards. At the iron-works the usual activity prevails, the rail mills and forges being fully employed.

DUNDEE.—There has been an active demand for flax goods on the spot, and numerous transactions have taken place at gradually improving prices. Our local consumers have come forward more freely as buyers, and there has also been increased demand from parties at a distance. Tows continue in fair demand, and prices have still an upward tendency. There has been rather a firmer tone in the jute market, and instead of making any farther reduction on the price of common qualities, holders seem now disposed to require some advance on recent lowest prices. The yarn market is very firm, and

prices of flax yarns have had an upward tendency. The demand for tow yarns continues active at full prices. Jute yarns also are still in very brisk request at stiff prices. There continues to be a fair demand for linens, and manufacturers are generally actively employed. The demand for jute fabrics also continues to be very extensive, and manufacturers are generally foresold for some time to come.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Nov. 24.

The whole market has been variable in tone, and yet the fluctuations in price have been unimportant. The receipts of flour have continued liberal, and receivers have been a little uneasy under the rapid accumulation of stocks on hand. On Tuesday the market for shipping extras was partially broken by the selling out, "under the rule," of a speculative line of 8,000 barrels extra State, bought in October for the last half of November. They were closed out at $6.50 to $6.60, being taken for shipment to Glasgow. Since this sale the market has been firmer, but business comparatively slow. Most of the flour now coming forward is at pretty high cost, and is not freely offered on sale. To-day the market was dull, depressed, and lower. Wheat has arrived very freely, and the indications now are that we shall have, at the close of the navigation, a very large supply in store and afloat in this market—probably the largest recorded. Advices have been firmer from Liverpool, but as we were already higher relatively than that market, not much effect has been produced, except to strenghthen the views of holders, both here and at the West, where receipts have been comparatively small. Yesterday, owing in part to the suspension of a leading shipper at Buffalo, there was more disposition to sell, and most of the previous improvement was lost, No. 2 Chicago selling at $1.50, but even at this price the demand was limited. To-day prices showed a further decline, causing a large movement at $1.55 for No. 1 spring, and $1.70 to $1.74½ for prime to choice white, other qualities being neglected. Indian corn has been variable, advancing on Tuesday to 80c for Western mixed, afloat, declining yesterday to 78½c, and closing to-day at 78c to 78½c. The supply of new has been less liberal, and in other descriptions the movement has been trifling. Barley has been buoyant, with an active speculation, partly on Canadian account. Oats have been selling pretty freely. The movement in breadstuffs at this market have been as follows:—

RECEIPTS AT NEW YORK.

	1871. For the week.	1871. Since Jan. 1.	Same time Jan. 1, 1870.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The grain trade has been without important feature during the week, the demand for all descriptions of produce having been restricted within very narrow limits, though the return of frost has enabled factors to realise the full prices of last week. Supplies of English wheat have been moderately extensive, while the arrivals of foreign have been liberal, and the samples generally have come to hand in good condition. Stocks in granary continue to increase, and the quantity of produce afloat for the United Kingdom is large for the time of year, there being now on passage from the south of Europe and America to ports of call 390 cargoes of wheat against 485 at the corresponding period in 1870, in addition to 47 cargoes to direct ports. It is anticipated that the trade will remain quiet but firm throughout the winter months, though very much depends upon the character of the season we may experience. Flour has ruled quiet, in sympathy with the wheat market, but the quotations have shown firmness.

The demand for feeding stuffs has been less active than was expected. Maize and oats have not been inquired after to any great extent; but the market closed with a steady appearance to-day. Beans and peas have been neglected, and are nominally unchanged in value. The seed market has ruled very inactive. Cakes closed firmly.

The following statement shows the imports and exports of breadstuffs into and from the United Kingdom since harvest, viz., from August 26 to the close of last week, compared with the corresponding periods in the three previous years:—

IMPORTS.

	1871. cwts.	1870. cwts.	1869. cwts.	1868. cwts.

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the last eight days only 10 grain and seed-laden vessels have arrived at ports of call, viz.:—7 wheat, 1 maize, 1 beans, 1 cotton-seed. The floating grain trade has been dull, and prices generally in buyers' favour. Wheat—American cargoes were at first difficult to sell; later the demand improved, and a fair amount of business was done. Maize—Fine cargoes steady, at fully late prices; inferior cargoes slow sale. Barley—Business has been at a standstill. Rye quiet in arrived cargoes, but a large quantity sold for spring shipment. The reported sales are as follows:—Wheat—15 arrived cargoes: Rostoff Ghirka, from Taganrog, 44s; Don Ghirka, 43s 6d; old Ghirka, from Odessa, 48s 6d; Bessarabian ditto, 47s 9d; hard Taganrog, from Marseilles, 45s per 492 lbs; No. 1 spring, from New York, 55s and 55s 9d; amber winter ditto, 57s 6d; red winter, from Baltimore, 57s; white Canadian, from Montreal, 62s per 480 lbs. Maize—3 arrived cargoes: Moldavian, from Sulina, 35s 3d per 492 lbs; mixed, from New York, 33s 6d to 34s per 480 lbs. Barley—On passage, 1 cargo Danubian, from Sulina, 26s 4½d per 400 lbs. Rye—On passage, 1 lot new Danubian, from Ibrail, 36s per 480 lbs. To be shipped, 2 cargoes Odessa, 35s 6d and 36s per 480 lbs. Linseed quiet. Rapeseed quiet. Arrived in London, 500 bags East India yellow mixed, 72s 3d; 200 tons ordinary brown Calcutta, 67s 6d per 416 lbs, A.T. Cotton-seed steady. On passage, 200 tons Egyptian, from Alexandria, 9*l* 2s 6d. To be shipped, 4,800 tons Egyptian, from Alexandria, 8*l* 17s 6d to 9*l* per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market has been quiet, the refiners having partly ceased buying. At the public sales brown Mauritius sold upon rather lower terms, and the few sales made in West India show a slight decline. Only 359 casks found buyers to yesterday. The stock of Barbadoes in first hands is exhausted. Good grainy sorts keep scarce, and high in price. Manila meets with diminished inquiry. The stock in London is further reduced to 47,000 tons. Last year at the same date it was 76,500 tons, and in 1869 78,500 tons. According to the latest return the home deliveries of beet sugar from this port were 33,200 tons, against 19,400 tons to same time in 1870. As refined goods have been in better demand, the market for raw sugar seems likely to improve, and advices from the continent show that prices are very firm.

Mauritius.—5,465 bags sold at and after the sale at about 6d reduction on last week's quotations. Brown, 27s 6d to 30s; middling soft yellow, 22s per cwt.

Penang.—553 baskets were taken in and afterwards sold chiefly at 24s 6d for soft brown.

Manila.—About 350 tons Ilo Ilo have sold at 25s 9d.

Refined.—There is a moderate inquiry for stoved goods at last week's rates, from 40s 6d to 42s. 2,963 Dutch loaves offered by auction sold at 41s per cwt. Sales have been made in pieces at some reduction on late quotations.

MOLASSES.—No business reported in West India. 50 puncheons Australian sold at 15s 6d per cwt.

RUM.—The market is firm, supporting the improvement last quoted. Leewards, 1s 10d; Demerara, 2s 1d per proof gallon. Deliveries continue good, and the stock is further reduced to 23,560 puncheons 6,050 hogsheads.

COCOA.—The stock of West India is now moderate, and will be further reduced before the new crop begins to arrive. At Tuesday's sales 200 bags Trinidad went at about 2s higher; grey to middling, 62s 6d to 70s; good rather mixed to fine, 71s to 102s. 484 bags Grenada part sold a

t

46s 6d for low quality. 406 bags Guayaquil and 154 bags Surinam were chiefly taken in.

TEA.—There have not been any further arrivals this week, and the importers seem indisposed to sell in quantity at recent quotations. The market may be quoted as quiet, but firm. 3,061 packages by auction went off without alteration in prices. According to the official returns, the duty payments upon tea in eleven months were 5,987,433 lbs larger than in 1870 during the same period, and the exports showed 9,072,666 lbs. 2,000 packages Indian tea are declared for sale next week.

COFFEE.—A good demand prevails for native Ceylon at firm prices. Business has been done in good ordinary on the spot at 66s 6d to 67s. To arrive, 67s to 67s 6d paid with guarantee of quality, and bold at 69s. 220 bags bold by auction were taken at 70s. Native kinds of East India are steady. The public sales of plantation Ceylon have gone at about last week's quotations, and yesterday there was rather more animation in the demand. 792 casks 59 barrels 565 bags all sold: low middling small berry to middling colory, 69s to 76s; good middling to bold, 76s 6d to 79s; pale and grey, 68s to 72s; bold, 72s 6d to 74s. A few parcels have changed hands privately. Business has been done in East India, including some fine quality. 72 bags Singapore sold at 63s 6d to 64s 6d. 88 bags Natal at 71s to 72s 6d. A floating cargo of St Domingo sold for a near continental port. Sales in Brazil afloat, and no particulars reported. The landings here last week were rather above the deliveries, but the stock at the close was 18,460 tons, against 27,080 tons last year.

RICE.—Transactions have been unusually small, and the market is very quiet. The sound portion of 7,042 bags Necrancie Arracan by auction was taken in at 10s 3d to 11s. 3,879 bags Moulmein also bought in. There have not been any floating cargoes reported sold during the week. By private contract, white Bengal was sold at 11s t 12s 1½d; ditto, at 11s 3d ex quay. Ballam, at 9s 1½d to 9s 3d, ex quay. 1,100 tons Madras to arrive at 10s 3d per cwt.

IMPORTS and DELIVERIES of RICE to Dec. 2, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imports ..... tons	80400	69160	75500	69050
Deliveries	95600	69700	57300	51500
Stock	38200	49270	50900	34100

SAGO is quiet.

SAGO FLOUR.—1,090 bags Singapore were taken in at 16s 6d per cwt.

TAPIOCA.—870 bags Singapore and Penang sold rather cheaper from 1¾d to 2¼d per lb.

BLACK PEPPER.—The market has become flat. During the week small sales have been made privately upon former terms, including Penang at 6d and Singapore at 6¼d. 1,142 bags of the former, by auction, on Wednesday, were chiefly taken in. A few lots sold at 6d. 136 bags Singapore were partly disposed of at 6d per lb for common grey, being rather cheaper.

WHITE PEPPER.—A limited quantity has been disposed of during the week, but 700 bags Singapore were offered in the weekly public sales, and chiefly disposed of at the reduction of 1d to 1½d, viz., 11½d to 1s per lb for common to good bold quality.

OTHER SPICES.—At the public sales this week 39 cases Penang cloves part sold at fully 3d reduction on late high prices, viz., 1s 3¾d to 1s 4¾d. Zanzibar firm at 3¼d to 3⅝d cash. 7 cases Penang mace went at easier rates: middling red, 4s 6d to 4s 7d; low and broken, 3s 10d to 3s 11d. 30 cases small brown Penang shipping nutmegs sold at 3s 1d to 3s 2d. 5 cases at 3s 7d to 3s 8d for 71 to 69's. 607 bags pimento went at rather lower rates from 2¼d to 2⅜d. 244 bags cinnamon bark and chips were bought in at 2¼d to 3¼d per lb. Of 184 cases cassia lignea from Hamburg, and 100 cases unworked sold at 113s to 114s per cwt.

SALTPETRE.—There have been some parcels of Bengal sold at uneven prices, and the market is rather quiet. Sales on the spot amount to 2,800 bags. Prices have not in all cases transpired, but the transactions include refraction 22½ to 6½, at 30s to 30s 6d per cwt., according to prompt.

IMPORTS and DELIVERIES of SALTPETRE to Dec. 2, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imported ..... tons	10330	10270	10750	6700
Total delivered	10700	12840	10270	10500
Stock	2020	2260	4660	4600

Deliveries last week, 250 tons.

SHELLAC.—The market was firmer in the early part of the week, but has since become less so, and 343 chests by auction went rather cheaper. Native orange, 7*l* 10s to 7*l* 12s 6d; second orange, 8*l*: garnet, 6*l* 12s 6d to 6*l* 15s; button, 7*l* 10s to 9*l* per cwt. The very large increase in the deliveries has brought the stock down to 8,100 chests, against 12,200 last year.

DRYSALTERY GOODS.—Turmeric is quiet. Some low Java kind, offered by auction without reserve, sold at 9s to 9s 6d. Cutch has been rather quiet. Boxes, 24s to 24s 6d. The latter paid for one parcel. 245 bags, &c., by auction were bought in. The deliveries this year have been larger than at any former period. Safflower quiet. There is a speculative demand for gambier, and at higher prices. 1,360 packages by auction sold at 18s to 18s 6d for block, and 20s 6d for pressel cubes. Sales at 17s 10½d to 18s 6d per cwt. ex ship. 99 chests lac dye were bought in. Privately, business has been done in the better qualities.

CAMPHOR.—Since last Friday further business has been done up to 80s per cwt, at which price the market is now quiet with sellers.

METALS.—The alterations in these markets have been of a very important nature during the week. On Tuesday the price of English copper was officially raised 10/, viz., 91*l* to 93/, and this was followed by a great advance in other kinds, but the excitement has now partly subsided. Chili, &c., has ranged from 82*l* to 85*l*, or 15*l* to 16 above the rates current a few weeks ago. Burra and Walaroo, 88*l* to 90*l* per ton. The enhanced value of copper has influenced spelter, in which speculative business has been done at 19*l* 15s up to 22*l*. W. B., 23*l*, but particulars do not fully transpire. The stock in London and Grimsby is 4,155 tons, as against 3,320 tons last year, and 2,000 tons in 1869 at the same date. There has been a reactionary movement in the tin market, which is at present in the hands of speculators. Sales of Straits at one time reported at 146*l* to 147*l* cash. Yesterday the tone was better. Business for arrival, 147*l* 10s to 149*l*. English nominally unaltered. Scotch pig iron has been in good demand. Latest sales at 70s 6d per ton cash.

HEMP.—Manila has declined 10s to 20s, and 4,889 bales recent import brought to auction only partly sold at 46*l* to 51*l* 15s for rather coarse to good roping, with low and ordinary brown at 37*l* 15s to 41*l* 10s. 148 bales East India Sunn were partly disposed of at 25*l* 10s per ton. The stock of Manila hemp in the docks, &c., is returned at 3,300 tons, being rather large.

JUTE.—The market is firm, with a much better inquiry. During last month the stock increased, being 78,500 bales at the close. Yarns and jute manufactures continue active in Dundee. Several sales are reported partly for arrival there at 19*l* 5s to 25*l* 5s per ton.

LINSEED.—The market remains dull. Calcutta, 62s 6d to 63s. No sales reported for arrival. Present quotation, 63s 6d to 64s, and Black Sea, 63s to 64s per quarter. Bombay scarce.

OILS.—A firm tone exists in the market for olive. Common qualities—including Mogadore, Tunis, &c.—have sold at 49*l* to 50*l*. A cargo of Gioja at 49*l* and one at 51*l* 5s for the United Kingdom. One Taranto at 54*l*, spring shipment to the Baltic. Common fish oils steady. Pale seal, 37*l*. Southern scarce, and pale worth 36*l* to 36*l* 10s. The prices of sperm are rather weaker, viz. 90*l* American and 91*l* per tun colonial. The stock of palm is chiefly held for an advance—viz., Lagos at 40*l*. The late arrivals of Cochin cocoa have been chiefly of common quality. Fine, which continues scarce, is worth 50*l* to 51*l*. Ceylon offers at 38*l* 10s, and the market is quiet. Linseed oil quiet, at 34*l* on the spot and next four months. English brown rape oil has been quiet, and during the week 43*l* 15s accepted on the spot: January to April, 44*l*; refined, 46*l*. Foreign refined dull, at 47*l* to 48*l* per ton.

TALLOW.—Supplies of Australian, &c., being still very liberal, the improvement last quoted upon Russian is not maintained, and the tone of the market has become quiet. Petersburg new, 48s 3d to 48s 6d. December the same; March, 49s 6d per cwt.

PARTICULARS OF TALLOW—Monday, Dec. 4, 1871.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is inactive, and the few public sales advertised for to-day were withdrawn. Privately 1,000 baskets Java sold at 35s.

COFFEE.—155 casks 12 barrels 88 bags plantation Ceylon sold upon former terms. 290 bags native were chiefly sea-damaged; sound realised 66s to 67s. 56 packages Mocha were withdrawn. 31 cases 104 bags East India sold steadily; greyish Wynard kind 71s to 73s 6d.

RICE, SPICE, AND SALTPETRE.—No sales.

GAMBIER.—100 tons sold for arrival at 19s per cwt ex ship.

METALS.—Tin advanced to 149*l* for Straits. Iron lower for Scotch pig—viz, 69s per ton cash.

OILS.—407 casks cocoa-nut by auction were chiefly taken in. A few lots of Ceylon sold at 38*l*. 100 casks palm were taken in at 39*l* per ton.

TALLOW firmer. Petersburg, 48s 6d; March, 49s 6d to 50s. 1,698 casks Australian chiefly sold: good to fine mutton, 47s 6d to 49s; beef, 38s to 46s per cwt. 247 casks South American bought in.

ADDITIONAL NOTICES.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that the contrary winds have prevented arrivals of oranges, and the market is bare of all kinds. Lemons of good quality scarce. Seville sours in demand. More inquiry for Barcelona, black Spanish, and Brazil nuts.

DRY FRUIT.—The market is quiet, business only moving in lowest qualities. Valencias firm, but not much offering. Figs only selling for immediate wants.

ENGLISH WOOL.—Prices very firm, particularly for long-stapled wools.

FLAX.—The market very firm. Stock very small.

HEMP.—Russian quiet. At auction this week, about 1,000 bales barely fair Manilla, forced off at 46*l* to 46*l* 5s; other parcels of similar quality withdrawn at 47*l* 10s up to 48*l* 10s; good Bolugan sold at 51*l* 10s to 51*l* 15s; 200 bales.

SEEDS.—The seed trade continues steady at late rates.

TOBACCO.—There has been but little general business doing in North American tobacco, with the exception of one or two sales of some magnitude, which were effected early in the month. Apart from these sales the market has been in a very inactive state. Prices continue without alteration. In substitutes and segar tobacco there has been a good inquiry.

METALS.—Our market has been active in most branches. Copper has been in special demand at advancing prices, and the smelters have notified an advance of 10*l* per ton, all round. The striking change in supplies and consumption in the course of this year appear to justify all the advance in prices, and even more. Tin has fluctuated considerably, but the week closes firmer than it opened, whilst the quantity changing hands has been very considerable. Spelter has been in great request, and marks an improved value of about 50s a ton. Lead steady. Tinplates still in demand.

METROPOLITAN CATTLE MARKET.

MONDAY, Dec. 4.—The total imports of foreign stock into London last week amounted to 12,097 head. In the corresponding week in 1870, we received 8,563; in 1869, 8,415; in 1868, 4,844; and in 1867, 9,758 head.

The cattle trade has been in a depressed state to-day, and the tendency of prices has been in favour of buyers. About an average supply of beasts has been on sale. The supply has been in excess of

requirements; and in sympathy with the dulness in the dead meat market, the demand for all breeds has been limited, prices ruling in favour of buyers. The best Scots and crosses have made 5s 6d to 5s 8d, and only occasionally 5s 10d per 8 lbs. With sheep the market has been only moderately supplied; nevertheless, there has been a want of animation in the demand for all breeds, and prices have had a drooping tendency. The top quotation for the best Downs and half-breds has been 6s 6d to 6s 8d per 8 lbs. Calves have changed hands quietly, at about late rates. Pigs have sold steadily, at last Monday's prices. The Annual Christmas Market will be held on Monday next.

SUPPLIES ON SALE.

	Dec. 5, 1870.	Dec. 4, 1871.
Beasts	3,980	4,180
Sheep	17,140	16,890
Calves	160	109
Pigs	200	60

HOP MARKET.

BOROUGH, Friday, Dec. 8.—Quietness continues to characterise this market. For all descriptions of hops the demand has been trifling, and in some instances a slight reduction has taken place. Mid and East Kent, 10*l* to 16*l* 16s; Weald of Kent, 8*l* 10s to 10*l* 10s; Sussex, 7*l* 5s to 9*l* 9s; Farnham and country, 11*l* to 16*l*. Yearlings—Mid and East Kent, 3*l* to 6*l* 10s; Weald of Kent, 3*l* to 5*l* 15s; Sussex, 3*l* to 5*l*; Farnham and country, 4*l* 10s to 6*l*; olds, 1*l* 5s to 2*l*.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Dec. 8.—Fair supplies of potatoes have been on sale. The trade has been quiet, at late rates. Regents, 85s to 120s; Flukes, 100s to 140s; Rocks, 80s to 95s; French, 70s to 80s per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 8.—Ever since the close of the public sales on Friday last week, there has been an active demand for home consumption at prices fully on a par with those realised at auction, and sellers show increased firmness in their demands.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 8.—A fair trade was done to-day at Tuesday's prices.

The Gazette.

TUESDAY, Dec. 5.

BANKRUPTS.

H. B. Barnham, Gloucester place, Hyde park, gentleman.

MANUFACTORY—PENTONVILLE, LONDON.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 14 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

OXYGENATED WATER HOLDS IN

Solution pure Oxygen Gas, the vital element that sustains life. It is a decided tonic and alterative drought, and from its special action on food during the process of digestion and assimilation is peculiarly suitable for invalids. Price 4s per dozen half-pints.

TEMPORARY CITY OFFICES—83 Lombard street, E.C.

1. The impetus which in recent years has been given, both in this country and abroad, to insurance of all kinds has in no instance been so marked as in the branches known as "Guarantee" and "Accident." They are, of all operations, based on the law of average, not only the most remunerative, but the least liable to fluctuation, whilst the growth of commerce, and the enormously increased facilities for locomotion, have given an unlimited field for their extension.

2. The working of selected "Guarantee" business shows that from 50 to 55 per cent. of the premiums will more than meet the claims, whilst the expenses are small, and decrease in proportion to the increase of income.

3. There are at present but two Companies in England doing guarantee business of any considerable amount. One, although only in a few hands, and confining its operations chiefly to London, has proved highly profitable; the other, more recently established, and with a comparatively small income, has paid in the last year, in dividend and bonus, over 15 per cent. on the capital employed. These two practically represent the only supply for a want more or less present to every employer. It is believed that these Companies have not extended their operations abroad, not even to India or the Colonies.

4. The returns of "Accident" business show it to be equally remunerative with that of Guarantee. A recent report of the largest existing Accident Insurance Company shows upon an income of £125,000 an excess of premiums over losses of upwards of £50,000. The best evidence, however, of the profit realised on this class of business is afforded by the price of the shares of that Company, which, with 17s 6d originally paid, are now saleable at £13 10s to £14 10s, the dividend for the last three years having been above 60 per cent. per annum upon the amount so paid, and the profit earned thereon above 100 per cent.

5. It is estimated that the united income of the few Accident Companies now at work does not exceed £200,000; most of the assurances are for £1,000, but taking them to average £500, at the lowest premium, £3 per annum per £1,000, this would represent under 140,000 persons insured, being but a small fraction of the insurable lives in Great Britain.

6. Neither guarantee nor accident business requires a large paid-up capital—the guarantee contracts are from year to year—the risk decreases rather than increases with the lapse of time—and there is no accumulation of liability to be provided for.

7. It is therefore not intended to make any further issue of capital, beyond the amount now offered, nor to call up more than £2 per share, unless the business of the Company should be so much enlarged as to render it necessary, and then only with the sanction of a general meeting of shareholders.

8. This Company has hitherto been carried on with a small capital, and to a limited extent only, but it has been well established, and required only the extension now secured to insure its full development. An analysis of the business already transacted, shows it to have been well selected, the claims on guarantee policies up to a late return having been less than 46 per cent., and on accident policies, less than 33 per cent. of the premiums.

9. In addition to the income already on the books, the Company has purchased on advantageous terms (embodied in contract No. 1, paragraph 14, sub. sec. 1), the goodwill of the "Guarantee" business and connection of the European Society, which, according to the books of the Society, upon the 3 years immediately preceding the present year, produced a premium income averaging over £35,000 per annum. Under the terms of the purchase, this Company takes over no liabilities whatever, and is not bound to renew any policies that do not appear on examination to be eligible risks.

10. The Directors of the London Guarantee and Accident Company have therefore considered this a favourable opportunity, by a further issue of capital, and an introduction of influential support, to extend the operations of the Company both at home and abroad, and thus to provide a powerful Association exclusively confined to guarantee and accident business, the growing want for which has for some time been seriously felt.

11. In conjunction with the purchase of the Guarantee business of the European Society, and in order at once to facilitate the transaction of Government business, arrangements (paragraph 14, sub. sec. 2), were made, whereby the subscribed capital of the Company was raised to £50,000, and a Special Guarantee Fund of £20,000, invested in the name of the Trustees.

12. The Articles of Association, with certain alterations now being carried out, rendered necessary by the extension of the Company, together with the accounts as audited and the register of shareholders, are open to inspection at the Office of the Company.

13. The existing contracts, other than the following, are such as have been made in the ordinary course of business as a Guarantee and Accident Company.

14. The following contracts have been entered into:—

1. Agreement dated the 13th day of November, 1871, between the European Assurance Society, by and with the consent of the Committee of Shareholders and Policyholders appointed by the Court of Chancery of the one part, and the London Guarantee and Accident Company, Limited, of the other part.
2. Letters dated the 29th day of November, 1871, from the London Guarantee and Accident Company, Limited, to Henry Labouchere, Esq., W. Morris, Esq., and Messrs Seymour, Elwyn, and Co., respectively.

FORM OF APPLICATION FOR SHARES.

PROSPECTUS.

The vast increase during recent years of British commerce has been followed by the successful establishment of a large number of Marine Insurance Companies, which, under careful and judicious management, have proved an exceedingly safe and profitable investment. Each successive return of the Board of Trade exhibits a steadily progressive increase in our commerce, and scarcely a year elapses which does not witness the successful establishment of a new Marine Insurance Company.

A just idea of the extraordinary increase in the trade of the country may be ascertained by comparing the monthly trade returns for the ten months ending with October last with the same periods in the three years immediately preceding. The ten months' total of 1871, compared with that of 1870, shows an increase this year of forty-nine millions, or 12½ per cent.; compared with that of 1869, the increase is sixty-six millions, or 18 per cent.; and compared with 1868, the increase is no less than eighty nine millions, or 25 per cent.

The opening of the Suez Canal route to India and China, and the large increase in steam tonnage between Liverpool and America, have added enormously to the trade of the country during the last three years, and for this increase no special facilities for insurance have been provided in Liverpool, so that insurers are compelled to send a portion of their risks to be covered elsewhere.

The Directors therefore believe that the present is a most favourable opportunity for the establishment of a new Company, and they are convinced that the profitable character of a well conducted marine insurance business will be obvious on examining the following figures, which are worthy of particular attention:—

Name of Company.	Established.	Amount of Shares.	Paid-up.	Present Value of Shares.	Last Dividend per Annum.
		£	£	£ s d	%
Ocean	1859	25	5	20 12 6	30
Universal	1860	20	5	15 5 0	12½
Thames and Mersey	1860	20	2	7 7 6	25
London and Provincial	1860	20	2	4 10 0	10
Union	1863	50	5	10 0 0	15
British and Foreign	1863	20	*4	11 12 6	†17½
Commercial Union	1863	50	5	12 0 0	10
Maritime	1864	10	2	4 15 0	10
Home and Colonial	1864	50	5	5 0 0	6
Globe	1870	20	4	5 15 0	5
Thetis	1870	20	5	10 0 0	5

* £2 written on out of profits.

† Being in reality 35 per cent. upon the £2 paid.

The results indicated by these statistics fully justify the Directors of the Imperial in confidently recommending the present undertaking to investors.

The Directors have made arrangements for taking over the business of the Liverpool Marine Insurance Company (Limited) on placing at the disposal of its liquidators 5,000 shares, with £2 credited thereon, for distribution amongst the shareholders in that Company. The Imperial will thus secure immediately a carefully-selected business, yielding, under the present management, a premium income of about £60,000 a year, which is capable of great and immediate expansion. Of this business only 13·47 per cent. of the total amount insured during the current year is upon hulls of ships, the balance being on freights and cargoes, which the experience of the most successful insurance companies proves to be by far the best description of marine risks. The Directors have also secured the services of a complete office staff in excellent working order, including an experienced underwriter.

The Directors are confident that a large and profitable business can be done in Liverpool alone, and this will be largely augmented by the operations of an office in London and agencies in Manchester, Dundee, Hull, and Leith. In addition to the agents already appointed in Bombay and Calcutta, it is the intention of the Directors to establish, as opportunity offers, agencies, conducted by first-rate firms, in the principal ports of Australia and China. As a proof of their confidence in the exceedingly profitable nature of marine insurance, when properly conducted, the Directors take upwards of 4,000 shares.

A considerable proportion of the capital has already been subscribed, and the remaining shares are now offered to the public. Application for the same to be made to the Secretary, Brokers, or Bankers of the Company, and should no allotment be made the deposit will be returned.

No promotion money will be paid, and the New Company will not be responsible for any of the liabilities of the Liverpool Marine Insurance Company.

The Memorandum and Articles of Association, and also the undermentioned Contract, may be seen on application to the Underwriter or Secretary, at the Temporary Offices of the Company.

The following Contract has been entered into:—

Date, 4th December, 1871.

PARTIES.—The Liverpool Marine Insurance Company (Limited), of the first part; Louis Henry Macintyre, James Marshall, and Thomas Sumner McGhie of the second part; and the Imperial Marine Insurance Company (Limited), of the third part.

Prospectuses and forms of application may be obtained from the Bankers, Brokers, and Agents, and at the Offices of the Company.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d, postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage 1s 10d. Post-office orders to be made payable to John White, Post-office Piccadilly.

NEW PATENT

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS &c. They are porous, light in texture and inexpensive and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

TEMPORARY OFFICES.

41 Threadneedle street, London.

This Company is formed for the purpose of constructing a railway in the Colony of Natal, between the Port of Durban and the Township of Verulam, in the County of Victoria. Contracts have already been entered into for the construction of the line between the River Umgeni and Verulam, a distance of 15 miles, and the works will be commenced at once, so that the line may be opened for traffic with the least possible delay.

The proposed railway will pass through the centre of the richest and most fertile district of Natal, well suited for the growth of almost every article of tropical and European production. The land in this district is, for the most part, held by farmers cultivating sugar, coffee, cotton, arrowroot, tobacco, and maize; but the progress of cultivation is retarded by the difficulty attending the transport of produce to the Port of Durban. During wet weather and in the driest season, the traffic comes almost to a standstill. Letters just received from the Colony state that the planters at the present time are at a loss for means to transport their produce to market, and that hundreds of tons of sugar await the growth of the grass to restore the draught cattle to their proper strength.

The region of highest fertility extends through a belt of coast land about twelve miles wide. The belt, for the fifteen miles to be traversed by the proposed railway, comprises something more than 100,000 acres of land, adapted to tropical cultivation; of which a considerable portion will yield sugar to the amount of from two to three tons per acre. The rest will furnish large quantities of coffee, maize, cotton, tobacco, and arrowroot. The land for twenty-five miles north-east of Verulam is of the same character, and already largely occupied by planters; and even beyond that quite to the north-eastern frontier of the colony, it is capable of becoming the seat of an extensive industrial development. Throughout this entire district nothing is wanted but railway communication to increase enormously and immediately the amount of valuable produce requiring carriage.

The difficulty of securing adequate transport for produce on the coast district of Natal is just at this time greatly increased, in consequence of the profitable field of employment for carriers, which has been opened out in the direction of the diamond fields upon the Naal river.

Natal is well watered, but it is entirely destitute of canals and navigable rivers; and there are no harbours, except Durban, on the east coast. There can, therefore, be no competition by water carriage with railway enterprise, as in India.

It has been thought advisable to limit the capital of the Company, in the first instance, to the amount necessary for the construction of the line through the region where the commercial success of the undertaking is absolutely sure. But the Company have taken power, with the consent of the shareholders, to extend the line to the town of Durban, and towards the north-eastern frontier of the colony, where exceedingly rich deposits of iron ore and coal are known to exist.

The contract for the construction of the line from the River Umgeni to Verulam, including the rolling-stock and full equipment of the line, payment of interest on the shares, and all expenses of management during construction, and for the maintenance of the works for six months after completion, has been taken by responsible contractors at £100,000, being the amount of the nominal capital of the Company.

In the published return of the Board of Trade for 1870, it is shown that the average receipts of railways for the United Kingdom, are £55 per mile per week. If one-half of this average is assumed for the Natal Line, but with an allowance for Colonial rates, which will be, at least, three times the English railway rates for heavy traffic, the gross revenue to be anticipated from the opening of the line will amount to £21,450 for the year.

The accuracy of the estimate thus arrived at is substantiated by a statement in the "Natal Colonist" of July 24, 1871, founded upon calculations of the Honourable the Colonial Secretary of Natal, in which the amount of goods traffic in the County of Victoria, conveyed over the Umgeni bridge, for the year ending May 31, 1871, is calculated at 26,935 tons. Upon the basis of this statement, the revenue of the line from its opening may be fairly calculated as follows:—

	£	s	d
26,935 tons goods traffic, at an average of 9d per ton* per mile	15,180	0	0
Parcels and light goods	1,300	0	0
Passenger traffic, at £100 per week	5,200	0	0
Gross revenue	21,680	0	0
Working expenses, at £40 per cent.	8,672	0	0
Net revenue	13,008	0	0

—Or £13 per cent. upon the capital of the Company, without allowance for increased traffic consequent upon the opening of the line.

A still more forcible confirmation of the general tenor of these estimates is furnished in the last report of the Natal Railway Company to their shareholders. From this report it appears that the actual net profits for the six months ending 30th June, 1871, of this short railway, from Durban to the river Umgeni (of which the projected Victoria Railway will virtually be an extension), were £2,452 17s 3d, or £25 per cent. per annum upon the capital of the Company.

From these various considerations, it is impossible to resist the conclusion that the proposed railway will afford the means of a safe and profitable investment.

Copies of the contract for the construction and equipment of the railway, and of the articles of association of the Company, can be seen at the Offices of the Solicitors, 4 Nicholas lane, London.

Applications for shares and prospectuses may be made at the Offices of the Company, or of the Brokers.

Dated the 4th December, 1871.

* The rates charged by the present mode of conveyance range from 1s 6d to 2s per ton per mile.

MESSRS C. DE MURRIETA AND CO. have been instructed by His Excellency Don L. L. Dominguez, Minister of Finance, and interim Minister of the Interior, of the Argentine Republic, to publish the following invitation for TENDERS for the CONSTRUCTION of a RAILWAY from CORDOBA to TUCUMAN, in the said Republic. The approximate estimates and particulars, furnished by the office of National Engineers, may be inspected at the office of Messrs C. de Murrieta and Co.

No. 7 Adams court, Old Broad street, E.C.,
27th Nov., 1871.

ARGENTINE REPUBLIC—DEPARTMENT of INTERIOR.

RAILWAY from CORDOBA to TUCUMAN.

(Proposal to be submitted within five months.)

The Government of the Argentine Republic, as authorised by Law of Congress, 12th October, 1871, for the construction of a railway from Cordoba to Tucuman, calls for proposals for the same, to be sent in before 2 p.m. on the 30th of March, 1872.

Sealed proposals will be received at the office of the Minister of Interior, and will be opened in presence of the Minister and the interested parties on the day and hour above mentioned.

The proposals must be subject to the following conditions:—

1. The line will be about 542 kilometers long, and must be built on a gauge of one meter, in strict conformity with the plans and surveys of the Government Engineers, which may be seen at the National Engineers' Department, 32 Calle Belgrano. The inspecting engineers to be appointed by Government for ensuring the proper execution of the works will be empowered to prohibit the use of materials which they may consider unfit, and the contractor must attend to their suggestions and follow the detailed specifications they give him, both as respects materials and the execution of the work.

2. The line must be finished in every part, stations, rolling-stock, &c., within 4½ years from the approval of the contract (except case of force-majeure), the contractor obliging himself to pay a penalty of 25,000 hard dollars a month for any delay; the Government further engaging to pay a premium of 10,000 hard dollars for every month finished before that time.

3. The execution of the works shall be arranged so as to enable the line to be delivered in sections, which the Government shall have the right to open to traffic whenever it see fit.

4. The contractor shall oblige himself to keep the line and annexed works in good order for 12 months after completion.

5. The Government will permit all materials necessary for making the line to be imported duty free.

6. Parties sending in proposals must specify how they would receive payment, whether directly from the National Treasury or through a banking house in London.

7. No proposals will be received exceeding 14,127 hard dollars 35 cents per kilometer, besides the interest at 7 per cent. on the capital employed for the interval between the actual outlay and the date of payment, which will depend on the form and manner of payment to be agreed on.

8. The contractor shall lodge in the Provincial Bank of Buenos Ayres or other bank, at the choice of the Nat. Government, the sum of 100,000 hard dollars, as a guarantee for the proper fulfilment of the contract, and this sum is not to be withdrawn till 12 months after the delivery of the whole line, on the Government declaring that the contractor has fulfilled all his engagements.

9. The Government always reserves to itself the right of selecting whatever proposal it thinks best for public interests, or rejecting all of them if necessary, so that the presentation of proposals gives no particular rights to any of the parties interested.

LUIS L. DOMINGUEZ.

Buenos Ayres, Oct. 21st, 1871.

HOLLOWAY'S OINTMENT AND PILLS.—Help under Suffering.—No diseases which afflict the human body are more irksome to bear, or more difficult to cure, than skin diseases, whether superficial sores or deep ulcerations. Holloway's ointment has proved itself a remedy for these maladies; it clears off scurfy incrustations, heals up cracks and fissures, reduces unnatural heat, mitigates irritation and inflammation, and it at once assuages pain, cleans wounds, and works out a sound and lasting cure more certainly and more rapidly than any other application. In those affections which are probably constitutional or chronic, debilitated habits, and constitutional ailments Holloway's pills should be taken to increase the salutary effects of his unguent.

ISSUE OF £300,000 FIVE PER CENT. FIRST MORTGAGE DEBENTURES OF THE SWEDISH CENTRAL RAILWAY COMPANY (Limited).

Notice is hereby given, that SCRIP CERTIFICATES will be EXCHANGEABLE at the Offices of the undersigned, against Bankers' receipts, on and after Monday, the 11th inst. Signed)

BISCHOFFSHEIM AND GOLDSCHMIDT.

THE FOOD PRESERVING COMPANY (Limited).

(JONES' PATENT.)

Incorporated under the Companies' Acts, 1862 and 1867, with limited liability.

Capital, £100,000, in 20,000 shares of £5 each.

Divided into 16,000 A shares, now offered for subscription, and 4,000 B shares, taken by the Patentees.

The B shares will receive no dividend until 10 per cent. has been paid upon the A shares, when they will receive dividend pari passu with the A shares.

After 20 per cent. has been paid on the entire capital the profits beyond such 20 per cent. will be divided between the A and B shares, in the proportion of one-half to the A shares and the other half to the B shares.

Deposit, £1 on application, £1 on allotment, the remaining £3, if required, in calls at not less intervals than three months.

ABRIDGED PROSPECTUS.

This Company is formed to develop an improved system of meat preserving in Great Britain, the colonies, and other countries; and for the purchase, with that object, of the patent rights for preserving articles of food under Richard Jones' Vacuum System, such patents being for the Australian colonies as well as for the United Kingdom.

The special feature of the process is, that poultry, game, fish, and whole joints of beef and mutton, chops or steaks, can be as readily preserved with as without bone, thus obviating the hitherto unsatisfactory appearance of preserved meat. At the last exhibition at Sydney, an early sample of meat, prepared by the Vacuum Process, carried off the only prize medal awarded. It has also stood the test of numerous voyages to and from the tropics, as stated in the accompanying testimonials.

The Directors, with a view to give the fullest information as to the character and condition of the meat cooked by Mr Jones' process, have arranged for its inspection by the public, at the Offices of the Company, 76 Cheapside.

Full prospectuses, and forms of application for shares with numerous testimonials may be obtained at the Offices of the Company, 76 Cheapside.

THE MAMMOTH COPPEROPOLIS OF UTAH (Limited).

(Armstrong's Copper and Silver Mine.)

Note.—From the description given by Captain Tilden, and the report of Mr Francis Fowler, M.E., and Member of the Institute of Civil Engineers (who was selected by the Saturn Silver Mining Company of Utah, to examine the property of that Company, and who has lately examined this property), it appears to be one of the most valuable and remarkable mines in the now famous territory of Utah, and from its present development capable of furnishing ores which can be sent to New York or to England, sufficient to pay from £150,000 to £200,000 per annum.

Capital, £150,000, in 15,000 shares of £10 each.

10,000 of which are offered for public subscription.

£1 per share payable on application. £2 per share on allotment.

The remainder to be called up in two instalments, viz., £3 10s on the 15th February, and £3 10s on the 15th April. And on the shares being fully paid up, warrants to bearer can be issued.

If no allotment is made the deposit and all payments on the shares will be returned in full.

Subscribers paying up their shares in full on allotment will have the right to receive share warrants to bearer, the stamp fees being paid by the Company.

OFFICES (pro tem.)—25 Moorgate street.

EXTRACTS FROM PROSPECTUS.

This Company is formed for the purpose of acquiring a freehold Mining property known as the Armstrong Claim on the Mammoth Vein, and locally called the Copperopolis of Utah.

The mine is represented in the statement of Captain Tilden, and the report of Mr F. Fowler, C.E. and M.E. (the engineer selected by the "Saturn Silver Mining Company of Utah" to examine and report upon that Company's property), as being so extensive as to appear more like a quarry of rich ores, having been opened upon the vein in one place 30 to 40 feet in width, and 20 feet in depth, and containing almost every species of copper ore, large masses of grey and black oxide being embedded in brilliant malachite, interspersed with suboxide of ruby and virgin copper. A shaft has been sunk within 200 feet of the north end of the lode to the depth of 55 feet, at the bottom of which a chamber 12 feet square of solid ore of the most valuable character has been excavated, without striking the walls on either side. The vein at this point is believed to be 30 feet and upwards in width. Openings have also been made on the whole length of the lode, everywhere showing the same rich metallic deposit.

A tunnel is now being driven, which has already penetrated 65 feet into the mountain side, and it is expected will strike the lode at a depth of about 175 feet below the present workings, and 190 feet below the highest point of the lode. Mr Fowler, in his report, expresses his opinion that this lode is a true fissure vein.

With three men only at work in the mine, 600 tons of ore have been extracted within the last four months, which yielded 112 dols per ton in New York, the total expenses being 64 dols 25c per ton, leaving a net profit of 47 dols 75c per ton by the present expense and inefficient means of working.

In corroboration of this statement, about five tons of average ore taken from near the surface of the mine, were sent by Mr Fowler to Swansea, where it realised on 5th December, 1871, £25 10s 3d per ton, being over £3 in excess of the sale price at New York, referred to in Captain Tilden's statement. It is estimated that 40 tons of ore per day can be taken from the mine in its present state, which would yield a net profit of 50 dols per ton in silver and copper equal to £400 per day; and allowing 280 working days, equal to an immediate revenue of £112,000 per annum. But it is stated that this profit can be increased to £200,000 and upwards per annum by employing more workmen, and erecting furnaces on the mine.

As soon as the railway is completed to within 20 miles of the mine, which will be in the course of the ensuing summer, a reduction of 8 dols per ton on freight alone will be effected.

The climate is milder than that of Salt Lake Valley, and mining operations can be carried on throughout the whole year.

The price to be paid for the property on a perfectly satisfactory title being established is £125,000, viz., 5,000 fully paid-up share warrants to bearer, and £75,000 in cash. The vendor consenting to take a less amount in cash, and any further number of share warrants the Directors may elect to allot up to 8,500, 10,000 shares are now offered for public subscription; £1 per share to be paid on application, and £2 per share on allotment, and the balance in two equal instalments on the 15th February and the 15th of April, 1872, leaving £25,000 to erect furnaces and for working capital.

Share warrants to bearer will be issued on the shares being fully paid up on the payment of the stamp duty, but to those shareholders electing to take fully paid up shares on application, the stamp duty will be paid by the Company.

The Directors will not be entitled to receive any remuneration unless a minimum dividend of 20 per cent. is paid on the shares.

The contract for purchasing the property is dated the 30th of November, 1871, and is made between Jonathan C. Lawrence of the one part, and Joseph Anderson for the Company of the other part, and may be seen at the office of the Company together with the Articles of Association and the report of the Engineer.

Applications for shares to be made to the Bankers, and at the offices of the Company, as under.

To the Directors of
THE MAMMOTH COPPEROPOLIS OF UTAH,
(Limited) London.

Gentlemen,—Having paid to your credit at the Bankers of the Company, the sum of pounds, being £1 per share on shares of the Mammoth Copperopolis of Utah (Limited), I request you to allot me that number of shares; and I hereby agree to accept the same, or any smaller number that may be allotted to me, and to pay the balance due thereon, according to the terms of the prospectus.

PROSPECTUS.

The object of this Company is to take over and work the newly-erected Stranton Iron and Steel Works, situated at West Hartlepool, and to further develop and enlarge the same, for which property the owners have agreed to accept £35,000 in cash, and 3,500 fully paid up shares.

The purchase includes certain important patents, one being much used at these works for the manufacture of a superior quality of finished iron out of No. 4 Cleveland pig.

These terms have been arranged with the approval of A. Davy, Esq., C.E., of Sheffield, whose report is printed and enclosed.

The property consists of four acres of freehold land, on which are erected the requisite buildings; comprising—puddling furnaces, capable of producing 10,000 tons of puddled bars per annum, also heating furnaces; rolling mills; steam-engines; steam hammers—quite new, of the best make and materials, and with the most recent improvements; and all other necessary appliances for the purpose of manufacturing 15,000 tons of finished iron per annum.

Arrangements are being made for an enlargement, so as to increase the out-turn to about 25,000 tons per annum, which can be effected for a comparatively moderate outlay, an estimate having been obtained to supply and lay down complete all necessary machinery for £10,000, with the requisite number of puddling furnaces and boilers; this increase will materially diminish the cost of production, and thereby also proportionately augment the annual profit. The manufacture of steel rails is also in contemplation.

The Cleveland district, where these works are situated, is the largest iron producing district in the world, and affords an annually increasing supply of pig iron; the yield this year is expected to reach the enormous total of 2,000,000 tons. Coal of the best quality is also abundant and cheap. The advantages of transport are unsurpassed, the works being connected by a siding with the North-Eastern Railway and the West Hartlepool Docks, thereby affording great advantages for carriage either by sea or by land—the saving in export alone as compared with the inland districts being about 10s per ton.

The competitive advantage of cheap transport, and low price of pig iron and coal are so great, that with proper and efficient management even in the worst times a good profit can be realised by the ordinary manufacture of iron; in addition thereto, by means of the valuable patent, many descriptions of fine iron can be made which have not hitherto been produced from Cleveland pig iron alone, such as hoops, sheets, &c., equal in quality to the best makes of South Staffordshire.

The works are now in operation, a considerable quantity of iron having already been produced and sold; large orders are also in course of execution at very remunerative prices, and when the extensions are complete it is estimated that, at the present price of the raw material, wages, &c., manufactured iron will be produced, showing at market rates, a very considerable profit. Taking this profit at only 20s per ton on the 25,000 tons per annum intended to be manufactured, a return would result of about 25 per cent. per annum on the proposed paid-up capital. A considerable income may also be derived from granting royalties, if thought desirable, under this patent.

The present condition and prospects of the iron trade offer unusual inducements to embark in an undertaking of this kind, the demand exceeding the power of production, whilst the greatly increasing use of iron for building, shipbuilding, tramways, agricultural machinery, and many other purposes, guarantees a still larger demand in the future.

The estimation in which such investments are held may be inferred from the annexed quotations of similar undertakings in the North of England.

SECRETARY (PRO TEM.)—J. Russell Clipperton, Esq.

TEMPORARY OFFICES—3 Salter's Hall court, Cannon street, E.C.

The demand for high-class iron ores has, during recent years, increased so rapidly that the prices of such ores have gradually advanced, until within the last year their rise has amounted to between 50 and 75 per cent. The increased production of steel made upon the Bessemer process is alone almost sufficient to account for this advance.

Owing to these facts, the attention of ironmasters is now being directed to foreign sources for a supply of ore, in particular to the Spanish mines. The want of railroads and other roads in Spain has hitherto presented insurmountable difficulties to any large and regular exportation of ore from that country.

This Company has been formed to purchase and take over as a going concern the iron mines or quarries now in full work, with the new railway, pier, plant, &c., situate at Marbella, in Spain, midway between Malaga and Gibraltar, and within 3½ miles of the sea, the property of Messrs W. and S. S. Malcolm, of Glasgow.

The following are the particulars of the property, &c. :—

Description.—The mines are held in perpetuity direct from the Crown without any royalty, and subject only to a nominal charge of £20 a year, while the land upon which the railway, works, and houses are erected is absolute property, and subject to no payment

The mines—or more properly quarries—comprise an enormous deposit or mass of ore on the west side and centre of the valley of the River Secundo. The workings have hitherto been only on the surface of the mass—taking off the top without exploring in depth or northward up the valley. The method of working the ore is the same as that adopted in ordinary stone quarries in this country. The mines are connected with the sea by a substantial railway about 3½ miles in length, terminating in an iron pier just completed, from which 1,000 tons of ore can be shipped per day. The depth of water at the loading berths of the pier is sufficient for steamers of 1,000 to 1,200 tons burden.

Quality of the Ore.—The quality is rich magnetic of the finest description. Five analyses of the ore have been made. The following is one by Dr Noad, of London. This analysis was made, not at the instance or on behalf of the vendors, but of the Ebbw Vale Company.

" Protoxide of iron	28
" Peroxide of iron	70
" Silica	2
" Lime, magnesia, and phosphoric acid	Mere traces.
" Sulphur	None.
	100·00

" Iron, 71 per cent.

" The above shows an ore of the highest quality."

The above is the analysis of a specimen of the ore, but it is well known that working results never come up to a scientific analysis. The Ebbw Vale Company and the Dowlais Company have for some time been buying and smelting the ore, and the following are the quarterly results of the former Company's working for the last 15 months as regards the percentage of iron the ore contains :—

1870.			1871.		
June.	September.	December.	March.	June.	September.
60·57	59·43	61·30.	61·19	61·25	61.99

Neither Dr Noad nor the above-named Companies have found sulphur or phosphorus in the ore, which is therefore peculiarly adapted for the Bessemer process.

Quantity.—On this subject, the following extract from the report of the well known engineer, Mr R. C. May, of Great George street, Westminster, speaks for itself:—

" You have asked me for an estimate of the probable quantity of material which the property contains. It is almost impossible to judge of material in such enormous masses, and to say that it is 'practically inexhaustible' has become such a hackneyed phrase, that I do not like to employ it. It has been proved to 90 feet depth, and it extends to such a width from east to west, and so far up the valley, that there must be at least twelve million tons without going below the present levels, and there can be no doubt but that the mineral exists to a far greater depth, and the water, if any, would be free at 100 feet below the present workings."

Cost of Working the Ore, &c.—The average cost of the ore delivered at the Welsh ports is, according to Mr May's Report, estimated to be 16s 9d per ton, and at Middlesborough and Glasgow 18s 9d per ton, and this includes working, railway expenses, freight, and all commissions and charges, as well as the royalty of 6d per ton.

Selling Price of Ore.—The present selling price of the ore is from 24s to 27s per ton, according to port of delivery—the most recent sale, however, has been at 28s.

Estimated Profit.—It is estimated, therefore, that the profit will be equal to from 7s to 9s per ton, which, on an out-turn of only 100,000 tons per annum, would give a return of from £35,000 to £45,000 per annum, whereas the out-turn is expected to rise to double that quantity.

Taking the estimate of Mr May as to the quantity—viz., twelve millions of tons (which estimate is confined to the ore down to the present levels),—it would give sufficient ore for working 200,000 tons a year for 60 years, and at a profit of only 5s per ton, would return £3,000,000 sterling to the shareholders.

Guarantee of 15 per Cent.—The vendors are so convinced of the profitable nature of the property and the business, that they have not only consented to take a considerable proportion of their purchase money in shares, but have guaranteed a minimum dividend of 15 per cent. for the period of five years on the capital issued to the public but the vendors are, if the profits during the five years shall exceed £15 per cent., to be repaid out of such excess of profits, any sum they may have paid under their guarantee, in manner provided by the agreement. This guarantee would give the shareholders a return of three-fourths of their capital in the form of dividends in the five years. The vendors also agree, towards securing the performance of the guarantee, to leave in the hands of the Directors £50,000 of their shares and the entire produce of the royalty during the currency of the guarantee.

Railway and Pier Plant.—The mines and railway are fitted with new plant, tools, and appliances, consisting of wire tramway, locomotive engines, waggons, repairing shops, storehouses, railway and coal, and ore depots sufficient to work and despatch a quantity of ore equal to 150,000 to 200,000 tons per year, while a very small outlay on rolling-stock would enable the quantity to be raised to 300,000 tons, as may be seen by the accompanying report of Mr May, which gives a full description of the railway, pier, and plant.

Carriage of Ore.—The average freight is about 13s to the Welsh ports, and 15s to Middlesborough or the Clyde. The owners of the mines, being possessed of steamers adapted for the purpose (and which in fact they are now so using) have entered into an agreement with the Company to carry for 5 years any quantity of ore, up to 200,000 tons per annum, at the market rate of freight for the time being, with an option to either party to put an end to the arrangement by 6 months' notice. It has been considered advisable that the Company should not themselves become connected with shipping, and that they should not therefore purchase steamers, but should rather, at least for the present, contract for the carriage of the ore.

Purchase Money.—The purchase-money of the mines, railway, pier, wire tramway, plant, tools, locomotives, engines, waggons, shops, storehouses, and premises, is the sum of £250,000, together with a royalty of 6d per ton on the ore won from the mines.

Date of Delivery of Mines, &c.—Possession of the entire property is to be given to the Company on the 1st January next, and upon the title being properly made out £50,000 of the cash part of the purchase money will be paid to the vendors. They have agreed to take the remaining sum by two equal instalments at three and six months.

Management.—The vendors, Messrs Malcolm, will join the Board of Directors, and act as Managing Directors for the term of five years, at the nominal salary of £250 per annum each for their services.

Preliminary Expenses.—The whole of the preliminary expenses up to the date of the allotment of shares will be paid by the vendors, and no promotion money whatsoever will be paid.

General Remarks.—It is important to note that the mines, railway, and pier, are in actual working order—in fact in actual work, so that the Company will start at once as a going concern, and earn dividends from the commencement. This fact gives this Company a great advantage over any other that may have to go through the tedious and expensive process of constructing a railway and pier and developing a mine.

These mines seem to contain no such elements of uncertainty as are frequently met with in ventures of a similar nature. The ore is on the hill side exposed to view, and can be seen, and its quantity estimated by anyone acquainted with the nature of such deposits. Its quality is beyond question, as shown both by analysis and actual working in the blast-furnace. The cost of working and delivering in this country has been proved by last year's operations, and the demand for the ore is constantly increasing.

The Company is to take over the following contracts for the sale of ore so far as they remain unperformed on the 1st January next :—(1.) A contract dated 2nd September, 1870, with the Ebbw Vale Steel, Iron, and Coal Company, Limited. (2.) A contract dated the 19th September, 1870, with the South Bank Iron Company. (3.) A contract dated 22nd February, 1871, with the Dowlais Iron Company, Limited (4.) A contract dated the 1st day of November, 1871, with the Dalmellington Iron Company. (5.) A contract dated the 23rd day of November, 1871, with the Blaenavon Iron Company. (6.) A contract dated the 7th day of December, 1871, with Messrs Colin, Dunlop, and Co.

An agreement has been entered into by the Company, dated the 8th day of December, 1871, and made between William Malcolm and Samuel Smythe Malcolm on the one part, and George Anderson, Esq., M.P., and Joseph Dodds, Esq., M.P., trustees for and on behalf of the Company, of the other part.

The articles of association and copies of the said contracts and agreement can be seen at the Offices of the Solicitors to the Company.

Samples of the ore can be seen at the Offices of the Company, and also of the Solicitors.

If no allotment be made, the application money will be returned in full.

Should a smaller number of shares than those applied for be allotted, the balance of the sum deposited will be appropriated towards the payment of the amount payable on allotment.

Forms of application for shares can be obtained from the Bankers and branches, the Solicitors and Brokers, and at the Offices of the Company.

THE MARBELLA IRON ORE COMPANY, LIMITED.

Notice is hereby given, that the SUBSCRIPTION LISTS for SHARES in the above Company will CLOSE on SATURDAY, the 16th instant, for LONDON, and MONDAY, the 18th instant, for the COUNTRY.

On November 25 was Published, No. XI., New Series, Price 8d and 8½d,

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL for November gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains

A FINANCIAL RECORD OF THE MONTH;

New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to November 22.

Advertisements for the next Number, to be published on December 30, must be sent, to insure insertion, on or before December 28.

The December Number of the INVESTOR'S MONTHLY MANUAL will give, in addition to the usual information, the Highest and Lowest Prices of all Stocks and Shares for the last Three Years, the latest quotations for 1870 (so as to indicate the Exact Movement during the Twelve Months), a Complete Directory, the names of the Markets where each Security is chiefly dealt in, a Financial History of the Year 1871 (including a Tabulated Chronicle of Events), besides Memoranda relating to the Financial Position of Foreign and Colonial Governments, to Railways, &c., &c. A copious Index will be added for purposes of reference.

This Double Number will be published on Saturday, the 30th of December. Price 1s 4d; by Post, 1s 4½d.

OFFICE—340 Strand.

THE MONEY MARKET.

There has never been a time when anything like so much of the money in the English money market belonged to foreign Governments.

1st. There is the 2,000,000*l* of American money of which we spoke last week. The curious operation in Bank post bills which we then mentioned is at an end, and the money is returned in the ordinary shape of private deposits. But it is still the money of the American Government, and may be called for when it suits their convenience. It is indeed very strange that it should remain here at all. The rate to be made of money at New York is 7 per cent., and that a large sum should be kept in England at low interest, or at no interest, by the American Government, when they can make so much of it in their own country, is not likely. So much (if any) as may be required by the Five-Twenties, to be converted in March, may remain here, but all the rest, upon every doctrine of probability, will go sooner or later. And we do not know if this 2,000,000*l* is all the money of the American Government now in London. The *New York Chronicle*, the best financial authority in the United States, estimated that the effect of Mr Boutwell's operation, now terminated, would be to give the American Government 4,000,000*l* in London; and as the conclusion of the operation is not known in detail, we cannot say how near that estimate is to the truth, or how far from it.

2nd. There is the money of the German Government, amounting to a very large, though not known, sum. This will probably remain here as long as it can be employed here better than elsewhere. The Mint at Berlin is already full of work, and has more raw material at hand than it is ready to manufacture. But the rate of interest has shown some tendency to rise in Germany, and bills upon that country were more in demand to-day than for some time past.

3rd. It is said also, on good authority, that a considerable amount of French money is also in London; but we cannot say how much, or precisely on what account.

The course of our money market is therefore exceedingly difficult to predict. We have enormous seeming wealth, but it is not produced, as is usual in the money market, by an aggregate of small balances, but only by the great sums left by three single depositors. We can never be so sure of the intentions of two or three people as we can of a great number. Every banker knows that the same sum is not worth near so much to him when it is left by two people, as when it is left by two hundred, because he cannot so certainly count on its remaining with him. The only rules to be observed are those which we have from week to week inculcated. First, by raising the rate of interest accumulate an ample reserve. Secondly, when you have accumulated it make no effort to keep foreign money here which you do not want, and which you cannot profitably employ. Lower the rate of interest fearlessly, just as you would if the money you held was domestic and not foreign money, and then if the money leaves you, use your reserve for the purpose for which you accumulated it—that is, pay it away. For the present this policy will involve lower rates, and if it should also involve raising the rate of interest rapidly at a subsequent time, we must submit to the evil of the fluctuation. Lombard street is becoming more and more the great bank of the world, and we must submit to the evil of having foreign balances sometimes withdrawn from us, if we are at other times to have the advantage of holding them.

THE ILLNESS OF THE PRINCE OF WALES.

Nothing could show more clearly the extreme shallowness and rootlessness of the Republican movement than the universal excitement and sympathy which has been called forth by the imminent danger of the Prince of Wales. In the Press perhaps that excitement, genuine and wide-spread as it has undoubtedly been, may have been a little magnified. But no political observer, however sober, can doubt that from one end of Great Britain to the other a feeling has shown itself which far exceeds the limits of any constitutional or doctrinal allegiances to a system,—which is indeed of the nature of direct personal loyalty. We do not of course mean for a moment that this loyalty is so strong that it would survive any real collision with the accepted political principles of the kingdom. In an age when loyalty was much more of a religion than it is now, such a collision took place, and the result proved that loyalty was even then scarcely a match for the earnestness of the political beliefs against which it was unfortunately pitted; and certainly loyalty was not only then stronger, but the political traditions which came into rivalry with it were not then nearly so universal or backed by so respectable a tradition as they would be now. But no collision between the loyalty of to-day and the political creed of to-day is to be apprehended. Indeed one meaning of the wide-spread emotion we have seen, is that the English people are so far from anticipating any such collision that they not only identify the political system under which they live with the Throne, but even love the Throne for its own sake as well as for the sake of the system with which it is connected. The eagerness for hourly reports of the Prince's condition could not spring from any mere love for the monarchical system, for the monarchical system does not in any way depend on the Prince's life, and its fixity would be quite consistent with a very moderate and indifferent feeling on the subject. There was probably never a time at which the Monarchy was in less danger than on the death of that Prince Frederick (son of George II.), at the contemptuous and epigrammatic epitaph on whom all the world laughed. Yet certainly at that time the principle of constitutional loyalty was in no degree strengthened and adorned by the emotion of popular sympathy with the occupant of the Throne and with the heir to it. At present it may well be that, from a multitude of circumstances, the emotion of personal sympathy has a good deal outrun even the abstract attachment to the Monarchy. The respect for the Queen, and the warm sympathy with her in the great loss she sustained ten years ago—a sympathy heightened by the knowledge that she herself has so recently passed through a very trying illness—the great popularity of the young Princess of Wales, and the annoyance and sense of insecurity caused by the shallow Republican agitation, have all contributed to give an even warmer complexion to the cordial pity and sympathy of the hour, than might under other circumstances have attached thereto. But still it is impossible to doubt that the personal sympathy with the Prince of Wales is both a gauge and a guarantee of the depth of English loyalty itself. It is a gauge of it, for the heir to the Throne would hardly be personally so popular if the Monarchy itself were not equally popular; indeed he has done nothing, and could not easily have done anything, to cause much personal attachment to himself as an individual and apart from his relation to the Monarchy. Again this popular sympathy is a guarantee for the continuance of loyalty to the monarchical principle, because it convinces the whole world that there is no use in even raising a discussion upon these fundamental questions of our political system, that these questions are answered already by the vast majority of the masses of the people, and answered in the sense that change is not desired but dreaded. To ascertain this clearly and incidentally before any real agitation of these matters has been entered upon, is no slight guarantee that no such agitation will be entered upon, that it will be still-born; whereas if we had had no such incidental demonstration that there is no wish to open the question, a very serious alarm might have been created and violent party passions roused before we had arrived at any certainty in the matter. As it is, it almost seems as if Sir Charles Dilke had anticipated the decisive opportunity which was approaching for sounding English sentiment on the subject of a great constitutional change, and had resolved to turn it to account by just raising the question in time to let the burst of public sympathy for the Prince pronounce a most decisive and convincing answer. Without the starting of the doubt by the Member for Chelsea, the great outburst of popular sympathy which we have seen would hardly have had the same significance.

One thing comes out remarkably in this strength of public feeling for the Prince, and comes out especially in connexion with angry expressions of economical aversion for the supposed cost of the monarchical system which have been recently heard, and it is this;—that those expressions of reluctance to be taxed for royal portions and dowries were in no degree whatever pretexts concealing a deeper feeling of social republicanism, but were on the contrary no more than what they seemed—fits of somewhat vague and ignorant irritation against what was thought a needless and callous tax upon the people. We may even take it for granted that Englishman, while bent upon cutting down every institution which interferes with the political welfare of the country, have not only no jealousy of, but a real sentiment of regard for, those social landmarks of the ancient times which it is possible to retain without any substantial interference with the wellbeing of the people. The House of Lords is pretty generally known to be of very little substantial use in popular legislation, and sometimes to cause very great delays in such legislation; but so far from feeling any disposition to root out the House of Lords, the country is at present quite indifferent to the mildest plans of reform for it. The truth is, that the House of Lords is regarded with pride as a grand vestige of our historical constitution, and as not in any formidable way interfering with popular wishes; and consequently there is something more than apathy, almost aversion, to any plans of serious change. The Throne has unfortunately acquired a reputation for really costing the people a very great pecuniary sacrifice—a gross political blunder on their part, though not one easy to eradicate,—and consequently, whenever any question arises of a money-vote, supposed to be superfluous, for the Royal Family, there is a very substantial manifestation of popular displeasure. But so little does this lead to any active dislike of the Throne, that no sooner is there real fear of losing the heir to the Throne, than the whole people give with one accord signs of sorrow, and even grief. Nonconformists, in the very height of their grievance against the Education Bill, suspend their conferences till the illness of the Prince shall have passed its critical stage. The most popular preachers and lecturers are compelled to direct their thoughts to this subject, for no one will listen willingly to any other. The streets in all the towns are crowded with people anxious to read the latest bulletin. Nay, so strong is the feeling here, that even India and Canada—nay, America itself, which is not part of our political universe—catch the contagion of anxiety, and prayers are offered on the same day before the sacred Fires in Parsee temples, and in churches, and chapels, and conventicles all over the world, for his recovery. This could not be if the *social* loyalty of the English people to the Throne were not completely intact. Grumble as men may at what they fancy serious taxes paid for the support of the Royal Family, they have nothing but goodwill for that family itself, and for its grand position. There is no shade of *levelling* feeling at work as yet in the English people. Aristocracy and royalty are still thoroughly *popular* social ideas,—nay, the latter at least is more than popular, for it calls forth something of effusion and almost tenderness whenever it is presented to us in circumstances completely divorced from all questions of political partisanship or financial sacrifice. The recovery of the Prince of Wales,—of which there seems to be now a very reasonable hope,—will certainly cause the nation at large far more real pleasure than any purely political satisfaction which you could imagine or propose to them.

THE ERRORS OF M. THIERS.

The Message of M. Thiers is one of the most signal examples how completely very good writing may be allied with very bad thinking. Every sentence in it is expressed with a rare and delicate precision. There is perhaps not a man in Europe who could have written it better or so well. But on the other hand there is no man who could express himself nearly so well, who would have had such benighted opinions to express. There are many things which are arguable, and many others which are not arguable. And M. Thiers on several points commits himself to opinions which are beyond the pale of rational

argument, and which are universally condemned by the higher thoughts of Europe—by what he himself appeals to as "the "clear intelligence of modern society."

First,—M. Thiers commits himself to Protection; and as to this, all the best opinion of Europe is decided. A man who is against Free-trade, on principle and as such, enters himself in the class of third-rate intellects. All higher classes were convinced 30 years, or more than 30 years, ago. We can well conceive practical doubts; we can quite understand a statesman who says—"My country has been subject to pro- "tective laws for many years, has never in fact been subject "to any other; we must therefore be careful how we change "our system, how, having long fostered mistaken industries, we "all at once and in a moment ruin those industries." This may be practical statemanship, but there is no statesmanship at all in thinking that it is best to make things at home which can be bought cheaper abroad, and the whole idea of M. Thiers is to cause as many things to be made at home as possible.

It had been rumoured in England that the instruction of facts and the responsibilities of power had weakened the confidence of M. Thiers in his former and erroneous opinions. It had been said that though he had all his life been a strong Protectionist, he now doubted as to the practicability, if not as to the desirableness, of Protection. But there is no trace of this in his Message. Upon commercial treaties he argues always as if each nation was to sell as much, to buy as little, as possible. He says that the French Government offered not to "denounce" the treaty with England if England would consent to an augmented duty on certain classes of English goods. But it does not cross his mind—there is not a sentence in the whole paper to show—that he ever understood that the French consumer wanted those goods; that he would not have bought them if he did not want them; that the offer which was made to England was really a proposal to prevent Frenchmen from purchasing that which they themselves preferred to purchase. He complains again that England met him with a refusal, because she did not wish to be a party to the creation of a new protection. But how is this consistent, when he throughout argues that Free-trade is a mistake, and that a moderate Protection, "such as enough to stimulate home "producers to encouragement, but not enough to stupify "them by monopoly," is beneficial? It was reasonable in the English Government to think that in aiding a Protectionist Government to re-establish Protection, it might itself be accused of assisting Protection. M. Thiers asks too—"If such "proposals as these are not to be admitted after the stipulated "ten years, why was any such period fixed for revision at "all?" The reply is that all Englishmen hoped, and but for untoward events were justified in hoping, that at the end of ten years a wiser Government would now have existed in France, and one inclined to advance further towards Free-trade—not like this Government, disposed to retract and fall back.

In his adherence to Protection M. Thiers has at least one excuse—a powerful one to a practical politician, if a trifling one to a rational economist,—he is supported by powerful interests. But in his *next* error, he is not supported by any interest. He proposes to establish an annual sinking fund of eight millions sterling, though the taxes are yet unfixed, and though huge loans are necessary and are in progress. He does not know that all instructed finance forbids paying with the right hand if you have to borrow the money so paid with the left. And this absurdity is gratuitous, for no corrupt interest wishes this, any more than any sound argument supports it.

Thirdly,—M Thiers proposes that the Bank of France shall augment the Bank circulation by 12, or 16, or 24 millions sterling, as the Assembly may decide to be best. And he treats this extension lightly. He says "that the credit of "the Bank is excellent, that its securities are good, that its "bullion is large, that its note as yet has not fallen to more "than 2 per cent. discount, and that the most 'renowned bank- "'notes' have several times been at more." But he does not remember that those "renowned banknotes" were at 2 per cent. discount before they fell to a greater. Only a few months since M. Thiers boasted that the note of the Bank of France was at a premium, even though cash payments were suspended—that is to say, he said, they were better than coin, even though coin could no longer be obtained for them. Now he has to admit that they are at a discount, though, as he argues, that discount is only trivial. But then that beginning of depreciation has been caused by excess of quantity, and he goes on to propose a further excess of quantity. He admits the effect of the past poison, and goes on to give more poison. The good credit of the Bank of France, its large bullion, its good bills, on which he dwells with emphasis, are beside the argument. The one important point is that there are already too many banknotes, and that in consequence gold is leaving France, and those notes are falling in value. And the remedy of M. Thiers is to issue more notes.

THE HUNGARIAN COMPROMISE WITH AUSTRIAN CREDITORS.

We have this week to record a rather curious transaction arising out of the fatal act of repudiation of which Austria was guilty in 1868. The result of that act was to exclude Austrian securities from being dealt in on the London Stock Exchange, and a certain number of the bondholders who were forced to convert with a loss of one-fifth of their interest obtained a quotation instead of the certificates of claim issued by their Committee as a record of the Austrian default, and to preserve the rights of the creditors. The measures thus resorted to, as we have often had occasion to notice, have been sorely felt in all parts of the Austrian dominions, rendering it impossible to borrow here any money for Austrian enterprises, and now they have led to a compromise, not by the Government directly implicated, but by an associated Government to which the exclusion of the Stock Exchange technically (though we also believe justly) extended. The Government of Hungary wished to bring out a loan of 3,000,000*l* on the London Stock Exchange, and was met by the initial difficulty of the exclusion from quotation, which was the result of the Austrian repudiation. It was argued for them that they were not responsible, that Cis-Leithan Austria had become a separate country under a distinct Government, that they had arranged with Austria about their common obligations, and that they had nothing to do with Austria's arrangements with its creditors. But the reply was, we think, unanswerable, and was suggested by ourselves at the time the original offence was committed. Hungary was *de facto* a part of the Austrian Empire when the debts were contracted, and could not be released from its external obligation by any internal arrangements. It remained the business of the Hungarian Government in setting up for itself to see that the debt with its creditors was sufficiently provided for. The default of Cis-Leithan Austria was therefore justly visited upon it, and the consequence has at any rate been satisfactory to the Austrian bondholders. The Hungarian Government has found it will be cheaper to pay something rather than dispute the question, and has accordingly offered 5*l* for each 100*l* certificate of claim, the amount offered, it is calculated, being about a third or fourth of what the certificate-holders would be entitled to from the Austrian Government. The compromise is certainly not so advantageous as it ought to be to the bondholders; but they will be better off than if they had not resisted, and in principle they give up less than if the compromise was made directly with Austria, because the certificates will exist either in the hands of the Hungarian Government or the Syndicate which has contracted for the loan, and will be very unpleasant to Austria until legitimately got rid of. The transaction as respects Austria comes to this—that the bondholders have sold their bad debts at a discount to a third party, who had an interest in buying them, but the debts continue to exist. In exchange, the Hungarian Government is to obtain the quotation of its new loan, and will in fact be considered to have entirely purged its discredit. It therefore gains most, but it is still a great deal for the creditors to have obtained so much for a claim against an obstinate repudiator by means of the pressure exercised upon a debtor less certainly bound, and whose interest is much smaller.

There are one or two points about the arrangement and its effects which should be specially noticed. It seems doubtful, in the *first* place to what extent Hungary is paying for the compromise. The cost at most is not very much, the claims being only 500,000*l*, and 5 per cent. upon them being 25,000*l*; but it is doubtful whether Hungary pays even this amount directly. The offer, as will be seen from the subjoined correspondence, is not made directly by the Hungarian Government, but by the representatives of the syndicate of bankers

which has contracted for the loan. It is only stated that "the Hungarian Government is desirous that the London "Stock Exchange should be opened to the introduction and "official quotation of Hungarian Government loans." There is no word of the Hungarian Government offering to pay the bondholders anything to secure this quotation. So far as the official correspondence goes, they take no notice of the means which the Syndicate might use to obtain the official quotation which was so desirable. And the Syndicate may have acted on its own account, taking into consideration the chance of having to buy off the Austrian certificate-holders when the contract for the loan was made. All this is certainly less satisfactory than if the offer had come directly and avowedly from the Hungarian Government, and entirely at its expense. Still the Hungarian Government is quite sufficiently implicated in the transaction to make its repentance and acknowledgment of the repudiation quite clear. It was expressly affirmed at the meeting of the certificate-holders by the agents for the loan, that the negotiation had the sanction of the Hungarian Government, and even if the Syndicate finds the money directly, we may be quite sure that Hungary has had to pay indirectly—the Syndicate charging a larger commission, in consequence of the existence of this particular difficulty. It will be impossible afterwards for Hungary to turn round and say that it had nothing to do with the transaction, and was in no way bound by it.

The next point is the peculiar position which Austria will be placed in by the arrangement. We have already glanced at the advantage to the certificate-holders, in the circumstance that though they have accepted a small sum themselves, they have not cancelled the debt. The certificates of claim will be in the hands of the Hungarian Government or syndicate of bankers, constituting as effective a debt as ever against Austria, and still debarring it from credit on the London Stock Exchange. Austria, therefore, still continues to suffer for its wrongdoing, so that the account of the repudiation is not entirely closed. What Austria will have suffered in loss of credit, and the difficulty of importing fresh capital into the country to develop its wonderful resources, must already be indefinitely more than the paltry saving made by the repudiation, and increases every day that the discredit continues.

The transaction is thus another evidence of the real power over their debtors which the creditors of foreign States possess. The refusal to lend again when a State repudiates is plainly a most powerful instrument of compulsion, and the refusal, which would be difficult if left to individual wills, is made efficacious through the combined action of a body like the Stock Exchange. There are conceivable cases in which a State might say it would be more profitable for it to save the interest it pays than to retain the power of borrowing new money, which the least act of repudiation involves. But practically these cases do not seem to exist—at least as respects any large State. There are sufficient large interests at home bound up with the debt to prevent any wholesale repudiation, and slighter acts of repudiation manifestly do not pay. Possibly it would be easier for foreign Governments to repudiate were there more markets than one in which they could borrow, but especially since Paris has been closed to large financial operations by the introduction of a paper currency, foreign Governments have no choice. They must come to the London market, or go without the money. Even if other monetary centres should be established in time, the condition of the world is now such, by means of telegraphs and other facilities of communication, that they would all act in sympathy, and discredit in one would be discredit in all. This altered condition of things should be clearly remembered by would-be repudiating Governments.

The following is the correspondence which has recently passed between Messrs R. Raphael and Sons (as representatives of a syndicate of Bankers who have contracted with the Hungarian Government for the issue of a new loan) and the Committee of Anglo-Austrian Certificate-holders :—

"London, Dec. 7, 1871.

"To the Committee of Anglo-Austrian Certificate-holders, London.

"Gentlemen,—As the Hungarian Government is desirous that the London Stock Exchange should be opened to the introduction and official quotation of Hungarian Government Loans, and as a syndicate of bankers has contracted with the Hungarian Government for the emission of a new loan, we, as the representatives of the said syndicate, with a view of carrying out the wishes of the Hungarian Government, hereby submit to your honourable committee the following proposals :—

"The sum of 5*l* for each Anglo-Austrian Certificate of claim of 100*l*, the total amount of which is understood not to exceed 500,000*l*, shall be paid on behalf of the said syndicate to the holders of said certificates, in consideration and full discharge of their claims respecting the said certificates. We engage to make the payment of 5*l* per 100*l* certificate within eight days after the official quotation on the London Stock Exchange shall have been granted to the new Hungarian Loan.—Your obedient servants,

(Signed) "Raphael and Sons."

"Committee of Anglo-Austrian Bondholders, Council of Foreign Bondholders, 115 Palmerston buildings, London, Dec. 7, 1871.

"Messrs R. Raphael and Sons, London.—Gentlemen,—We beg to acknowledge the receipt of your letter of this day, proposing an arrangement of the Anglo-Austrian certificates of claim.

"We hereby accept the terms of such proposed arrangement, subject to the ratification by the certificate-holders, a meeting of whom has been convened for Monday next, the 11th December.

"After such ratification, this committee will inform the Committee of the Stock Exchange of the said arrangement having been effected, and will, at the same time, request the removal of the Anglo-Austrian certificates of claim from the Official List, and will declare that no objection whatever will be offered to the introduction and official quotation of the Hungarian Loans.

"When the above arrangement shall have been carried out, this committee will declare itself to be dissolved.—By order of the committee,

(Signed) "Hyde Clarke, Secretary."

MR LOWE ON EDUCATION.

Mr Lowe's speech at Halifax last week will do good both to the Government and to the Liberal party. The greatest permanent danger of both is the extreme discontent and suspicion with which their policy upon the subject of education has come to be regarded by the great body of Nonconformists throughout the country. These suspicions, as we have often shown, are extravagant, but they are not altogether unnatural, and whether reasonable or unreasonable, they cannot be wholly disregarded without serious danger of alienating a body of electors, valuable not only from their numbers, but from the very great steadiness and fidelity which, for a whole generation, they have displayed towards the Liberal side. There can be little doubt, we imagine, in the minds of anyone who reads the proceedings of the Birmingham League, that they are even more disappointed than annoyed, and even more suspicious than disappointed; that they are amazed at the strength which the Establishment, with its great command of wealth, has been enabled to display in the foundation of denominational schools, and suspicious that this strength was anticipated with pleasure by a Ministry in which the Premier is believed to entertain High Church proclivities, and the Minister of Education is supposed, without proof, to be a determined disciple of Dr Arnold. The Nonconformists anticipated a very different result, a system approximating much more closely to that of the Eastern States of the American Union, and are so bitter in consequence that a general election just now might have the most dangerous results. It is at such a juncture that the Chancellor of the Exchequer steps forward to tell the Nonconformists, in a speech of the most manly straightforwardness and lucidity, that he for one is not cheating them, that he entirely sympathises with their main idea—that education ought to be undenominational, but that circumstances and opinion are too strong both for them and for the Ministry. He holds that it is as much the duty of Government to provide education as to establish a system of police, or to provide for the safety of society; and this duty is not performed by delegating it to anybody who will subscribe money. He tried, when in office as Vice-President, to carry out this idea, but the people would not support him; "many who are now very loud were mute," and the Government were driven back upon the subscribers. All they could do they did. They imposed upon the denominational schools a rigid conscience clause; they made State inspection a *sine quâ non* of pecuniary aid; they secularised inspection; and they reduced the entire organisation, as far as possible, to a branch of the State machinery. Beyond this the Government was unable to go without destroying all the institutions established during twenty-five years—that is, says Mr Lowe, without sacrificing a whole generation, which must be left uneducated while new machinery is being prepared. Is it wise, even from the Nonconformist point of view, to exhaust the strength of the School Boards in replacing these schools which are in existence, and

are at work, and are protected by the conscience clause, instead of directing their energies to the education of the great body of children whom the denominational schools have not yet reached? To do so would be a waste of power, of which no one sincerely interested in education could possibly be guilty, unless at heart he considered the main use of education to be religious proselytism.

This is plain speaking, and we do not wonder that it was received at Halifax with applause. As we have said before, the great grievance of the Nonconformists is not so much what has been done, as an idea that it has been done with intent—that, to use their own language, the Government has been "playing the game of the Church." It is quite clear, from Mr Lowe's speech, that this is not the case—that he at least, by no means the least influential member of the Ministry, is heartily in sympathy with the discontented, and only bends to a necessity which he perceives, and which he calls upon them to perceive also. His object is theirs; and it is therefore certain that, so far as his power extends, no step will be taken which will designedly intensify the denominational character of the schools; that this aspect of the system will be repressed rather than encouraged, will be accepted as an unpleasing necessity instead of being fostered as a most acceptable instrument. This is precisely the declaration the Nonconformists wanted, and it will, we believe, tend to soothe them more than a much more elaborate speech, while, as is evident from the comments of the Press, it has not irritated the Church party, who, like Englishmen generally, desire above all things definite information as to the policy to be pursued, relief from that haze of uncertainty in which it is the tendency of this Administration to wrap up its purposes. That is the great merit of Mr Lowe as a political orator. His audience may not like what he says, but they always know what he means. He is pretty sure to rasp them in some sensitive place, but he is quite sure not to leave them with a sense that they have listened to a great number of pretty words, and are no better instructed after all. The Government, according to the Chancellor of the Exchequer's account, supports denominational education as a necessity it cannot help, as an alternative to allowing a chasm in the education of the country, which it would take years to fill up, but it only accepts, and did not design, that system with any ulterior end. That is the true tone to take, whether denominational education be better or worse than a secular system. If it is better, there it is; if it is worse, there it is too; an endurable alternative for something much worse—namely, such a reconstruction of the entire machinery as it would take years to accomplish, while in the interval between the two systems a whole generation would grow up untaught.

Mr Lowe is equally clear and equally sensible upon the next two points—the kind of education which should be given in the primary schools, and the method by which Government should assist in developing the higher instruction. Remembering the hereditary ignorance of most of the children to be taught, and the narrow limit of time within which they can remain at school, he is opposed to teaching too much, would confine effort almost entirely to the "three R's"—reading, writing and arithmetic—the instruments through which the child may hereafter acquire all knowledge for itself. Add a little geography, and we believe that Mr Lowe is right. No one not engaged in education knows the time and labour it takes to teach a child wholly devoid of hereditary culture how to read as grown up people of the better class read, that is, without effort of any kind, and almost without consciousness; and yet, unless this power is attained, education may be said to be almost without value. It certainly cannot be acquired before ten years of age without the devotion of almost the whole time to that study and to writing; and any diversion of the mind to other subjects ends in such a neglect of this one, that boys who can read at ten, at thirty can barely spell out their own names. Nor is Mr Lowe's caution about colleges less valuable. It is not, except in rare cases, the business of the State to found colleges, and so get itself involved in the inextricable meshes of the "religious difficulty." Its true function is to found universities, dignified and competent boards of examination, independent of all teachers, and rigorous in examining the results of their teaching. When it has done this, it has done all that is necessary, and, as a rule, all that is expedient.

BUSINESS NOTES.

The Decline in the American Gold Premium.—One of the most noticeable facts in the commercial telegrams from New York this week is the decline in the gold premium to 109¼—a fall of about 1 per cent. on the week, and about 1 per cent. lower than the lowest point yet touched in the decline of the last few years. The lowest point previously in the present year was 110⅛, and the lowest point in 1870 was 110. There has been a continuous decline in the quotation for the last two months, the opening price in November having been about 112¼, and the closing 110⅜, the fall having been tolerably steady in the interval. So far as we can judge too the present decline, like the decline in 1869 and 1870, is due to an appreciation of the paper currency, and not to any special causes affecting gold. The New York *Commercial Chronicle*, in speaking of the movements of the money market on the 2nd inst., before the present fall took place, thus describes the increased demand for currency which had set in:—"This movement," it says [viz., the natural flow of currency and deposits to the interior], "has been "somewhat checked by recent events. But it is now setting "in, and there are not wanting indications of its efficiency. "Among these we may mention the loss by our banks last "week of 1½ millions of legal tender reserve, while they increased their loans by 2 millions. These greenbacks were "doubtless shipped to the South and West, and further shipments have been since going on." The greater absorption of the currency is of course a very sufficient reason for its increase in value; and if the demand only continues a little time longer, it is barely possible that the appreciation may continue until the paper is again at par. It will be very singular if the United States, by its natural power of expansion, should bring about the restoration of its paper to a condition in which it would be easy to make it convertible. The opportunity of assisting the process by artificial means ought not to be lost sight of now by the American Government.

The Secrecy of Government Financial Operations.—We have more than once had occasion to censure the love of secrecy displayed by Governments in conducting their large financial operations. Mr Lowe, in borrowing money to pay for the telegraphs, did so by creating stock silently, and gradually feeding the market, and more recently the German Government has caused no little mischief by choosing to veil its operations for repaying the debt in similar obscurity. We have now to add a third offender to the list. The Indian Government, as we learn from the Indian Finance Blue Book, has for long been habitually guilty of the offence for which Mr Lowe was censured. Mr Seccombe, the Financial Secretary of the Council of State for India, was asked about an item of 4,039,412*l* in the accounts entered as "India 4 per cent. "stock sale proceeds," and explained that this receipt was really a borrowing operation rendered necessary in this country in consequence of the Government in India having requested them to cease drawing. It was part of a sum of 8,000,000*l* which Parliament had authorised the Secretary of State to borrow, and of which 4,900,000*l* yet remaining would be received in a similar manner by the gradual sales of stock. The practice of "feeding the market" is exactly what Mr Lowe described, as will be seen from the following questions by Mr Crawford and the answers:—

9444. Will you describe the practice which you follow in taking that money up in the market; you first instruct, I think, the Governor of the Bank of England to create stock for a certain amount?—Yes.

9445. That is to say, to raise stock in their books?—Yes.

9446. What do you do after that?—Then, the stock being raised, it is sold as favourable opportunities offer by our broker, we taking care not to sell so rapidly as to depreciate the value of the stock, and by that means we obtain a favourable loan.

9447. And how often does that operation occur?—It is almost continuous.

9448. From month to month?—From month to month.

9449. 200,000*l* or 300,000*l* a month?—Sometimes 200,000*l*; if we see that the market is rising (*sic*), we instruct our broker not to sell until he gets a more favourable rate.

9450. And you generally get one price; that is, you get par?—We are selling above par.

9451. What are you getting at this moment?—We are getting at this moment 101½; that is, about 1 per cent. being absorbed by the interest of it, we have a premium of about a half per cent.

Mr Seccombe in his farther examination insists that this obscurity is advantageous to the Government, the system having enabled them in 1859-60 to obtain 102*l* 10s for a 5 per cent.

stock, whereas in offering it to the public in large amounts they only got 97*l*. But we should doubt very much whether business men would agree that either the Indian Government or any other profits by this mode of operation. It is a cause of uncertainty and loss to the whole class of lenders from whom they get the money, and in some way or other all losses of that kind will ultimately fall on the borrower. In any case a Government is never likely to conduct a nice Stock Exchange operation with much skill, and we say this notwithstanding the special allegation of profit made by Mr Seccombe. How are we to calculate the effect of so nasty an operation for the fall as that which is described as selling "as favourable opportunities "offer?" Nothing so checks a rising market as the *repeated* sales by judicious "bears," and we should consider it most probable therefore that the Government has rather lost by checking a natural rise which would have given it a good chance for a new public loan. No doubt in a large new issue the price would be 1 or 2 per cent. under the figure at which the credit of the Government stood for the moment, whereas by the other method the market price is got, but in the former case the market price as a rule would permanently be much higher. The matter, as we have seen, is of great moment for those who lend to the Indian Government, or deal in its securities, and the disposition should be to secure their favour as much as possible unless some very clear advantage is derived from the opposite course.

THE CHANNEL PASSAGE.—The project for a Channel steam-ferry, stated to be brought forward by M. Dupuy de Lome, the celebrated French naval constructor, acting for himself and also in the name of the Société des Forges et Chantiers de la Méditerranée, MM. Drouyn de Lhuys, Scott Russell, and others, appears to be the most promising, practically, of the numerous schemes which have been invented for facilitating the passage between England and France. The idea is to construct three large and powerfully-engined paddle-wheel steamers, each capable of receiving a train of thirty carriages, and that the trains, on arriving at Dover or Calais, should be shunted into the vessels, so that passengers would be enabled to travel between London and Paris without change of carriages. Of course the steamers must be immensely large, and of peculiar construction, to be capable of receiving trains of maximum dimensions; and we observe that the steam-power is to be 1,400-horse, capable of working up to 7,000 horses, the vessels being 450 feet long and 50 feet wide. The estimated rate of speed is 18 knots an hour, and the passage will be performed in one hour and ten minutes in fine weather, and one hour and thirty minutes in bad. It is clear that by means of vessels of this sort, and without change of carriage, passengers will be enabled to effect the Channel passage with some degree of comfort, and the construction of the vessels cannot present such novel difficulties as that of a bridge across, or a tunnel under, the Channel. The greatest novelty about the new scheme will be the construction of special harbours or docks to accommodate the mammoth steamers, and it is proposed on the French side to construct a dock in the form of a quadrant a mile and a-quarter north-east of Calais pier head, and at a distance of three-quarters of a mile from the shore, with which the communication could be effected by a bridge having a single line of rails. The French Government, with whom the promoters are negotiating, will be asked to use its good offices with the English Government to supply sufficient accommodation at Dover. The most minute arrangements are made in the project for transferring the trains from the shore to the steamers, and *vice versa*, and the engineering authority of the promoters is such that the execution of the scheme may be considered easy—the practical point of course being the cost, which for the three steamers will be 400,000*l*. Among the conditions required of the French Government is a mail contract for 20 years, with an annual subsidy of 20,000*l*, and the projectors, if successful, hope to obtain a similar contract and subsidy from the English Government. We do not know whether it is this very scheme or only a like one which the South-Eastern Railway Company is to promote in Parliament in the ensuing Session, but when schemes like this are being actively pushed and well backed by capitalists, the problem of abridging the horrors of the Channel may be considered near its solution.

THE UTILISATION OF SEWAGE—The following extract from the proceedings of the last weekly meeting of the Metropolitan Board of Works, will explain the present position of one of the new sewage companies with reference to the sewage of the Metropolis, about which there is some Stock Exchange interest:—

Mr Shaw brought forward the following motion, pursuant to notice:—

"That this Board having a contract with the Metropolis Sewage and Essex Reclamation Company, which will shortly expire, it would be inexpedient to interfere in any arrangement between that company and the Phosphate Sewage Company, as such an interference might hereafter serve as a plea for an application to Parliament to further extend the contract with the Metropolis Sewage and Essex Reclamation Company, which has hitherto been detrimental to the interests of the ratepayers of the Metropolis; but that inasmuch as the position of the Board with regard to the sewage of the southern side of the Metropolis is different, and they are unhampered by any contract, the Phosphate Sewage Company might be permitted, on application, to make an experiment of their process on the sewage on that side."

After a brief discussion as to matters of form, it was decided that the motion, in its present shape, was informal, upon which Mr Shaw intimated his intention of again bringing forward the subject upon some future occasion.

The Board of Works apparently, though rather slow in its action, is willing enough to allow reasonable facilities for any plausible attempts to purify and utilise the sewage, though as yet there has been no successful result. It may be hoped that in any event it will retain some control of the subject-matter in its own hands, so that if any profit is to be made the Metropolitan taxpayer will benefit by it.

THE EXPIRY OF A TIME-POLICY OF INSURANCE.—A nice question, depending upon the exact hour of the shipwreck of a vessel which was insured by a time-policy, came before the Court of Common Pleas this week, in the case of Morton *v.* Wylie. The policy on the ship in question, the Lucerne steamer, expired at midnight on March 19, 1869, and it was disputed whether the wreck and total loss, which occurred off Ushant, took place before the policy expired or after. The counsel on both sides argued from elaborate calculations as to when the ship could have been wrecked; the plaintiff, who sued upon the policy, contending that already on the 19th the steamer was amidst "the grave of rocks" near Ushant, so that it would probably be wrecked before midnight; and the defendant arguing that on the afternoon of the 19th she had open sea before her. The crew had all been drowned, and the evidence was that of witnesses from the shore, whose observations, however, were made under the disadvantage of thick and heavy weather. Eventually the jury found for the plaintiff, holding that the steamer was lost before the policy sued on had expired. It is difficult to conceive a nicer question coming before a Court of Law, and it was apparently inevitable once the strange conjuncture of circumstances had occurred. At first sight, it might be thought that re-insurance would have mended the matter, as nobody, unless by accident, would let a time-policy run out before renewing it; but even this precaution could not prevent litigation, as the reinsurance, in the actual course of business, was by no means necessarily to be effected with the same underwriters.

ANTE-NUPTIAL SETTLEMENTS IN BANKRUPTCY.—An important question for creditors came before the Chief Judge in Bankruptcy this week, in the case of P. C. Lovett *ex parte* Smart. The application was by a trustee to have a deed of settlement executed by the bankrupt on his marriage on the 2nd December, 1869, declared fraudulent and void as against the creditors. The circumstances are reported to have been very peculiar, the bankrupt having only attained majority on the 20th October, 1867, having previously and subsequently had dealings with a money-lender named Morbey, and having in December, 1869, married the daughter of Morbey, and settled upon her 300*l* per year by way of jointure, with 10,000*l* for the children of the marriage. It was this settlement which the trustee now disputed, on the ground that the bankrupt was in a hopeless state of insolvency at the time of its execution, and it was suggested that Mr Morbey had planned the marriage to place the property beyond the reach of the creditors. Evidence was given however that the bankrupt and the young lady had been long engaged, and the Judge, holding that there was no fraud, decided for the validity of the settlement. Fortunately the cases where creditors are tempted to dispute ante-nuptial settlements are few, but a case like this would go a long way to support the conclusion that creditors should have an opportunity of impeaching such settlements, as well as post-nuptial settlements, on other grounds besides fraud. Where it can be shown that the settler was insolvent at the time, and had continued so to the bankruptcy, or even where the bankruptcy follows the settlement at a short interval,

there would be some cause for carrying the property settled back into the general estate, and making the trustees of the settlement simple creditors along with the others for the amount which the bankrupt had assumed to dispose of. The procedure might in some cases be hard upon the wife and children, but not more hard upon them than the present law is upon other creditors.

PRUDENT FINANCING.—We receive from a correspondent the following suggestions for a "British Credit and Investment Company, Limited." His idea is to have a company on a large scale, and having some of the first commercial names on its management, and on the following principles :—

I. To have agencies, and collect information, in the shape of authentic facts and reports, from all parts of the world, showing the actual state of industrial enterprise in each locality, and the field open for the safe and profitable investment of capital, either in established or new schemes.

II. To publish this information regularly, impartially, without favour or disfavour to particular schemes, and refusing to give any private or confidential information.

III. To employ their own capital in giving temporary aid to such schemes as they think safe and sound on certain conditions, viz. :—

a. That any prospectus issued shall be *bona fide*, true, and honest, and not delusive.

b. That the greatest practicable publicity and accessibility of accounts, and an effective audit, public or otherwise, should be provided for.

c. That the advance by the Credit Company should be for a limited term, and the whole repaid by fixed instalments.

d. That, on the demand of the Credit Company, the scheme assisted shall be wound up at any period within the term agreed upon for the advance of capital.

IV. The general result aimed at should be moderate profits and safe returns. No fixed and entangling investments of the capital of the Credit Company, but the whole capital in constant circulation, always returning at fixed periods.

Our correspondent remarks in support of his plan :—

Is not the present a favourable time for establishing such a company, before a great number of delusive schemes have been launched? Would it not have a great influence in checking the origin of such schemes by providing a safer mode of investment? No doubt rival credit and investment companies would soon appear, and, by offering easier terms, might secure a certain amount of business. But, as we see in the case of the great banking companies of London, this competition would not necessarily be disastrous; it might, in some respects, do good. If one large company were established having something of the *prestige* in commercial investments which the Bank of England has in banking matters, it might raise very much the general standard of commercial honesty and credit. If this plan were established in England, other countries would follow the example; and thus again a wholesome check and competition would be provided. J. G. M.

THE PUBLIC REVENUE AND EXPENDITURE.

THE following are the Receipts into and Payments out of the Exchequer between April 1, 1871, and Dec. 9, 1871 :—

REVENUE AND OTHER RECEIPTS.

	Budget Estimate for 1871-72.	Total Exchequer Receipts To Dec. 9, 1871.		Same time last year.	
	£	£	£	£	£
Balance on 1st April, 1871—					
Bank of England	...	5,678,915		7,633,761	
Bank of Ireland	...	1,344,520		972,887	
			7,023,435		8,606,648
REVENUE.					
Customs	20,100,000	13,898,000		13,909,000	
Excise	22,420,000	14,390,000		14,058,000	
Stamps	8,750,000	6,606,000		6,035,000	
Taxes	2,330,000	425,000		805,000	
Income Tax	8,820,000	1,864,000		1,593,000	
Post Office	4,670,000	2,492,000		2,640,000

A comparison of this week with last, in the principal items shows :—

DEBTOR.

	Increase. francs.		Decrease. francs.
Notes in circulation	6,100,000	.....	...
Treasury balance	6,700,000	.....	...
Deposits	...	.....	31,333,000

CREDITOR.

	Increase. francs.		Decrease. francs.
Coin and bullion	333,000	.....	...
Bills discounted.....	...	.....	6,500,000
Advances on securities.....	...	.....	2,333,000

The chief features in the return for the week are a decrease in the amount of the advances by the Bank to the City of Paris, which has repaid a sum of eight millions and a-half; and a considerable diminution in the private deposits, compensated for by a decrease in the discounts and advances, and an increase of six millions in the circulation.

The announcement by M. Thiers of the intention of the Government to denounce the Treaty of Commerce with England has created no surprise here, as the rupture of the negotiations and the well-known Protectionist views of the two chief members of the Cabinet had foreshadowed this step, which the Government had indeed made no attempts to conceal. That the President anticipated serious opposition to this retrograde measure is evident from the efforts he made in his address to exhibit the proposed changes in the tariff as insignificant. All we asked, he said, was to raise in a modest proportion, from three to five per cent., the duties on cotton, linen, and woollen yarn and tissues, and to increase from twelve to eighteen per cent. that on the mixed woollen stuffs for which Roubaix is famous. But when the Treaty has been once terminated and no obstacle exists to further changes, how will he be able to refuse to grant to the ironmasters, shipbuilders and owners, native wool growers, manufacturers of paper, glass, tools, machinery, &c., all of whom complain, the favour he has granted to the millowners, especially when he has virtually justified such demands by admitting a necessity for them? As M. Thiers believes the inquiry of last year to have proved that the Treaty "established insufficient tariffs, drawn up by foreign commissioners to the exclusion of those of France, and has caused the greatest prejudice to the most important of the natural productions, such as iron, tissues of all sorts, agricultural produce, and above all to merchant shipping," he cannot logically decline to apply a remedy now that he is in power; and then what becomes of his promise that the tariffs are to remain as they were, excepting for the few articles concerning which he has asked for a change?

The Budget for 1872 has been presented to the Assembly by the Minister of Finance, and has been ordered to be printed. It will not be ready for distribution before the end of the week, and nothing more is known of it than was contained in the President's Message. The precise amount at which it has been fixed is 2,429 millions, or with the departmental expenses 2,749. M. Thiers takes credit for simplifying the estimates by the suppression of what was called the Extraordinary Budget by which an expenditure of from 120 to 150 millions was dissimulated under that name, although it recurred regularly every year. Those items have now been included in the ordinary estimates, but at the same time a supplementary Budget of a new kind has been established. This is the sum of 400 millions required to liquidate the disasters of the war, and of which a deficit of 230 millions has to be provided for. In the first part of the Session the Minister had calculated that with 488 millions of new taxes he could balance his receipts and expenditure. A portion only were voted, the exact amount of which is uncertain: the committee on the Budget fixed it at 326 millions; M. Thiers, in his speech, at 350 millions; while the Minister of Finance has since declared that the new imposts will produce 366 millions. The sum of 488 millions is, however, found to be insufficient. The President declares that 600 millions will be required, and taking his estimate of the portion voted at 350 millions, the Assembly will be called on shortly to provide 250 millions more.

When the Chamber separated in September last the question of the mode in which the remaining portion of the new taxes was to be raised had remained open, in consequence of the divergency of views between the Minister of Finance and the Committee on the Budget, the former proposing a Customs' duty of 20 per cent. on raw material, and the latter one of 3 per cent., with an income tax. It was, however, understood on both sides that the question was to be decided immediately on the re-assembling of the Chamber. The committee had only come to a decision after a lengthy inquiry, on which a voluminous report was drawn up by M. Casimir Perier. His labour had almost proved in vain, as M. Pouyer Quertier, on presenting his Budget for 1872, now put forward the demand that it should be referred to a new committee, pretending that the former one had already fulfilled its mission, he evidently hoping thereby that the new committee might prove more docile. Were this course adopted the discussion in committee would have to be gone through over again, and a vote on the Budget could not be taken for a couple of months at least. The Chamber refused to permit of this delay, and decided, by a large majority, that the report of a former committee should come on for discussion on Monday next. The Minister had taken the precaution to provide for the service of the Treasury by presenting a Bill to obtain authorisation to collect, on account of the Budget of 1872, three-twelfths of the already existing taxes, amounting to 603 millions.

The Minister has also brought forward his Bill to increase the circulation of notes of the Bank of France from 2,400 millions to 2,800 millions, and eventually to 3,000; but for the last 200 millions an authorisation is to be obtained from the President whenever the issue of a portion is required. The question of the paper currency was touched on in his address by M. Thiers, who certainly takes a more optimist view of the situation of the Bank than is generally shared. According to him, the Bank was never in such a sound state, and its notes were at a premium abroad. Moreover, he asserted, "the infallible notes of the Bank of France had never in the worst times been depreciated to the extent of two per cent." M. Thiers is apparently not aware that less than two months back gold in Paris was at a premium of 25 francs per thousand, or 2½ per cent. He will hardly contend that it was the gold that had become dearer, and not the notes cheaper. To prove the solidity of the Bank, M. Thiers brought forward a table, showing that the Bank presented a guarantee of 3,383 millions, of which however 1,710 millions consisted of unsecured claims on the State and City of Paris.

The idea of increasing the Bank circulation has been well received among traders, on the supposition that it would permit of a greatly-extended discount accommodation, and a consequent reduction of the Bank rate. Whether that relief will be obtained in as large a measure as expected is doubtful. The Government has still the right of claiming further advances to the amount of 200 millions from the Bank, and the Minister of Finance admitted recently before the Permanent Committee that he would probably at the commencement of the year exercise that privilege. Another 100 millions will be required for the five and ten-franc notes the Bank is to issue, and considerable reimbursements on the Treasury account will no doubt be called for when the series of payments of the Prussian indemnity commences in January. Consequently little of the first issue of 400 millions will be available for commerce.

The Bill of M. Wolowski, forming a counter project to that of the Minister, was brought forward at the same time. As I mentioned last week, the Deputy for Paris proposes to limit the increase in the Bank circulation to 100 millions of small notes, and to reimburse 600 millions of the State debt to the Bank in 5-30 bonds. This proposal was referred to the same committee as the Government Bill, to be considered as an amendment to it. The Minister, however, took the opportunity of stating that the Government was completely opposed to the system of M. Wolowski, and did not intend to raise any loan for the purpose.

A proposal of another kind has been made by M. Ducuing. He has introduced a Bill to authorise the Bank of France to receive on behalf of the Government private deposits, on which three per cent. interest would be allowed, and which would be reimbursable at call. Although this plan was also referred to the same committee as the two other Bank Bills, the Chamber is not likely to adopt such a dangerous system, which would only be possible in a time of unlimited confidence. As the Government would naturally employ the deposits, it would be compelled to close its doors at the first run on the Treasury for repayment.

The two Bills of the Minister of Finance and M. Wolowski have since been the subject of a discussion at a meeting of the Free-trade deputies, in one of the committee rooms of the Assembly. M. Wolowski, in support of his measure, said that the stock of specie in France at the commencement of the war was five milliards, and that it must still consist of 4,600 millions, as only 400 millions had been exported. A loan would therefore bring out the gold and silver from its hoards, put an end to the present depreciation of banknotes, and restore to the Bank its real functions, which were those of

assisting commerce and not of being made a printing press for the creation of assignats. M. de Soubeyran maintained, on the other side, that 2,200 millions of coin had disappeared from France, and that consequently the medium of circulation was now insufficient, and must be replaced by a larger issue of notes. The loan would be an embarrassment to trade by withdrawing more specie, which was indispensable to it. M. Léonce de Lavergne defended the thesis of M. Wolowski. M. Bonnet said that the question was rather budgetary than financial, and that if the annual reimbursement of 200 millions was made to the Bank it would recover its normal state. No definite resolution was come to. The rival systems of the Minister and M. Wolowski have also been discussed in a meeting of the Left Centre, which consists of all the moderate Republicans in the Assembly. There also the debate was adjourned, but the predominant opinion appeared to be adverse to a large increase in the Bank issue, without however being more in favour of the partial reimbursement by a loan.

The Bourse has been dull during the week, rente, the loan, and Bank of France shares alone showing any improvement. Railway property continues heavy, and has further declined. The following are the latest quotations:—

	December 7.		December 14.

South Austrian Lombard	447	50	441	25
Suez Canal	187	50	182	50

The premium on gold is higher, and now ranges from 15f to 17f per thousand. Exchange on London, 25f 82½c to 25f 85c; sovereigns, 25f 75c; English banknotes, 25f 80c.

The Prefect of the Seine, in the last meeting of the Municipal Council of Paris, brought forward his project of new taxes to meet a deficit of 20 millions in the City Budget for 1872. They consist of an augmentation of the octroi duty on alcohol, from 197f to 249f, to produce 6 millions; an increased tax on beer, 1,110,000f; a new tax on window-glass and bottles, 796,000f; additional tenths on the four direct taxes, 3,260,000f; lease of the privilege of collecting dust, 1,500,000f; and a new treaty with the Gas Company, to produce 7,500,000f.

The Oxhydrique Gas Company has obtained permission from the city to light one side of the Boulevard, from the new Opera House to the Porte St Martin, as an experiment. The opposite side of the road will continue to be lighted by the present company, in order that a comparison may be made between the two systems. The depreciation in the shares of the old company is partly due to apprehensions of the result of this competition.

The South of Austria and Upper Italy Railway Company is about to withdraw its bonds from the official price current on the Bourse, in order that they may escape the increased transfer duty and stamp, which liabilities they incur in exchange for the privilege. The shares will however continue to be quoted. The Imperial Austrian Company adopted a similar measure some time back.

The City of Paris announces that the second instalment of 50f on the loan of 1871 is now due, and must be paid before the 6th January. These bonds have now fallen to from eight to ten francs below par.

The Comptoir d'Escompte is about to open a branch at Brussels.

The Creuzot Iron Works Company (Schneider and Co.) have fixed its dividend for 1870-1871 at 50f per share, payable half from the 15th December, half from the 15th June.

The Iron Works of Petin-Gaudet and Co. is being transformed into a limited liability company. The value of the works is estimated at thirteen millions, for which 26,000 500f shares are to be created.

The shareholders of the Credit Mobilier met on Monday last, and voted the report of the committee charged to verify the amount brought in by the old company. The new company was declared to be now definitively constituted.

The following are the latest quotations of the produce markets at Havre, per 50 kilogs (one cwt), duty paid.

Cotton.—New Orleans, very ordinary, 128f; good ordinary, 135f; choice, 141f; Georgia, same marks, 123f, 130f, and 135f; Oomra, good ordinary, 97f; Tinnevelly, 97f; Madras, good ordinary, 90f; Bengal, fair, 80f. Sales for week, 12,100 bales; arrivals, 12,509; stock, 129,505.

Coffee.—Hayti, 145f; Rio, 141f 59c; native Ceylon, 147f 50c; Capitania, 144f; Guatimala 90f (in bond). Arrivals in the week, 300 bales; deliveries, 2,178; stock, 159,949 and 2,683 tierces; sales, 5,181 bales.

Sugar.—Usine, on sample, 63f to 67f. Little doing; no arrivals.

Hides.—Monte Video saladeros ox, 81f 50c; cow, 78f; Rio Grande, light ox and cow, 75f; La Plata dry, 111f 50c; Pernambuco dry salt, 136f; Valparaiso dry, 86f 50c; green, ox and cow, 77f.

Wool.—Buenos Ayres, unwashed, 210f; Venezuela, 150f ditto; Peru scoured, 450f; Monte Video, unwashed, 140f; Spanish, 270f, ditto; native, 172f 50c, ditto.

Tallow.—La Plata sheep, 59f; mataderos, 56f 75c; Monte Video, 60f.

Cocoa.—Para, 70f, in bond; Trinidad, 122f 50c, duty paid.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

An Account pursuant to the Act 7th and 8th Victoria, cap 32, for the week ending on Wednesday, the 13th day of December, 1871.

ISSUE DEPARTMENT.

Thursday	12,765,000	39,741,000	9,721,000
Friday	15,155,000	25,162,000	9,789,000
Saturday	13,635,000	22,066,000	10,743,000
Monday	11,807,000	18,230,000	9,939,000
Tuesday	12,738,000	15,294,000	10,979,000
Wednesday	14,439,000	13,030,000	9,457,000
Total	80,539,000	133,493,000	60,628,000

JOHN C. POCOCK, Deputy Inspector.

Bankers' Clearing-house, December 14th, 1871.

The total since the 4th of January, 1871, is 4,486,923,000*l*, compared with 3,671,134,000*l* for the corresponding period last year, showing an increase of 815,789,000*l*.

The following shows the amount of the Circulation, Bullion in both departments, Banking Deposits, Banking Securities, Reserve, and Rate of Discount, for three months ending 13th December, 1871 :—

Date.	Circulation.	Coin and Bullion.	Deposits.	Securities in Banking Departmnt	Reserve.	Rate of Discount
	£	£	£	£	£	%
Sept. 6	25,631,434	24,816,585	26,624,200	30,628,460	14,727,040	2
13	25,297,965	24,158,814	26,073,163	30,403,797	14,423,619	—
20	25,356,777	23,497,160	26,756,326	31,824,604	13,711,115	3

Clearing-house return	...	74,908,000	75,590,000	60,628,000	80,539,000

In 1861 there was rather more business doing than there had been a week or two previous, but nothing beyond the usual increase at the close of the year. The death of the Prince Consort of typhoid fever took place on the 14th, and cast a great depression over the City, aggravated by the unsatisfactory character of the American President's Message in regard to the Trent difficulty.

In 1868, money continued to be easier after the recent rise, and no farther advance was anticipated. Foreign difficulties had arisen in consequence of the breach between Turkey and Greece on account of the Cretan insurrection. The state of the accounts of the Metropolitan Railway, which had been paying dividends out of capital, was exciting a great deal of attention.

In 1869, the demand for money was quiet, but rates were firm. The difficulties of the French Emperor, in consequence of the large radical vote at the recent elections for the Corps Legislatif, were sensibly increasing.

In 1870, money still continued to be "in suspense" on account of the war, and the Bank was now unusually strong, having 15,057,000*l* of reserve, against 26,288,000*l* of liabilities. A new complication had occurred on the continent, in consequence of German protests against the alleged breach of neutrality by Luxembourg. The sufferings of the besieged in Paris were becoming very severe, and the attempt of the relieving army of the Loire had now completely failed, the army being driven back to Le Mans.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 3,389,720*l*; in 1868, an excess of 477,475*l*; in 1869, an excess of 661,626*l*; and in 1870, an excess of 2,722,578*l*. In 1871, there is an excess of 4,756,469*l*.

Discount and Money Market.—The ease in the market, which has now been continuous for several weeks, has continued this week, and the Bank on Thursday made a farther reduction of its rate—from 3½ to 3 per cent. Previously the minimum rate out-of-doors had got well under 3 per cent., and the movement of the Bank has been followed by a farther fall, the minimum rate to-day for the best short-dated paper being 2⅝. There has been, however, a better demand to-day than during the week, partly in consequence of the Stock Exchange settlement, which has been a very large one, and some of the discount houses are indisposed to quote less than 2¾ for three months' Bank bills. The market is still a little unsettled, the natural effect of the movement of the Bank being retarded by the occurrence of the Stock Exchange settlement. At the Bank to-day, as well as in the open market, there has been an improved demand.

The changes in the Bank account, coupled with the absence of any strong demand for money, are quite sufficient to account for the step which has been taken. The 2,000,000*l* of Bank post bills, which were taken out last week in connection with the American Funding loan, have been returned, so that the Bank's means of lending out of private deposits are what they were the week before, while the public deposits have increased 920,000*l*. The circulation, apart from the Bank bills, has also diminished 400,000*l*, and the private securities have diminished 169,000*l*. The net result is that the Bank in both departments has 244,000*l* more bullion, and the banking reserve has increased 648,000*l*. Altogether, the Bank has now 15,649,000*l* of reserve, against 28,502,000*l* of deposits—in reality a stronger position than it has been in during the last three months, the unusual diminution in the deposits last week being compensated by the increase of the Bank post bills. In this state of the facts, the reduction of the rate was inevitable, and the only question for the moment is the chance of a farther reduction. The abundance of money in Lombard street is certainly such as to stand a severe strain; and the extensive repayments of its debt by Germany are apparently compensating the effect of the process of paying to it the instalments of the indemnity which are still due. It will be impossible, however, to feel any great confidence in the long continuance of the present state of things; and we observe that already during the present week the continental exchanges have been falling, the demand for bills on 'Change to-day, especially for bills on Hamburg, having been very strong. The dearness of money in Germany may not be such as to take away much of our present store, but the symptom is worth noting, as an indication of the natural effect of the reduction in the value of money which has occurred here. The incident of the Bank post bills has also shown that the Bank holds 2,000,000*l* of American money, which can hardly be depended on to remain here.

The changes in the Bank of France account for the week are not unfavourable, the circulation having only increased 244,000*l*, and the cash having only diminished 13,000*l*—the discounts and deposits having likewise diminished. It is all but certain of course that the note circulation will increase very soon; and we are informed that parcels of French gold pieces, each of small aggregate amount, but altogether making up a considerable total, are daily arriving in this country.

We subjoin our usual quotations for mercantile paper having various periods to run, subject, however, to the remark that the market is a little unsettled. The quotation for six months' Trade bills is especially somewhat wide :—

Bank bills—3 months	2⅝		per cent.
Do 4 —	2¾		per cent.
Do 6 —	3		per cent.
Trade bills—3 months	2¾	3	per cent.
Do 4 —	3	3¼	per cent.
Do 6 —	3½	3⅝	per cent.

The allowances for money at the private and joint stock banks and discount houses have been reduced to correspond with the reduction in the Bank rate. They now are :—

Private and Joint Stock Banks at call	2 per cent.
Discount houses at call	2 per cent.
Do with seven days' notice	2¼ per cent.
Do fourteen days'	2¼ per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent. 1870.	1871.	Open Market, per Cent. 1870.	1871.
Paris	6	6	...	...
Vienna	6	6½	5⅝	6
Berlin	5	4	4¼	3½
Frankfort	4	4	3½ ¾	3½
Amsterdam	4	3	3½	2⅝ ¾

	Bank Rate. Per cent.		Open Market. Per cent.	
	1870.	1871.	1870.	1871.
Brussels	...	3½	...	3 ¼
Hamburg	...	...	4½	3½
St Petersburg	8	6	7	6

THE STOCK MARKETS.—The week has been one of great buoyancy in the stock markets, the good feeling which had begun to prevail last week, and which was checked on Friday by the alarming news about the Prince of Wales and apprehensions about the money market, having since been wholly recovered. The opportunity of last Friday's depression was also taken advantage of by numerous strong operators, who have recently been holding aloof, to make their purchases for the expected rise in almost all departments next spring. Investors generally have likewise come in more largely than was the case in September and October. The rise in all departments has been sensible, but in English railways it will be seen it has been very important indeed—a higher point being now touched by the stocks of almost every line than had been attained before the panic of September, and the rise in some cases being a good deal above the level then reached. The change of tone during the week has been very remarkable, though speculators, warned by recent experience, will doubtless be still very sensitive to any movements in the money market.

As we notice below, there are several new foreign loans spoken of—for Hungary, for Russia, and for Peru. Such demands are naturally to be looked for in the present abundance of money.

ENGLISH GOVERNMENT SECURITIES.—The buoyancy of the week has extended fully to this department, the continued decline in the value of money, and the absence of political apprehensions, combining to increase the amount of purchases, though the transactions are now comparatively few in proportion to the general business of the Stock Exchange. This afternoon there was a slight reaction in the price, but the tone has remained substantially good.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money. Lowest	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March and June
Saturday	91⅝	92⅞	91⅝	92	1s to 6s pm
Monday	91⅝	92	91⅞	92⅛	2s to 6s pm
Tuesday	91⅞	92⅛	92	92⅛	2s to 6s pm
Wednesday	91⅝	92⅛	92	92⅛	2s to 7s pm
Thursday	92	92⅛	92⅛	92⅜	3s to 8s pm
Friday	91⅝	92⅛	92⅛	92 7/16	3s to 8s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices this day.	or Inc. Dec.
Consols for money	91⅝ ⅜	92⅛ ¼	+ ⅛
Ditto January	91⅜ ⅞	92⅛ ⅜	+ ⅛
Reduced 3 %	91⅝ ⅜	92 ¼	+ ⅛
New 3 %	91⅝ ⅜	92 ¼	+ ⅛
Bank Stock, last dividend 4½ %	239 41	239 41	... ...
Ind a Stock, 10½ %, red. at 200 Apl. 30, 1874	207 9	207 9	... ...
Do 5 %, red. at par, July 5, 1880	112¼ 13	110 ½ xd	... ...

EXCHEQUER BILLS 3s to 8s prem.

COLONIAL GOVERNMENT SECURITIES.—The following are the changes for the week in this department :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Canada 6 %	110½ 11	110½ 11	... ...
Ditto 5 %	103½ ¼	103¼ 4	... ...
New Zealand 5 % Consolidated Bonds	102½ 3	102⅝ 3½	+ ¼
New South Wales 5 % Bonds, 1888 to 1896	105 6	105 6	... ...
Nova cotia 6 % Bonds, 1875	105 6	105 6	... ...
Queensland Government 6 % Bonds, 1884-5	111½ 12	111½ 12	... ...
Victoria 6 %	112½ 13	112½ 13	... ...
Ditto New 5 %	106 7	106 7	... ...

FOREIGN GOVERNMENT SECURITIES.—As will be seen from our subjoined list, there is a farther appreciable rise this week in almost every description of security. The more speculative stocks—Turkish, Egyptian, and Spanish—have all improved, (the expectation increases that the tax on the Spanish debt will not be carried out); and the less speculative stocks, especially those of the better South American States—Brazil, the Argentine Republic, and Chili—have all been strongly bought, the two former advancing about 1 per cent. on the week. The principal exceptions to this improvement are a slight decline in Russian on the report of an intended new loan, and a decline in Italian, in which recently there has been a strong advance, on account of the statements in Signor Sella's Budget speech as to the amount of the deficit (upwards of 6,000,000*l*), and the necessity of new taxes. French Rentes and new loans, after being dull early in the week, in sympathy with the weak prices from Paris, where there has been no little difficulty in carrying over, have now rallied; but the upward movement is checked by the expectation of a new loan at no very distant date. To-day, the tone of the market has continued good, numerous purchases, both for investment and speculation, being made, notwithstanding the time necessarily occupied in the settlement of the account, which has been an unusually large one. The rates for carrying over have generally been rather less than they were at the previous account.

References have been made to the expectation of a new Russian loan; but there are in fact three loans impending, besides the new French loan, which is predicted as the result of the present financial situation in France. The *first* on the list is a loan for Hungary, the intention to introduce which has been publicly announced in consequence of the necessity for a preliminary negotiation to remove the sentence of exclusion under which Hungary lies, with every State belonging to the Austro-Hungarian Empire, through the repudiation of a part of its debt by Austria. As will be seen from our reports elsewhere, the syndicate of bankers has succeeded in compromising the claims of the certificate-holders by a payment of 5 per cent. on the nominal amount of the claims, the condition being that Hungarian loans shall have been admitted to quotation on the Stock Exchange, and the committee of bondholders promising to offer no opposition. The certificates are also to be given up to the syndicate of bankers which offers the compromise. The loan for which the way has thus been prepared will, it is understood, be brought out early in January, and will be for 30,000,000fl, or 3,000,000*l*, at 5 per cent., the issue price being 81, with discounts upon the prepayment of instalments. There is a report that opposition will still be offered to a quotation on the Stock Exchange by an eminent financial house, whose clients converted without the agency of the bondholders' committee, and without obtaining the certificates—that is, unless their claims are compromised on the same terms; but it is difficult to see how the Stock Exchange can take notice of any claim, except what has been formally admitted to quotation in its own lists. It would be setting up a bad precedent. The settlement is, on the whole, a satisfactory one, and it helps to establish the influence both of the Stock Exchange and of bondholders' committees in bringing defaulting States to book.

The Russian loan, which is the next on the list, will, it is stated, be for 12,000,000*l*.

The third loan which is talked of is for Peru; but we do not understand what the exact amount will be, though it is stated that the operation will be a large one.

As regards the prospects of a new French loan, we should think it extremely probable that France will be a borrower, both to pay the indemnity and for other purposes, for some years to come; but to meet the immediate difficulties apparently the Government is rather relying upon its powers to borrow from the Bank of France. Out of the amount which it has already arranged to receive from the Bank of France, viz., 53,000,000*l*, it has still about 6,000,000*l* to get, the Bank having only lent 47,000,000*l*, and it has authority to borrow 8,000,000*l* beyond the above sum. The two sums together will go a long way to fill up any deficit in the current year.

Annexed are our usual quotations showing the changes for the week :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.

ENGLISH RAILWAYS.—As we have stated, the buoyancy in the stock markets has been most felt here, in which for some time there has been the largest amount of speculation. The traffic returns are so continuously good, that on the occasion offering there is the utmost elasticity in these securities, holders being most unwilling to sell a property holding out so much promise, and the investing public being proportionately eager to buy. Such an opportunity was offered by the somewhat unaccountable fall last Friday, occurring at a time when the money market was really easy, and just at the close of the year, when there is a certainty that the ensuing dividends will be unprecedentedly good. The fall accordingly brought in some very strong buyers, and but for some realisations this afternoon, the improvement has continued all the week, the contangoes at the settlement being light, and a large amount of stock being taken up. The rise has been chiefly in the heavy lines—Midland, Great Northern, North-Eastern, and North-Western—all making a great advance, Midland 6¼ per cent. But the other lines, though they have improved less, have more than recovered the decline of last Friday, and now stand at the highest point of the year.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices:

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Caledonian	115⅞ 16½	117½ ¾	+ 1⅝
Great Eastern	47½ 8½	49½ ½	+ 1⅝
Great Northern	137 8	138 9	+ 1
Ditto A	162 3	167 ½	+ 4½
Great Western	109½ 10½	112½ ⅝	+ 2⅛
Lancashire and Yorkshire	156 ½	159 60	+ 3½
London and Brighton	67½ ⅝	69½ ⅝	+ 1⅝
London, Chatham, and Dover	24½ ⅝	26½ ⅝	+ 2
London and North-Western	147⅞ 8½	151½ ⅜	+ 3½
London and South-Western	108 9	110 11	+ 2
Manchester, Sheffield, and Lincolnshire	73¾ 4½	77 ½	+ 3
Metropolitan	70½ ½	72 ½	+ 1½
Ditto D strict	32½ 3	33 ¼	+ ¾
Ditto ditto Preference	62 4	64 6	+ 2
Midland	138⅝ 9½	145 ½	+ 6½
North British	56 ½	56½ 7½	+ ¾
North-Eastern—Consols	174 ½	177½ 8	+ 3½
South-Eastern	97½ ¾	98½ 9	+ 1½
Ditto Preferred	118 19	118 19	... ...
Ditto Deferred	77½ ¾	79½ ½	+ 2

The quotations for the leading debenture stocks compare as follows with last week:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.

Metropolitan District 6 %	121 2	122 4	+ 2

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending Dec. 10 to 757,989*l*, being an increase of 57,773*l* on the corresponding week of last year. The aggregate receipts to date are now 18,215,182*l*, being an increase of 1,355,872*l* on the corresponding period of last year. The principal increases for the week are—North-Western, 11,790*l*; Midland, 10,162*l*; Lancashire and Yorkshire, 4,563*l*; North-Eastern, 6,634*l*; and Great Eastern, 3,505*l*. The Metropolitan shows a farther decrease of 125*l*. The following shows the details of the increase or decrease in each case for the week and for the whole period:—

AMERICAN SECURITIES.—Five-Twenties of the 1865 and 1867 issues have been in good request, as well as Ten-Forty bonds, to replace redeemed bonds of 1862; while the Five per Cent. loan has risen 1 per cent. The issue of Mr McHenry's circulars in reference to the Atlantic and Great Western and Erie railroads has had a marked influence upon the value of those lines, though some divergence of opinion exists with reference to the course to be pursued with the Erie Ring. Telegrams from New York to-day lead to the belief that a vigorous effort will be made by the Fisk-Gould party to maintain their position, and a heavy fall in the price of the shares took place in New York, the market being sympathetically affected here.

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.

Virginia 6 % Bonds	53 5	52 4	− 1

JOINT STOCK BANKS.—There have been few dealings in joint stock bank shares, and the movements have not been important. Some of the Indian banks are lower, Chartered of India and Chartered Mercantile of India having given way ½. Union of Australia shares have declined to a similar extent; but Anglo-Egyptian have risen 1; Alliance and Oriental, ½.

TELEGRAPHS.—After undergoing considerable fluctuations Anglo-American and Anglo-Mediterranean Telegraph shares close at an improvement of 3 and 2 respectively. French Cables are 1¼ higher on the week, Falmouth and Marseilles and Algiers ¼, China Submarine ⅛; but Submarine shares are nominally quoted 5 lower; while Indo-European have given way 1. Hooper's Construction shares have been in demand, and have risen 1; while Telegraph Construction and Silver's finally closed at an improvement of ½.

MINES.—The mining share market has ruled flat, and the changes in prices are nearly all of an adverse character, more particularly in British mines. According to the official list Wheal Bassett and Tin Croft have given way 5; Providence, 3; South Wheal Frances, North Roskear, and Wheal Butler, 2½; West Bassett, 1; Tankerville, and Wheal Grenville, ½. Wheal Seton, however, have risen 7½; South Caradon, 5; and East Caradon, ¼. The principal changes on the week in the foreign market are a decline of 2 in Eberhardts; ⅛ in Pacific and Russia Copper; ¼ in Colorado, Lusitanian, and United Mexican; ⅛ in Chontales, Don Pedro, and Yudanamutana. Copiapo shares have risen ½.

MISCELLANEOUS.—The changes in the miscellaneous department have not been numerous, the most worthy of notice being a reaction in Scottish Australian Investment, which have fallen 5; Peel River Land are 1 lower, and London Tramways ¼. Bolckow Vaughan shares closed at an improvement of 2 on the week; Copper Miners of England have risen ½; Australian Mortgage, British and Foreign Tramways, ¼; Credit Foncier ⅜. Otherwise prices are without important variations from last week.

In new undertakings, Limmer Asphalte are quoted 3¾ to 4, United Limmer to 3½ to 2⅔ discount, Anglo-Austrian Bitumen 2 to 1 discount, Anglo-Hungarian Bitumen 3 to 4 prem., Anglo-German Bitumen 3 to 2 discount, Native Guano 28 to 29, Phosphate Sewage 26¾ to 27¼, Patent Gas 11¾ to 12¼, and the New Shares 5⅜ to 6¼.

EXCHANGES AND BULLION.—In the foreign exchanges this afternoon bills upon Hamburg, Berlin, and Holland were in strong demand, especially on Hamburg, but bills upon Belgium were offered.

There is now less demand for silver than there was a week or two since, and there is still no demand for gold for export. Quantities of French gold coin continue to arrive from France.

The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—There has been no demand for abroad, and all arrivals, comprising chiefly gold coin from France, and amounting to 323,000*l*, have been sent into the Bank. The Moselle has brought 19,600*l* from the West Indies. The Sweden has taken 120,000*l*, and the Celt 113,000*l* to the Cape; the Massilia 29,300*l* to India, and the Boyne 576,500*l* to South America. About 300,000*l* of this latter sum consisted of bars which were purchased last week.

Silver.—The price has become slightly lower, and may now be quoted as 60⅜d to 60½d per oz standard, buyers at the former, sellers at the latter rate. The Moselle has brought about 29,000*l* from the West Indies, and we have received 89,000*l* from New York during the week. The Massilia has taken 131,000*l* from Southampton, and the Walamo 50,000*l* through the Canal to India.

Mexican Dollars.—The Massilia has taken 61,720*l* to the East. The price has now declined in consequence of the arrivals of 336,000*l* by the French steamer at St Nazaire; these dollars are nearly all on English account.

Exchange on India for Banks' drafts at 60 days' sight, 1s 11⅜d to 1s 11⅛d per rupee.

The sum of 161,000*l* was sent into the Bank to-day, of which 80,000*l* came from Paris. 20,000*l* was withdrawn for transmission to Sweden.

According to the *Gazette* returns the imports of the precious metals into the United Kingdom during the week ended December 13 were:—Gold, 198,073*l*; silver, 194,889*l*. The exports were:—Gold, 547,027*l*; silver, 382,677*l*.

We are indebted to Messrs J. Allard and Co., of Paris and London, for the following telegram, giving to-day's exchange and bullion quotations in Paris:—

MEETINGS OF COMPANIES NEXT WEEK.

MONDAY, December 18.

Cagliaro Mining, general, 7 Westminster chambers.

TUESDAY, December 19.

South Metropolitan Gas, extraordinary general.

Ceylon Company, general.

WEDNESDAY, December 20.

Oude and Rohilkund Railway, general, City Terminus Hotel.

FRIDAY, December 22.

Hayling Railway, extraordinary general, 6 Victoria street.

Rajawelle Coffee Estate, general, 28 Fenchurch street.

Scinde, Punjaub, and Delhi Railway, general, London Tavern.

NOTICES AND REPORTS.

STOCKS.

Austrian—Anglo-Austrian Bondholders' Certificates.—The bondholders, at a meeting on the 11th instant, passed the following resolutions:—

"That this meeting, having considered the letter from Messrs Raphael and Sons, dated 7th December last, making, as representatives of a syndicate of bankers, and in order to carry out the wishes of the Hungarian Government, an offer to pay 5*l* for every 100*l* Anglo-Austrian certificate of claim, and having also considered the letter sent by the Anglo-Austrian Committee, accepting Messrs Raphael's offer, subject to certain terms and the ratification of the meeting of the holders of Anglo-Austrian certificates to be specially convened, does hereby confirm and accept the said arrangement, and requests the committee to carry it out.

"That from the payment of 5*l* per certificate of 100*l* to be made under the foregoing arrangement, the sum of 5s shall be deducted in payment of the expenses incurred by the committee and the Council of Foreign Bondholders."

British Guiana 6 per Cent. Loan for 10,000*l*.—Mr Charles Cave, of the firm of Prescott, Grote, Cave, and Co., invites tenders for 20 bonds of 500*l* each, having five years to run from the 1st of January next, with half-yearly coupons attached. The proceeds, with funds already in hand, are to redeem bonds to the amount of 40,000*l*, falling due on the 1st proximo.

New South Wales 5 per Cent. Debentures, 1866.—Bonds representing 100,000*l* have been drawn for redemption on the 1st January.

Turkish 6 per Cent., 1858.—Bonds representing 100,600*l* have been drawn for redemption on the 1st March next.

RAILWAY COMPANIES.

Erie.—Mr James McHenry, who has just concluded his labours for the reconstruction of the Atlantic and Great Western Railroad, proposes, if supported by the Erie proprietors, to commence energetic proceedings for the removal of the present directors of the Erie Railway, and placing in power an honest administration. He requests therefore that all Erie shares shall be deposited by the 23rd instant with Messrs Bischoffsheim and Goldschmidt, who have consented

[CONTINUED FROM PAGE 1533.]

to act as agents for the reorganisation of the line, and to issue certificates for the same, as in the case of the Atlantic and Great Western Railway.

Great Indian Peninsula.—The report for the first six months of the current year states that the gross receipts amounted to 1,080,462*l*, and the expenditure to 602,589*l*, leaving as net profit 477,873*l*, or equal to a return at the rate of 4*l* 11s 9d per cent. per annum on 20,832,650*l*, the amount of capital expended on open line to date. The line was not open to Jubbulpore for passenger traffic until the 1st of April, 1870, and for through communication with the East Indian and other railways until May, 1870. It is thus impossible to make any effectual comparison of the through traffic with the corresponding half of last year. During the current six months a marked improvement is evident in the traffic receipts, the earnings from the 1st of July to the 4th of November last having amounted to 440,193*l*, or 19*l* 4s per mile per week, against 336,666*l*, and 15*l* 15s per mile.

Louth and Lincoln Railway.—The subscription lists for the shares of this railway will be closed on Monday, the 18th inst. for London, and on Tuesday, the 19th inst., for country applications.

Madras.—The aggregate receipts for the half-year ended the 30th of June last showed that 255,422*l* had been received, against 265,677*l* in the corresponding half of 1870, showing a decrease of 10,255*l*. The working expenses amounted to 138,217*l*, or 54·11 per cent. of the receipts, against 134,820*l*, or 50·75 per cent., in the corresponding period, showing an increase of 3,397*l*. The net receipts amounted to 117,205*l*, against 130,857*l*, showing a decrease of 13,652*l* There were at the same time 49 additional miles in operation. The falling off in the earnings was chiefly in the conveyance of goods, and was fully accounted for by the stagnation of trade. The increase in the cost of maintenance was mainly attributable to the unexpected outlay in the immediate restoration of the Cheyair bridge for daily traffic, and to the expenditure on protective works to most of the other bridges. The capital account showed that 10,066,537*l* had been received and 9,311,726*l* expended, leaving a balance of 754,811*l*.

Oude and Rohilkund.—The capital expended to the 30th June was 1,689,355*l*, and the capital received was 3,525,048*l*. The net profit upon the opened section for the half-year was 5,142*l*. The portions of the main line from Lucknow to Fyzabad, 77 miles, and the first 30 miles from Lucknow towards Moordabad, with the branch from Nawabgunge to Biramghaut, 22 miles—together 129 miles—will probably be completed by the end of June next.

Union Pacific Railroad.—Messrs Morton, Rose, and Co., announce that the coupons of this company's six per cent. first mortgage gold bonds will be paid on and after January 1st, at their banking house.

Union Pacific Railroad—Omaha Bridge Bonds.—The numbers of 38 bonds have been drawn for repayment at 220*l* per bond on the 1st April next.

BANKS.

London and River Plate.—The report announces the payment of a dividend of 5 per cent. for the half-year ended September last, making, with 5 paid in June, a distribution of 10 per cent. for the year, and leaving 5,034*l* to be carried forward. Statistics manifest the progress and continued development of the River Plate.

ASSURANCE COMPANIES.

County Life Assurance.—Messrs Cooper Brothers announce a dividend of 15s in the pound to the creditors.

MISCELLANEOUS COMPANIES.

African Steamship.—A half-year's dividend of 8s 6d per share, free of income tax, has been declared; surplus, 639*l*.

Bombay Gas.—Interim dividend declared at the rate of 6½ per cent. per annum, free of income tax.

Conservative Land Society.—The 19th annual meeting of the members was held on Tuesday, the 12th inst., at the Norfolk street offices, Col. B. Knox in the chair. The report of the board states that the receipts for the financial year were 136,014*l* 4s 5d, and that the grand total to Michaelmas had reached the sum of 1,719,373*l* 19s 7d. The number of 50*l* shares issued was 36,472, representing a subscribed capital of 1,823,600*l*. The withdrawals under the rules were 441,694*l* 17s. The reserve fund was 10,500*l*, exclusive of 2,348*l* 2s 10d office expenses and furniture account. The dividend declared for the year was five per cent.

Crystal Palace.—At the annual meeting a dividend of 1½ per cent. was declared.

Food Preserving Company.—The subscription lists will be closed on Wednesday, the 20th inst., for London, and on Thursday, the 21st inst., for country applications.

Special Settling Days, &c.—The Stock Exchange Committee appointed the 14th instant a special settling day in the new ordinary stock of the Caledonian Railway Company (no quotation necessary), and the 15th in the following securities:—United States Rolling-Stock Company (scrip and paid-up scrip); Moscow-Kowosk Railway Company, scrip and paid-up scrip of the Six per Cent. loan; Swedish Central Railway Company, Limited, scrip and paid-up scrip of the Five per Cent. First Mortgage Debentures; all to be officially quoted. The committee ordered the following securities to be quoted in the official list:—London, Chatham, and Dover Railway Company, B Debenture stock, 2nd issue (358,955*l*); State of Virginia, New Funded bonds; Imperial Government of Russia, bonds of the Five per Cent., 1871, loan; United States, bonds of the Funded loan. The 19th instant was appointed a special settling day in the 5 per cent. bonds of the South Australian Government and in the new shares of the Anglo-Egyptian Banking Company, Limited, both to be marked.

Stranton Iron and Steel Company.—The subscription lists will be closed on Wednesday, the 20th inst., for London, and on Thursday, the 21st inst., for country applications.

MINING COMPANIES.

Cape Copper.—A dividend of 5s per share is announced out of the profits of 1870 realised to date.

The Commercial Times.

POST OFFICE ANNOUNCEMENTS.

The time required for the journey from Calais to Brindisi having been much shortened by arrangements consequent on the opening of the tunnel under Mont Cenis, it is found that the India, China, and Australia mails may now be forwarded most expeditiously by way of France. Commencing therefore with the mails for Bombay, appointed to leave London on Friday, the 5th January next, the Brindisi portion of the overland mails will in future be forwarded via Calais and Mont Cenis. The postage of letters, book packets, and patterns will remain unaltered; but owing to an important reduction which the French Government have with great liberality conceded in the French transit rate on the newspapers contained in those mails, the charge on a newspaper not exceeding four ounces in weight, addressed to the East Indies, Ceylon, the Straits Settlements, China, Japan, Australia, or New Zealand, forwarded via Brindisi, will be reduced from 4d to 3d.

In consequence of the great acceleration of the mails for India, China, and Australia, by the adoption of the route of Brindisi, those mails will, from the commencement of next year, arrive at Alexandria about two days earlier than they arrived when sent by Marseilles; and in order to prevent their suffering any detention in Egypt, it will be necessary to despatch the packet from Southampton two days earlier than at present. Commencing therefore with Thursday, the 28th instant, the mails for India, &c., intended to be forwarded via Southampton, will in future be made up in London on Thursday mornings, instead of on Saturday mornings, as under the existing arrangement.

On the 1st of January next, and thenceforward, the rate of postage on a newspaper not exceeding four ounces in weight, addressed to Egypt and sent by the route of Brindisi, will be reduced from threepence to twopence; twopence being added for every four ounces in excess.

In consequence of the present low rate of exchange between this country and Germany, the commission on money orders issued at any money order office in the United Kingdom and payable in Germany will, until further notice, be as follows:—For sums not exceeding 2*l*, 1s 3d; for sums above 2*l* and not exceeding 5*l*, 2s 6d; for sums above 5*l* and not exceeding 7*l*, 3s 9d; for sums above 7*l* and not exceeding 10*l*, 5s.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The grain trade has been without animation throughout the week, and the tone of the market at Mark lane to-day was decidedly weak. Supplies of English grain were small, but there was a good show of foreign, and sales progressed slowly at about stationary currencies. Flour was quiet, and without alteration in value. Good sound oats maintained late rates, but inferior corn was neglected, Barley, beans, and peas were without change in price. The week's imports of foreign and colonial produce into London have amounted to 16,520 qrs of wheat, 13,360 barley, 28,290 oats, 1,250 maize, 160 sacks and 1,540 barrels of flour.

The Liverpool cotton market has been very active during the past week, and an extensive business has been done at gradually advancing prices. The total sales are 132,330 bales, of which the trade have taken 89,490 bales, speculators and exporters 42,840 bales. The imports for the week are 117,864 bales; the actual exports, 15,395 bales; and to-day's stock is 458,470 bales. Quotations for American descriptions have advanced ¼d to $\frac{5}{16}$d per lb; East Indian, ⅛d to $\frac{3}{16}$d per lb; while Bengals remain unchanged since this day week. To-day the market closes barely so firm for cotton to arrive. Sales, 15,000 bales.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended December , 1871:—

	Imported.	Exported.
American.....bales	64,194	3,498
Brazilian	7,686	349
East Indian	23,198	16,857
Egyptian	19,776	313
Miscellaneous	3,345	401
Total	118,199	21,418

At New York on December 14 middling Upland cotton was quoted at 20⅛ cents per lb.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, Nov. 17:—The improvement in cotton telegraphed from Liverpool naturally gave some impetus to business here, and as dealers were on the whole generally willing to meet the demand, the total sales sum up to about 3,500 candies, being a considerably larger figure than we have been able to report for some time, especially if we consider that two days have been taken up by the Dewallee holidays. Prices at the opening of the market were much on a level with our last quotations, but the better inquiry has since then allowed dealers to obtain rather more favourable terms, though at the close we cannot quote more than 2 rs to 3 rs above last week's rates. Arrivals both by rail and by sea have been moderate during the week. Dhollerah and Bhownuggur, sawginned Dharwar and Compta, still form the principal part of our receipts, but this week a few parcels of new Agra cotton have come to hand, and with the railway extensions now available we may expect some descriptions hitherto almost unknown here to seek shipment from this instead of from Calcutta, Khandeish has also furnished its quota to the week's supplies. On the night of the 12th inst. very heavy rain fell here, continuing almost without cessation until the following afternoon. Since then we have had several heavy showers, and at the present moment rain is still falling. Such extraordinary weather at this season has caused a good deal of anxiety, but we are happy to say that so far no serious harm appears to have resulted. In Broach and its neighbourhood and in the Dhollerah district, where the fall has been heaviest, the plants were not sufficiently advanced to be damaged beyond the loss of a few bolls and flowers. These however will in all probability be replaced by others, to which the increased moisture should give greater strength, and, except that picking will be a fortnight later than usual, the rain in these parts will be beneficial rather than otherwise. In the Berars the fall has been slight comparatively, and though a little stain will probably be found amongst the earliest pickings, we are told that the damage so far is trifling, We append the latest telegrams to hand from the various growing districts, which confirm our views as stated above. Broach, Nov. 16th—"The more advanced fields in this collectorate and at Baroda are now a mass of bloom, and present a most healthy appearance." Bhownuggur, Veerawul, and Dhollerah, 12th to 14th instant—The reports are all quite favourable. Wurdha (Hingunghat)—"Up to 15th instant the weather was most favourable. Since then there have been heavy white clouds overhanging the horizon, but no rain so far." Oomrawuttee, 16th—"About 1½ inches have fallen, but if the weather clears up I do not imagine the damage will be very great." 17th—"No rain; weather clearing up." Sheagaum, 16th—"Rain commenced to fall last evening, and continued throughout the night. It was much wanted, and no doubt has done much good to the more backward cotton plants." Khangaum—Report of 16th is nearly identical with that of Sheagaum. Tinnevelly—A telegram of 17th informs us that dealers are offering at 7⅜d per lb, c. and f., but no business is doing.

EXPORT of COTTON from BOMBAY to November 17.

	1871.	1870.
London.....bales	21,705	2,075
Liverpool	732,443	824,224½
Total, Great Britain	754,148	826,299½
Channel for orders	37,333	10,379
Continent	277,932	138,658
China	49,812½	49,289
Grand total	1,119,225½	1,024,625½

Actual exports since last mail left, 3,916 bales.

The Imperial Ottoman Bank have furnished the following report, dated Alexandria, Dec. 1:—There was great excitement in our cotton market during the first days of the week, and large purchases were made at advancing prices. Yesterday the news from Liverpool being less favourable than expected, business was partly checked, and prices gave way ¼d per lb. To-day however the demand has again sprung up, and the market closes firm at the following quotations:—Fair open, with staple, 9¾d per lb, f.o.b.; good fair, with staple, 10¼d ditto; fully good fair, with staple, 10¾ ditto; fully good

fair to good, with staple, 11¼d ditto; extra fine, with staple, 16d to 18d ditto. Arrivals, from Nov. 25th to Dec. 1st, 66,730 crs. Sales, from 25th Nov. to 1st Dec. 46,080 crs. Shipments, from Nov. 25th to Dec. 1st—To England, 16,657 bales; to France, 1,108; to Italy, 578; to Austria, 464—total, 18,807 bales.

The following telegram is dated Alexandria, Dec. 12:—Good fair, 10¾d; good fair, with staple, 10¾d; good fair, extra staple, 11⅛d; fully good fair, 11¼d; fully good fair, with staple, 11½d; fully good fair, extra staple, 12d per lb, all cost and freight; fair, January delivery, 10⅝d; fair, May delivery, 10¾d, f.o.b. Market continues firm, with an active demand.

There is nothing special to notice in connection with the colonial produce markets. Sugar has ruled dull and prices are 6d lower on the week, though a firmer tone prevailed at the close. The stock in the United Kingdom is estimated at 103,550 tons, against 146,680 last year, while the quantity of East India afloat for the United Kingdom and continent, not including Government exports from Java, is 41,700, against 26,300 tons in 1870, and 34,000 in 1869. There has been a good demand for coffee, and full prices have been obtained; Brazil afloat being even dearer. The quantity of East Indian afloat for the United Kingdom and continent, not including Government exports from Java, is 21,750 tons, against 18,800 in 1870, and 17,370 in 1869. Rice has ruled quiet, and late rates have been with difficulty realised. Afloat, 60,000 tons, against 56,000 in 1870, and 34,000 in 1869. Rum is without change, but jute and saltpetre have been dull of sale.

The annexed report, dated Nov. 13, has been forwarded by Messrs Fryer, Schultze and Co., of Colombo:—A continuance of broken and squally monsoon weather has interfered greatly with the preparation and shipment of produce, especially coffee. The clearances however still show an excess of exports over those at the same period of last year. The distribution of crops is shown below:—

PLANTATION COFFEE.

	1871.		1870.
	cwts.		cwts.

Foreign ports ...	1,773	.....	1,618
Australia and India ..	...	.....	496
	11,479	.....	4,296

We have had a rather quieter market for parchment coffee than for some time past; prices are barely maintained for fine mountain-grown kinds, and for such we cannot requote previous rates. Ordinary growths are slightly lower. The business in clean native coffee has been on a moderate scale, at unchanged value for really good parcels of picked and dried but lower rates are now accepted.

Messrs Matthew Clark and Sons thus review the position of the wine trade:—We have to report a fair business in most descriptions of wines during the past month. Ports of 1870 vintage have especially attracted attention. They show good quality, and seem likely to prove useful. Brandies have been freely dealt in at advanced rates, consequent on the unsatisfactory yield of the 1871 crop having compelled the two leading houses to issue a circular raising the quotations of 1870 vintage 15f, and the older vintages 10f. The uncertainty both as regards quality and opening price of 1871's continues to influence trade operations, and holders are stiff, at our quotations.

Messrs Hunt and King thus review the state of the silk trade during the past fortnight:—There is no change to report in the silk market, the ease in the money market having had little effect upon the prevailing dulness. Prices however are generally firm for good silk, and the deliveries, though reduced, may be considered fair, while the continental markets are being supplied direct from the East, and the rates of exchange continue so high. In China silk the small business doing has been chiefly in fair to good Tsatlee and Taysaam; other kinds, especially Haineen, are neglected. A moderate demand continues for Canton silk, and the fine short reel commands a full price. The Japan silk this season is far below the standard, instead of being superior in quality as was reported. The Mybash is mostly inferior and foul, and can only be sold at a low price, but the little that remains of good silk in the market is held firmly, and realises extreme rates as it will evidently be scarce. The recent telegrams from China have no importance. Prices for best Tsatlee Nos. 3 and 4 are maintained at 31s and 29s respectively, and other classes in proportion; settlements moderate. From Japan we learn that business has been restricted by the advance in the exchange, which with the high range of prices made the cost 5 to 10 per cent. above our quotations. In Bengal silk there has been no improvement. In European silk the upward tendency appears to have ceased for the present, and concessions are occasionally made.

PARTICULARS of STOCKS, IMPORTS, and DELIVERIES of SILK, to the 1st December, 1871.

	Imports. bales.		Deliveries. bales.		Stock, Dec. 1. bales.
China	5,155	.....	3,511	.....	30,075
Japan	1,588	.....	567	.....	9,141
Bengal	388	.....	334	.....	7,294
Waste	2,279	.....	911	.....	7,845

With regard to the colonial wool sales Mr Helmuth Schwartze reports:—The fifth and last series of London public sales of colonial wool, which commenced on the 23rd of November, terminated on the 7th inst., the catalogues having comprised:—Sydney, 21,865 bales; Port Phillip, 13,929; New Zealand, 8,904; Adelaide, 1,667; Van Diemen's Land, 685; Swan River, 43; Cape, 25,951; sundries, 1,843—total, 74,887 bales. The total arrivals were only 68,813 bales, and of these about 6,000 bales had been forwarded direct to the country or the continent, reducing the quantity of fresh wools to about 63,000 bales. 73,000 bales colonial having been sold, it results that about 10,000 have been second-hand wools—a large quantity, the disposal of which probably clears our market entirely of old stocks. The series opened with an average rise of 1d per lb on the closing rates of the preceding sales, and, very slight fluctuations excepted, this advance has been fully maintained throughout. Of the wools offered the majority were, as usual at this season, scoured, including a more than average supply of well-conditioned parcels from Port Phillip, as well as from Sydney and New Zealand.

The annexed is dated New York, Dec. 2:—The sudden close of the canals has also had a tendency to restrict business, by causing an advance in some of the leading agricultural staples, thus increasing the margins against shippers. As navigation closes upon moderate stocks of grain there is much less pressure to sell, especially as holders seem quite confident that the European markets must, sooner or later, respond to higher prices here. The supply of currency seems to be ample for all the exigencies of the season, though the demand for money is becoming more active as the end of the year, with its annual settlements, approaches. The comparative low prices of most kinds of staple products enable the domestic exchanges of the country to be readily effected, and with but a moderate draft upon its pecuniary resources. At the close money was 7 per cent. on call, and discount rates 8 to 10 to 15 per cent. Gold weak, and exchange firmer.

THE COTTON TRADE.

LIVERPOOL.—DECEMBER 14.

The cotton market has been very active throughout the week, and with large daily sales, prices of all descriptions have gradually advanced ⅛d to ¼d per lb. The Bank rate has this day been reduced to 3 per cent. Sea Island continues in good request, and owing to the scarcity of good stapled Floridas, prices have risen 1d to 2d per lb. during the past fortnight. American has been in general demand, and, partly owing to scarcity, has commanded an advance of fully ¼d per lb. New York advices to the 14th instant quote middling Upland 20½c, costing to sell in Liverpool 10¾d per lb, by steamer. For Brazil there has been a large inquiry, and quotations are raised ¼d per lb. Egyptian has again been in extensive request, and prices have advanced ¼d per lb. In East Indian a large business has again been transacted at gradually hardening prices, and quotations are advanced about ⅛d per lb in Surat: but Scinde and Bengal are unchanged.

In cotton to arrive the transactions have been unusually extensive, and prices have advanced about ¼d per lb. The latest quotations are—American, basis of middling (from any port), not below good ordinary, shipment November, 9 5/8d; December-January, 9 5/8d; January-February, 9 5/8d; Charleston, not below good ordinary, ship named, 9 5/8d; Savannah, loading, not below good ordinary, 9 5/8d; November shipment, 10d; November sailing, 9 5/8d; ship named, not below low middling, 10d; New Orleans, January delivery, not below low middling, 10¼d; November shipment, 10¼d; not below good ordinary, shipment November, 10¼d; November-December, 10 3/16d; December-January, 10 3/16d; December sailing, 10¼d; Mobile, not below good ordinary, November shipment, 10¼d; not below low middling, Nov. shipment, 10¼d; Broach, good fair new merchants, machine ginned, March-April shipment, canal, 8¾d; Dhollerah, fair merchants, not below middling fair, February delivery, 7¾d; Oomrawuttee, fair new merchants, February-March shipment, canal, 8d; Bengal, fair new merchants, November-December shipment, 6¾d; Western Madras, fair, ship named, 7d per lb.

The sales of the week, including forwarded, amount to 132,330 bales, of which 23,360 are on speculation, and 19,480 declared for export, leaving 89,490 bales to the trade.

DEC. 15.—The sales to-day will probably amount to about 15,000 bales, the market quieter.

N.B.—Tuesday, the 26th (the Bank holiday), and Saturday, the 30th December, and Monday, 1st January, 1872, will be close holidays in the cotton market.

The above figures show:—

	bales.
An increase of import compared with the same date last year of	788,600
An increase of quantity taken for consumption of	582,990
An increase of actual exports of	211,530
An increase of stock of	73,530

In speculation there is an increase of 422,490 bales. The imports this week have amounted to 117,864 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to Dec. 8) is 147,000 bales, against 310,000 bales at the corresponding period last year. The actual exports have been 15,395 bales this week.

LONDON.—December 14.

NEW YORK.—Dec. 1.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Dec. 1. From the figures thus obtained it appears that the total receipts for the seven days have reached 122,126 bales, against 104,743 bales last week, 101,494 bales the previous week, and 105,400 bales three weeks since, making the total receipts since Sept. 1, 1871, 890,741 bales, against 1,058,827 bales for the same period of 1870, showing a decrease since Sept. 1, this year, of 168,086 bales. The exports for the week ending this evening reach a total of 69,846 bales, of which 58,619 were to Great Britain, 1,100 to France, and 10,127 to rest of the continent, while the stocks as made up this evening are now 380,849 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:—

Week ending Dec. 1.	Exported to Great Britain.	Exported to Continent.	Total this week.	Same week 1870.	Stock. 1871.	Stock. 1870.
New Orleans	12842	8261	21103	23008	137383	117733

Total	58619	11227	69846	70242	380849	393956
Total since Sept. 1	348427	58984	407411	523806	...	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 11,623 bales, while the stocks to-night are 13,107 bales *less* than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Nov. 24, the latest mail dates. We do not include our telegrams to-night.

as we cannot insure the accuracy or obtain the detail necessary by telegraph :—

The market the past week has been variable in tone, showing considerable animation, with higher prices earlier in the week, followed by a decline to the closing rates of last week on Tuesday, and an easy market on Wednesday, without, however, any further change in prices. Yesterday (Thursday) being Thanksgiving Day, was kept as a close holiday; to-day the market has been steadier, and closes firm at 19c for middling Uplands, on the spot. The influence operating, which gave the upward turn to prices, was the increasing animation and improvement at Liverpool. Our very large receipts, however, for the first three days appeared to have checked the upward tendency in Europe, and the reaction there, resulted in the reaction here. To-day's firmness is also a reflex of the renewed firmness at Liverpool, which is probably the result of the cable dispatches sent from this side with regard to the extreme cold which has been experienced during the last two days over a large portion of the country, accompanied with an unusual fall of snow. The effect of this severe weather is variously estimated here, but as it has resulted in a severe snow storm in the Memphis district (where there were the brightest promises of a good yield, and where, heretofore, there has not been even a killing frost) the tendency of the trade is to consider the consequences as likely to be quite unfavourable. For forward delivery prices for all the months have given way, but especially for the later months, under the influence of the large receipts, the market closing for low middling at 18$\frac{5}{16}$c for December, 18$\frac{3}{4}$c for January, 18$\frac{7}{8}$c for February, 19$\frac{1}{16}$c for March, 19$\frac{1}{4}$c for April, and 19$\frac{1}{2}$c for May. The total sales of this description for the week are 79,700 bales, including 650 free on board. For immediate delivery the total sales foot up this week, 12,598 bales, including 6,200 for export, 4,099 for consumption, 484 for speculation, and 1,815 in transit. Of the above 500 bales were to arrive. The following are the closing quotations :—

	Upland and Florida.	Mobile.	New Orleans.	Texas.
	c c	c c	c c	c c
Ordinary.....per lb	16$\frac{1}{2}$ @ ...	16$\frac{3}{4}$ @ ...	16$\frac{3}{4}$ @ ...	16$\frac{7}{8}$ @ ...
Good ordinary	17$\frac{7}{8}$ ...	18 ...	19$\frac{1}{2}$ ...	18$\frac{3}{4}$ ...
Low middling	18$\frac{1}{2}$ ...	18$\frac{3}{4}$ ...	19$\frac{1}{2}$ ...	19$\frac{1}{2}$ ...
Middling	19 ...	19$\frac{1}{2}$ ...	19$\frac{3}{4}$ ...	20 ...
Good middling.....	19$\frac{7}{8}$ ...	20$\frac{1}{8}$ ...	20$\frac{5}{8}$ ...	20$\frac{7}{8}$ ...

For forward delivery the sales (including 650 free on board) have reached during the week 79,700 bales (all low middling or on the basis of low middling).

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports, receipts and shipments for the week, and stock to-night and for the corresponding week of 1870 :—

	Week ending Dec. 1, 1871.			Week ending Dec. 1, 1870.		
	Receipts	Shipments.	Stock.	Receipts	Shipments.	Stock.
Augusta	4867	6233	14000	8260	6170	13130
Columbus	2139	2032	6861	3404	3751	6433
Macon	2566	2125	10421	4440	4330	8856
Montgomery	3081	2471	9030	4877	5802	8530
Selma	3025	1826	5489	4281	2741	10005
Memphis.....	14264	15430	19698	34846	20804	39959
Nashville.....	2201	2052	1793	3490	3410	2221
	32143	32172	68092	63138	47008	89164

The above totals show that the interior stocks have increased during the week 151 bales, and are to-night 21,072 bales *less* than at the same period last year. The receipts have also been 13,859 bales *less* than the same week last year. It will be noticed that the receipts at Memphis alone last year were more than the entire total this year. Probably the storm has in great part contributed to make the arrivals at that point so small this week.

The exports of cotton this week from New York show an increase since last week, the total reaching 14,254 bales, against 12,713 bales last week. Below we give our table showing the exports of cotton from New York and their direction for each of the last four weeks; also the total exports and direction since September 1, 1871; and in the last column the total for the same period of the previous year :—

—*New York Commercial and Financial Chronicle.*

NEW YORK, December 8.—According to Messrs Moffatt, Davidis, and Co.'s report, the week's receipts of cotton at all United States' ports have been 106,000 bales, and since the 1st of September, 1,004,000 bales. Shipments to England, 36,000 bales; ditto to France, 12,000; and to the continent 8,000 bales. Total since the 1st of September, 462,000 bales. Stock at all ports, 413,000 bales. Middling Upland, 9$\frac{5}{8}$d, cost and freight, per steamer.

NEW YORK, Dec. 12.—The receipts of cotton at all United States' ports for the last four days have been 62,000 bales. Shipments to England, 35,000 bales; ditto to France, 7,000 bales; ditto to the continent, 3,000 bales. Middling Upland, 9$\frac{5}{8}$d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, Dec. 14.—Since our last our market has become much stronger in tone. The continued heavy business in the Liverpool cotton market, influenced by the small receipts at the American ports, has compelled producers to materially advance their quotations. In cloth, there has not been much doing in the staple makes, but in some special class of goods there has been a good inquiry at full rates. The unfavourable advices from our Eastern markets still deter merchants from buying extensively. In yarns, both for export and home trade, there is a good business doing, though the high prices quoted are preventing buyers from operating beyond their immediate requirements.

BRADFORD.—The wool market is exceedingly firm, and though rates are not actually higher, yet the tendency of quotations is decidedly upward. Most classes of wool meet with a ready sale, the choice sorts being still most in favour. A good business has also been done in noils and brokes, particularly in good English and botany sorts, at firm rates.

The yarn market shows a firmer tone in every department. Business is most apparent in twofold yarns, particularly 36's and 40's, and in single 30's, medium sorts, and single 40's. In the piece market there is a fair demand for fancy fabrics for both home and foreign accounts.

LEEDS.—The cloth halls have not shown much animation. The heavy cloth department was quieter. Some few tweeds, meltons, and coatings changed hands, but stocks are very low. Stocktaking is said to be proceeding satisfactorily, and the year is likely to close profitably both to merchants and manufacturers. All kinds of material are quite as dear as on this day week, but sales are not frequent.

ROCHDALE.—There has been a fair market for all low-priced flannels, and in some varieties there is extreme scarcity. In Yorkshire goods there is not much doing. Both English and colonial wool are objected to as too dear, but there is no help for it.

CARDIFF.—Increasing activity is to be witnessed in the steam-coal trade, and the press of orders is such that many have to be altogether refused unless ample time is given for delivery. The house-coal colliers are beginning to take action with the view of obtaining higher wages, and it is expected that some concession will be made to them at the commencement of the new year.

WOLVERHAMPTON.—There was a numerous attendance of iron and coalmasters and hardware merchants on 'Change. No diminution was reported in the extent of the activity which has lately prevailed in almost every department of all the leading industries. The collieries are crowded with canal boats and railway trucks, all waiting and pressing to be loaded.

BIRMINGHAM.—The more hopeful tenor of the bulletins relating to the Prince of Wales, and the reduction of the Bank rate of discount to 3 per cent. combined to impart a decidedly cheerful tone to the iron trade, but in the absence of any relaxation of prices there was no appreciable increase in the amount of business transacted. Where business was booked, as a rule, it was at the maximum rates lately prevailing. Bars range from 9*l* to 10*l*, the latter price being readily obtained by most of the leading firms, and sheets, hoops, strip, and nail rods, all of which continue in active demand, fully sustain the high rates lately quoted. Pig iron is quoted nominally 4*l* 15s to 5*l* for the best native all mine, but for present delivery there is little or none obtainable. Hematites now are quite beyond the range of local consumers.

BELFAST.—Flax—Markets were but moderately supplied; demand steady Fine descriptions maintained their value; coarse and medium qualities were somewhat easier to purchase. Yarns—Demand inactive; still some slight improvement has occurred, and a better feeling generally has manifested itself. Stocks and prices show little change during the week. Brown linens (powerloom)—For many fabrics demand has been of a fair, steady character. Prices firm and unchanged. Handloom—Good makes of light linens have not been so much inquired for as previously. Bleached linens—An average amount of business has been transacted on home account, considering the season of the year. Stocks not extensive; prices unaltered.

NOTTINGHAM.—The lace trade during the past few days has been in a healthy state for the time of the year, and manufacturers generally are well employed. Business continues brisk in cotton lace, and there is an extensive inquiry for curtains, while Brussels nets are still selling freely. Good silk laces are in fair request, and there is a moderate business doing in warps. The lace yarn market is still very firm, and silks sell slowly at unaltered rates. The hosiery trade in the shipping branch is active.

DUNDEE.—Our flax market has been very firm, and prices have had an upward tendency. The demand for goods on the spot has been active, and a considerable amount of business has been done at full prices, while in some instances holders now refuse to sell, unless at a further advance. There has been increased demand for tows, and the unfavourable prospects for next season's supply of Archangel tows cause holders to demand advanced rates, and rather higher prices have in some instances been paid. Our market for jute is without material alteration; the demand for fine jute continues good, and prices of such are well maintained. For flax and tow yarns there has been an active demand during the past week. For linens there continues to be a steady demand, and the trade are well supplied with orders.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Dec. 1.

The whole market, under a variety of conflicting influences, has been very irregular, closing firm, but somewhat unsettled. The receipts of flour have been less liberal, but Liverpool reported a decline, and ocean freights were early in the week scarce and higher, while holders have been anxious to close out current receipts from the wharf. The improvement in wheat on Tuesday induced buyers of flour to operate more freely when they could do so at inside prices, and there was some disposition shown to ship to Great Britain on consignment, but on the whole the market has been without spirit, and the business of the week rather below the average. Two moderate lines of extra State sold on Wednesday at $6.65. To-day low grades brought 10c advance, and no good lines of shipping extra State can be had under $6.75. Wheat has been very unsettled. On Monday, with free receipts, dull accounts from abroad, and higher ocean freights, No. 2 spring sold at $1.46 to $1.49, but on Tuesday the probable detention of a million bushels on the canal by ice caused a withdrawal of samples, and on Wednesday No. 2 Chicago sold at $1.50, with some speculative demand for amber winter, but common red winter was freely offered and sold on Tuesday and Wednesday at $1.58 to $1.60 The stock of wheat in this market cannot be much less than five million bushels, but there is a remarkable falling off in receipts at all points. To-day holders were firm, but buyers would not respond, although favoured by a decline of 2d in ocean freights. $1.50 was bid and $1.52 asked for No. 2 Chicago, with one boat load reported sold at $1.51. The market was generally dull, and prices nominal. Indian corn declined on Tuesday to 77c for prime old mixed afloat, but at the close of Wednesday's report 79c was paid. New mixed has come forward in moderate quantities by rail, and sold at 75c to 77½c. Yellow and white quiet. To-day old Western mixed sold moderately at 79½c, with some at 80c, afloat, and a boat load of new white Southern at 86c. Rye has been dull. Barley has experienced a large speculative advance. Oats have been in speculative demand. The movement in breadstuffs at this market has been as follows:—

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The grain trade has been very quiet throughout the week, and no feature of interest has presented itself. Supplies of English have been moderately extensive, and the samples have come to hand in good condition; while the stocks of foreign grain in granary have further increased. The quality of the foreign produce is not first-rate, the proportion of really good wheat being small. Speculation has been very limited notwithstanding the reduction in the rate of discount, which, how-

ever, may induce holders not to realise. In any event, it will tend to check the downward movement in the quotations. There are now on passage from the South of Europe and America to ports of call 440 cargoes of wheat, against 544 at the corresponding period last year; and to direct ports 51 cargoes of wheat (of which 12 are from San Francisco, 13 from New York, 19 from Montreal, and 7 from other ports), against 84 in December, 1870. Wheat remains without change in value on the week, the average price being 56s 10d per quarter. Flour has ruled dull, at stationary currencies. In spring corn there is no change to notice. Fine malting barley would command 42s per quarter; but grinding parcels have ruled weak. Inferior oats and maize have been neglected, but sound corn has maintained late rates. Beans and peas are without quotable variation.

The following statement shows the imports and exports of breadstuffs into and from the United Kingdom since harvest, viz., from August 26 to the close of last week, compared with the corresponding periods in the three previous years :—

IMPORTS.

	1871. cwts.	1870. cwts.	1869. cwts.	1868. cwts.
Wheat	14,497,642	9,973,724	14,006,516	9,088,002

Flour	23,381	361,568	5,433	14,070

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the last eight days 62 grain seed-laden vessels have arrived at ports-of call, viz., 24 wheat, 16 maize, 12 barley, 1 rye, 4 beans, 1 beans and peas, 1 oats, 1 linseed, 1 palm kernels, 1 locust beans. The floating grain trade has been quiet in tone. Wheat has been difficult to sell, even at a reduction. Maize—Slow sale at 6d decline. Barley—The demand has been inactive. Rye—Business has been confined to corn to arrive at about late prices. The reported sales are as follows:—Wheat—7 arrived cargoes: New Ghirka, from Odessa, 54s to 54s 7½d; Ghirka, from Odessa, 50s 6d; White Dari, from Alexandria, 50s per 492 lbs; red winter, from New York, 57s 6d; No. 1 spring, from Philadelphia, 56s per 480 lbs; shipped or to be shipped, 1 cargo; Egyptian Saide, from Alexandria, 46s 9d per 480 lbs. Maize—4 arrived cargoes: Moldavian, from Sulina, 31s 9d per 492 lbs; Mazagan, 34s; mixed, from New York, 33s and 33s 6d per 480 lbs. Barley—Shipping or to be shipped, 1 cargo New Danubian, 26s 6d per 400 lbs. Rye—Shipping or to be shipped, 2 cargoes: Odessa, 34s; new ditto, 36s per 480 lbs. Linseed quiet. Arrived in London, 100 tons East Indian, from Calcutta, 63s per 410 lbs, A.T. On passage, 100 tons ditto, 63s 6d per 410 lbs, A.T. Shipped or to be shipped, 200 tons ditto, 63s 10½d per 410 lbs, A.T. Rapeseed quiet. To arrive, 150 tons ordinary brown Calcutta, 68s per 416 lbs, A.T. Cotton-seed steady. To be shipped, 450 tons Egyptian, from Alexandria, 9*l* per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market is firmer, with an upward tendency. As the statistics continue favourable to the maintenance of present quotations, the importers do not make sales freely. There is still a very limited supply of West India, consequently the sales to yesterday reached only 620 casks. A few parcels of low brown sorts have changed hands upon former terms. Grainy descriptions, which are rather scarce, command extreme prices. Several parcels of Natal and Penang in the public sales went off without change in prices. No alteration can be quoted in beet sugar. Refined is firm, and fine French loaves do not offer at any reduction. The deliveries of sugar from this port last week were 5,410 tons, leaving the stock at the close only 43,900 tons. In the three previous years the stocks were 73,700, 76,200, and 72,500 tons respectively. The stock in the kingdom is smaller than last year's by 43,000 tons. Imports and duty payments of refined have been much less, owing to the decreased production in France during the war.

Mauritius.—1,826 bags by auction went at full prices, a portion being sold: brown, 26s to 30s 6d; grainy yellow and grey, 34s 6d to 35s 6d; a few small lots grainy white, 39s to 40s per cwt.

Bengal.—150 casks and 550 bags low brown were taken in at 26s.

Madras.—500 bags Jaggery reported on the spot at 22s 6d, and 850 bags to arrive at 22s.

Penang.—2,585 bags partly found buyers: brown and grey, 26s 6d to 30s 6d; very soft brown, 24s.

Natal.—3,412 bags at 27s to 32s 6d for brown and grey, and 31s to 36s 6d for yellow. A fair proportion sold.

Manila.—7,419 bags low unclayed were taken in at 24s, and since sold at 23s 6d. Privately the 12,000 bags Zeba taken in last week have sold at 25s. 5,500 bags: brown at 26s 6d, and Taal at 24s 6d.

Other Foreign.—200 bags Martinique sold at 39s for fine white crystals. 1,375 bags grainy white Java were taken in at 38s to 38s 6d; 233 bags concrete at 25s.

Beet Sugar.—Of 607 bags by auction a few lots fine grainy white sold at 38s 6d and business has been done by private contract.

Refined.—The market is steady, with a moderate business doing in dry goods at 40s 6d to 41s upwards. 2,937 Dutch loaves by auction sold at 41s per cwt. Good to fine pieces met a steady sale.

MOLASSES.—A parcel of St Kitts sold at 14s. 260 barrels Australian treacle by auction were taken in at 10s per cwt.

RUM.—The market is less active than of late, with very limited transactions in West India. Quotations, however, remain unchanged. During the week 80 casks Mauritius have sold at 1s 7½d per proof gallon.

COFFEE.—A firm tone pervades the market. During the week about 150 tons native Ceylon have sold to arrive at 67s 6d. 235 bags by auction realised full prices, viz., 66s 6d to 68s for good ordinary mixed to rather bold. 976 casks 77 barrels 1,058 bags plantation Ceylon chiefly met with buyers upon former terms, ranging from 70s 6d to 80s 6d for low middling to bold. 96 half-bales Mocha sold at 88s to 100s for mixed to good yellowish. 18 casks 436 cases 1,332 bags East India chiefly sold at steady rates; fine Mysore, 91s to 95s; pale and mixed ditto, 80s to 83s 6d; small berry in proportion. 1,897 bags Manila were part sold at 67s to 69s. 38 bags Singapore realised 67s 6d. 15 casks Jamaica, 69s to 76s 6d for pale to middling, and 87s 6d for colory; 76 bags ordinary mixed at 62s 6d to 65s. 3,875 bags Guatimala brought full rates, from 66s 6d to 72s. 2,297 bags Costa Rica, 67s to 72s for ordinary pale to middling. The stock is 7,100 tons less than at the same date last year, but further arrivals have taken place, and the export deliveries are beginning to fall off.

COCOA.—The trade have made few purchases this week, and the supplies offering continue small. There will shortly be arrivals of the new crop. On Tuesday 128 bags Trinidad by auction were bought in at high prices, also 248 bags Surinam. 627 bags Guayaquil at 50s to 52s per cwt.

TEA.—Since last Friday the market has continued moderate, and the trade being large, buyers of late seem averse to extend their operations so near the close of the year. Business has been done in medium black leaf at firm rates. Moyune greens, just landed, are declared for sale "without reserve" next Monday. Supplies of Indian tea have been rather large, but a good deal has sold at easier rates for some of the common to medium sorts. At auction this week 2,480 packages went at fair prices for the portion sold, including 400 packages of the Assam Company's growth. The deliveries of tea show 11,810,000 lbs increase compared with last year, and the stock in the kingdom on the 1st inst. was 5,750,000 lbs larger than at same time last season.

RICE.—Transactions during the week have been upon a small scale, and prices are in many cases almost nominal.

IMPORTS and DELIVERIES of RICE to Dec. 9, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imports ..... tons	83130	73200	77050	70500
Deliveries	98900	72500	58200	53100
Stock	37700	50500	51600	34000

SAGO.—The market is quiet. 135 bags rather rough bold grain offered by auction, sold at 17s to 17s 6d. 266 bags small grain were partly disposed of at 16s to 16s 6d per cwt, being former terms.

SAGO FLOUR.—257 bags Singapore were taken in at 16s per cwt.

TAPIOCA.—445 bags Singapore and Penang were sold at 2d to 2¼d per lb for fair quality.

BLACK PEPPER.—The market is quiet and rather lower. The business privately has been limited, and chiefly in Singapore, at 6⅛d to 6⅜d. 924 bags Penang by auction yesterday were only partly sold at 5⅞d; low dusty, 5⅝d to 5¾d. 120 bags common greyish Trang sold at 5⅞d; one lot, 5⅞d.

WHITE PEPPER.—Privately 1s has been paid for fair quality Singapore, and there is less pressure to sell. 20 bags sold yesterday at 11⅜d to 1s, and 235 bags Penang, of fresh import, at 11⅛d to 11¾d per lb. The stock continues small.

OTHER SPICES.—At the sales this week 53 cases brown nutmegs sold at full rates: small, 3s 1d to 3s 2d; 95's, 3s 6d; 81 to 73's, 3s 6d to 3s 7d. 106 cases and boxes mace only partly sold at 2d decline: low and ordinary of fresh import, 3s 10d to 4s 1d; middling to fair, 4s 3d to 4s 5d. 1,000 bags Zanzibar cloves of common quality just landed were taken in at 5⅜d. 40 bags cinnamon chips sold at 3¾d. 728 bags bark of low quality at 1¾d to 2d. The chief feature in the spice market this week has been the sale of part of the new crop of pimento for delivery at 2⅜d per lb. 100 boxes cassia lignea from Hamburg were chiefly taken in, one lot selling at 114s. 20 boxes cassia buds withdrawn. 224 cases Cochin ginger, more or less wormy, sold at 44s to 54s; small and broken, 39s to 43s per cwt.

SALTPETRE.—The market is flat, and business has been done on lower terms, of which particulars do not transpire. 75 tons Bengal sold afloat at 28s 6d to 28s 9d per cwt, usual terms, being about 1s 6d per cwt cheaper.

IMPORTS and DELIVERIES of SALTPETRE to Dec. 9, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imported ..... tons	10470	10490	11100	7050
Total delivered	11050	13110	10450	10750

COCHINEAL.—At Wednesday's sales 1,272 bags Teneriffe went at previous rates to 1d advance: silver, 2s 4d to 2s 7d; blacks, 2s 5d to 3s 9d. 86 bags Honduras rather dearer: silver, 2s 4d to 2s 7d; black, 3s 2d to 3s 3d. 55 bags Mexican, chiefly black, at 2s 6d to 2s 8d. Business has been done in Teneriffe privately, and the bulk of the above quantity by auction sold.

OTHER DRYSALTERY GOODS.—Gambier, after advancing to 19s on the spot and afloat, is now less active. 1,174 bags cubes were taken in at 22s 9d. Small sales of fine cutch, in boxes, reported at 23s 6d to 24s. Yesterday, 100 cases middling by auction realised 22s to 22s 3d, being rather cheaper. 1,798 bags Madras turmeric sold a 13s 6d to 15s 9d. 891 bags Bengal were taken in at 18s per cwt. There have not been any public sales of safflower.

SHELLAC.—222 chests at public sale were partly sold at easier rates. Second orange, 8*l* 2s 6d; DC, 8*l* 7s 6d to 8*l* 10s; native orange, 7*l* 10s; garnet, 6*l* 10s per cwt.

METALS.—The business has been rather large, and prices in some cases are rather higher. Copper, which at one time last week was rather weaker, has again become active, with considerable sales at advanced quotations, including Burra and Walaroo at 90*l* to 93*l*. Chili at 83*l* 10s to 86*l*. English is also in demand, and prices unchanged Straits tin has fluctuated, and prices are lower, Banca being relatively cheap. Straits, after touching 145*l* cash, since obtained 146*l* to 146*l* 10s. Sales have been made to arrive at 145*l* to 147*l*. The last transactions in Banca were at 145*l* 10s. English down about 5*l* per ton. Tin plates active, and likely to be dearer. A good demand prevails for English lead. English sheet zinc is raised to 28*l*. During the week considerable sales of spelter have been effected at 22*l* to 23*l* 10s, and for arrival at same price. The iron trade continues good. There has been a steady business in Scotch pig. This morning's quotation is 69s 3d to 69s 6d per ton, cash.

JUTE.—Further sales have been made for arrival at previous rates, but the market on the spot is quiet, with the stock increasing. 15,121 bales by auction on Wednesday barely one-fourth part sold, prices being in many cases favourable to the buyers. New crop, 22*l* to 28*l*; ordinary ditto, 18*l* 10s; old crop, 19*l* 10s to 20*l*; with low and common at 15*l* 10s to 18*l* 10s. 1,000 bales cuttings were t ken in The trade in jute manufactures continues active.

HEMP.—Manila is quiet, with limited sales reported during the week at easier rates. P tersburg clean by auction sold at 34*l* to 34*l* 10s.

LINSEED.—Prices continue steady, with moderate transactions. Calcutta, 62s 9d to 63s; ditto to arrive, 63s 3d to 64s per qr. No transactions of importance in other kinds.

OILS.—There has been rather more demand for sperm, with a few sales at 90*l*. Cod has sold at 35*l* 10s on the spot, and 34*l* 15s to 35*l* per tun to arrive. Pale southern is scarce. Olive firm. Linseed oil has been sold upon rather lower terms, but is now firmer at 33*l* 10s; and for delivery in the next four months, 33*l* 15s. English brown rape oil meets a better demand; present quotation, 44*l* to 44*l* 5s; next four months, 44*l* 10s; refined, 46*l*; foreign, 47*l* to 48*l*. Cocoa-nut dull, with sellers of Ceylon at 38*l* to 38*l* 10s; common Cochin, 44*l* to 45*l*; fine qualities of the latter scarce, and worth 50*l* to 51*l*. Palm remains firm at 40*l* per ton for fine, but is not active. Olive oils have been steady, with a good demand for common kinds.

SPIRITS TURPENTINE have advanced: American, 49s 6d to 50; French, 48s 6d per cwt.

PETROLEUM is dull. American refined, 1s 5d to 1s 5½d per gallon; stock, 8,000 barrels above last year's.

MOTHER-O'-PEARL SHELLS.—At the sales this week, 250 cases Manila was taken in at 9*l* 7s 6d to 9*l* 10s. 250 cases Macassar at 14*l*. 359 cases Bombay sold at 4*l* 7s 6d to 7*l* 15s per cwt, and other qualities in proportion.

TALLOW.—There has been a firmer market, with prices about 6d higher for Russian on the spot, or for early delivery. The closing quotations yesterday were, for new Petersburg, 49s 3d, and March, 50s per cwt. There is not any diminution in the supply of Australian, and the report of this day's sales will, as usual, be given in the postcript.

PARTICULARS OF TALLOW—Monday, Dec. 11. 1871.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—At the public sales 498 bags crystallised Demerara sold at 40s 6d to 41s for fine yellow. 2,101 mats Java kind at 28s 6d for low brown. 134 casks sold to-day, making 755 casks for the week. The market is decidedly firmer. Privately, 2,600 bags clayed Manila at 27s 6d per cwt.

COFFEE.—At the sales to-day 37 casks 19 barrels and bags plantation Ceylon, in small lots, realised former rates. 220 bales Mocha 88s to 88s 6d for mixed greenish and pale. 503 cases 717 b gs East India sold, including Calicut, at 76s 6d to 77s 6d. 649 bags Rio part sold at 69s 6d. 117 bags Central American at 69s to 70s per cwt.

RICE and SPICES without further further change.

SALTPETRE. Refraction 5½ sold at 28s 9d on the spot, and 120 tons Nov. and Dec. shipment at 28s to 28s 3d per cwt.

GAMBIER.—1,600 packages by auction part sold at 20s 6d to 21s for pressed cubes. Block rather heated, taken in at 19s 3d per cwt.

TURMERIC.—825 bags Bengal of old import sold without reserve at 16s 6d to 16s 9d.

METALS.—Copper is again dearer. Fine Silesian spelter sold at 24*l*. Tin unchanged.

OILS.—1,383 casks cocoa-nut by auction partly sold: Cochin, 44*l* to 44*l* 10s. Ceylon chiefly taken in. Sydney partly sold at 33*l* 10s to 36*l* 10s. 263 casks palm part sold at 33*l* to 35*l* 10s per ton for low qualities.

TALLOW.—Town unaltered; also Russian. 464 casks South American went at 48s for beef, and 47s 3d to 48s 6d for mutton; inferior in proportion. Australian quiet, and 1,900 casks only part sold: mutton, 46s 6d to 49s; beef, 44s 6d to 46s 3d per cwt; inferior in proportion.

ADDITIONAL NOTICES.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that large arrivals of oranges have been received from the Azores, Spain, and Portugal, and sold freely in consequence of the approach of the Christmas holidays. Lemons of all descriptions in demand at a high price. Seville sours to hand and in request. Barcelona and black Spanish nuts advanced in price. Brazils have a good sale, as well as West India cocoa nuts.

DRY FRUIT.—Currents are very dull for the season of the year, and it is thought that dealers have all along been holding more stock than they would own to. The deliveries, small as they are, consist of more daily than the sales that are made, and yet buyers are very indifferent to replenish their stocks. A steady rising market has characterised Valencia raisins this week, and large purchases have been made for immediate use. Turkey fruit is neglected. Muscatels show a fractional improvement. Figs lower.

ENGLISH WOOL.—Everything very firm, and higher prices may be looked for at the turn of the year.

COLONIAL WOOL.—The market is quiet; prices firm.

FLAX.—Market very firm.

HEMP.—Market for Russian quiet, owing to short shipments of Manilla to England; the market has become steady.

SILK.—Little doing, but prices very firm.

SEEDS.—The seed trade continues quiet at late rates.

TOBACCO.—There has been but little done during the past week in North American tobacco, and the sales effected have been quite of a retail character. Prices of all descriptions remained unchanged, and holders are firm at current rates. In substitutes and segar tobacco there has been a fair business done.

LEATHER.—The leather market has not presented any decided change since our last report, but the demand has to some extent improved, while the supplies are curtailed by the unfavourable weather for drying. At Leadenhall on Tuesday crop hides, light prime English butts, light English shoulders and bellies, calf skins of 60 lbs and upwards, and English horse hides, met a good inquiry at late quotations.

METALS.—There has been great activity in metals all the week. Copper has been dealt in freely day by day, and a large business has been done at advancing rates for all descriptions of foreign copper. Iron maintains its firmness. Tin has lost somewhat of its buoyancy, and lower prices have been accepted. Spelter has suddenly become dearer by about 3*l* per ton. Lead too has been in demand and prices have advanced about 15s per ton. Tin plates are very active.

THE ANNUAL CHRISTMAS CATTLE MARKET.

The annual Christmas fat stock market was held according to custom. Although some very fine stock was exhibited, the general character of the show did not call for any particular comment. In point of numbers the show was not so strong as on some recent occasions; but this must be attributed to the regulations still in force respecting the transit of cattle. At the same time the losses sustained by the foot-and-mouth disease during the earlier part of the season had engendered much caution on the part of graziers, and in many instances stock has been sent forward to the market much earlier than would have been the case, owing to the chance of loss or deterioration of quality through the foot-and-mouth disease. The Scots carried off the prize in point of excellence, and there was also a fine show as regards number. The

show of stock was in every respect satisfactory, although it must be admitted that the abundance and cheapness of food have enabled Scotch graziers to rear their stock at a minimum of expense. Shorthorns were well represented, both as regards number and condition. Devons were not freely offered, but the quality was good. Hereford cattle were not well represented, and there were very few Sussex beasts on the stands. Some choice Welsh runts were offered, and there were a few Irish beasts whose condition did not call for special comment. As regards foreign stock a moderate supply was on offer, including French, Spanish, and Dutch beasts in improved condition.

STATE OF THE TRADE.—Notwithstanding the cold weather there has been an absence of animation in the trade. This is doubtless attributable to the fact that the time between this and Christmas is too long to suit butchers, and they have consequently exercised more caution in dealing. On the other hand, the general excellence of no small proportion of the supply has been the theme of universal comment, and has imparted a firm tone to the quotations. The best Scots and crosses have occasionally made 6s 2d, but 6s per 8 lbs has been the more general top quotation. In the sheep market there has been a quiet tone prevalent, but the shortness of the supply has imparted a firm tone to prices. For the best Downs and half-breds 6s 10d to 7s per 8 lbs has been paid. For calves there was more inquiry, and prices were higher. Pigs were steady in value, with a moderate demand.

HOP MARKET.

BOROUGH, Friday, Dec. 15.—This market presents a languid appearance. Purchases in all descriptions are effected with much caution, and some difficulty is experienced in realising previous values. Mid and East Kent, 10*l* to 16*l* 16s; Weald of Kent, 8*l* 10s to 10*l* 10s; Sussex, 7*l* 5s to 9*l* 9s; Farnham and country, 11*l* to 16*l*. Yearlings—Mid and East Kent, 3*l* to 6*l* 10s; Weald of Kent, 3*l* to 5*l* 15s; Sussex, 3*l* to 5*l* 5s; Farnham and country, 4*l* 10s to 7*l* olds, 1*l* 5s to 2*l*.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 15.—We have again an active demand to report this week, and all useful classes are exceedingly firm, with an upward tendency in prices.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 15.—This market was depressed to-day, and a little business was done in wheat at 1d lower. Corn was very dull with a retail demand, at 6d less.

WAKEFIELD, Friday, Dec. 15.—There was a very limited demand for wheat to-day at this market, and where sales have been made 1s decline has been generally conceded. The barley trade is still dull at late rates. Another report says that, as usual at this period of the year, millers restrict their purchases to their immediate wants, and business in wheat is limited. There were no quotable alteration in prices.

The Gazette.

TUESDAY, Dec. 12.

BANKRUPTS.

Hugh Thomas Cameron, Basnett grove, Wandsworth, gentleman.
George Ley King, Bristol, solicitor.

DUNN'S "ESSENCE OF COFFEE," 1s and 2s a Bottle.

DUNN & HEWETT'S "BROMATINE," a Cocoa deprived of its superfluous Butter, 6d a Packet.

MANUFACTORY—PENTONVILLE, LONDON.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

OXYGENATED WATER HOLDS IN Solution pure Oxygen Gas, the vital element that sustains life. It is a decided tonic and alterative drought, and from its special action on food during the process of digestion and assimilation is peculiarly suitable for invalids. Price 4s per dozen half-pints. Laboratory, 36 Long Acre, and all Druggists.

SHIRTS.—FORD'S EUREKA "DOUBLE SHRUNK" FLANNEL SHIRTS.—Messrs R. FORD and CO. have all their new patterns of double shrunk flannel shirts now ready. Patterns sent free, with self-measure. The "Eureka Double Shrunk" are the perfection of flannel shirts. No quantity of washing will ever shrink them.—Richd. Ford and Co., 38 Poultry; Branch, 308 Oxford street, W.

SOLD BY ALL DEALERS THROUGHOUT THE WORLD.

KINAHAN'S LL WHISKY.

This celebrated and most delicious old mellow spirit is the very

CREAM OF IRISH WHISKIES,

In quality unrivalled, perfectly pure, and more wholesome than the finest Cognac Brandy.

Note the words—

"KINAHAN'S LL WHISKY,"

on seal, label, and cork.

Wholesale Depôt, 6A Great Titchfield street, Oxford street, W.

DUNVILLE'S OLD IRISH WHISKY, BELFAST, of same quality as that supplied to the International Exhibition of 1862, Dublin Exhibition of 1865, Paris Exhibition of 1867, and now regularly to the House of Lords, the quality of which is equal to the finest French brandy, may be had direct from Belfast, in butts, hogsheads, quarter-casks, and cases.—Quotations on application to Messrs Dunville and Co., Royal Irish Distilleries, Belfast; or at their London offices, 4 Beaufort buildings, Strand, W.C.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage 1s 10d. Post-office orders to be made payable to John White, Post-office Piccadilly.

NEW PATENT

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS &c. They are porous, light in texture and inexpensive and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

HOLLOWAY'S OINTMENT AND PILLS.—Glandular swellings in the throat, neuralgia, tic doloreux, rheumatism, gout, lumbago, and other diseases affecting the glands, muscles, and nerves of sensation are permanently eradicated by this healing antifebrile and soothing preparation. It is also a perfect remedy for skin diseases and every kind of superficial inflammation. Such complaints soon lose their angry and painful character under this invaluable ointment. The pills have never been administered either by hospital or private practitioners in dyspepsia or liver complaint without producing the desired result, and the ointment has in the hands of the public and the profession rarely failed to fulfil the most sanguine hopes of sufferers after they had altogether despaired of amendment.

HANDSOME ILLUSTRATED GIFT

BOOKS.—Now ready, THE LEISURE HOUR and SUNDAY AT HOME VOLUMES for 1871. Cloth bds. 7s; gilt elegant, 8s 6d; half-calf, 10s.

SCHOOL PRIZES.—THE LEISURE

HOUR and SUNDAY AT HOME Vols. for 1871 will be found full of interest for the Young.

LIBRARY READING.—THE

LEISURE HOUR and SUNDAY AT HOME. Volumes, just published, are admirably adapted for Parochial, Congregational, and Working Men's Libraries.

LEISURE HOUR VOLUME FOR

1871 contains 832 Imp. 8vo pages of letter-press, and 159 superior Engravings, besides 12 Illustrations in colours or on toned paper. Among the literary contents are—Rookstone, by Mrs Macquoid; Master of Aynhoe, by Mrs Prosser; Roger Kyffin's Ward, by W. H. Kingston; Max Kromer, a Story of the Siege of Strasbourg, by the Author of "Jessica's First Prayer;" First Impressions of America and its People, by the Editor; Sketches of the Geological Periods, by Principal Dawson; Rome in Transition, by Mary Howitt; My Autobiography, by John Timbs; Ghosts and Ghost Lore.

SUNDAY AT HOME VOLUME FOR

1871, consisting of 832 pages, abounds with Illustrations by eminent Artists, as well as coloured plates; and, in addition to a vast variety of interesting Sunday Reading, includes the following—The Life of David as reflected in his Psalms, by Rev. Alexander Maclaren, of Manchester; Daily Thoughts of Christ, by Lord Kinloch; The Gospels and Modern Criticism, by Rev. Dr Roberts; Morals of Mottoes, by Rev. S. B. James, M.A.; The Gospel in Nature, by Rev. Newman Hall; Miriam Rosenbaum, by Rev. Dr Edersheim; Under the Mulberry Tree, by Mrs Prosser.

CHRISTMAS AND NEW YEAR'S

PRESENTS.—The BOOKSELLER says, "In each succeeding year they appear to gather strength, each volume being a real and decided improvement upon its predecessor." The STANDARD says, "These companion volumes maintain in every respect the very high character which has for years distinguished them." The SATURDAY REVIEW pronounces the Illustrations "wonderfully good." The SPECTATOR declares that these "two stout volumes, with plenty of good reading in them, are well worth their price." "Whoever wants value for his money in bulk as well as in quality, should invest in one or both of these volumes," is the recommendation of the EDINBURGH DAILY REVIEW.

London: 56 Paternoster row; and all booksellers.

ROYAL PRINCESS'S THEATRE.

Sole Lessee—Mr B. Webster.

Managers—Messrs B. Webster and F. B. Chatterton.

On Monday and during the week, Mr Phelps, Mr. B. Webster, and Miss Furtado will appear in a new and original drama, by Watts Phillips, Esq., entitled ON THE JURY, with new scenery and effects by F. Lloyd. Characters by Mr Phelps, Mr B. Webster, Messrs J. G. Shore, H. Forrester, H. Ashley, Travers, &c. Miss Furtado, Misses E. Stuart, Julia Daly, Hudspeth, Lovell, Hubert, Phillips, M. Edmonds, &c. Preceded by DOWN IN A BALLOON. Messrs C. Seyton, Ashley, and Barrett; Misses E. Stuart, Lovell, and Mrs. R. Power. To conclude with A DOMESTIC HERCULES. Messrs C. Seyton, Moreland, Charles; Misses L. Grey and Hubert. On Boxing Night, Tuesday, Dec. 26, will be produced a new grand Christmas comic Pantomime, entitled LITTLE DICKY DILVER, WITH HIS STICK OF SILVER; or, Harlequin Pretty Prince Prettycoy and the Three Comical Kings, with new and characteristic scenery by F. Lloyds. Morning performances every Wednesday and Saturday, commencing Saturday, Dec. 30. Doors open at half-past six. To commence at seven. Box office open from ten till five daily.

ROYAL GALLERY OF

ILLUSTRATION, 14 Regent street.

MR and MRS GERMAN REED'S ENTERTAINMENT.

The Christmas novelty at this popular place of amusement is by J. R. Planché, and will be entitled, "King Christmas, a Fancy-Full Morality." Mr Planché's reputation for refined wit and pungent joke is well preserved; the humour of the novelty is as genial as the season it extols; the dialogue sparkles with jeux d'esprit, at the same time that it is easy and flowing. No better author could have been selected for the illustration of the forthcoming festive season, as a place which is chiefly patronised by the higher and educated classes, than the veteran Mr Planché, all of whose extravaganzas and burlesques are conspicuous for the brilliancy of their wit, and their entire freedom from coarseness of expression. Mr Corney Grain will bring out a New Musical Sketch on Boxing-day, and the Entertainment will conclude with "A Peculiar Family" in a compressed form.

ROYAL POLYTECHNIC.—

The Battle of Dorking answered by the Autumn Manœuvres, being Professor Pepper's new Entertainment. Illustrated with Graphic Pictures, Music, and Patriotic Songs by Miss Alice Barth. Also the remarkable feat of Imitating a Drowning Man by Marquis Bibbero. Illustrated by a splendid light. Lecture on Diamonds and the African Diamond Fields, by Mr Tobin. The Arabian Mystery. Mr George Grossmith, jun.'s Entertainment, the Silver Wedding. Open twice daily. Admission One Shilling.

12 Debentures of £1,000 each..... £12,000

£100,000

JOHN CURRIE,
Secretary of the Bank of New South Wales, Agents for the Government of New South Wales.
Present—WILLIAM DUFF, Notary Public.

NEW SOUTH WALES

GOVERNMENT DEBENTURES.

The Bank of New South Wales, Financial Agents for the New South Wales Government, will PAY, on and after the 1st proximo, the Half-year's Interest, due in London on that date on all Debentures issued by that Government.

Coupons and claims for Interest must be left three clear days for examination, and forms for specifying the same may be had on application at the Bank.

JOHN CURRIE, Secretary.
Bank of New South Wales, 64 Old Broad street, London, Dec. 13, 1871.

BONDED DEBT OF SOUTH AUSTRALIA.

The Bonds due on the 1st of January, 1872, and the Interest due at same date, will be PAID by the National Bank of Australasia, 47 Cornhill, on that and subsequent days, between 12 and 2 o'clock.

The Bonds then due, the coupons, as well as the Bonds having no coupons, must be left at the Office of the undersigned three clear days for examination, and will be received from this date.

The lists to accompany the above can now be obtained on application either at the National Bank of Australasia, No. 47 Cornhill, or at this Office.

FRANCIS S. DUTTON,
Agent-General for the Government of South Australia.
No. 37 Great George street, Westminster, Dec. 15, 1871.

RAILWAYS OF THE SOUTH OF AUSTRIA AND UPPER ITALY.

The Board of Directors has decided that a Drawing of the Company's Bonds (obligations), to be paid off in 1871, shall take place in the usual manner at Vienna (Austria), on FRIDAY, December 15th.

The same day will be drawn two of the six series of Bonds (bons), 1872–1874, remaining to be amortised, and which will be paid off—the one on the 1st March, the other on the 1st September, 1872.

THE FOOD PRESERVING COMPANY (Limited). (JONES' PATENT.)

Incorporated under the Companies' Acts, 1862 and 1867, with limited liability.

Capital, £100,000, in 20,000 shares of £5 each.

Divided into 16,000 A shares, now offered for subscription, and 4,000 B shares, taken by the Patentees.

The B shares will receive no dividend until 10 per cent. has been paid upon the A shares, when they will receive dividend pari passu with the A shares.

After 20 per cent. has been paid on the entire capital the profits beyond such 20 per cent. will be divided between the A and B shares, in the proportion of one-half to the A shares and the other half to the B shares.

Deposit, £1 on application, £1 on allotment, the remaining £3, if required, in calls at not less intervals than three months.

TRUSTEES.

The Earl Fortescue.

AUDITORS—Messrs Ford and Smith, 76 Cheapside, E.C.
SECRETARY (pro tem.)—Fred. W. Smith, Esq.
TEMPORARY OFFICES—76 Cheapside, London, E.C.

ABRIDGED PROSPECTUS.

This Company is formed to develop an improved system of meat preserving in Great Britain, the colonies, and other countries; and for the purchase, with that object, of the patent rights for preserving articles of food under Richard Jones' Vacuum System, such patents being for the Australian colonies as well as for the United Kingdom.

The special feature of the process is, that poultry, game, fish, and whole joints of beef and mutton, chops or steaks, can be as readily preserved with as without bone, thus obviating the hitherto unsatisfactory appearance of preserved meat. At the last Exhibition at Sydney, an early sample of meat, prepared by the Vacuum Process, carried off the only prize medal awarded. It has also stood the test of numerous voyages to and from the tropics, as stated in the testimonials.

The Directors, with a view to give the fullest information as to the character and condition of the meat cooked by Mr Jones' process, have arranged for its inspection by the public, at the Offices of the Company, 76 Cheapside.

Full prospectuses, and forms of application for shares, with numerous testimonials, may be obtained at the Offices of the Company, 76 Cheapside.

THE FOOD PRESERVING COMPANY (Limited). (JONES' PATENT.)

The LIST of APPLICATIONS for SHARES will be CLOSED for London on WEDNESDAY, the 20th instant, and for the Country on THURSDAY, the 21st instant.—By order.

FRED. W. SMITH, Sec. (pro tem.)
76 Cheapside, E.C., 15th Dec., 1871.

MILNERS' STRONG HOLDFAST AND FIRE-RESISTING SAFES

(of Six Progressive Qualities and Prices, suitable for all amounts of risk), CHESTS, STRONG ROOMS AND DOORS with all the Latest Improvements. Effectually guarding against the novel modes of attack, as used by the Caseley gang in the Cornhill and other rooberies (against which, no safe made before 1865 is secure), but which addition to Milners' succession of improvements during the last half-century constitutes their safes the strongest, and (quality considered) the cheapest safe-guard against fire and the modern burglar. Milners' Phœnix Safe Works, Liverpool, the most extensive and complete in the world. Depots: Liverpool, Manchester, Sheffield, Leeds, Hull; London depot, 47A Moorgate street, City, near the Bank of England. Circulars free by post.

THE STRANTON IRON AND STEEL COMPANY (Limited).

Works:—West Hartlepool.

Incorporated under the Companies Acts, 1862 and 1867.

Capital, £100,000, in 10,000 shares of £10 each.

£1 payable on application, and £3 on allotment.

First call, £3 on 1st February, 1872.

Remainder as required on giving one month's notice.

In the event of no allotment being made, the deposit will be returned in full.

DIRECTORS.

E. W. Barnett, Esq., C.E., Victoria street, Westminster.
R. O. Buckley, Esq., Fenchurch street, London.
James Colquhoun, Esq., Royal terrace, Edinburgh, and Seaton Carew, West Hartlepool.
W. H. Higgins, Esq., Iron Merchant, Liverpool.
A. Higgins, Esq., Iron Merchant, London.
A. R. Quiney, Esq., Mincing lane, London.

BANKERS.

National Provincial Bank of England, London.
National Bank, Liverpool.
Commercial Bank of Scotland, Edinburgh and Glasgow.
SECRETARY (pro tem.)—E. Howard Leversage, Esq.
OFFICES—110 Cannon street, London, E.C.

ABRIDGED PROSPECTUS.

The object of this Company is to take over and work the newly-erected Stranton Iron and Steel Works, situated at West Hartlepool, and to further develop and enlarge the same, for which property the owners have agreed to accept £35,000 in cash, and 3,500 fully paid up shares.

The purchase includes certain important patents, one being much used at these works for the manufacture of a superior quality of finished iron out of No. 4 Cleveland pig.

These terms have been arranged with the approval of A. Davy, Esq., C.E., of Sheffield, whose report is printed and enclosed.

The property consists of four acres of freehold land, on which are erected the requisite buildings; comprising—puddling furnaces, capable of producing 10,000 tons of puddled bars per annum, also heating furnaces; rolling mills; steam-engines; steam hammers—quite new, of the best make and materials, and with the most recent improvements; and all other necessary appliances for the purpose of manufacturing 15,000 tons of finished iron per annum.

Arrangements are being made for an enlargement, so as to increase the out-turn to about 25,000 tons per annum, which can be effected for a comparatively moderate outlay, an estimate having been obtained to supply and lay down complete, all necessary machinery for £10,000, with the requisite number of puddling furnaces and boilers; this increase will materially diminish the cost of production, and thereby also proportionately augment the annual profit. The manufacture of steel rails is also in contemplation.

The works are now in operation, a considerable quantity of iron having already been produced and sold; large orders are also in course of execution at very remunerative prices, and taking the profit at only 20s per ton on the 25,000 tons per annum, a return would result of about 25 per cent. per annum on the proposed paid-up capital. A considerable income may also be derived from granting royalties, if thought desirable, under the patent.

The only contract entered into on behalf of the Company is:—1871. December 4th. Agreement between R. O. Buckley, Esq., of the one part, and W. H. Higgins, Esq., on behalf of the Company, of the other part.

Copy of the agreement and articles of association can be seen at the Solicitors' Office.

Full prospectuses and forms of application can be obtained of the Brokers, the Bankers, and at the Offices of the Company.

Offices—110 Cannon street, E.C., 6th December, 1871.

THE STRANTON IRON AND STEEL COMPANY (Limited).

The SUBSCRIPTION LIST of this Company will be CLOSED for London on WEDNESDAY, the 20th instant, and for the Country on THURSDAY, the 21st instant.—By order,

E. HOWARD LEVERSAGE, Sec. (pro tem.)

110 Cannon street, London, E.C., Dec. 16th, 1871.

ROYAL STRAND THEATRE.

Sole Lessee and Manageress—Mrs Swanborough.

Great attraction. Production of a grand entirely new and original Burlesque by F. C. Burnand, entitled ARION; or, THE STORY OF A LYRE. Last two nights of Mr John S. Clarke. In consequence of Mr John S. Clarke requiring a few weeks' rest to recruit his health, Mrs Swanborough is compelled to announce the last two nights of TOODLES.

On Monday and Tuesday, commence at seven with the successful new comedietta, AN ELIGIBLE BACHELOR. Mr W. H. Swanborough; Mesdames Fanny Hughes, O. Armstrong, R. Cullen, and Raymond. After which, at eight (last two nights), TOODLES. Mr John S. Clarke; and Mrs Raymond. To conclude with Byron's glorious burlesque, IVANHOE.

On Wednesday and during the week, commence at seven with a farce. Followed by AN ELIGIBLE BACHELOR. After which, will be produced on a scale of splendour, a grand, entirely new, and original burlesque, written by F. C. Burnand, Esq., entitled ARION or, THE STORY OF A LYRE. The beautiful new scenery painted by Mr H. P. Hall. The new music composed and arranged by Mr John Fitz Gerald. The splendid new dresses by Mr S. May, Mrs Richardson, and assistants, from designs by Linley Lambourne, Esq. New properties by Mr Ball. Machinery by Mr Beavington. The burlesque produced under the direction of Mrs Swanborough, Mr J. Wallace, and Mr F. C. Burnard. Characters supported by the following powerful caste:—Messrs Edward Terry, H. J. Turner, T. Edge, Bartlett, West, and Harry Paulton; Mesdames Augusta Thomson, R. Rance (her first appearance at this Theatre), T. Venn, O. Armstrong, Raymond, R. Cullen. M. Pascal, C. Bateman, Lennox, and a numerous corps de ballet. To conclude with LODGERS AND DODGERS. Due notice will be given of Mr John S. Clarke's reappearance. Doors open at half-past six. Secure your seats. Acting Manager—Mr Arthur Swanborough. Treasurer—Mr Edward Swanborough.

TO THE SHAREHOLDERS OF THE ERIE RAILWAY.

GENTLEMEN,

The proceedings which I inaugurated for rescuing the Atlantic and Great Western Railway have been, with the unflinching aid and co-operation of Messrs BISCHOFFSHEIM and GOLDSCHMIDT, successfully concluded. The Road is restored to its owners, and the Board of Directors of the Reorganised Atlantic and Great Western Company includes some of the best known and most respected names in the United States, as a guarantee for its faithful administration hereafter.

The *gross* annual revenue of the ERIE RAILWAY is now £4,000,000 sterling (calculating the dollar at 4s), being about the same as that of the New York Central, running between the same points, viz: New York and Buffalo. The capital and length of the two roads, and their traffic resources are about the same, but the net revenue of the New York Central is £1,650,000, while that of the Erie appears scarcely £250,000, the whole of which is required to pay its bonded interest. Were the Erie Railway managed in the interests of the proprietors, as the New York Central is, a surplus of £1,400,000 would appear to be available for the Erie Shareholders, from whom, however, it is now diverted through private contracts for loading and receiving freight, the construction of rolling-stock, the purchase of supplies, and the working of the coal, petroleum, and through traffics. During the last three or four years, the Capital Stock has been increased by Ten millions sterling, and it is still increasing. No one outside of the "Ring" knows its present amount. No dividends have been paid on the ordinary stock since 1865, when 8 per cent. was declared; or on the preferred stock since 1868.

I now propose, if supported by the Erie proprietors, to commence energetic proceedings for the removal of the present Directors of the Erie Railway, and placing in power an honest and capable administration. The time is opportune for rescuing your splendid property from its present scandalous position. I undertake this movement alike in the interests of the Atlantic and Great Western Railroad, with which I am more immediately connected, and of the Erie Railway proprietors, as well as for the justification of the laws of the United States, which, if rightly appealed to, will not fail in protecting your interests.

I have, therefore, to request that all Erie Shares shall be deposited with Messrs BISCHOFFSHEIM AND GOLDSCHMIDT, who have consented to act as Agents for the Reorganisation of the Erie Railway, and to issue Certificates for the same as in the Reorganisation of the Atlantic and Great Western Railway. There is reason to believe that the policy which has resulted so satisfactorily in the one instance will be equally successful in the other. Their Agency will not be in any way antagonistic to the action or objects of the existing "Protection Committee," but will, on the contrary, be directed to the very end that Committee has in view. The Shares will be received without charge, and will not be subject to any contribution until the administration of the Railway is reformed, and payment of dividends resumed. In order to check the issue of Shares, which continues to overflow all restrictions placed on it either by the Protection Committee or by the laws of New York, the actual deposit of the Shares with Messrs Bischoffsheim and Goldschmidt and consequent conversion into Certificates is imperatively necessary. It being essential to limit the time for such deposit, so as to prevent any issue of fresh Shares being made available for that purpose, *no shares will be received by Messrs Bischoffsheim and Goldschmidt after the date named in the subjoined Advertisement.*

The legality of Erie Shares, for which Certificates will be issued by Messrs BISCHOFFSHEIM AND GOLDSCHMIDT, will not be contested.

Effective action can only be secured by the hearty co-operation of a very large proportion of the proprietors. It is, therefore, to be hoped that all English and Continental holders will at once join in this new effort for the recovery of their property.

Messrs W. and H. P. SHARP, who acted as Solicitors in the Atlantic Reorganisation, will again give their services in the present instance,

I am, Gentlemen, your faithful Servant,

JAMES McHENRY.

1871. ERIE RAILWAY REORGANISATION.

MESSRS BISCHOFFSHEIM AND GOLDSCHMIDT are prepared to receive Shares of the Erie Railway Company and issue their Certificates in exchange. NO Shares will be received unless deposited at their Counting House, Founders' Court, Lothbury, E.C,, on or before Saturday, the 23rd instant. AFTER THAT DATE, *the advantage of* JOINING IN THIS MOVEMENT MUST, *in the general interests, be positively restricted.*

On November 25 was Published, No. XI., New Series, Price 8d and 8½d,

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL for November gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains

A FINANCIAL RECORD OF THE MONTH; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to November 22.

Advertisements for the next Number, to be published on December 30, must be sent, to insure insertion, on or before December 28.

The December Number of the INVESTOR'S MONTHLY MANUAL will give, in addition to the usual information, the Highest and Lowest Prices of all Stocks and Shares for the last Three Years, the latest quotations for 1870 (so as to indicate the Exact Movement during the Twelve Months), a Complete Directory, the names of the Markets where each Security is chiefly dealt in, a Financial History of the Year 1871 (including a Tabulated Chronicle of Events), besides Memoranda relating to the Financial Position of Foreign and Colonial Governments, to Railways, &c., &c. A copious Index will be added for purposes of reference.

This Double Number will be published on Saturday next, the 30th of December. Price 1s 4d; by Post, 1s 4½d.

OFFICE—340 Strand.

ONE DEDUCTION FROM THE RECENT MOVEMENTS IN THE MONEY MARKET.

The recent movements in the money market give additional force to a proposal which has been often made—and first, we believe, by an able correspondent in these columns—that the Bank of England should publish the bankers' balances in their weekly account as a distinct item from the rest of the private deposits. The great advantage of this would be that we should have a more quick and just knowledge of the nature of the liabilities of the Bank. If, as lately, there was a sudden increase in the bankers' balances, we should know that in all likelihood that money was not about to remain in the Bank. The reserve of bankers is proportioned to their liabilities; they keep, as a rule, the quantity unemployed that experience has shown them to be necessary. If, on a sudden, that reserve is much augmented, the strong presumption is that a large extra sum or sums have somehow been deposited with them which they cannot employ, and which they accordingly place on deposit at the Bank of England. This the Bank of England would know to be temporary, and would act accordingly; but the public, who only know the facts of the present return, and have no ground for thinking this deposit more temporary than any other, are much puzzled, and cannot account for the unusual policy of the Bank.

It would also be advantageous that the public should know how great or how small the aggregate reserve of bankers at the Bank of England really is. At present, except from the returns relating to the panic of 1857, in which the bankers' balances are separately given, there is no authentic basis for reasoning concerning them. There has been a great increase in the private deposits since 1857—

	£
They now are	20,526,000
They then were	10,002,000*
Increase	10,524,000

* We give the figure for Oct. 10, a date just before the panic of 1857.

And it is generally believed that of all the deposits, the one which has most contributed to that increase is the aggregate of bankers' balances. It is very desirable that the public should see whether, as a whole, the balance of bankers does or does not augment with the increase of their liabilities. No doubt it ought to do so, and we believe it does, but we ought to be sure, and to have authentic evidence of the fact. Of course the reserve of the bankers being deposited at the Bank of England is a different thing from the reserve of the Bank itself, which is in its own custody. The bankers' balances are one of the funds out of which the Bank of England makes its loans; that of the Bank of England is the ultimate reserve, which is never lent, and which is the great fund to be looked to for meeting unusual demands, whether caused by an unfavourable exchange or by a domestic panic. No prudence on the part of the bankers in keeping a large reserve at the Bank will help the country if the Bank of England mismanages, and does not keep enough reserve of its own. But, on the other hand, the bankers will help the Bank of England materially by keeping a large reserve on deposit; they will give it additional means of keeping a large reserve of its own. And it will be additionally to blame if it does not use these means.

There would also be a great and important advantage to the bankers themselves, at least to the joint stock banks. At present there is a doubt hanging over their half-yearly returns. It is currently said—and we have no means of confirming or

contradicting the report—that just before the publication of their accounts large sums are called in from the bill-brokers and the Stock Exchange, in order that the reserve at the Bank of England should look larger. Nothing could be more reprehensible than such a practice: the account of a bank ought to show its actual condition and not an artificial condition contrived to make the account look good. But now we have no means of denying that some banks at least may do this; no bank can speak with authority as to the proceedings of any other bank. But if the bankers' balances did not augment at these seasons, we should have good evidence that the accusation was untrue, and that the reserve, as shown by the published accounts of banks, was in all cases their usual reserve, and in no case a made up and extraordinary one.

THE ORLEANS PRINCES AND M. THIERS.

M. Thiers has at last ungraciously and awkwardly permitted what it is not very easy to see why he ever interdicted, at all events after it became pretty clear that the Assembly did not intend to debar the Orleans Princes from gaining any influence in France which their history and positions might obtain for them. It might be a fair question,—we do not say that it was not,—whether in the excited state of political feeling between the friends of Monarchy and the friends of a Republic, the exile of men who might be regarded as putting forward a pretension to the Throne should ever have been cancelled. It was no doubt a high State question whether the Orleanists should not remain under a statutory prohibition to enter France, and the Buonaparte Princes be put under such a prohibition. However, the Assembly decided finally against this policy, and decided even to legalise the elections of the Duc d'Aumale and the Duc de Joinville as members of the Assembly. If M. Thiers thought this policy utterly bad, he should have vetoed it under threat of resignation; and if he thought it a course which, though approved by this Assembly, is disapproved by the mature judgment of France, he ought to have exerted his whole influence to get a dissolution, and the election of a new Assembly, which would test the true opinion of the nation. But he did neither of these things. He acquiesced in the decision of the Assembly to admit the legality of the election of the Orleans Princes, and then attempted by an exertion of personal influence to keep them out of the political arena. This could only be accounted for by the personal jealousy of M. Thiers, which is, we need hardly say, not a defensible political motive, and he is now apparently "hoist with his own petard." For finding that personal persuasion would no longer do, he attempted to represent the pledge given by the Orleans Princes as given to the Assembly and not to him, and professed himself personally indifferent in the matter. The Assembly, on their side, professed to know nothing of the engagement, and simply put the subject aside, apparently thinking that the Princes would never venture to take their seats without an express invitation to do so; whereupon the Princes, finding that both M. Thiers, the head of the Government, and the Assembly disavowed being parties to any honourable engagement with them, of course justly assumed that there was none such in existence, and quietly took their places in the Assembly without invitation, and of course without repulse.

The result is, as far as we can see, far from a subject for legitimate regret. We are by no means inclined to place any very high confidence in the practical abilities of men who have been so long out of France and out of the region of practical statesmanship as the Princes of the house of Orleans. It may well be that in losing their political apprenticeship, they have lost all chance of taking the position of real rulers. It is not, therefore, from any strong confidence in their power to introduce elements of order into the terrible political chaos of France that we rejoice in their admission to the debates of the French Assembly. But be the hope which attaches itself to their names small or great, it is clearly, in the present state of France, not one to be thrown away. M. Thiers is even now at most able to temporise. He can carry his own views in hardly anything. His policy is feeble, and his aims are confused. He has great tact, but he has few convictions, and therefore no power of guiding the convictions of the mob of deputies who shriek against each other at Versailles. He staves off one difficulty after another, his whole policy being apparently included in the notion of staving off difficulties. He cannot make the Assembly remove to Paris, and he will not encourage it to move into the country. He will not decide on universal conscription, and he cannot find a substitute. He will not propose a permanent form of constitution himself, yet he cannot hold on long without one, without some power of dissolution at the very least. He does not know in the least what financial proposals to make which would be agreeable to the Assembly. He is at best painfully following the lead of the least capable popular Assembly which perhaps ever met in France. And he is nearly 75 years old, without a rival or sign of a successor,—M. Grévy, of whom nothing is really known, except that he makes a firm President to the Assembly, being the only man who has ever been suggested as the one likely to succeed him. In such a condition of things what can be more desirable than that any men who have the slighest shadow of a natural advantage for the post of leaders should at least have the arena freely opened to them? In the absence of strong political character the prestige of dignity and rank is not of insignificant value; in the presence of it—and no one questions but that the Duc d'Aumale *might* turn out to be a statesman—such prestige would be of the first value. We fully admit that the future of France is uncertain in the extreme; that even the *most* probable event may be so little probable in the presence of conditions so completely unknown that it would be absurd to reckon on it as what is ordinarily termed a probability. Yet the very fact that this is so renders it doubly desirable that solutions of the slightest promise should not be weighted with artificial difficulties, and what solution is there of more promise,—how *much* that may be we do not say,—than the election of the Duc d'Aumale to the position of head of the Government in succession to M. Thiers? That a return to a Monarchy would certainly divide France most dangerously we are willing to admit. It may even be assumed that the peasantry themselves, now that they see that a Republic *can* be Conservative, are glad to appease the Radicals by conceding to them this question of form. But, then, suspicions might be excited by putting at the head of a Republican Government any member of a Royal House? That cannot be denied. We are not saying that if there were any statesman of high character and high popularity with the peasants weighty enough to wield the influence of the Duc d'Aumale without being the object of these suspicions, it might not be better to have him than to take an uncle of the heir of Louis Philippe. Still beggars must not be choosers. And when there is so total a deficiency of men of the calibre needed to exercise any influence at all with the Assembly and to inspire confidence also in the French peasantry, it does not do to take every objection that can be raised to those who are men of such calibre, as final. We are by no means saying that the Duc d'Aumale ought to be at once chosen M. Thiers's successor. We only say he ought to have a clear field in which to prove his political capacity,—that there should be no attempt to keep down one of the very few men of whom there is a rational hope that they might be fairly trusted as heads of the French Executive. If the Republican suspicion excited by the rank of the Orleans Princes is to be counted—as it should be counted—to their disadvantage as candidates for high office under the Republic, then, on the other hand, the confidence excited by their rank and known character should be fairly weighed on the other side. A genuine Republic, honestly accepted and governed by a Prince of the late Royal House, would probably command more popular adherence in France than any other form of Government. The Republicans might trust it the more,—directly they were assured of the honesty of the individual ruler,—that it would be so much less likely to excite a Royalist cabal against it; while the Royalists would trust it the more because of the rank and descent of the Prince President. At all events, if in the realm of the blind the one-eyed is a King, in the realm of politics so anarchical as those of France, a ruler who anywhere else would be thought too little popular for even a chance of rule, might well be elected President. M. Thiers would have consulted better the good of the commonwealth, as well as his own dignity, if he had not tried to shut the door by a sort of *ruse* on the Princes of the House of Orleans.

PRESIDENT GRANT ON CUBAN AFFAIRS.

If the affairs of the American Union were still in the hands of Southern statesmen—that is, of men whose interest it was to increase the area of soil cultivated by servile labour—the Message of President Grant about Cuban affairs would mean little less than a declaration of war with Spain; and even as it is, we do not think that contingency quite so impossible as some of our contemporaries. The facts are very grave indeed. In the very outset of the revolt the Spanish Government committed a grave error. Owing partly, we suspect, to ignorance, and partly to the necessity which existed at the moment for conciliating the jealous pride of the people, that Government announced that it would make no terms with armed rebels, that the Cubans must lay down their arms, and that it would then proceed to consider grievances which Prim at all events knew to be both real and considerable. Had the Cubans submitted, that general, who, violent as he occasionally showed himself, was neither cruel nor vindictive, would probably have induced the Cortes to consent to some reasonable compromise—such, for instance, as the creation of a local Cortes, with power over all affairs except those of Imperial import, and all revenue except the tobacco monopoly, and so have restrained misgovernment within endurable limits. The Cubans, however, rendered mistrustful by the events of half-a-century, during which they have constantly suffered from violated promises, read in the stern proclamations from home assurances of treachery, either liberated the blacks, or in some method not yet detailed secured their confidence, and availing themselves of the natural features of their large territory, made of independence an ultimatum. The Spanish spirit, essentially a haughty one, took fire; the friends of Spain within the island were exasperated to fury; no less than fifty thousand Spanish soldiers were sent by degrees and in driblets into the island, and a device was adopted without parallel, so far as we know, in the long history of Spanish colonial warfare. The friendly section of Cuba, and more particularly Havana, was known to be honeycombed with disaffection, and it was thought that if this section could be completely garrisoned, even by inferior troops, the regular soldiers would be set free for the conquest of the insurgent districts. The colonists therefore and the Spaniards were invited to furnish volunteers for garrison duty, and the call was obeyed by the most extraordinary crowd ever collected in arms. Honest but ignorant patriots from Spain in hope of a career, old soldiers suffering from want, the desperadoes of the cities, young men anxious to avoid conscription, a good many mere ruffians, and, it is believed, a good many compromised Reds, swelled the ranks of insular sympathisers, mostly of the "mean white" sort, till the whole body reached 40,000, and found itself all at once in possession of the balance of power. At first, we believe, though we admit that on this point we are compelled to rely too much on American accounts, the volunteer force was more than half inclined to join the insurgents, and become the army of the island; but gradually, after a term of partisan warfare marked by inconclusive engagements and excessive cruelty, it became penetrated with the feeling of the insular loyalists, and far outdid them in rancour and severity. One Captain-General was denounced for lenity, and another was sent home; orders from the Home Government were treated with derision; and at last the volunteers openly proceeded to dictate the official policy. It was to be one of mere severity. Every rebel taken, black or white, was to be shot. The policy of dividing black from white, the half-hearted from the determined, was derided, and the educated colonist who desired a compromise was as much an object of suspicion as an insurgent leader. A reign of terror was set up, under which capitalists, professional men, and great planters speedily found their lives unsafe, and began to look to their business correspondents in the American cities as their only hope. They carefully related the history of every week, and at last excited strong feeling within the Union. The Americans are exactly like the English in one respect. Cruelty, when committed on persons whom they know, or classes which they understand, more especially if the classes and persons happen to be respectable, rouses in them a passionate indignation, and the Government was earnestly besought to intervene. The Government was unwilling, without a larger policy than mere intervention, but it made some attempts to induce Spanish statesmen to sell the island, not to the Union, but to the Cubans themselves—the secret, we imagine, of official denials at Madrid otherwise inexplicable—and at last, moved by the growing lawlessness in Havana, and the cries of Americans whose property and friends were being destroyed by the war, uttered the threat contained in the President's Message. The Cuban authorities must leave American citizens alone. If not the American fleet would make them. Six vessels, four of them of the first-class, were put in commission, and in a few days will be ready to answer any appeal from American citizens or Cubans claiming to be naturalised citizens of the States.

We do not think it by any means certain that no such appeal will be made. The Spanish Government, which is not so much obstinate as coerced by opinion, would doubtless avoid any such complication, but it is not fully master of the situation. Owing to some cause of weakness which we do not fully understand, unless the regular troops have perished in an unprecedented manner of disease, or unless there is risk of the volunteers joining the insurgents, it appears to be unable to restrain the fury of its militia, who, only three weeks since, insisted on the execution of eight students, sons of the principal professional men in Havana, for a stupid freak—the desecration of a rather preposterous monument over a volunteer. Four thousand more regular troops have been sent out at once, and six thousand will follow day by day, while three ironclads are under orders for the Antilles; but the Captain-General may still be unable to prevent outrages which the volunteers will consider acts of patriotism—the Americans sympathising more or less openly with Cespedes and the insurgents,—and which the Washington Government will consider acts of savagery If any such act is committed, President Grant is quite certain to risk all consequences, and the American people is quite certain to support him Neither desire war; but if American citizens are shot, and still more, if the American Consul-General is arrested—which is quite likely—the squadron will demand redress, and if it is refused, will open fire—a fire which will be followed n a certright by a rush of American sympathisers to the insurgents' end of the island. The cities of the Southern States are crammed with men who ask nothing but such a chance, and who will bring to Cespedes energy, experience, arms, moral support, and the one quality in which the Anglo-Saxon excels the modern Spaniard, who is otherwise a most formidable soldier—military "go." In three months the revolt would be successful and Cuba independent, and a sort of nominal "war," without active hostilities, would be raging between Spain and the United States—a war, perhaps, of no particular importance, but still entailing great expense on Spain, and endless annoyances upon neutral Powers, particularly ourselves. No such danger is imminent if King Amadeo is supported in Madrid and obeyed in Cuba, for neither he nor the President have the slightest desire for hostilities on account of Cuban affairs; but it is extremely doubtful if the King can restrain the imprudent and ferocious persons who appear for the moment to be masters in the Havana from some act which will compel one of the most powerful and resolute Governments in the world to act with decisive vigour. A war with America on behalf of friends who will not obey her orders would about complete the misfortunes of Madrid; and such a war, though not inevitable, is by no means beyond the range of possibility.

THE PRESENT STATE AND PROSPECTS OF AMERICAN FINANCE.

Mr Boutwell's third statement revives the impression that seldom has the Finance Minister of a great country been less competent than Mr Boutwell has shown himself to be. As was the case in his statement last year, Mr Boutwell is less fluent and enthusiastic than he was at first in the utterance of stale Protectionist heresies and of financial crotchets of his own; but substantially he is unchanged. His report contains little more than a statement of his adherence to the policy of heavy taxes to reduce debt, a lame account and vindication of his operations to convert the debt, which have come so far short of his intentions, and a suggestion to plant the industry of iron steam-ship building in the United States by an annual payment for five years of 13 dols per ton to the owners of the ships built. The latter suggestion is the last outcome of absurdity among American Protectionists, who cannot escape the charge of having destroyed American ship-building, and exhaust themselves in fancy devices to revive it upon Protectionist principles. Fortunately for the United States, the situation of the country is such that it can pull

through with such Ministers as Mr Boutwell, or rather without any definite authority in finance; and the present facts show in a very striking manner the peculiar nature of that wonderful success in finance with which the United States may be credited.

In a strictly Treasury sense—apart, that is, from the economic effects of the taxes and expenditure on the country—it would hardly be possible to imagine more flourishing finances than those of America. First of all, during the last two years the surpluses have been gigantic—

	£
In 1869-70 the surplus was	18,627,000
In 1870-71 it is	16,712,000
Total surplus of two years.....	35,339,000

The whole of this vast sum has been available for the reduction of the debt. Such a fact is unprecedented in financial history. It may be due partly to the American constitution, which separates so completely between legislation and administration—the result in fiscal matters being that taxes may be left in existence even contrary to the wish of the Executive, and that the Treasury gets the benefit of those taxes. But, whatever may be the cause, the Americans are entitled to credit for submitting in some way to great, even if unnecessary, sacrifices for a national object. There was room to suppose that the great reductions effected immediately after the war by means of the outstanding war taxation, and when the yield of the taxes could not be exactly calculated, were to some extent accidental; but the return to the former rate of repayment must be admitted to be more deliberate.

The next satisfactory fact is the remarkable growth of the revenue over the estimate. It is not true that the large surpluses above mentioned were wholly intended, though the purpose was to have very large surpluses. In addition there has been an elasticity in the growth of American revenue even more remarkable than that with which we are familiar at home. We subjoin below the estimate for 1870-71, as well as the result, and considering that the estimate was made when nearly six months of the year had passed, the excess of the actual result over the reckoning is indeed most wonderful. The leading changes are:—

	Estimated.		Accrued.		Increase.
	£		£		£
Revenue.....	65,835,000	...	70,276,000	...	4,441,000
Customs.....	34,050,000	...	37,816,000	...	3,766,000

It is not always creditable to a Finance Minister to be out in his calculations so much, even when the balance comes in on the right side; but in the peculiar circumstances of America the error was more venial, the growth being comparatively unexpected according to recent experience. That it has occurred is striking proof of the vigour of American industry, and the rapidity of the national growth—the most cardinal fact after all in American finance. The people are so industrious, and nature has been so bountiful, that in spite of a system of Protection which would have ruined outright any old country, and which has indisputably done infinite damage to the Americans, the country grows at a rate without example elsewhere, except perhaps in England in a prosperous epoch like the present.

As regards the prospects of American finance the new facts are very important. The new House of Representatives is certainly leavened to a remarkable extent with Free-traders and revenue reformers, and it is impossible that the Protectionists will have their own way in it as they have hitherto done. Both President Grant and his Secretary to the Treasury suggest important concessions to this party. President Grant, while mainly recommending the abolition of internal taxes, except stamps and the excise on alcoholic drinks and tobacco, also proposes a readjustment of the tariff. His suggestion is—"That a careful estimate be made of the "amount of surplus revenue collected under the present "laws, after providing the current expenses of the Govern- "ment, the interest account and a sinking fund, and that "this surplus be reduced in such manner as to afford the "greatest relief to the greatest number. There are many "articles not produced at home, but which enter largely "into general consumption through articles which are manu- "factured at home—such as medicines compounded, &c., &c. "—from which very little revenue is derived, but which "enter into general use. All such articles I recommend to "be placed on the free list. Should a further reduction "prove advisable, I would then recommend that it be made "upon those articles which can best bear it, without dis- "turbing home production or reducing the wages of American "labour." This language, though still Protectionist, is plainly framed with a view to conciliate people who are not Protectionist; and the tone is such that a revisal in a Free-trade spirit might properly be covered by it. Protection, we should infer, is to be maintained in theory but extensively given up in practice, and the measures suggested are such that by the gradual accumulation of similar measures—and one leads to the other—Free-trade would in the end be arrived at. A reduction upon articles "which can best bear it without disturbing "home production or reducing the wages of American labour" is in fact the exact kind of reduction which Sir Robert Peel began between 1843 and 1846, and which has ended as we see.

Mr Boutwell's suggestion is rather less satisfactory, but it still admits a great deal of the Free-trade demand. He says:—"I respectfully recommend to the consideration of "Congress the reduction of the duties on salt to the extent "of fifty per cent.; the duty on bituminous coal to fifty cents "per ton; the reduction of the duty on raw hides and skins, and "the removal of all duties from a large class of articles pro- "duced in other countries which enter into the arts and manu- "factures of this country, and which are not produced in the "United States, and the revenue from which is inconsider- "able. Such a list, with the revenue derived from each "article, is in course of preparation, and will be submitted to "Congress. The removal of duties from a large class of "articles used in manufactures, and the reduction of the "duties upon coal, furnish an opportunity for a moderate "decrease of the rates of duties upon those products whose "cost will be diminished by these changes." The abolition of the duties here described would be a great step in advance. The reduction of the duties on salt, coal, and hides would diminish materially the "protection" now given to certain trades, and the abolition of minor duties would have an importance in relieving trade, as we all know, out of all proportion to the mere amount of the duties collected. But the most important point is that these abolitions and reductions are to be used as furnishing an "opportunity for a moderate "decrease of the rates of duties upon these products, whose "cost will be diminished by these changes." It is impossible to misunderstand the glance here thrown at the iron, cotton, and woollen manufactures, whose products are all enhanced in cost by the duties to be abolished. The abolition or reduction of one duty inevitably leads to the abatement of others, and Mr Boutwell could not go so far as he proposes without practically acknowledging the failure of that thorough-going Protection which the United States has hitherto practised.

Such is the position and such are the concessions now offered to Free-traders by ardent Protectionists. We infer that Free-trade principles are now on the eve of a very considerable triumph in the United States, and with the quickness of action characteristic of Americans, it would not be surprising to see the system thrown down almost as quickly as it was set up. Mr Wells predicts in the essay from which we have already quoted, "that ten years will not elapse before "every vestige of restrictive and discriminating legislation "will be stricken from the national statute book." The consummation may to all appearance come before that, and one of the most potent causes in producing it will have been these very studies in political economy which Mr Wells issued from time to time in his character of Commissioner of Revenue, and the subsequent essays in which he has enforced the lessons. The sort of facts he observed and reasoned upon were familiar to every student of economic science, and were only what might have been expected; but the American facts were on so large and complete a scale, that Mr Wells's account of the experiments will long remain among the most valuable contributions to the literature of political economy. He has the credit too of long ago recommending those very changes which Mr Boutwell and President Grant are now advocating—in particular, the abolition of small duties yielding little revenue. He was not listened to at the time, but the country is coming round to his views, and he must gain in authority at home accordingly.

RECEIPTS AND EXPENDITURE OF THE UNITED STATES.*

RECEIPTS.

	1870–71.		1871–72.	1872–73.
	Estimate in Dec., 1870.	Result.	Estimate in Dec., 1870.	Estimate in Dec., 1871.
	£	£	£	£
Customs	34,050,000	37,816,000	32,083,000	38,867,000
Internal revenue	26,977,000	26,235,000	23,177,000	23,100,000
Sales of public lands	521,000	438,000	550,000	550,000
Miscellaneous sources	4,287,000	5,787,000	2,933,000	3,300,000
Total	65,835,000	70,276,000	58,743,000	65,817,000

EXPENDITURE.

Civil and miscellaneous purposes	13,239,000	12,741,000	11,767,000	11,082,000
War department	7,375,000	6,563,000	5,223,000	5,761,000
Navy department	3,633,000	3,562,000	3,675,000	3,473,000
Indians and pensions	7,026,000	7,676,000	6,421,000	6,586,000
Interest on public debt	21,905,000	23022000†	24297000†	23152000†
Total	53,178,000	53,564,000	51,383,000	50,054,000
Surplus	12,657,000	16,712,000	7,360,000	15763000‡

* Converting the dollar throughout at 3s 8d.

† The heading in the statement is "Permanent Appropriations," and it must include some other charges besides debt interest, as the interest on the debt is diminishing. The accounts are not detailed enough to show the exact charge.

‡ Including 4,891,000*l* for sinking fund.

MR VERNON HARCOURT ON LAW REFORM

FOUR millions sterling are spent annually in these kingdoms on the machinery of law and justice, and in return we get the most complicated, costly, and slow-moving system in the world. No other nation spends so much and has its work so badly done. Starting from these facts, Mr Vernon Harcourt, in a recent address to the Jurisprudence Section of the Social Science Association—an address which has just been printed in a pamphlet form—did not feel called upon to prove the necessity for a reform of our judicial organisation. He assumed that it was inevitable, and taking his stand upon the general conclusions of the Judicature Commission, he unfolded a scheme of judicial reconstruction which it is to be hoped he will press upon the attention of Parliament. The merit of Mr Harcourt's plan is that it is coherent and comprehensive, not a piece of timid tinkering that will itself require to be tinkered again in ten years or less, but a substantial workable measure that, once adopted, would become a settled and stable part of the institutions of the country. It may be objected that Mr Harcourt's proposals are too revolutionary to be ever accepted with a good grace by the Conservative mass of the legal profession. He sweeps away ruthlessly venerated names, institutions, and distinctions. The Appellate jurisdiction of the House of Lords and of the Privy Council go down before him, the Circuits disappear, the distinction between Law and Equity is erased, Chancery, Queen's Bench, Common Pleas, and Exchequer become obsolete names of tribunals no longer having separate existence. But what will shock lawyers most of all is that Mr Harcourt lays a sacrilegious hand upon the long vacation.

The evil of which complaint is chiefly made is that legal delays render law costly, and of all legal delays the long vacation is itself the hugest and least reasonable example. The legal business of the country is brought to a standstill for three or four months, and cruel hardship is inflicted on thousands of litigants, not in order that Judges and lawyers should have their vacation, which is quite fair and proper, but that they should all take their holidays at the same time, for which there is no vestige of reason. In no other profession or department of the public service would anything of the kind, as Mr Harcourt observes, be tolerated. The clerks in our Government offices, for example, get their annual vacation, but each has to wait his turn; no one dreams of proposing to shut up the Home Office, the War Office, or the Admiralty for three months in order that the staff may all enjoy their freedom together. It is quite certain that so preposterous an institution as the long vacation would never have been maintained if it had not subserved the private interests of the leading men at the bar. If the Courts were to sit all the year round, the leaders would have to take their holidays when they could, and to allow their business for the time to fall into the hands of younger men. Physicians and surgeons, and all the other skilled occupations, have to run this risk; but the big lawyers provide an artificial barrier against competition by upholding the long vacation. To clear the ground for his reforms, Mr Harcourt proposes to abolish this absurdity, and to make the sitting of the Courts continuous; for this purpose he would have a larger number of Judges than would be needed in each Court for the actual conduct of business, and a certain proportion of them would be always taking their vacation.

The next great obstacle to a cheap and speedy administration of justice is the diversity of jurisdictions, both original and appellate, at present existing. The distinction between common law and equity has been condemned by the Judicature Commissioners as purposeless and embarrassing, and the separate functions of the Probate, Admiralty, and Bankruptcy Courts are as inconsistent with efficient judicial work. What reason again, apart from out-of-date antiquarian excuses, can be assigned for the maintenance of the independent and co-equal appellate jurisdictions of the House of Lords and the Privy Council? It is proposed therefore, first of all, to consolidate all the tribunals of original jurisdiction into a Supreme Court of First Instance, and all the powers of existing appellate tribunals into a High Court of Appeal. It appears there are no less than thirty-three Judges of the Superior Courts "disposable for purposes of judicial administration." Of these, ten would be constituted the High Court of Appeal, which would cumulate all the present powers of the Chancellor and Lords Justices, the Exchequer Chamber, the House of Lords, and the Judicial Committee; for Mr Harcourt believes that with a "really powerful and competent" appellate tribunal, a single appeal from the Courts of First Instance is all that should be permitted. This High Court of Appeal would be constituted as far as possible on the basis of representation. Real property law, commercial law, civil law, Scotch law, Irish law, Indian law, Colonial law, International law, should all be represented by eminent and erudite practitioners. Two of the ten Judges would always be on vacation, and the remaining eight would be always in session. The Court might be divided for dispatch of business into two tribunals, but this would be subject to the discretion of the President, who would be the Lord Chancellor deprived of his present political position, and retaining only his judicial functions. It may be observed in passing that Mr Harcourt inclines to replace the Chancellor as the Minister of Justice in the Cabinet by the Attorney-General. The salaries of the ten Judges of the Appeal Court would be covered by those of the Lord Chancellor (including the ex-Chancellor's pension), of the chiefs of the Common Law Courts, of the Lord Justices, and the Master of the Rolls.

Twenty-three Judges of the second rank (Puisne Judges, Vice-Chancellors, Judges of the Admiralty, Probate, and Bankruptcy Courts, and the new paid Judges of the Judicial Committee) would remain to furnish Mr Harcourt with the material for his Supreme Court of First Instance, which would cover the whole ground of the ordinary business in Common Law and Equity. For the Supreme Court eighteen of them are to be chosen, but as the tribunal is to sit all the year round, and three Judges are to be always on vacation, the working staff is to consist of fifteen only. All the present distinctions of Law, Equity, Probate, Admiralty, and Bankruptcy business being abolished, the Exchequer Chamber business too being transferred to the High Court, the alternate *nisi prius* sittings at Westminster and the Guildhall being suspended as well as those of the Circuits, it would be necessary to distribute the work of the Court afresh on a new principle. Mr Harcourt finds such a principle in the threefold nature of the business that comes before our tribunals. Every cause or motion turns either upon (1) a matter of procedure (practice or pleading); or (2) an issue of law; or (3) an issue of fact). Accordingly the Supreme Court would be divided into three parts: the first settling disputes as to procedure daily in Chambers, and reorganising, among other things, the business of the Chief Clerk's office, which is so discreditable to our present Chancery Administration; the second division dealing with points of law, such as now come before our Judges sitting *in banco* and the Vice-Chancellors; and the third division disposing of issues of fact, whether arising out of ordinary proceedings at *nisi prius*, or in Equity, Divorce, Probate, Admiralty, or Bankruptcy practice. The Chief Justice of the Supreme Court would have a salary of 7,000*l* a year, and the duty of regulating his colleagues' work. The other Judges would have 5,000*l* a year each.

There would remain to be disposed of all the important business that is settled at the Assizes, for the Circuits, as we have said, are to be abolished. For this work Mr Harcourt takes the five Judges that are left out of our present staff, after providing for the High Court of Appeal and the Supreme Court of First Instance, and adding one other Judge to their number (whose salary could be saved, he alleged, out of the present extravagant charge for Circuit expenses), he proposes to divide the country into six Circuit districts, with ten Assize towns in each, and to allocate a Judge permanently to each, with position and salary equal to those of the Judges of the Supreme Court. A Circuit Court would be held for a week once every three months in each of the ten Assize towns, and while the Judge thus obtained a rest of three weeks in every quarter, the administration of justice would be made twice as rapid as at present, and probably at half the present cost. Mr Harcourt expects that these Circuit Courts would absorb a great part of the business of County Courts and Quarter Sessions; but if the Assize business remains as heavy as it has lately been in some Circuits, the Judges will have enough to do without trenching on the work of subordinate Courts. It is a question, however, whether the County Courts are doing their work efficiently, and whether few Judges better paid might not take their place with advantage.

Such are Mr Harcourt's proposals. We hope he will not let them remain in abeyance as a mere theoretical development of the principles laid down by the Judicature Commission. He can do an immense public service by putting them into Parliamentary shape, and if he brings the question before the House of Commons, he will probably force the Government to take it up.

AN INCOME TAX FOR FRANCE.

M. THIERS forms no exception to the number of the foremost men of France whom the pressure of circumstances has compelled to eat their epigrammatic words—good or bad—during the past year. It was but on the 20th June last that he scouted the very idea of discussing an income tax, as *tres dangereuse*, and called the tax itself an *impôt deplorable* and an *impôt de discorde*. But the Budget Commission evidently think a discussion of it salutary, for, in their message of 13th September last, a tax upon various kinds of revenue is included amongst those new taxes the deliberation upon which is merely adjourned to the next Session of the Assembly.

In the meanwhile the whole subject is understood to be in course of study, and it appears that the President of the Republic has, in a very sensible manner, shown a willingness to let second thoughts on this important question control the exuberance of the first flight of his fancy, somewhat, tinged, as it was, with preconceived bias against an income tax.

A very opportune letter has been lately addressed to the members of the National Assembly by M. de Parieu from the retirement of his country seat in Auvergne. In this letter he repeats the pith of what he has ably urged, in his writings and speeches on income tax, during upwards of 20 years. In 1848, from his seat in the Chamber as a Minister, and as reporter of a commission which recommended a tax upon *revenu mobilier*, and again in 1857, in the Council of State, in advocating a law to provide for a better equalisation of the assessment of various descriptions of property, has M. de Parieu thrown the weight of his opinion in favour of such a tax for France. Like other eminent men of various shades of politics, his arena of speech is confined for the moment to the Council-General of his Department, but, in his case, that body has for the last 22 years warmly and sympathetically seconded his views on taxation by their resolutions. His authority on such a subject gains, however, a far wider horizon from the recollection in the Assembly of his vast store of information on fiscal and economical science, and of his writings on taxation, which have a great reputation at home as well as abroad.

The law of 1791, which imposed a direct *impôt mobilier* in France in proportion to the rental of houses, originally had for its object exactly the attainment of the same end as an income tax would now subserve—namely, the assessment of every man according to his means. The rent of a house was a rough and ready way of ascertaining relative wealth in a country and at a time when large industrial and professional incomes were not very numerous. But there was always a great chance of error arising from, amongst other causes, the nature of a profession or occupation requiring premises of greater or smaller comparative extent and value, and from the number of a family demanding more or less space according to circumstances. And the changes that have occurred in the growth and development of industrial and financial enterprise since 1791, and particularly during the second Empire, have been on so vast a scale, that the system inaugurated at the date just cited has become entirely antiquated and gone by as a means of ascertaining the comparative wealth of the country, and the *impôt mobilier* assessment amounts to little more than a graduated house duty.

The land tax in England and Scotland—still assessed as it is upon the valuations of the year 1692—became as inexact a guide to comparative means of the population, at the time when Mr Pitt first levied his income tax, as the *impôt mobilier* has become in France in 1871, whatever it may have been in 1791. M. de Parieu remarks, in his letter to the French Assembly, that—at a time when through the imperfection of the method of assessment of personal property in France, and perhaps also through a mistake in the studies of her legislators, the problem of direct taxation of this branch of wealth, remained quite unsolved—the great adversary of the French Revolution, Mr Pitt, became the skilful founder of a system of taxation having already a certain root in Anglo-Saxon traditions, and susceptible of subjecting personal property to taxation in the most powerful manner through an income tax, the name of which has become European, notwithstanding its distinctly English stamp. Pitt's organisation of an equalising system of taxation in 1797 thus became the model for imitation elsewhere, so that (as M. de Parieu remarks) it is now either in force in the greater part of the civilised world, or else is being studied, and put, in some shape or another, upon the order of the day for discussion, wherever it has not yet been actually introduced.

The French Budget Commission has faced with a good deal of hesitation and reserve the policy of imposing dividends upon *rente*—*i.e.*, interest from Government stock—with income tax. M. de Parieu quotes the wonderfully simple, but truthful, words by which Mr Pitt proved to Parliament, in 1798, that it would be a positive injustice if the fundholder were treated in any way differently from the landowner, manufacturer, or merchant—an argument fully endorsed by Sir Robert Peel on his re-imposition of our income tax in its present form. There can, indeed, be no doubt of the complete right and equity of any State's imposition of an income tax on its *internal* debt, consentaneously with the levy of a tax upon the revenue from all other kinds of property the protection and enjoyment of which are under the responsibility, and at the cost, of the State. It is only when a State debt is contracted and interest agreed to be paid abroad that its taxation at home becomes unjust. The French, therefore, have a complete moral and legal right to tax *rente*. And as it is to be feared that by the time the German tribute money shall all be paid, the interest on the public debt of France will not fall greatly short of forty million pounds sterling per annum, an income tax on so enormous an amount, even at a moderate percentage, is a fiscal help by no means to be despised.

It will be a matter of some difficulty to fix the limit in France at which exemption from the incidence of the income tax shall commence. Perhaps 1,000 francs, or, at most, 1,500 francs, of income should be adopted as a fair line of demarcation. An income tax on all kinds of personal property in France will certainly be vastly productive, and there is reason for being as sanguine of its good results as is M. de Parieu. He thinks it should be supplemented by an increase of the stamp duties on the transfer of personal property, and a reduction of what he considers the immense duties, "almost "exceptional in Europe," which weigh down the transfer of real property in France.

In the peroration of his most interesting letter, M. de Parieu, so far from viewing, like M. Thiers, an income tax in France on personal property as a source of social discord, considers that its levy will be only a great act of justice, and which, as such, is a principle of social concord. There are, indeed, just grounds to regard the imposition of a well-adjusted income tax in France as presenting the best chances for the future salvation of her high financial credit. The enlarged knowledge upon the subject of the income tax of England and other countries which is possessed by men of the character and influence of M. de Parieu—and of M. Wolowski, the accomplished economist and Deputy for Paris, who, with others, will, it is expected, advocate an income tax in the National Assembly

—cannot fail to be brought to bear on the discussion of the project in the approaching Session with practical effect and with wholesome results.

BUSINESS NOTES.

THE ERIE SHAREHOLDERS.—We regret to see that a division has been created among the Erie shareholders in the conduct of the proceedings for the recovery of their property. Hitherto there has been only one Erie Protection Committee, and it has certainly accomplished a great deal in the difficult process of rescuing the line from the clutches of Messrs Fisk and Gould. The litigation has necessarily been tedious and harassing, as all great litigations are apt to be, even where there is not the additional hindrance of a corrupt judiciary which is only being gradually purified; but the steps taken have nevertheless been as energetic as possible, and now there is at least a prospect of American law being made to work. Just at this moment one of the shareholders, Mr James M'Henry, steps in and proposes, on his own responsibility, a new mode of proceeding. His claim is that he has reconstructed the Atlantic and Great Western Railway, and on the strength of that success he invites the Erie shareholders to put confidence in him. We cannot but consider this proceeding as most unfortunate, and likely to impede the joint and harmonious action of the Erie shareholders. In such matters union is everything, and the step is the more unaccountable as it is not accompanied by any charge of incompetency against the present Committee, or a statement of the grounds upon which the charge is based. The separate action proposed is also the more embarrassing, because there is no statement whatever of what it is proposed to do. The shareholders are merely informed that the proceedings will be energetic, and that the object will be the reorganisation of the railway. The language is as vague as it could possibly be, and quite justifies the uneasiness which was expressed this week at the meeting of the Erie shareholders. There are, moreover, some mysterious phrases in the circular—such as that "the "legality of Erie shares, for which certificates will be issued "by Messrs Bischoffsheim and Goldschmidt, will not be con- "tested," and that the movement is undertaken "alike in "the interests of the Atlantic and Great Western Railroad, "with which I am more immediately connected, and of the "Erie railway proprietors"—about which some explanation clearly ought to be given. The Erie difficulty has been of a sort that all who propose to meddle with it should define clearly their intended action, and this is the more necessary when it is virtually proposed to supersede a Committee about whose actions and proceedings there is no mystery whatever. The Committee, we observe, have prudently resolved to wait for the details of the movement, in order to support it if possible; but if they are unable to do so those who have commenced this separate action, and thereby impeded a settlement, will have undertaken a heavy responsibility. It will be a great misfortune if the complete defeat of the Erie ring is thwarted at the last moment by a division among the shareholders themselves.

THE INCOME TAX ON SHIPOWNERS.—An important meeting of London shipowners was held this week, at which resolutions were adopted condemning the mode of levying the income tax upon them, and also condemning in general the income tax on trades and professions. We cannot say we sympathise with the specific complaints alleged by the shipowners, and in some respects they appear to be rather better off than other traders. It appears from the statement of one of the speakers, that the basis of calculating the assessment is a 5 per cent. rate of profit, and instead of this being a grievance we should think it is in most years and on the average rather favourable to the shipowner. In the North of England for a year or two back the profits are said to have been 20 and 40 per cent. per annum, and if the rule has been generally practised, many shipowners must have got off very cheaply. Another grievance alleged is that each ship is assessed separately, the manager being virtually made a collector of the tax, and bound to deduct it from his co-owners. This is only what is done in every partnership, and we doubt if the shipowners have any claim more than railway or bank shareholders to be assessed personally, instead of having the tax deducted from their dividends. While the specific complaints however are not serious, it is different with the general complaint against the tax, to which Mr Lowe would do well to give heed. There is an unpleasant amount of agitation against the tax in progress throughout the country, and as the only remedy is abolition, we cannot but consider the income tax as a source of revenue to be seriously in danger. We fear that in many quarters the screw of the assessor has been worked too severely, and that in their anxiety to make it yield what it ought to do the Inland Revenue Commissioners have succeeded in making the tax itself a grievance of the first magnitude.

THE HALF-YEAR'S STOCK EXCHANGE BUSINESS.—The extraordinary amount of business transacted on the Stock Exchange during the last six months, as manifested by the Clearing-house Returns, is the best evidence of the large savings made by the country. The figures, up to the present date, when there is only one more settling-day for the half-year to come, are as follows:—

		1871.		Corresponding Date, 1870.		Increase.
		£		£		£
July	13.....	36,712,000	.....	32,461,000	.....	4,251,000
	28.....	39,356,000	.....	30,300,000	.....	9,056,000
Aug.	16.....	36,130,000	.....	22,500,000	.....	13,630,000
	31.....	32,969,000	.....	20,512,000	.....	12,457,000
Sept.	13.....	34,412,000	.....	18,741,000	.....	15,671,000
	29.....	39,907,000	.....	22,992,000	.....	16,915,000
Oct.	12.....	37,796,000	.....	21,243,000	.....	16,553,000
	27.....	36,205,000	.....	23,005,000	.....	13,200,000
Nov.	15.....	40,539,000	.....	26,596,000	.....	13,943,000
	30.....	39,741,000	.....	25,018,000	.....	14,723,000
Dec.	15.....	42,372,000	.....	22,380,000	.....	19,992,000
		416,139,000	.....	265,748,000	.....	150,391,000

The total clearing for the half-year to date is 416,139,000*l*, being an increase of 150,391,000*l*, or 57 per cent. over 265,748,000*l*, the total for the corresponding period of last year. The lowest week in the half-year is August 31, when the clearing was 32,969,000*l*, and this is larger than the total of the one or two big settlements in 1870, when the transactions caused by the outbreak of the war had to be settled. The clearing on last settling-day of 42,372,000*l* is the largest which has yet taken place on one day, but as the business is increasing from account to account, we shall probably have much bigger figures in the spring of next year.

THE CREDIT FONCIER AND THE MARSEILLES LAND COMPANY.—The Lords Justices of Appeal in Chancery have *reversed* the decision of Vice-Chancellor Malins, which we recently noticed in the matter of the advance of 10,000*l* by the Credit Foncier to the Marseilles Company. The decision, it will be remembered, was to the effect that although, as a rule, a company is liable for debts irregularly contracted by its directors, yet in the case in question the money was advanced for an improper purpose—viz., to enable the Marseilles board to rig the market; and as both parties had a knowledge of the nature of the transaction, the Credit Foncier could not sue. The Vice-Chancellor assigned as his reasons for both sides knowing, that the two companies had some directors the same, and were affected by the knowledge of their common solicitor. The Lords Justices however have decided that there was no sufficient evidence to go to a jury affecting the Credit Foncier with notice, and that the circumstances alleged by the Vice-Chancellor were not enough. Lord Justice James, in giving his opinion, said "that he did not see how a director "of the one company going to borrow money for that com- "pany from another company of which he happened also to "be a director could put the lending company in any different "position from that of a joint stock bank to whom one of "their own directors went to borrow money for himself. It "appeared to his Lordship that in both cases the parties "would stand in precisely the same position, and no one "would contend that the bank would have notice of every- "thing which was known to the director who borrowed "from them."

DEBTS NOT SUPPORTING A BANKRUPTCY PETITION.—The Chief Judge in Bankruptcy—*ex parte* Sturt, *re* Pearcy—has decided that a petition for adjudication of bankruptcy cannot be based upon a debt which had not become due. The case came before the Court on appeal from Messrs Sturt and Co., warehousemen in the City, who had supplied goods to the respondent, who was a draper at Hailsham, upon the terms of two months' credit, and before the expiry of the credit had presented a

petition for adjudication of bankruptcy, alleging that an act of bankruptcy had been committed; but the Lewes County Court had dismissed the petition. This ruling was upheld by the Chief Judge, who "was of opinion that the debt of "the petitioning creditor must be a sum for which an action "could be brought or a bill in Equity filed." The doctrine certainly appears to be in accordance with the section of the Act, but if so the Act itself is really very defective. One effect of an act of bankruptcy should be to cancel all credits given to the bankrupt, as the implied condition of these credits—the continued solvency of the debtor—is infringed. A simple enactment of this sort would not be difficult to frame, and would enable creditors to prevent many frauds which are now possible where a person has publicly committed an act of bankruptcy but there is no creditor in a position to apply for an adjudication, the credit not having expired.

Railway Legislation and Courts of Equity.—Another case, which shows the practical difficulty of enforcing the elaborate financial restrictions which the Legislature has thought fit to provide for the constitution of railway companies, came before Lord Justice James this week in the matter of the Tendring Hundred Railway *re* Ogilvie. We have often had occasion to point out how these restrictions break down when the object is to limit the borrowing powers of the company, Courts of Equity enforcing the payment of ordinary contract debts and any loans of which the company has had the benefit; and the present case is somewhat similar, the intention of the Legislation to divide a company into two distinct financial sections being at least impeded in practice. This comes out very plainly from the facts. The Tendring Hundred Railway was authorised in 1863 to make an extension to Weeley and Walton, in Essex, and for that purpose to raise 85,000*l* on "Extension shares," the Act declaring that the railways and works to be constructed should, "for finan- "cial purposes, form a separate undertaking," and the capital and new shares should constitute a separate capital. The contractor of the original line however not being paid a balance of 5,734*l* due to him, issued a writ of *elegit*, under which the Sheriff of Essex seized some surplus lands of the Extension Company, and Lord Justice James has decided that the Extension property was liable, holding that a railway company, like any other debtor, if they contracted a debt must pay it. The ruling of Equity is only common sense; but the necessary consequence is that one object of the Legislature in making the two undertakings separate is probably frustrated. The Extension shareholders, who subscribed on that footing, are made to bear the debts of the original concern, and the elaborate financial arrangement fails exactly where it would be of any service. Of course the Extension shareholders, we imagine, would have a claim against the other section; but in the only case where such claims are likely to arise—the insolvency of the section claimed against—the remedy would be of little value. After this and other practical failures, we should hope the Legislature will be convinced of the uselessness of tying up companies in fetters, whether they have to construct railways or any other work of public utility. Ample guarantees should be taken for the protection of the public interest; but to fetter companies in their financial constitution, and exempt them from the ordinary results of mismanagement, is not a guarantee of any value, and, as we have seen, it is only too easily evaded. It would be much easier and better to let railways, like other joint-stock companies, stand or fall without any such extraneous aids.

A Debtor's Absence as an Act of Bankruptcy.—The Lords Justices of Appeal—*ex parte* Meyer, *re* Stephany—have decided a point as to what constitutes "absence by a debtor "with intent to defeat or delay his creditors." The circumstances as reported were—"that Mr H. E. Meyer, on the 6th "of November last, called at Mr Stephany's place of business, "for the purpose of asking for payment of an overdue bill of "exchange, and that he saw Mr Stephany, who promised to "bring him the money for the bill before 3 o'clock that day. "This promise Stephany failed to keep. Evidence was g ven "of other similar promises which he made and did not keep. "There was no evidence to show that Stephany had absented "himself from his own house, or that the creditors ever had "any difficulty in communicating with him." Upon these facts the Lords Justices decided that the alleged absence was not of a kind to constitute an act of bankruptcy—there being not the least intention of defeating or delaying the creditors.

The Caledonian and North British Amalgamation.—We regret to learn that the directors of the two companies have decided to postpone the Amalgamation Bill for the present Session, in consequence of the want of time to frame the Bill with the necessary completeness. It would have been for the public interest to have the whole round of projected amalgamations introduced in a single Session, so that a debate on the general policy involved would have been certain to take place. The North-Western and Lancashire and Yorkshire amalgamation is big enough for the purpose, fortified as it is by various proposals for working agreements promoted by other companies; but a set of measures embracing almost the entire railway system must have compelled the attention of the Legislature. We only hope that the Caledonian and North British scheme will not ultimately fall through because of the delay. There is evidently a good deal of what we think unreasonable discontent among the North British shareholders, on account of the terms being too favourable to the Caledonian—as if it mattered, in an adjustment of that sort, which company gained most when both were to be better off than they are now. The great fact in all such arrangements is the immediate saving of expense, which at once places each company in a position it could only have worked up to separately after an interval of time. An immediate improvement, as business men know, is worth a very large amount of contingent and prospective gain. The discontented North British shareholders appear to have forgotten the homely proverb about a bird in the hand.

Registered Stocks.—The grievance of loss of transfers in the post, brought forward by correspondents of the *Times* this week, is a very serious one. Cases arise, it is said, in which important transfers are lost, because the letters containing them are stolen *in transitu* for the sake of the stamps enclosed to pay the registration fees. The fees of course are the veriest trifle compared with the value of the document made away with, and which can be of no use to the thieves; and we sympathise most fully with the suggestion, that as the fees are of no consequence to the companies concerned, the existence of so serious a danger is a sufficient reason for giving them up altogether. Of how very little consequence they are is shown by the following table, which one of the correspondents suppplies:—

	Gross Receipts. £		£
Caledonian	1,070,842	Including fees,	301
Great Eastern	1,050,139	—	448
Great Northern	1,103,415	—	238
Great Western	2,258,896	—	712
London and North-Western	3,663,325	—	475
London and South-Western	891,151	—	138
London, Brighton, and South Coast	618,744	—	323
Midland	1,996,844	—	447
North British	764,165	—	311
North-Eastern	2,354,670	—	504
South-Eastern	612,527		267

Clearly the companies have no interest in maintaining the charge, nor can they do so with any object of checking the multiplicity of transfers, the registration fee being an obstacle of utter insignificance, compared with the obstacles of the stamp duty, and the trouble of preparing and signing the documents. Besides, it is the real interest of a company to encourage the utmost facility of dealing, and the evil now shown is only one out of many which the companies should be anxious to remove. The existing delay in registration which takes place at the office of many companies is, for instance, a very serious nuisance, and it is entirely within the power of the companies to remedy it. Both by issuing shares to bearer, and facilitating transfer by registration, companies would find it to be their interest to give property in their shares the utmost currency possible. The abolition or reduction of the stamp duty, and the increase of such facilities, would constitute a substantial gain to the present proprietors of registered stocks throughout the country. The saleability of his stock is a matter of importance even to the steadiest holder.

THE PUBLIC REVENUE AND EXPENDITURE.

THE following are the Receipts into and Payments out of the Exchequer between April 1, 1871, and Dec. 16, 1871 :—

REVENUE AND OTHER RECEIPTS.

	Budget Estimate for 1871–72.	Total Exchequer Receipts To Dec. 16, 1871.		Same time last year.	
Balance on 1st April, 1871—	£	£	£	£	£
Bank of England	...	5,678,915		7,633,761	
Bank of Ireland	...	1,344,520		972,887	
			7,023,435		8,606,648
REVENUE.					
Customs	20,100,000	14,523,000		14,603,000	
Excise	22,420,000	15,356,000		14,914,000	
Stamps	8,750,000	6,878,000		6,296,000	
Taxes	2,330,000	425,000		805,000	
Income Tax	8,820,000	1,896,000		1,603,000	
Post Office	4,670,000	3,192,000		3,290,000	
Telegraph Service	750,000	525,000		340,000	
Crown Lands	375,000	245,000		265,000	
Miscellaneous	4,100,000	3,547,229		2,068,053	
Revenue	72,315,000		46,587,229		44,184,053
OTHER RECEIPTS.					
Advances, under various Acts, repaid		1,820,384		1,646,628	
Money raised for fortifications		...		...	
Money raised by Exchequer Bonds		...		...	
Temporary advances not repaid		1,000,000		...	
			2,820,384		1,646,628
Totals			56,431,048		54,437,329

EXPENDITURE AND OTHER PAYMENTS.

	Budget Estimate for 1871–72.	Total Exchequer Issues To Dec. 16, 1871.		Same time last year.	
EXPENDITURE.	£	£	£	£	£
Interest of Debt	26,910,000	18,436,846		18,430,298	
Other charges on Consolidated Fund	1,920,000	1,245,255		1,530,933	
Supply Services voted by Parliament	43,283,000	29,242,201		26,214,224	
Telegraph Service	420,000	350,000		270,000	
Expenditure	72,433,000		49,274,302		46,445,455
OTHER PAYMENTS.					
Advances under various Acts		1,205,272		934,393	
Expenses of fortifications		...		...	
Exchequer Bonds and Bills, &c., paid off		145,800		25,500	
Surplus income, to reduce Debt		739,179		2,464,526	
			2,090,251		3,424,419
Balances on Dec. 16th, 1871—					
Bank of England		4,059,733		3,562,203	
Bank of Ireland		1,006,762		1,005,252	
			5,066,495		4,567,455
Totals			56,431,048		54,437,329

The following are the Receipts on account of Revenue during the week ending Dec. 16 :—

	Receipts of Week Ending Dec. 16.
	£
Customs	625,000
Excise	966,000
Stamps	272,000
Taxes	nil.
Income tax	32,000
Post Office	700,000
Telegraphs	nil
Crown lands	nil.
Miscellaneous	2,662
Total	2,597,662

The total receipts of the previous week were 1,189,000*l.*

The Exchequer issues of the week on account of expenditure were 2,026,872*l*, viz. :—

	£
Interest of debt	39,390
Other charges on Consolidated fund	nil.
Supply services	1,917,482
Telegraph services	70,000
	2,026,872

During the week the cash balances have increased as follows :—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on Dec. 9	3,534,604	868,801	4,403,405
— 16	4,059,733	1,006,762	5,066,495
Increase	525,129	137,961	663,090

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, Dec. 21.

The returns of the Bank of France for this week, last week, and for the week ending 8th September, 1870, are as follow :—

	Dec. 21, 1871.	Dec. 14, 1871.	Sept. 8, 1870.
DEBTOR.	f c	f c	f c
Capital of the bank	182,500,000 0	182,500,000 0	182,500,000 7

A comparison of this week with last, in the principal items shows :—

DEBTOR.	Increase. francs.	Decrease. francs.
Notes in circulation	1,500,000	...
Treasury balance	...	36,400,000
Deposits	13,333,000	...
CREDITOR.	Increase. francs.	Decrease. francs.
Coin and bullion	...	250,000
Bills discounted	...	14,000,000
Advances on securities	...	600,000

The Bank return issued to-day exhibits an increase of only a million-and-a-half in the circulation of notes, although the Government has drawn about 36 millions of its deposits. The void thus made is filled up by an augmentation of 13 millions in the private accounts, a diminution of 7 millions in the discounts, the reimbursement of 6½ millions of advances to the State (Treasury bonds), and of 1½ millions of the City of Paris debt, with an increase of 2½ millions under the head of divers interests.

The Budget of 1872, just distributed to the Deputies, before announcing the future plans of the Minister of Finance, gives an outline of the present situation. Referring to the liabilities of the Government towards the Bank, this document shows that on the 20th June, 1871, the advances made to the State amounted to 1,330 millions; and the law of that date authorised the Minister to increase that sum to 1,530 millions by borrowing 200 millions more in case of necessity. As yet, however, that privilege has not been exercised. Moreover, various reimbursements made by the Government have reduced the present debt to 1,253 millions, represented in the last weekly Bank return by the items—Treasury bond, 1,193 millions, and advances to the State under Convention of June,

1867, 60 millions. Consequently the Treasury, which still retains the right of demanding the maximum amount, may dispose of a sum of 277 millions in addition to the 183 millions of deposits, or together 460 millions which the Bank may at any time be called on to pay.

The exportations of the precious metals during the first eleven months of 1871 are estimated in the Budget at 257 millions, against 266 millions of imports. But in addition to these latter, 219 millions have been paid to Germany in specie. According to this calculation, the loss of specie would only amount to 210 millions; but the Minister appears to have little faith in his statistics, as after declaring that they have been drawn up with much care, he admits that they cannot be considered as rigorously exact, and then only claims that the maximum of the excess of exports over the imports cannot be fixed higher than 400 millions, thus leaving a margin of 180 millions for errors. He expresses a hope that by the aid of the Clearing-house which is about to be established, the deficiency of specie will be less severely felt.

The mode in which the first three half-milliards were paid to Prussia was as follows:—

	francs.
Payment at Berlin	7,890,063
Bills	822,866,839
Value of Eastern Railway in the annexed departments	325,000,000
Notes of the Bank of France	125,000,000
French gold	109,001,503
Foreign banknotes	6,794,343
German coin	45,769,091
Total	1,505,338,534

A further sum of five millions has been paid in advance, making with the home Budget of 3,202 millions, a total expenditure of 4,712 millions in 1871.

To meet the 650 millions forming the fourth half-milliard and interest on the remaining three milliards, to be paid in the first four months of 1872, the Minister has already a sum of 350 millions provided; the rest will be obtained by the Treasury receipts, the deposits at the Bank, and the remainder of the loan not paid up, and if those are not sufficient, by the advances the State has the power to obtain from the Bank of France.

After this retrospective summary the financial statement comes to the previsions for 1872. The reductions in the former credits amount to 31 millions in the navy estimates, and 71 millions in those of the Ministry of Public Works, of which about 40 millions consist of subventions and guarantees of interest to the railway companies, which the Government has induced them not to claim next year. Nearly all those savings are however absorbed by the increased credits for war, and the reorganisation of the army, which will take 75 millions.

The anticipated receipts for 1872 amount to 2,429,362,625f of which 1,815,573,325f from old taxes, 366,349,300f from the produce of new or increased taxes voted in 1871, and 247,500,000f from those the Minister is about to propose. These last are the following:—

	francs.
Duty on raw material	90,000,000
Duty on textile substances	65,000,000
Duty on manufactures	10,000,000
Increase of two-tenths on sugars	20,000,000
Soda	8,000,000
Navigation dues	10,000,000
Statistical duty	6,000,000
Increased match tax	5,000,000
Three per cent. on dividends	30,000,000
Monopoly of carrying newspapers	3,500,000
Total	247,500,000

The duties on raw materials will be of 2, 10, or 20 per cent. on all articles admitted free of duty since 1860, the tariff to be submitted to the Assembly. The tax on textile substances will be 20 per cent. with a drawback. The value of these importations is estimated at 700 millions, and the gross produce of the tax at 140 millions, reduced to 65 by the restitutions. The sugar duty, when increased as proposed, will amount to about one penny per pound—the Government, with respect to the navigation dues, adopts the conclusions of the committee published in the first part of the Session, and which are on the paper for discussion in the Chamber. The statistical tax is a charge of one penny on every parcel, ton of goods in bulk, or animal crossing the frontier either way. The tax on soda was abolished in 1863, and is to be revived. That on dividends is to include all French or foreign stock or shares excepting French rente. The Post Office is henceforth to have a monopoly of the conveyance of newspapers, which can be now sent by rail in bundles. As the expenditure for the year is estimated at 2,415,335,040f, the Minister of Finance counts on a surplus of 14,027,585f.

With the exception of a vote to permit the Minister of Finance to collect personally the taxes for the first three months of 1872, the Assembly has made no progress during the last week in the financial business before it. The Chamber had fixed first Monday and then Wednesday for discussing the reports standing over from the first part of the Session on an income tax, Customs duties, and merchant shipping, and which are to precede the examination of the Budget for 1872. The entire sitting was however taken up yesterday by an idle dispute on the question why the Government had not prosecuted M. Ranc, one of the Communist leaders, and the opening of the debate was again postponed till to-day.

The committee appointed to consider the three Bank Bills are almost entirely adverse to the proposed increase in the circulation of notes, only four of the fifteen members being in favour of the Government plan. The names of the deputies chosen by the Bureaux of the Chamber are a guarantee that the subject will be seriously examined, as they comprise the economists MM. Wolowski and Passy; the former Ministers of Finance, MM. Magne and Buffet; the banker, André; M. de Soubeyran, sub-director of the Credit Foncier; and M. Germain, director of the Credit Lyonnais. One modification in the Government Bill is now almost certain, which is that the increased circulation will be limited to 400 millions, and that the provision by which it could be raised to 600 millions by a simple decree of M. Thiers will be abandoned. M. Pouyer-Quertier has been already heard before the committee, and manifested a willingness to give way on that point. Even the augmentation of 400 millions might be diminished by one-half if the Government would defer the commencement of its sinking fund for a twelvemonth. By the system proposed the sum of 200 millions a-year to be set aside for that purpose will be first employed in reimbursing the advances from the Bank, so that the sum repaid to it in 1872 will be really taken from the Bank itself. If the working of the sinking fund were deferred until the 1st January, 1873, instead of 1872, the Government would be able to dispense with 200 of the 460 millions the Bank is liable to be called on to provide. The committee sat again to-day, when Baron de Rothschild was heard.

The Bourse has been unsettled during the week, and the slight recovery in rente and the loan in the preceding period has been again lost. Railway shares show a further decline. The stock of some of the credit companies is however firmer, and the foreign funds are in demand. The Budget of M. Sella has been well received, and has produced a rise of more than two francs in Italian rente. Turkish Fives have also advanced nearly one-and-a-half. The premium on gold coin has fallen to 11 francs per thousand, but ingots are quoted at 16 francs. Exchange on London is easier at 25f 65c to 25f 70c. Sovereigns and English banknotes, 25f 75c. The following are to-day's prices:—

	December 14.		December 21.

Suez Canal	182	50	187	50

The Bank of France has declined to open an account with the newly-constituted Credit Mobilier. The reason for this refusal is that the old company had left an acceptance for ten millions dishonoured. A sum of two millions has since been paid, and a renewal granted for the remainder; but the protest involved costs for stamps, registration, &c., to the amount of 600,000f.

The Bank of Algeria has held a meeting at Algiers. The report read showed that the discounts for the year 1870-71 amounted to 151 millions, producing a profit of 1,926,887f. The dividend for the year was fixed at 66f, representing 13 per cent. on the original capital.

The Prefect of the Seine announces that he has in preparation a plan for increasing the octroi tax on champagne and other fine wines in bottles, and that the Administration is seeking for a practical means, which has not yet been discovered, of fixing an *ad valorem* duty.

A drawing of bonds of the Municipal loan of 1865 has taken place; the prize of 150,000f was won by No. 38,687, that of

50,000f by No. 299,953; those of 10,000f by 333,426, 68,660, 182,682, and 475,319.

The Assembly has appointed a committee of thirty members to inquire into the complaints made of the delay in the conveyance of goods by railway, and to consider whether the charters of the companies require a revision. The Minister of Public Works defended the companies, showing that the lines were overtasked in consequence of the enormous arrears of transports accumulated by a partial suspension of the traffic during the war and the insurrection. The Lyons Company, he said, had made prodigious efforts to keep pace with the demands on it; it had in three months conveyed 500,000 tons of last year's crop of wine in the south, and 317,000 tons of corn from Marseilles to the interior, in addition to the ordinary traffic. The intermediate manufacturing towns are nevertheless suffering severely from a want of fuel. At Limoges a week ago twenty-nine potteries had not between them ten tons of fuel, and were successively suspending their works.

The Marseilles Chamber of Commerce has forwarded to the Ministers of Commerce and Finance a memorial on the subject of the Bill on the new sugar duties. By Art. 2, sugar from countries out of Europe imported in foreign bottoms, or from the European bonding warehouses by any vessels, will pay two francs per 100 kilos additional duty, and by Art. 3, beetroot sugar from the countries which signed the Convention of 1864 is exempted. The consequence is that the manufacturers in the north may obtain their supplies from Belgium, and even Germany, unrestricted; while those of the south, which work chiefly colonial sugar, will thus be placed in an unfair position, as they are too distant to profit by the importations by land.

The following are some of the principal items of the trade of France in 1870, compared with the two preceding years, as contained in the Customs' return just published, the value being given in francs:—

Imports for Consumption.

	1870. francs.	1869. francs.	1868. francs.
Corn and flour	167,222,000	56,328,000	337,816,000
Sugar	128,509,000	137,176,000	119,220,000
Coffee	106,092,000	73,699,000	73,889,000
Cattle	73,133,000	145,001,000	158,005,000
Skins	96,252,000	129,846,000	108,508,000

The following are the latest quotations of the produce markets at Havre per 50 kilos (1 cwt), duty paid:—

Cotton.—New Orleans very ordinary, 128f; good ordinary, 135f; choice, 141f; Georgia, same marks, 123f, 130f, 135f. Oomrawuttee good ordinary, 97f; Tinnevelly, 97f; Madras, 90f; Bengal, 83f. The sales for last week amounted to 22,726 bales; the arrivals 7,665, of which 6,258 from England, and the stock to 128,109 bales.

Coffee.—Rio, 145f; washed, 153f; Hayti, 148f; Java, 152f; Gonaives, 85f in bond. The sales for the week ending Monday last were 9,600 bales, the deliveries 3,852 and 15 tierces; the stock 156,097 bales and 2,668 tierces. No arrivals.

Hides.—Monte Video salted cow, 77f; Valparaiso, 75f, dry, 82f; Pernambuco, dry, 106f; Calcutta, 80f; La Plata goat skins, 14f 50c to 16f 50c the dozen; dry horse, 15f to 16f 50c a piece.

Wool.—Monte Video unwashed, 240f; Buenos Ayres, 210f; Spanish, 270f; Chili, 197f; Levant, 160f; Peru black scoured, 450f.

Tallow.—Monte Video ox, 59f 50c; La Plata sheep, 57f 50c to 59f; United States, 59f 50c.

Cocoa.—Para, 115f; French West India, 111f.

COMMERCIAL AND MISCELLANEOUS NEWS.

An annual Parliamentary return shows that in the year 1870 584 joint stock companies were registered, having in the aggregate a proposed capital of 38,252,374*l*, and in the first five months of 1871 260 companies, with a proposed capital of 23,367,247*l*.

The *Turquie*, of Constantinople, has published a detailed statement of the consolidated debt of the Ottoman Empire, the accuracy whereof has not been challenged. It is substantially as follows:—

External Debt.

Loans.	Amount (Nominal). £	Interest. %	Repaid. £	Remaining to be Paid. £	Annual Charge for Interest and Sinking Fund. £ s
1854	3,000,000	6	698,250	2,301,750	207,940 10
1855	5,000,600	4	751,200	4,248,800	248,044 10

Ditto, Internal Debt	66,904,793
Add the Floating Debt, calculated at	8,500,000
Grand total of Debt	136,441,403

About two-thirds of the annual revenue of Turkey are absorbed in meeting the interest and sinking fund of this grand total. The fact of the remaining third being obviously insufficient to cover the expense of administering this large Empire explains the annual deficit. Hence the patriotic and successful efforts of the Grand Vizier to economise and increase the revenue of the State.

The following is a return of the number of paupers (exclusive of lunatics in asylums and vagrants) on the last day of the second week of December, 1871, and of the corresponding week in 1870:—

	Paupers. Indoor. Adults and Children.	Outdoor. Adults.	Outdoor. Children under 16	Total. 2nd week Dec., 1871.	Corresponding Total in 1870.
West district	5,475	7,003	4,700	17,178	20,923
North district	7,198	10,676	8,009	25,883	26,271
Central district	6,584	6,889	5,258	18,731	21,907
East district	7,128	8,241	7,178	22,547	28,352
South district	8,890	15,925	13,937	38,752	44,336
Total of the Metropolis	35,275	48,734	39,082	123,091	142,879

Total Pauperism of Metropolis.—Population in 1871, 3,251,804

	Number of Paupers. Indoor.	Outdoor.	Total.
Second week of December, 1871	35,275	87,816	123,091
— — 1870	35,852	107,027	142,879

— — 1868	36,641	106,363	143,004

Vagrants relieved in the Metropolis on the last day of the 2nd week of Dec., 1871.

Men.	Women.	Children under 16.	Total.
697	163	57	917

The total quantity of coal raised in the United Kingdom in the seven years ending with 1870, inclusive, was 725,286,578 tons. In this total 1864 figured for 95,122,919 tons; 1865 for 98,911,169 tons; 1866 for 100,728,881 tons; 1867 for 105,077,743 tons; 1868 for 104,566,959 tons; 1869 for 108,003,482 tons; and 1870 for 112,875,725 tons. To the aggregate of 725,286,578 tons Northumberland, Durham, and Cumberland contributed 77,894,900 tons; South Durham, 106,124,977 tons; North and East Lancashire, 47,031,875 tons; West Lancashire and North Wales, 56,468,939 tons; Yorkshire, 70,043,900 tons; Derbyshire, Nottinghamshire, Leicestershire, and Warwickshire, 54,240,000 tons; North Staffordshire, Cheshire, and Shropshire, 41,000,000 tons; South Staffordshire and Worcestershire, 71,683,500 tons; Monmouthshire, Gloucestershire, Somersetshire, and Devonshire, 43,428,500 tons; South Wales, 61,427,851 tons; East Scotland, 52,348,690 tons; and West Scotland, 48,593,446 tons.

An abstract of the census returns of the Dominion of Canada has at last been issued. The total population, exclusive of British Columbia and Manitoba, is 3,484,924, showing an increase of 12·79 per cent. in round

figures. The Ontario district has 1,600,000 inhabitants, the Quebec 1,200,000, New Brunswick 285,000, and Nova Scotia 387,000.

The staff of engineers sent out by Mr Fowler, on behalf of the Government of Egypt, to survey and lay out the proposed Soudan Railway, have already commenced operations on the whole length of the line between the second cataract and Khartoom. The staff, which consists of 20 experienced English surveyors, an English surgeon, and numerous native assistants, are all in excellent health, and speak highly of the arrangements of the Egyptian Government in carrying out Mr Fowler's programme for their progress and work. The highest importance has long been attached to this railway communication in the interests of Egypt. The vast area of rich land above the sixth cataract is capable of producing sugar, cotton, grain, &c., to an extent almost unlimited, but the present means of transport are dependent on the employment of camels for several hundred miles, and all exportations, therefore, except of spices and similar products, is simply impossible. It is not improbable that more frequent intelligence from Sir Samuel Baker may be obtained from the facilities afforded by this expedition.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap 32, for the week ending on Wednesday, the 20th day of December, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued.....	39,332,270	Government debt.....	11,015,100

GEORGE DERBYSHIRE, Chief Inspector.

Bankers' Clearing-house, December 21st, 1871.

The total since the 4th of January, 1871, is 4,607,725,000*l*, compared with 3,754,469,000*l* for the corresponding period last year, showing an increase of 853,256,000*l*.

The following shows the amount of the Circulation, Bullion in both departments, Banking Deposits, Banking Securities, Reserve, and Rate of Discount, for three months ending 20th December, 1871 :—

Date.	Circulation.	Coin and Bullion.	Deposits.	Securities in Banking Department	Reserve.	Rate of Discount
	£	£	£	£	£	%
Sept. 13	25,297,965	24,158,814	26,073,163	30,403,797	14,423,619	2

Clearing-house return..	...	64,932,000	67,135,000	83,335,000	120,802,000

In 1861, the prospect of a war with America on account of the Trent difficulty continued to be most gloomy. The demand for money was more active just before the close of the year. Mr Chase's first Budget had just been published, showing that the United Sates in the first year of the war were only meeting 10 per cent. of their expenditure by taxation.

In 1868, the demand for money was very moderate, even for the close of the year. The recent advance of the Bank rate to 3 per cent. had proved completely effective.

In 1869, there was a somewhat brisk demand, but nothing beyond what is frequent at the close of the year. It was rumoured that France had proposed a general disarmament to the European Powers. The directors of Overend, Gurney, and Co. had just been acquitted of the criminal charge of fraud brought against them.

In 1870, money was rather firmer for the week, owing to the close of the year, but there was no special advance in the rates. In business quarters there was still the utmost suspense, in consequence of the prolongation of the siege of Paris and of the war, and foreign money kept accumulating in Lombard street. The revenue was increasing rapidly. The retirement of Mr Bright from the Cabinet, in consequence of his ill-health, had just occurred.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 3,516,382*l*; in 1868, a deficiency of 488,633*l*; in 1869, a deficiency of 769,047*l*; and in 1870, an excess of 1,938,717*l*. In 1871, there is an excess of 4,292,664*l*.

DISCOUNT AND MONEY MARKET.—Until yesterday the rates for money continued easy, the usual demand at the close of the year promising to be rather less than usual, but yesterday and to-day the market shows perhaps even more than the customary activity at this period. The minimum rate, which was quoted last Friday at 2½, is now three per

cent., and there is a strong demand both in the open market and at the Bank, and for Stock Exchange purposes. In consequence of Christmas day falling on a Monday, and the day after being now a Bank holiday, it happens that to-morrow there are three days' bills to provide for, viz., those falling due on Saturday, Sunday, and Monday, while any provision beforehand for Tuesday's and Wednesday's bills, which fall due on Wednesday, must also be made this week. The extent of the demand which has sprung up, and which is also increased by the usual measures taken by the joint stock banks to show a good balance sheet at the close of the year, is thus fully accounted for. That there is no expectation of dearer money is shown by the rate charged for 3, 4, and 6 months' Bank bills, being in all cases the same—viz., 3 per cent. Money continues most abundant, though some of the foreign houses are understood to be taking bills rather less freely than thay have recently done.

The changes in the Bank account for the week shows that the Bank's position has been still farther strengthened. The bullion has increased 280,000*l*, and the reserve 215,000*l*, the amounts now being respectively 24,935,000*l* and 15,864,000*l*. The public deposits have however increased 662,000*l*, and the private deposits decreased 138,000*l*—the net increase being 524,000*l*. The increase of reserve is thus only in proportion to the increase of liabilities, but the total is the largest of the returns of the last three months.

The principal changes in the Bank of France account for the week are an increase of 60,000*l* in the note circulation, a decrease of 1,440,000*l* in the Government deposits, and an increase of 533,000*l* in the private deposits. The stock of bullion is not appreciably changed.

We subjoin our usual quotation for mercantile paper having various periods to run :—

Bank bills—3 months	3	per cent.
Do 4 —	3	per cent.
Do 6 —	3	per cent.
Trade bills—3 months	3	per cent.
Do 4 —	3½	per cent.
Do 6 —	3½	per cent.

The allowances for money at the private and joint stock banks and discount houses are as follows :—

Private and Joint Stock Banks at call	2	per cent.
Discount houses at call	2	per cent.
Do with seven days' notice	2¼	per cent.
Do fourteen days'	2¼	per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent.		Open Market, per Cent.	
	1870.	1871.	1870.	1871.
Paris	...	6	...	...
Vienna	6	6½	5½	6
Berlin	5	4	4½	3½
Frankfort	3½	4	3	3½
Amsterdam	4	3	3¼	2½
Brussels	...	3	...	2¾
Hamburg	...	...	4¼	3
St Petersburg	8	6	7	6

THE STOCK MARKETS.—The buoyancy which characterised the markets last week has been continued during the present week, prices generally rising with hardly a break even for realisations. Towards the close of the present week transactions have been limited by the approach of the Christmas holidays, but prices have ruled steady, and the little buying there has been has, in almost all cases, caused a farther and important advance. Speculators appear now to be assured of the continuance of ease in the money market for some little time, while the buying for investment has lately been continuous, giving evidence that the savings of the country are now on a great scale. As the tendency is still towards known investments, and not to new undertakings, the enhancement of prices which is in progress is easily explained. The advance has been so general that particular markets need not be specified, but the two prominent departments appear to be English railways and foreign stocks, some foreign and colonial railways being also in good demand. The demand in the foreign market is, perhaps, the best indication of the competition for investment, as there is no rival cause, while speculation in English and colonial railways is undoubtedly excited by the real improvement in the property which is in progress, and on which, day by day, a greater value is placed. Still, even in the latter class of investments, the competition of capital to be placed has its effect, and in the leading lines the apparent immediate return to the investor becomes less and less every half-year.

ENGLISH GOVERNMENT SECURITIES.—As will be seen from our subjoined table, the general advance in almost all securities has been accompanied by an improvement here, though there has been little dealing. Little attention comparatively is now given to this market, but the great abundance of money seeking investment has still a sensible influence.

Subjoined is a list of the highest and lowest prices of Consols every day :—

	CONSOLS.				
	Money.		Account.		Exchequer Bills.
	Lowest.	Highest.	Lowest.	Highest.	March and June
Saturday	92⅜	92⅜	92⅛	92⅛	2s to 7s pm
Monday	92⅛	92⅛	92⅜	92⅜	3s to 7s pm
Tuesday	92⅜	92⅛	92⅛	92⅛	2s to 7s pm
Wednesday	92⅛	92⅜	92⅛	92⅛	3s to 7s pm
Thursday	92⅛	92⅜	92⅛	92⅛	2s to 7s pm
Friday	92⅛	92⅜	92⅛	92⅛	2s to 7s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Consols for money	92⅛ ⅛	92⅛ ⅜	+ ⅛
Ditto January	92⅛ ⅜	92⅛ ⅜	... ...
Reduced 3 %	92 ⅛	92⅛ ⅜	+ ¼
New 3 %	92 ⅛	92⅛ ⅜	+ ¼
Bank Stock, last dividend 4½ %	239 41	239 41	... ...
India Stock, 10½ %, red. at 200 Apl. 30, 1874	207 9	207 9	... ...
Do 5 %, red. at par, July 5, 1880	110 ⅛ xd	110½ 11⅛	+ 1

EXCHEQUER BILLS 2s to 7s prem.

COLONIAL GOVERNMENT SECURITIES.—There has been some active dealing this week in this department, especially in Canadian securities. The great advance in foreign securities has naturally an effect here, as with every rise in second and third-rate foreign securities the return to the investor approximates more nearly to what is obtainable from our colonies, whose security is esteemed preferable. The following shows the principal changes in the quotations for the week :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Canada 6 %	110½ 11	110½ 11	... ...
Ditto 5 %	103¼ 4	103¼ 4	... ...
New Zealand 5 % Consolidated Bonds	102¾ 3¼	102¾ 3¼	... ...
New South Wales 5 % Bonds, 1883 to 1886	105 6	105 6	... ...
Nova Scotia 6 % Bonds, 1875	105 6	105 6	... ...
Queensland Government 6 % Bonds, 1884-5	111½ 12	111½ 12	... ...
Victoria 6 %	112½ 13	112½ 13	... ...
Ditto New 5 %	106 7	106 7	... ...

FOREIGN GOVERNMENT SECURITIES.—The buoyancy of the market last week has continued till now, though on some days of the week there was little doing. Investment continues steadily, and as there is little disposition to sell, the accumulated purchases very quickly force up the price. As was the case last week, the advance is pretty equally distributed over the more speculative securities, which pay a high interest, and the less speculative stocks, which are esteemed safer by the investor. Among the former, Turkish securities have been largely bought this week, and have again advanced; and among the latter, South American securities have again been in strong demand. The market has been very steady to-day, but does not close quite so firm.

Italian, in which there was a decline last week upon the recent advance, have again advanced, a favourable effect being produced by Signor Sella's declaration that he has five years' dividends provided for. It should be observed by the investor with regard to these securities that at the present price of 67, and with the exchange upon Italy, which has been rising lately, at 27·80, Italian securities will return rather less than 6 per cent. The Italian income tax is 13 per cent., and the difference between the present rate of exchange and 25·50, which is about the par of exchange, is equal to a tax of 9 per cent. additional. At 67, if there were no deductions, the return would be 7½ per cent., but a deduction of 22 per cent. makes it about 5¾ per cent. We need not point out the injury which is done to its own credit by the Italian Government, both in taxing its debt, and then imposing an additional tax on foreign holders by means of the depreciated paper.

It is stated in the Berlin papers that the new Russian loan will not be brought out for some time, but it is not denied that a loan is in contemplation, and it is not likely that a favourable opportunity for bringing it out will be missed. We should expect it at no very distant date.

Annexed are our usual quotations showing the changes for the week :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.

ENGLISH RAILWAYS.—The advance in this department has been very general this week, the principal rise being in the heavy lines, and in Brighton among the lower priced stocks—the latter upon reports that the project of the new line is to be withdrawn, and that the next dividend will be at the rate of 4 per cent. per annum. Among the heavy lines, London and North-Western have especially advanced. The rise in these has been sustained by the continuously good traffics, which are especially good in the case of the North-Western, the Midland, and the North-Eastern, and by favourable reports respecting the coming dividends. In the middle of the week there was little doing in the market, though prices were sustained, but yesterday and to-day there has been more activity, and firmness prevailed till very nearly the close, with few of the usual realisations on Friday afternoon, and on the approach of the account.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices:

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Caledonian	117⅞ ½	118½ ½	+ ½
Great Eastern	49⅜ ⅞	50½ ½	+ ⅛
Great Northern	138 9	138 9	... ...
Ditto A	167 ½	167½ 8	+ ½
Great Western	112½ ½	113½ ½	+ 1½
Lancashire and Yorkshire	159 60	160 ½	+ ½
London and Brighton	69½ ½	72½ ¾	+ 3⅛
London, Chatham, and Dover	26½ ½	26 ½	− ½
London and North-Western	151½ ½	153½ ½	+ 2½
London and South-Western	110 11	110½ 11½	+ ½
Manchester, Sheffield, and Lincolnshire	77 ½	77½ ½	+ ½
Metropolitan	72 ½	72 ½	... ...
Ditto District	33 ½	33½ ½	+ ½
Ditto ditto Preference	64 6	65½ 6½	+ ½
Midland	145 ½	147 ½	+ 2½
North British	56½ 7½	56 ½	+ ½
North-Eastern—Consols	177½ 8	178½ 9	+ 1
South-Eastern	98½ 9	99½ 100½	+ 1½
Ditto Preferred	118 19	118½ 19½	+ ½
Ditto Deferred	79½ ½	79 ½	− ½

The quotations for the leading debenture stocks compare as follows with last week:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Great Eastern A 5 %	113 16	112 14	− 1
Ditto 1867 Redeemable	113 15	111 14	− 1
Great Western 5 %	116 18	117 19	+ 1
London and Brighton 4½ %	106 8	106 8	... ...
London, Chat., & Dover Arbitration 4½ %	102 4	102 4	... ...
Metropolitan District 6 %	122 4	125 7	+ 3

The traffic receipts on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending Dec. 16 to 759,888*l*, being an increase of 60,659*l* on the corresponding week of the previous year. The aggregate receipts to date are now 18,975,071*l*, being an increase of 1,416,431*l* on the corresponding period of last year. The principal increases for the week are—North-Western, 13,823*l*; North-Eastern, 10,945*l*; Midland, 10,795*l*; Great Western, 3,851*l*; Lancashire and Yorkshire, 3,813*l*; and Caledonian, 3,462*l*. The Metropolitan has again declined on the week, and the balance of increase on the half-year to date is reduced to 948*l*. The following shows the details in each case for the week and for the whole period:—

RAILWAY TRAFFIC RETURNS.

	Week's Receipts. Amount.	Inc. or Dec. on Corresponding week in '70.	Aggregate Receipts of Half-year to date. Amount.	Inc. or Dec. on Corresponding per. in '70.
	£	£	£	£
Bristol and Exeter	7,731	+ 453	213,320	+ 8,333
Great Eastern	37,635	+ 133	1,050,025	+ 53,029

Ditto guaranteed 6 % Preference	22 3	22 3	... ...
Sambre and Meuse	8 ½	8½ ½	+ ⅛
San Paulo	22½ ½	22½ ½	... ...
Varna	4½ ½	4½ ½	... ...
Ditto 3 % Obligations	4½	4¹¹/₁₆ 5¹/₁₆	+ ⅛
British Possessions.			
East Indian	110 ½	110½ ½	+ ½
Grand Trunk of Canada	21 ½	21½ ½	+ ½
Great Indian Peninsula	108½ 9½	109 ½	+ ½
Great Western of Canada	22⅞ ⅞	23½ ½	− 1/16
Madras 5 %	107½ ½	107½ 8	+ ½

AMERICAN SECURITIES.—But few changes have taken place in this department, but prices have been well sustained, in consequence of the announcement that Mr Boutwell has called in a further amount of 20,000,000 dols of Five-Twenties. The following communication to that effect was posted in the Stock Exchange to-day:—

41 Lombard street, London, E.C., 22nd Dec. 1871.—To the Secretary of the Stock Exchange, London.—Dear Sir,—We beg to inform you that the Secretary of the United States Treasury advises us that he has called in for payment a further amount of $20,000,000 of the Five-Twenties of 1862, the interest upon which will cease on the 20th March next. The following are the numbers:—

$	
50's	5,461 to 10,775
100's	13,094 to 25,935
500's	7,965 to 16,179
1,000's	11,121 to 27,443

We are, yours truly,

(Signed) JAY COOKE, MCCULLOCH, and Co.

This being the case, 1862 bonds have been weak, and there has been a decided disposition to buy into the later issues. Erie shares have fluctuated considerably, and finally close at a rise of ⅜. Illinois Central shares have also varied, but are without change on the week:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
United States 6 % 5/20 Bonds, exchng. 4/6	92½ ½	92 ½	− ½
Ditto 1865 Issue	93½ ½	93½ ½	+ ½
Ditto 1867 Issue	93½ 4 xd	93½ 4	... ...
Ditto 5 % 10/40 Bonds, exchange 4/6	91½ 2	91½ ½	− ½

Atlantic and Great Western Consol. Bonds	38½ 9½	37½ 8½	− ½
Erie Shares	26½ ½	27½ ½	+ ½
Illinois Central Shares	109½ 10½	109½ 10½	... ...
Massachussets 5 % Sterling Bonds, 1900	97 9	97 9	... ...
Panama General Mortgage 7 % Bonds, 1897	78 80	78 80	... ...
Pennsylvania Gen. Mort. 6 % Bonds, 1910	97½ 8½	98½ ½	+ ½
Virginia 6 % Bonds	52 4	50 2	− 2

JOINT STOCK BANKS.—A good business has been transacted in the shares of foreign banks, but the leading London institutions have also risen, and the tendency of the market has been favourable. London and County, Oriental and Anglo-Austrian, have advanced 1½; Anglo-Egyptian, 2; British North American, South Australian, London and Westminster, New South Wales, and Union, 1; British Columbia, City, London Joint Stock, London and Provincial, ½. On the

other hand, London Chartered of Australia shares have receded 1½, and British North America ¼.

TELEGRAPHS.—A large business has been done in this department at improving prices. Anglo-American have risen 6 and French Cables 1½, notwithstanding the report of another competing line to America. British Indian Extension have improved ½, China-Submarine ¼, and Falmouth to Gibraltar ⅛; but Cuba shares are ¼ lower. Silver's Construction has risen ½ and Telegraph Construction ¼; while Hooper's have receded ½. Submarine Cables Trusts' Certificates have risen 1.

MINES.—The mining share market has ruled flat this week, and the transactions have been on a limited scale. South Wheal Frances shares are quoted at a further fall of 7½, and West Seton of 15. Tin Croft and Van have given way 2½; West Caradon 1; East Caradon ¼; but North Roskear have advanced 2½; East Lovell 1; Great Laxey ½; Hingston Downs ¼. In the foreign market Ebarhardts were in demand to-day, and closed at an advance of 3; while Sierra Butter and Fortuna were ¼ better. St. John del Ray show a decline of 3; Cape Copper, General Mining, Linares, and Pacific of ½ each.

MISCELLANEOUS.—The dealings in this department have been moderately extensive, and prices are rather better on the week. City Offices have risen 3; Royal Mail Steam, 1; North Metropolitan Tramways, ⅜; Hudson's Bay, ⅛; General Credit are ¼ higher, while London Financial have advanced 1½. Native Guano have given way 3, but New Sombrero Phosphate are ¼ better.

In new undertakings, Limmer Asphalte are quoted 3⅜ to 3⅝; Anglo-Hungarian, 3½ to 4½ prem.; Native Guano, 25 to 26; Phosphate Sewage, 27 to 28; Patent Gas, 12¾ to 13¼; New Shares, 6½ to 7; United States Rolling-Stock, 3 to 3¼ prem.; and Philadelphia and Erie Mortgage Bonds, 2½ to 3 prem.

EXCHANGE AND BULLION.—In the foreign exchanges this afternoon there was a good demand for bills on Holland and Italy. Bills on Paris and Belgium were offered. There is no demand for gold for export, and the silver market is also inactive, the Indian exchanges falling in consequence of the amount of the non-converted 5 per cent bonds being taken up for remittance to Calcutta.

The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—With the exception of withdrawals of sovereigns to the amount of 175,000*l*, there is no demand whatever for export, and all arrivals during the past week, comprising 226,000*l*, chiefly in French coin, have been sent into the Bank. The Nile has taken 2,550*l* to the West Indies, and the City of Rio 55,000*l* to the Brazils. About 500,000*l* per overland mail from Australia, will be due here on the 30th instant.

Silver.—The market has become flatter, and the nearest quotation we can give is 60⅜d per oz standard. The demand for India has decidedly slackened, and the amounts now arriving will, we think, not find a ready sale at the above price. The Delta has taken 100,000 to Bombay, and the Nile 13,300 to the West Indies. The Candia has brought 79,800*l*, Bycee, from China.

Mexican Dollars.—The large amount of dollars by the French and American steamers, in all about 370,000*l*, has been placed at 60¼d per oz for the old, and 59⅝d per oz for the new coinage. The reduction in price has been caused not only by the magnitude of the sum for sale, but also by the fall in the exchanges from China.

Exchange on India for Banks' drafts at 60 days' sight is 1s 11⅛d to 1s 11⅛d per rupee. Tenders for the India Council bills were received yesterday; the minimum, as before, was 1s 11d per rupee. Applications on Calcutta at 1s 11⅜d received 85 per cent., and on Bombay at the same rate in full. On the 6th inst. the allotments were 37 per cent. to Calcutta and Madras at 1s 11⅛d, and in full to Bombay at the same rate. Yesterday the amounts appropriated were 440,000*l* to Calcutta, and 60,000*l* to Bombay.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; ditto refinable, 77s 10½d to 77s 11d per oz std, last price; South American, doubloons, 74s per oz. Silver—Bar silver, fine, 5s 0⅛d per oz std, last price; ditto containing 5 grains gold, 5s 1d per oz, std last price; Mexican dollars, new, 4s 11⅜d, old, 5s 0⅛d per oz, last price. Five-franc pieces, 3s 11½d each, last price.

The sum of 35,000*l* in gold was sent into the Bank of England to-day.

We are indebted to Messrs J. Allard and Co., of Paris and London, for the following telegram, giving to-day's exchange and bullion quotations in Paris:—

NOTICES AND REPORTS.

STOCKS.

Argentine 6 per Cent Loan.—Bonds, representing 36,600*l*, have been drawn for redemption on the 1st January.

European Commission of the Danube Loan, 1869.—Bonds to the amount of 4,600*l* have been drawn, and will be repaid by Messrs Bischoffsheim and Goldschmidt.

State of Georgia.—The interest coupons of the bonds of the State of Georgia, on which the interest is payable quarterly, and which mature on the 1st of January next, will be paid at the Banking-house of Messrs Clews, Habicht, and Co. on and after that date.

Uruguay.—Messrs I. Thomson, T. Bonar and Co. announce that bonds of the Consolidated Six per Cent. Loan of 1871 will be ready for delivery, in exchange for fully paid up scrip, on and after the 27th inst.

RAILWAY COMPANIES.

Atlantic and Great Western.—Mr McHenry's circular reports a great improvement in the condition and prospects of the line, which is now more completely equipped. A statement of the capital of the new company, list of directors, &c., accompanies the circular, while the manager adds an estimate of the cost of various improvements yet required.

East Indian.—The directors recommend the payment of a dividend at the rate of 4s 4d per cent., in addition to the usual guaranteed interest.

Philadelphia and Reading.—A cash dividend at the rate of 10 per cent. per annum has been declared for the half-year on the ordinary and preference capitals.

Scinde, Punjaub, and Delhi.—During the half-year ended June last, the gross receipts on the whole of the company's system amounted to 233,524*l*, including 102,325*l* derived from passengers, and 131,199*l* from goods. The working expenses amounted to 208,953*l*, or 89·48 per cent. of the gross receipts, and the net revenue to 24,571*l*, or 10·52 per cent. The high rate of working expenses is attributable chiefly to the depression in the goods' traffic, and to the fact that the cost of maintenance of the whole line, with two slight exceptions, has been charged to revenue.

BANKS.

Bank of Roumania.—5 per cent. is announced for payment to the shareholders as interim interest.

Colonial.—Dividend at the rate of 15 per cent. per annum recommended upon the increased capital.

National Bank of Scotland.—Year's profits, 165,405*l*. At the meeting the ordinary dividend was declared of 13 per cent., together with a bonus of 3 per cent., for the present year. 5,000*l* has been added to the rest (now 335,000*l*), and 11,442*l* has been carried forward.

Provincial of Ireland.—A half-year's dividend of 4 per cent., and an extra dividend of 30s per 100*l* share, and of 12s per 10*l* share, will be payable on the 12th January.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

Hungarian General Land Credit.—A payment of 4s per share on account of earnings is to be made in London on the 2nd proximo.

ASSURANCE COMPANIES.

Positive Life.—The chairman, Mr J. D. Bell, has issued an address, stating that 70,000*l* of shares have been subscribed for. The company have commenced business in London and the provinces.

MISCELLANEOUS COMPANIES.

British Indian Extension Telegraph.—A second interim dividend, at the rate of 6 per cent. per annum, is payable on the 5th of January.

Ceylon Company.—At the meeting an interim dividend at the rate of 6 per cent. per annum was declared, free of income tax.

Ebbw Vale Steel, Iron, and Coal.—Interim dividend, 10s per share.

Italian Tobacco Company.—Messrs Stern Brothers notify that the coupon No. 6, due 1st January, of the Italian Tobacco Monopoly Company, also the coupon due, same date, of the Italian Six per Cent. Tobacco loan, will be paid at their offices on and after the 1st proximo.

London and Yorkshire Steamship, Limited.—Capital, 50,000*l*, in 10*l* shares; first issue, 30,000*l*. The company will purchase two steamers, a tug, and a sloop, the property of Messrs Benjamin Dawson and Co., together with wharves, &c., for 17,500*l*. Another steamer is to be added to the list.

National Steamship.—Dividends at the rate of 10 per cent. per annum have been announced on the ordinary and preference shares.

Phœnix Gas.—At the meeting recently held the amalgamation with the South Metropolitan Company was agreed to. The Surrey Consumers' Company claimed terms which were deemed incompatible with the interests of the other two; but power was reserved in the Bill to extend the amalgamation. The new undertaking, with an authorised capital of 1,544,000*l*, will be called the South London Gas Company.

Pile, Spence, and Co., Limited.—A final dividend of 6d in the pound, making 10s paid to the creditors, is announced.

Stranton Iron and Steel.—The letters of allotment were posted this evening.

Symes' Patent Economic Gas, Limited.—Capital, 50,000*l*, in 2*l* shares. Messrs Taylor, Cameron, and Co. have offered 10,000 shares for public subscription. By Symes' Patent, which has been acquired, this new company will be enabled to undertake the manufacture of apparatuses for the supply of country houses and isolated buildings of every description with gas. The apparatuses are stated to be safe and simple of construction, and can supply pure gas at from 1s to 2s 2d per 1,000 feet. Refuse coal, dross, wood, bones, and peat are also stated to suffice for the manufacture of gas of good quality.

MINING COMPANIES.

Chans Silver-Lead Mining, Limited.—Capital, 30,000*l*, in 5*l* shares. The concession of 172 acres, given by the Portuguese Government for a period of 30 years, will be taken over. There are said to be numerous lodes rich in metal.

Colorado Terrible Lode.—Seven months' profit, 5,893*l*, in addition to the 2s dividend already paid.

Great Wheal Vor.—Quarter's dividend, 2s 6d per share; leaving 493*l* undivided.

St John del Rey.—The report stated that the result of operations during the half-year showed an excess of expenditure of 3,712*l*, against 5,697*l* for the corresponding period of 1870. The reserve fund amounts to 16,000*l*, consisting chiefly of English railway debentures falling due next year. In order to conduct efficiently operations until the shafts are completed and the working of the mines in depth is resumed, it is proposed to issue debentures.

The Commercial Times.

POST OFFICE ANNOUNCEMENTS.

The undermentioned offices have been opened since the publication of the last list of postal telegraph offices:—England—Aberford (Yorkshire); Batley Carr, near Dewsbury; Billericay, near Ingatestone; Bishop's Castle, near Shrewsbury; Brading, near Ryde (I.W.); Cains Cross, near Stroud; Codnor, near Alfreton; Cross Inn, near Llanelly; Cwm Amman, near Llanelly; Cwmburla (Glamorganshire); Deepcar, near Sheffield; East Rudham, near Brandon; Edenfield, near Bury (Lancashire); Elmham, near Thetford; Foulsham, near Thetford; Great Ayton, near Northallerton; Haswell, near Fence Houses; Heckington, near Sleaford; Kilburn, near Derby; Kilsby, near Rugby; New Whittington, near Chesterfield; Norwich, Cattle Market; Reepham, near Norwich: Ripley, near Derby; Shillington, near Hitchin; Shipdham, near Thetford; Smalley, near Derby; St Germans, near Lynn; St Helen's, near Ryde (I.W.); Tutbury, near Burton-on-Trent; Twerton, near Bath; Upway, near Dorchester; Watton, near Thetford; Weeley, near Colchester; West Haddon, near Rugby; Whittington Moor, near Chesterfield. Scotland—Edinburgh, Stock Exchange. Ireland—Balla, near Castlebar; Ballindine, near Claremorris; Ballinrobe, near Claremorris; Ballyfarnon, near Carrick-on-Shannon; Ballyglass, near Claremorris; Ballyhaunis; Belfast, Shankhill road; Borrisoleigh, near Templemore; Carndonagh, near Londonderry; Castlefin (Co. Donegal); Derrygonnelly, near Enniskillen; Dunmore, near Tuam; Hollymount, near Claremorris; Kilbeggan, near Mullingar; Kingscourt, near Kells; Malin, near Londonderry; Manor Hamilton, near Carrick-on-Shannon; Newport, near Limerick; Tyrrell's Pass, near Killucan. The undermentioned railway station was opened for the transaction of telegraphic business on behalf of the Postmaster-General on the 20th December:—Scotland—Glasgow (College street) Station (North British Railway).

Since the issue of the recent notice respecting the winter service to Constantinople, via Vienna, information has been received from the Austrian Post Office that there will be two dispatches only in each week, instead of three, as previously announced. Mails for Constantinople will be forwarded from London during the winter season as follows:—Every Tuesday morning, via Trieste; every Saturday morning, via Bucharest and Rustchuk; with supplementary mails on the evenings of those days, on the chance of their reaching Vienna in time.

The next mail for New Zealand, via San Francisco, will be dispatched from London on the evening of Thursday, the 11th January, 1872.

MAILS ARRIVED.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The grain trade ruled dull and inactive to-day, owing to the arrival of numerous vessels off the coast. The supply of English was small but there was a fair show of foreign, and the samples generally were in good condition. Sales progressed slowly in all descriptions, and prices were with difficulty maintained. Flour ruled dull in sympathy with the wheat market; barley, beans, and peas were unchanged in value; but maize and oats closed at a reduction of 1s per quarter on the week. This week's imports of foreign and colonial produce into London have amounted to 36,730 quarters of wheat; 18,660 barley; 39,800 oats; 1,150 beans; 7,460 peas; 8,910 maize; 14,390 barrels of flour.

At Liverpool and Wakefield this morning the wheat trade ruled dull, and where sales were pressed less money was accepted.

The Liverpool cotton market has been quiet during the past week, and prices have declined $\frac{1}{16}$d per lb. The total sales are 73,860 bales, of which the trade have taken 58,300 bales; speculators and exporters, 15,560 bales. The imports are 48,740 bales; the actual exports, 12,162 bales; and to-day's stock is 437,990 bales. Quotations for American descriptions have declined $\frac{1}{16}$d per lb, East Indian $\frac{1}{16}$d per lb, and Bengals remain without change since this day week. To-day the market closes quiet, but firm. Sales, 12,000 bales.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended December 21, 1871:—

	Imported.	Exported.
American bales	36,505	2,513
Brazilian	6,676	1,943
East Indian	37,006	15,091
Egyptian	2,825	302
Miscellaneous	1,919	242
Total	84,931	20,091

At New York on the 21st inst., middling Upland cotton was quoted at 20¼ cents per lb.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, Nov. 24:—The demand in our cotton market has continued fairly active throughout the week, and the purchases reported reach an aggregate of about 3,300 candies, including 1,300 candies of new cotton for delivery in one to three months. Prices have on the whole remained pretty steady, but the better news now reaching us from Liverpool has had a hardening effect on the market, and this morning dealers have advanced their quotations 2 rs to 3 rs per candy. Our receipts, which have been confined almost entirely to sawginned Dharwar and Dhollerah descriptions, are not allowed to accumulate, the balance, after outstanding contracts have been met, finding ready sale at current rates. The quality of the sawginned Dharwar, we are sorry to say, does not show any improvement, and complaints as to the difficulty of selection are very general. The Dhollerah and Bhownuggur, although somewhat mixed, are, we think, up to the average for old cotton. In new cotton business is only practicable at very extreme prices. Crop prospects—Accounts from the districts are generally favourable, the fall of rain reported in our last circular, although unlooked for, having in most instances proved beneficial. The following are the latest telegrams to hand:—Wurdha—"A slight drizzle of rain fell on Sunday last, doing considerable good to the late crops. Since then the weather has been bright." Oomrawuttee, 22nd Nov.—"Weather has been cloudy for the most of the week. It however now looks more settled. The damage done by the rain last week was quite trifling. A little new cotton of good quality is coming in daily." Broach, 23rd—"Since my last report the weather has assumed a more settled character, but thunder and clouds gather in the evening, and there are indications of rain to the west and south-west." Randere, 23rd—"The crop is in good order, but the boll-worm is reported to have made its appearance, without however as yet doing serious injury." The plants about here are covered with "bolls," and look, if anything, better than they did a week ago. Tinnevelly—A telegram of the 23rd instant quotes $7\frac{5}{16}$d as the rate demanded.

Export of Cotton from Bombay to November 24.

	1871.	1870.
London bales	21,705	2,075
Liverpool	733,651	832,507
Total, Great Britain	755,356	834,582
Channel for orders	37,333	10,379
Continent	278,640	139,101
China	50,270½	49,798½
Grand total	1,121,599½	1,033,860½

Actual exports since last mail left, 2,374 bales.

The Imperial Ottoman Bank have furnished the following report, dated Alexandria, Dec. 8:—Our cotton market has been rather irregular and less excited since our last report. A fair business, however, has been transacted during the week, at about our last quotations:—Fair open, with staple, 9¾d per lb, f.o.b.; good fair, with staple, 10¼d per lb ditto; fully good fair, with staple, 10¾d ditto; extra fine, 16d to 16d ditto. Arrivals, from Dec. 2 to Dec. 8, 62,860 crs. Sales, from Dec. 2 to Dec. 8, 34,225 crs. Shipments, from Dec. 2 to Dec. 8—To England, 6,329 bales; to France, 1,450; to Italy, 1,594; to Austria, 272—total, 9,645 bales.

The colonial produce markets here shown considerable

activity during the week, and prices have tended upwards. Sugar has been in request, and closed at a rise of 6d. It is estimated that the continental beetroot crop will produce 830,000 tons for the present season, or about 115,000 tons less than last year. The stock of sugar in the United Kingdom is returned at 103,725 tons against 142,283 tons at the corresponding period of 1870, while the quantity of East India sugar afloat for the United Kingdom and the continent (not including Government exports from Java) is 43,300 tons, against 24,000 tons in 1870, and 44,000 tons in 1869. Native Ceylon and East India coffees have been in request, and prices generally are 6d to 1s higher on the week, a fair business having been effected both on the spot and afloat. The quantity of East India afloat for the United Kingdom and continent (not including Government exports from Java) is 21,650 tons, against 30,780 tons in 1870, and 17,820 tons in 1869. Cocoa has remained without change, but there has been an improved inquiry for rum and rice. Jute has continued quiet.

Annexed is Messrs William Moran and Co.'s indigo report, dated Calcutta, Nov. 21:—A small public sale was held on the 16th inst., at which 263 chests were offered and 180 chests were sold. The bulk of these were fair and good Oudes, which were keenly competed for, and realised an advance on the London July sales of from 9d to 1s per lb, being rather more than was paid for similar qualities by private contract, as reported in our last issue. The following transaction by private contract is reported, viz.:—D B above P, Patkabarry, Moorshedabad, 115 chests, at 315 rs per fy. maund.

The weekly circular of Jay Cooke, McCulloch, and Co., with mail dates December 5th, and cable prices December 19th, says:—The prominent feature of the market for Government securities is still the scarcity of bonds, and the consequent difficulty of executing European orders to buy. The price of bonds has only very partially followed the downward tendency in the gold premium, and, in gold value, bonds are rather higher, though about the same in currency quotations. The annual report of the Secretary of the Treasury shows that during the year ending June 30, 1871, the debt of the United States was reduced $94,300,000. The estimates of receipts and expenditures for the current fiscal year (ending June 30, 1872), shows a surplus of revenues amounting to $71,794,000. The secretary therefore proposes that $50,000,000 be devoted to the sinking fund and the liquidation of the public debt. He further suggests that, for the next fiscal year the taxes be reduced $36,000,000, viz., $16,000,000 on internal revenue, and $20,000,000 on customs duties, the latter reduction to be effected chiefly on raw materials. The secretary appears to contemplate renewing his efforts at an early day to negotiate the loans authorised for refunding the debt at lower rates of interest, and asks Congress for permission to allow higher rates of commission on the negotiation of the 4½ and 4 per cent. bonds, and also suggests that authority be granted for making the interest payable at London. Foreign exchange, at the moment, is quiet, there being few bills offered or asked for, but rates are steady. The close of the canal navigation and the scarcity of ocean freights have checked the export of grain, and the supply of local commercial bills is consequently limited.

THE COTTON TRADE.

LIVERPOOL.—December 21.

The cotton market has been quiet throughout the week, and with comparatively moderate sales, prices of some descriptions have slightly declined. Yesterday afternoon and to-day a firmer tone has prevailed. The business in Sea Island this week has been only of a retail character, owing to the scanty supply; full previous prices have been maintained. American is quoted about ⅛d per lb lower in the current qualities. New York advices to the 21st instant quote middling Upland 20½c, costing to sell in Liverpool 10¾d per lb, by steamer. Brazil has been in moderate request at ⅛d per lb decline in the middling fair and fair qualities. The finer grades maintain last week's values. Egyptian has been in good demand, and prices are without change. East Indian has been heavy of sale, and with a liberal supply offering prices are barely maintained.

In cotton to arrive the business has been comparatively limited, and prices, after declining about ⅛d per lb, have partially recovered. The latest quotations are:—American, basis of middling, not below good ordinary (from any port), shipment December-January, 9⅞d; from Savannah, at sea, 9⅞d; Mobile, not below low middling, ship named, 10d; New Orleans, not below good ordinary, shipment November, 10⅛d; December-January, 10⅛d; January-February, 10⅛d; delivery, December, 10⅛d; Dhollerah, fair merchants, not below middling fair, mutual allowance, February delivery, 7⅞d per lb.

The sales of the week, including forwarded, amount to 73,860 bales, of which 7,700 are on speculation, and 7,860 declared for export, leaving 58,300 bales to the trade.

Dec. 22.—The sales to-day will probably amount to fully 12,000 bales, with a firm market.

N.B.—Tuesday, the 26th (the Bank holiday), and Saturday, the 30th Dec., and Monday, 1st Jan., 1872, will be close holidays in the cotton market.

NEW YORK.—Dec. 8.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Dec. 8. From the figures thus obtained it appears that the total receipts for the seven days have reached 105,839 bales, against 122,126 bales last week, 104,743 bales the previous week, and 101,494 bales three weeks since, making the total receipts since Sept. 1, 1871, 998,051 bales, against 1,212,545 bales for the same period of 1870, showing a decrease since Sept. 1, this year, of 214,494 bales. The exports for the week ending this evening reach a total of 55,622 bales, of which 35,350 were to Great Britain, 11,974 to France, and 8,298 to rest of the continent, while the stocks as made up this evening are now 411,888 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night :—

Week ending Dec. 8.	Exported to			Total this week.	Same week 1870.	Stock.	
	Great Britain.	France.	Continent.			1871.	1870.
New Orleans	11952	9288	...	21240	43350	152774	132785
Mobile	506	...	526	1032	14175	37583	57485

New York	7896	...	600	8496	23546	62981	68000
Other ports	750	...	80	830	...	26000	30000
Total	35350	11974	8298	55622	102554	411888	434136
Total since Sept. 1	387537	55507	28104	471148	629371	...	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 46,932 bales, while the stocks to-night are 22,248 bales *less* than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Dec. 1, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph :—

Ports.	Receipts since Sept. 1.		Exported since September 1 to				Coastwise Ports.	Stock.

The market the past week has developed a gradually improving tendency; prices have advanced, and confidence in the future has strengthened. This upward movement finds its more immediate cause in the late cold weather and the decreased receipts, which latter are interpreted as indicating a smaller yield than the prevailing estimates of a few weeks back. We think, however, aside from these facts, there has been a growing inclination to consider American cotton not dear at present prices. The world's consumption has increased so rapidly, and its wants are so large, while the disposition to use largely the American staple has become so general, and the expense of going back to the poorer sorts is so great, it is felt that our supply, even if it were to reach the larger figures current, would be none too great notwithstanding a moderate advance in price for the supply of spinners' wants. Holders therefore show no anxiety to dispose of their stock while our own spinners appear to be taking hold more freely, and there is an increased movement on foreign account. To-day the transactions have been moderate, middling Uplands closing to-night at 19$\frac{3}{4}$c, against 19c last Friday. For forward delivery the business has been large, and prices have fluctuated somewhat, closing for low middling at 19$\frac{1}{2}$c for December, $19\frac{5}{16}$c for January, 19$\frac{3}{8}$c for February, $19\frac{9}{16}$c for March, 19$\frac{3}{4}$c for April, and $19\frac{7}{8}$c for May. The total sales of this description for the week are 122,100 bales, including 500 free on board. For immediate delivery the total sales foot up this week 22,673 bales, including 7,684 for export, 6,532 for consumption, 1,289 for speculation, and 7,168 in transit. Of the above, 1,057 bales were to arrive. The following are the closing quotations :—

	Upland and Florida.	Mobile.	New Orleans.	Texas.
	c c	c c	c c	c c
Ordinary per lb	16$\frac{5}{8}$ @ ...	16$\frac{3}{4}$ @ ...	17$\frac{1}{8}$ @ ...	17$\frac{1}{8}$ @ ...
Good ordinary	18$\frac{1}{4}$ ...	18$\frac{1}{4}$ ...	18$\frac{3}{8}$ ...	18$\frac{3}{8}$ ...
Low middling	18$\frac{7}{8}$ ...	19$\frac{1}{8}$ ...	19$\frac{1}{4}$ ...	19$\frac{1}{4}$ ...
Middling	19$\frac{3}{8}$ ...	19$\frac{5}{8}$ ...	20$\frac{1}{8}$ ...	20$\frac{1}{8}$ ...
Good middling	20$\frac{1}{4}$ ...	20$\frac{3}{8}$ ...	21 ...	21$\frac{1}{4}$ ...

For forward delivery the sales (including 500 free on board) have reached during the week 122,100 bales (all low middling or on the basis of low middling).

The Cotton Exchange, through Mr Charles A. Easton, the chairman of the Committee on Statistics, reports the stock of cotton in New York, Dec. 1, at 57,509 bales, as follows :—In warehouse, 35,871 bales; on wharves, 3,638; on shipboard (not cleared), 18,000—making in all, as stated above, 57,509 bales.

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports, receipts and shipments for the week, and stock to-night and for the corresponding week of 1870 :—

	Week ending Dec. 8, 1871.			Week ending Dec. 8, 1870.		
	Receipts	Shipments.	Stock.	Receipts	Shipments.	Stock.
Augusta	5395	6143	13252	8993	7123	15000
Columbus	1884	1488	7257	4130	1518	9080
Macon	2169	1925	10665	4381	3555	9882
Montgomery	2511	1549	9992	4642	2226	10946
Selma	2977	2613	5753	3696	3755	9780
Memphis	12152	15992	18033	23454	25387	38026
Nashville	2602	2502	1377	3782	2905	3098
	29690	32212	66329	53078	46469	95612

The above totals show that the interior stocks have decreased during the week 1,763 bales, and are to-night 29,283 bales *less* than at the same period last year. The receipts have also been 23,388 bales *less* than the same week last year.

The exports of cotton this week from New York show a decrease since last week, the total reaching 12,019 bales, against 14,254 bales last week. Below we give our table showing the exports of cotton from New York and their direction for each of the last four weeks; also the total exports and direction since September 1, 1871; and in the last column the total for the same period of the previous year :—

—*New York Commercial and Financial Chronicle.*

NEW YORK, Dec. 15.—According to Messrs Moffat, Davidis, and Co.'s report, the week's receipts of cotton at all United States ports have been 121,000 bales; and since the 1st of September, 1,125,000 balef. Shipments to England, 72,000 bales; ditto to France, 22,000 bales; and to the continent, 14,000 bales. Total sinae the 1st of September, 570,000 bales. Stock at all ports, 408,000 bales. Middling Uplana, 9½d, cost and freight per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, Dec. 21. — Since Friday last our market has retained its quiet tone. The cotton market, influenced by the increased receipts at the American ports, has shown an easier tone, consequently the large buyers both in cloth and yarns show a disposition to hold off, trusting by waiting to do better. In cloth the market has been very inanimate, though business may be done at a low rate of prices. In yarns for export there is little inquiry, buyers being disposed to hold off under the expectation of lower values. For home trade the demand is caused by those manufacturers who are obliged to buy for immediate requirements.

BRADFORD.—The market has a better tone in nearly every department. Most descriptions of wool meet with an active inquiry, and a fair business has been done for immediate consumption. Noils and brokes, especially good English and Botany, are in active demand and are firm in price. In the yarn market there is an active inquiry in most classes of yarns, including lustre, demi-lustre, single, two-fold, and genappe, and a fair amount of business has been done at higher rates. In the piece market there is a fair business doing in both plain and fancy goods for the continent. Prices are extremely firm.

LEEDS.—Though there was little business done in the cloth halls, an excellent feeling prevailed among both merchants and manufacturers, dyers and finishers, wool merchants and waste dealers. Meltons and fancy coatings were further bespoken, notwithstanding that merchants have little time to spare except for stocktaking, and that prices are hardening. Wools, mungoes, shoddy, and machine oils are very firm in price.

ROCHDALE.—There is more business doing in some branches of the flannel trade, and metropolitan, Scottish, and other buyers have been looking up plain and dyed flannels rather determinedly. Various kinds of flannel are inquired for, but prices prevent orders which otherwise would make the mills busy.

CARDIFF.—The steam-coal trade continues to show a large amount of activity, merchants being so fully supplied with orders, that they are obliged to refuse many fresh contracts offered to them. House coals command a brisk sale on West of England and Irish account, and prices are advancing.

DUNDEE.—During the past week there has been considerable inquiry for flax goods on the spot, and numerous small transactions have taken place at improving prices. In some instances holders now refuse to make sales, unless at a farther advance, which they require, in order to bring prices more on a level with those current abroad. There has been an active demand for tows during the week; a large amount of business has been done, chiefly in good medium qualities at full prices. The jute market continues without change; the demand for low qualities is still very languid, and prices of such are without improvement. The yarn market continues firm, and prices of flax and tow yarns are well maintained. The demand for jute yarns also continues active at stiff prices. The demand for linen continues good, and manufacturers are well employed. There is also a great demand for certain descriptions of jute fabrics, for which manufacturers are considerably foresold.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Dec. 8.

We have had a very unsettled market during the past week. Reports by cable have been contradictory. Gold has declined freights have been irregular, and inland navigation has definitely closed for the season, but the quantity of grain which was prevented from reaching its destination is estimated much smaller than early in the week. Flour has arrived freely by rail, and we have had a very variable market. The trade bought very fairly on Monday and Wednesday, but on succeeding days was quiet. A few lines of shipping extra State sold at $6.65 to $6.75, mainly the lower figure, but the market has really been without important feature. Rye flour has improved a little. To-day was quiet, but firm, and good bakers' brands brought more money. Wheat has been firm, but very dull. As is customary at the close of inland navigation, the views of buyers and sellers have been wide apart. On one or two days the sales have been limited to car-loads and broken parcels. The most pressing demand appears to have been for choice white and spring red wheat. The feeling of holders generally has been strengthened by the marked reduction in receipts at the Western markets, as shown in the statistics below. To-day holders were firm, and for such quantities as buyers must have full prices were realised. No. 2 Milwaukee sold at $1.55, but our quotations are mostly nominal. Indian corn has been fairly active, and prices generally firm. There is better supply, both of yellow and white, and these descriptions have been weak, but prime mixed has ranged higher than last week. There is a moderate quantity of new corn coming forward by rail. To-day there was a moderate shipping demand at 79c for prime old mixed, with some demand for white Western at 82c. The movement in breadstuffs at this market has been as follows:—

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

There have been very heavy arrivals of grain-laden vessels this week off the coast, and the number of cargoes now on passage has been reduced by about 250, to be replaced by only about 50 of the most recent shipments. It is probable, therefore, that the stocks of foreign grain will not further increase beyond the present addition. The holding is now large, so much difficulty has been experienced in finding warehouse-room this week. Trade has ruled very dull, and the tendency of prices has been decidedly downwards, though the quotations are without actual change in the absence of important business. Off the coast 2s per quarter less money has been accepted for inferior wheats, while good qualities have given way 1s. Supplies of English wheat at Mark lane have not been extensive, there having been no fresh arrivals of importance during the week, but the condition of the samples has been generally good. Farmers have preferred to thrash out barley, and the supply of that article has been consequently large. Flour has ruled dull, in sympathy with the wheat market, and the quotations have shown weakness.

The spring corn trade has been very inanimate. Maize and oats show a reduction of 1s per quarter on the week, and inferior produce has been very difficult to dispose of. Beans and peas are about 2s per quarter cheaper; but fine malting barley would still command 42s per quarter.

The following statement shows the imports and exports of breadstuffs into and from the United Kingdom since harvest, viz., from August 26 to the close of last week, compared with the corresponding periods in the three previous years :—

IMPORTS.

	1871. cwts.	1870. cwts.	1869. cwts.	1868. cwts.

Mr George Dornbusch thus reports the state of the floating grain and seed trade :—During the last eight days the westerly and south-westerly winds have brought up 236 grain and seed-laden vessels at the usual ports of call, viz., 133 wheat, 21 maize, 27 barley, 16 rye, 15 beans, 1 oats, 9 linseed, 5 rapeseed, 1 cotton-seed, 4 valonea, 4 sundries. The floating grain trade has this se'nnight, during the arrival of the fleet, been at first in a state of expectancy, and prices difficult to settle. Wheat—The simultaneous arrival of so large a number of cargoes caused at first a pause, some buyers aimed low, and sellers resisted making concession. Maize steady in tone. Barley—6d to 1s cheaper. Rye—6d to 1s dearer. The reported sales are as follows :—Wheat—11 arrived cargoes; Ghirka, from Galatz, 55s; New ditto, from Odessa, 52s 9d and 53s; ditto, from Nicolaieff, 53s; New Rostoff Ghirka, from Taganrog, 48s per 492 lbs; winter, from Baltimore, 57s 6d; Milwaukee, from Montreal, 56s; red winter ditto, 57s 6d per 480 lbs. Maize—10 arrived cargoes: Odessa, 33s 9d per 492 lbs; Wallachian, 29s 9d; Mazagan, 34s; mixed, from New York, 33s; ditto, from Baltimore, 32s 9d to 33s per 480 lbs. Barley—7 arrived cargoes: new Wallachian, 26s 6d; new Odessa, 25s; Azow, from Taganrog, 25s 3d; new Danubian, from Sulina, 25s 6d and 25s 9d; Yeisk, 25s 6d per 400 lbs. Rye — 3 arrived cargoes: Azow, 33s and 34s; Nicolaieff, 35s per 480 lbs. On passage, 1 cargo Odessa, 33s 6d. To be shipped 1 cargo ditto, 36s per 480 lbs. Linseed quiet—prices unaltered. Arrived 2,800 qrs from Kertch, 63s per 424 lbs. Shipped or to be shipped, 400 tons East India, from Calcutta, 63s 10½d to 64s per 410 lbs. Rapeseed quiet, at late rates. To be shipped 600 tons ordinary brown Calcutta, 68s 6d per 410 lbs. Cotton-seed—No sale reported; prices are nominal, about 8*l* 17s 6d to 9*l*.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

[Most of the markets will be closed next week, as usual at Christmas.]

SUGAR.—The improvement in this market, referred to last week, has continued, and the lower qualities have met with some speculative demand at about 6d to 9d per cwt advance, sales including a large quantity of Manila, also some parcels of Jaggery afloat. Other descriptions are firmer, with more inquiry from the refiners. About 1,766 casks West India sold to yesterday (partly from second hands), leaving a limited quantity on show, for which the importers ask higher rates. 299 bags bright grainy yellow Demerara by auction sold at 41s to 41s 6d; 12 hogsheads Demerara at 40s 6d. Best sugar is dearer on the spot and afloat. Fine white crystals have been sold at 39s per cwt. Refined is firmer, and taken more readily by the trade at fully last Friday's quotations. The stock of sugar in London on the 16th inst. was further reduced to 41,200 tons, or 30,600 tons less than last year, and in the kingdom to 104,000 tons, against 142,500 tons at the same date in 1870.

Mauritius.—1,361 bags soft grainy kinds were taken in above the value.

Penang.—200 bags soft yellow were withdrawn. Privately, 800 baskets soft brown at 24s to 25s 6d.

Jaggery.—500 tons sold afloat at 22s 6d, and 23s paid yesterday.

Natal.—251 bags sold as follows :—Brown, 31s to 33s; grainy yellow, 35s to 37s; small lots white, 37s 6d to 38s 6d.

Manila.—The quantity sold on the spot has been about 70,000 bags. Taal, 24s to 25s 6d; Ilo Ilo, 26s; brown and clayed, 26s 6d to 27s, including washed. About 2,200 tons afloat Ilo Ilo and Zebu at 26s.

Floating Cargoes.—One of Porto Rico at 29s 6d for the United Kingdom. 750 tons Java afloat at 31s 6d, equal to about No. 12.

Refined.—The demand has been steady, and prices show rather an improving tendency for stoved goods and pieces.

MOLASSES.—No sales reported in West India.

RUM.—The market has become dull, with prices nominally unaltered in the absence of business. There have been arrivals of West India, and some Mauritius is in course of landing.

COCOA.—There is not any change in the market this week. The public sales have included 76 bags Trinidad, which sold at prices ranging from 62s to 80s. Of 250 bags foreign, the bulk was taken in; Cuba sold at 68s to 70s. Of 4,104 bags Guayaquil, a few lots good sold at 52s 6d to 53s. The remainder taken in at 48s to 50s per cwt. The stocks generally are now below those of last year.

TEA.—Fresh arrivals have taken place, but the trade seem indisposed to extend their operations so near the close of the year. The market remains firm. During the week some few public sales have been held, at which prices did not experience any material change, the principal

feature being the business in green teas. Fine qualities realised full. Common rather easier rates. Moyune gunpowder, No. 1, 2s 8d to 3s 1½d; No. 2, 1s 11d to 2s 1d; No. 1 Hyson, 1s 8¼d to 2s 1½d; fine young Hyson up to 2s 4½d per lb.

COFFEE.—The market has become firmer, with a revival of demand. For native Ceylon an advance of 6d to 1s per cwt may be quoted. Good ordinary has obtained 67s to 68s. Sales to arrive at 68s, with guarantee of quality. 773 bags by auction sold at 67s 6d to 68s 6d for mixed to good ordinary rather bold. 823 casks 156 barrels and bags plantation went at full prices to 1s recovery: low middling palish to middling colory, 71s to 77s; good middling to bold (in luding a few lots of the new crop), 77s 6d to 82s. Native East India has sold on the spot at 66s to 69s 6d; ditto afloat at 67s. 348 cases 785 bags East India by auction were chiefly Wynaad kinds, at 71s to 78s. 548 mats Manila at 67s 6d to 68s. Some parcels by private contract at 67s 3d to 68s. 680 bags African at 64s to 65s. 232 bags Singapore were chiefly taken in at 71s for Bontyne. 4,746 bags Guatimala sold rather dearer, chiefly at 67s 6d to 72s 6d. 800 bags Costa Rica at 66s 6d to 71s 6d. 527 bags Rio withdrawn above the value. 301 bags pale St Thome sold at 66s per cwt. The deliveries, although steady, are now less than last year's during the same week, and the decrease in stock is now 6,453 tons. Arrivals of Ceylon and East India will be earlier than usual.

RICE.—Very few transactions are reported this week as the market remains dull. About 700 tons low quality Bengal have sold at 8s 9d to 9s 3d ex quay. On the spot 1,500 bags Madras are reported at 10s 1½d to 10s 3d per cwt. There have not been any floating cargoes of soft grain sold.

IMPORTS and DELIVERIES of RICE to Dec. 16, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imports ....tons	83750 ...	75000 ...	78850 ...	71700
Deliveries	100960 ...	73750 ...	60170 ...	54466
Stock	36200 ...	51000 ...	51350 ...	33850

SAGO.—The stock is large, but a better demand prevails. 612 bags small grainy by auction went at rather higher rates, viz., 16s 6d to 17s per cwt, and business has been done by private contract.

TAPIOCA.—146 bags pearl were taken in at 19s to 20s per cwt. A few lots of rough Penang sold on former terms. 320 bags tapioca flour chiefly at 1¾d per lb.

BLACK PEPPER.—The market is rather lower, and there have been further arrivals. At the public sales yesterday, 2,239 bags partly sold: common Penang, 5½d to 5¾d; low Trang kind, 5½d; Singapore, good greyish, 6d; one lot bold clean Siam kind, 6¼d. 149 bags Malabar were chiefly sea-damaged, but two lots sound sold at 5¾d to 6d for common grey. By private contract during the week Penang has sold at 5½d to 5¾d, and good Singapore up to 6¼d per lb.

WHITE PEPPER.—Common qualities are rather slow of sale. 291 bags Singapore by auction was partly disposed of at 11½d to 11¾d. A few lots fine realised 1s 0¼d to 1s 1½d per lb.

OTHER SPICES.—A good business has been done in nutmegs and at rather higher rates, including some parcels by private contract. 39 packages brown Batavia and Penang at auction sold as follows:—123 to 102, 3s 2d to 3s 3d; 86 to 81, 3s 6d to 3s 7d; 78 to 76, 3s 7d to 3s 8d. 5 cases low Singapore mace sold at 4s to 4s 1d. Further business has been done in pimento to arrive, at 2⅜d for the new crop. On the spot an advance to 3d has occurred. A few parcels of cinnamon went at some reduction on the rates current at the last quarterly sales, viz., 102 bales Ceylon as follows: 1st sort, 2s 4d to 2s 11d; 2nd, 2s to 2s 8d; 3rd, 1s 10d to 2s 8d; 4th, 1s to 2s 3d. 165 bags chips at 3½d to 5d. There have not been any public sales of cloves. 20 boxes China cassia were sold at 1s 1d to 1s 1½d per lb. 50 boxes Cassia lignea bought in at 115s. 247 cases 128 pockets Cochin ginger were more or less wormy, and chiefly bought in. A few lots sold at 37s to 39s, and very small at 35s per cwt.

SALTPETRE.—The market, which was last week depressed by forced sales, is now firmer. 200 tons Bengal have sold afloat, the latest price being 28s 9d to 29s per cwt, usual conditions. A small parcel on the spot, refraction 5¼, at 28s 9d cash.

IMPORTS and DELIVERIES of SALTPETRE to Dec. 16, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imported ....tons	10750 ...	10860 ...	11140 ...	7050
Total delivered	11220 ...	13350 ...	10680 ...	10920
Stock	1900 ...	2330 ...	4650 ...	4270

DRYSALTERY GOODS.—There is more inquiry for lac dye this week, with business by private contract. Teneriffe cochineal is in demand, and rather dearer. China galls, 57s 6d to 60s. Business has been done in Bengal turmeric to arrive at 16s 6d. Cutch steady at 23s to 24s. Gambier maintains the late advance. A sale made at 19s per cwt, ex ship.

SHELLAC is in steady demand. Garnet, in course of landing and afloat, has sold at 6*l* 10s per cwt.

CAMPHOR has met with more inquiry, with sales at 77s 6d up to 80s per cwt.

METALS.—The advance quoted in these markets last week is not quite maintained, and a moderate amount of business has been done. Tin has been sold at some further reduction. Straits, 144*l* to 145*l*, according to terms. Banca about the same, and yesterday at 144*l* cash. English nominally unaltered. A good business has been done in English lead during the last two or three weeks, up to 19*l* 5s for the best soft qualities, and Spanish at 10s to 15s less. Some realisations by holders of Chili copper has led to lower prices: present value, 83*l* to 85*l* 10s. Australian steady at 91*l* to 93*l* 10s. In other kinds no change is perceptible. There is less demand for spelter. The last sale of Silesian was at 23*l*. Business in Belgian for arrival. A large quantity of Scotch pig iron has changed hands during the week at advancing prices, up to 71s 8d cash. Railway bars and other makes of British iron continue in good demand.

JUTE is steady, but not very active. The few sales made in the new crop have been at steady prices. Further arrivals have taken place. The stock has further increased to 107,270 bales, being larger than usual. Deliveries have shown a very important decrease, owing to the shipments direct from Calcutta to Dundee.

MANILA HEMP.—During this week business has been done in Manila rather under former prices. 389 bales by auction part sold at 48*l* 5s to 50*l* 5s for good, and 38*l* to 38*l* 10s per ton for ordinary course brown. Other descriptions of hemp are generally quiet. Petersburg clean, 34*l* 10s per ton.

LINSEED.—The market is steady. Calcutta, 62s 6d to 63s. Business reported for arrival at and rather under 64s. A cargo of Azoo reported at 63s per quarter.

HIDES.—At the sales of East India yesterday the best qualities went rather dearer, while low and inferior were dull, and fully ¼d per lb lower. Buffalo steady. Of the total quantity, 208,502 hides brought forward, the bulk sold.

OILS.—Olive has been firm, with business in the lower qualities. Two cargoes of Gioja has sold at 49*l* 10s and 52*l* 5s per tun, f.o.b. Palm is held at late prices, but not much business doing. Cocoa-nut oil remains as before, and is rather dull. Linseed is quiet at 33*l* 5s to 33*l* 10s; first four months' delivery, 33*l* 15s to 34*l*. English brown rape dull and lower, viz., 44*l* to 44*l* 5s, spot and delivery to April. Refined, 46*l*; foreign, 46*l* 10s to 48*l*. A good business in sperm at 89*l* to 91*l* per tun.

PETROLEUM.—American refined, 1s 4½d to 1s 5d per gallon, with a quiet market.

SPIRITS TURPENTINE.—American and French quiet at 49s to 49s 6d per cwt.

TALLOW.—Foreign has been firmer, with a steady business. New Petersburg, 49s 6d; January to March, 49s 9d; and March only, 50s to 50s 3d per cwt. About 2,600 casks Australian, &c., are declared for public sale this afternoon.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is active, and the business in low descriptions shows a further slight advance. About 7,000 bags Manila have sold: Zebu, 27s; Taal, including washed, at 26s. 2,500 bags of the former afloat at 26s. 59 casks crystallised Berbice by auction were disposed of at 40s 6d to 41s 6d for fine yellow. 142 bags Mauritius at 29s to 30s. 387 casks West India sold, making 2,153 casks for the week.

COFFEE.—The market closes firm.

RICE dull.

METALS.—A good business in Scotch pig iron. Other metals without material change.

OIL.—72 casks palm by auction were bought in.

TALLOW.—No alteration in Petersburg or town melted. 2,189 casks Australian by auction partly sold, and went at 6d to 1s decline; mutton, 46s to 47s 6d; beef, 44s 6d to 45s 6d; inferior in proportion. 333 casks, &c., South American, part sold at 45s 6d to 47s per cwt for mutton.

ADDITIONAL NOTICES.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that large arrivals of oranges have been received from the Azores, Spain, Portugal, and Sicily, and met with a ready sale for Christmas consumption. Sicily lemons at easier rates, any of fine quality sustain their value. Barcelona nuts scarce; an advance in black Spanish. Brazil in demand. A good inquiry for Seville sours.

ENGLISH WOOL.—The firm tendency still continues. Stocks light.

COLONIAL WOOL.—The market is without change.

FLAX.—Market very firm.

HEMP.—Market dull, and but little business doing.

SILK.—Market firm, prices well sustained.

SEEDS continue to meet a moderate demand, at late rates.

TOBACCO.—We have nothing new to report during the past week in the North American market, buyers showing no disposition to operate, and confining their purchases to their immediate requirements only. In no particular descriptions has there been any operation worthy of notice. Prices are without alteration.

LEATHER.—At Leadenhall on Tuesday, the last market of the present year, there was a very small supply of fresh leather The demand was good for light English butts, light shoulders, and bellies, but, as is usual at the close of the year, the immediate wants of the buyers regulated their purchases. Prices in general are unaltered.

METALS.—There is a continued strong market, and a good deal of business reported. Copper has been dealt in daily at full prices, and to a good extent. Iron continues very firm. Tin has been rather neglected, and prices are a shade easier. Spelter, lead, and tin plates have all been in demand at full quotations.

METROPOLITAN CATTLE MARKET.

MONDAY, Dec. 18.—The total imports of foreign stock into London last week amounted to 4,065 head. In the corresponding week in 1870, we received 11,157; in 1869, 7,918; in 1868, 8,926; and in 1867, 7,614 head.

A quiet tone has pervaded the cattle trade to-day. The supply of beasts has been only moderate; but as butchers have already supplied their wants, there has been very little demand for any breed, and prices have experienced a sharp reaction, being from 2d to 4d per 8 lbs lower than on Monday last. The best Scots and crosses have sold at from 5s 6d to 5s 8d per 8 lbs. In the sheep market there has been an absence of any prominent feature. The supplies have been short, but the trade has been dull. Choice Downs have fallen 2d, but in other breeds the decline has been more marked. The top price has been 6s 8d to 6s 10d per 8 lbs. For calves there has been only a moderate inquiry at late rates. Pigs have been in limited request at

previous quotations. As Christmas-day falls on Monday next, the market will be held on the following day (Tuesday).

SUPPLIES ON SALE.

	Dec. 19, 1870.	Dec. 18, 1871.

HOP MARKET.

BOROUGH, Friday, Dec. 22.—This market has been characterised by quietness. Business in all descriptions has been transacted slowly, but prices have shown little or no alteration. Mid and East Kent, 10*l* to 10*l* 16s; Weald of Kent, 8*l* 10s to 10*l* 10s; Sussex, 7*l* 5s to 9*l* 9s; Farnham and country, 11*l* to 16*l*; Yearlings: Mid and East Kent, 3*l* to 6*l* 10s; Weald of Kent, 3*l* to 5*l* 15s; Sussex, 3*l* to 5*l* 5s; Farnham and country, 4*l* 10s to 7*l*; olds, 1*l* 5s to 2*l*.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec 22.—The demand has continued active throughout the week, and at the public sale held here on Wednesday about 2,900 bales, including 1,150 ballots Peruvian, 700 bales Turkey and Syrian, 260 bales River Plate, and 260 bales Spanish and frontier wool were offered, and mostly sold at prices on a par with last sale-rates of three weeks ago.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 22.—Moderate attendance, and fair consumers' demand for wheat at Tuesday's full prices. Flour steady. Maize, retail demand barely at late quotations. Market generally wears a holiday tone.

WAKEFIELD, Friday, Dec. 22.—The wheat trade ruled dull to-day, and prices still have a downward tendency, while parcels out of condition were nearly unsaleable. Barley was in limited demand, and rather lower. Beans and oats sold slowly at late rates.

The Gazette.

TUESDAY, Dec. 19.

BANKRUPTS.

The Hon. Lord Charles George Archibald Hamilton, Long's Hotel, Bond street.
William Hurdman, High Holborn, wine merchant.

DUNN & HEWETT'S "BROMATINE," a Cocoa deprived of its superfluous Butter, 6d a Packet.

MANUFACTORY—PENTONVILLE, LONDON.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

OXYGENATED WATER HOLDS IN

Solution pure Oxygen Gas, the vital element that sustains life. It is a decided tonic and alterative drought, and from its special action on food during the process of digestion and assimilation is peculiarly suitable for invalids. Price 4s per dozen half-pints. Laboratory, 36 Long Acre, and all Druggists.

DUNVILLE'S OLD IRISH WHISKY,

BELFAST, of same quality as that supplied to the International Exhibition of 1862, Dublin Exhibition of 1865, Paris Exhibition of 1867, and now regularly to the House of Lords, the quality of which is equal to the finest French brandy, may be had direct from Belfast, in butts, hogsheads, quarter-casks, and cases.—Quotations on application to Messrs Dunville and Co., Royal Irish Distilleries, Belfast; or at their London offices, 4 Beaufort buildings, Strand, W.C.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER

TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage 1s 10d. Post-office orders to be made payable to John White, Post-office Piccadilly.

NEW PATENT

ELASTIC STOCKINGS, KNEE

CAPS, &c., for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS &c. They are porous, light in texture and inexpensive and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

INDIA OFFICE, 19th December, 1871.

WITH REFERENCE TO THE

Notification by the Government of India (Financial Department), dated the 11th April, 1867, No. 2,010, under which debentures to the amount of Rs. 37,91,946, bearing 5 per cent. interest, were created, to be liquidated and paid off at par on 1st June, 1872, the Secretary of State for India in Council hereby give notice, that in anticipation of that date, the Governor-General in Council has been pleased to authorise the immediate liquidation of any of these debentures that may be presented duly receipted at either of the Presidency Banks of Bengal, Bombay, or Madras, together with interest to date of discharge, and in addition thereto half the interest that would have accrued between that date and the 31st May, 1872, inclusive had such debentures not been discharged before maturing.

M. E. GRANT DUFF.

FINE FLAVOURED STRONG BEEF

TEA at about 2½d a pint. Ask for LIEBIG COMPANY'S EXTRACT OF MEAT, requiring Baron Liebig the Inventor's Signature on every jar, being the only guarantee of genuineness.

Excellent economical stock for soups, sauces, &c.

WHEN YOU ASK FOR

GLENFIELD STARCH,

SEE THAT YOU GET IT,

As Inferior kinds are often Substituted for the sake of extra profits.

TO SHIPPERS AND EXPORTERS.

MILNERS' STRONG HOLDFAST

AND FIRE-RESISTING SAFES, CHESTS. STRONG ROOMS AND DOORS, with all their Latest Improvements.—The strongest and (quality considered) the cheapest safe-guards against fire and the modern burglar. Wanted wherever cash and books are used in quantities at wholesale prices. Milners Phœnix Safe Works, Liverpool, the most extensive and complete in the world. HOLLOWAY'S PILLS

are admirably adapted for the cure of diseases incidental to females. At different periods of life women are subject to complaints which require a peculiar medicine, and it is now an indisputable fact that these is none so suitable for such complaints as Holloway's pills. They are invaluable to females of all ages, young or old, married or single. They purify the blood, regulate the secretions, give tone to the stomach, correct all suspended functions, and clear the complexion. The first approach of disordered action should be met with appropriate doses of these pills. Whilst taking them no restriction need be placed over the patient. They contain nothing which can possibly prove injurious to the system. They act by purifying the blood, and regulating every organ.

COMPANY OF THE RAILWAYS OF THE SOUTH OF AUSTRIA AND UPPER ITALY.

The Board of Directors has the honour to inform bondholders that two Series of Bons and 8,389 Obligations, the numbers of which are subjoined, were DRAWN for Reimbursement in a public sitting held at Vienna, on December 15th, 1871.

BONS, 1872–1874.

LLOYD'S LIST
(Established in 1726).
The official organ of the Committee of Lloyd's, published daily in time for the Morning Mails, and containing the most complete reports of every description of SHIPPING AND COMMERCIAL INTELLIGENCE.

		£	s	d
Annual subscription.....		3	0	0
Do.	with evening edition	4	0	0
Do.	evening edition alone	2	0	0
Quarterly subscription.....		0	16	0
Do.	with evening edition	1	1	0
Do.	evening edition alone	0	10	6

Extra for postage at the rate of 13s per annum.

On and after the 1st of January next, the size of this journal will be considerably enlarged, for the purpose of extending its Shipping and Commercial information. From that date this long-established journal, in addition to its complete Summary of Shipping News (which will include a Reliable Homeward-Bound List), will contain correct and early intelligence of each day's commercial transactions. Full reports will be given of Stock Exchange, Mincing lane, Corn, Cattle, and all other markets of interest to the mercantile classes. Reports will also appear in each issue of the Provincial markets of the previous day, including Corn, Cattle, Manufactures, &c. The state of the principal Foreign markets will also form a feature in its columns; and many other additions of importance to the commercial world will be made.

Evening Edition.—For the convenience of the Country and Foreign Subscribers, from January 1st an Advance Sheet will be issued daily in time for the Evening Mails. This Edition may be subscribed for separately, or together with the Morning Edition. The two Editions combined will keep subscribers informed up to the latest moment as to Shipping movements, the fluctuations of the markets, &c., &c.

The influential character of the subscribers to "LLOYD'S LIST," both at home and abroad, necessarily renders the journal more than an ordinary medium for publicity. The attention of advertisers is therefore directed to the advantages they will gain by making their wants known through its columns.

TO ADVERTISERS.
The Foreign circulation of "LLOYD'S LIST" having proved of considerable benefit to firms advertising therein, advertisers will, in future, have the option of inserting their advertisements alternately in English, French, Spanish, Italian, German, &c. For the convenience of advertisers unable to supply their own translations, the Publishers will undertake to provide them at a charge of 2s 6d for each language for any advertisement not exceeding two inches in depth.

Terms for insertion of advertisements sent on application to the Publishers.

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL for December gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains

A FINANCIAL RECORD OF THE MONTH;

New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to December 27.

Advertisements for the next Number, to be published on January 27, must be sent, to insure insertion, on or before January 25.

The December Number of the INVESTOR'S MONTHLY MANUAL gives, in addition to the usual information, the Highest and Lowest Prices of all Stocks and Shares for the last Three Years, the latest quotations for 1870 (so as to indicate the Exact Movement during the Twelve Months), a Complete Directory, the names of the Markets where each Security is chiefly dealt in, a Financial History of the Year 1871 (including a Tabulated Chronicle of Events), besides Memoranda relating to the Financial Position of Foreign and Colonial Governments, to Railways, &c., &c. A copious Index is added for purposes of reference.

OFFICE—340 Strand.

THE GREAT RISE IN THE PRICE OF COMMODITIES.

Most persons are aware that the trade of the country is in a state of great activity. All the usual tests indicate that—the state of the Revenue, the Bankers' Clearing-house figures, the returns of exports and imports are all plain, and all speak the same language. But few have, we think, considered one most remarkable feature of the present time, or have sufficiently examined its consequences. That feature is the great rise in the price of most of the leading articles of trade during the past year. We give at the foot of this paper a list of articles, comprising most first-rate articles of commerce, and it will be seen that the rise of price, though not universal and not uniform, is nevertheless very striking and very general. The most remarkable cases are—

	January. £	s	d	December. £	s	d
Wool—South Down hogs ..... per pack	13	0	0	21	15	0
Cotton—Upland ordinary ..... per lb	0	0	7¼	0	0	8⅝
No. 40 mule yarn, &c. ..... „	0	1	1¼	0	1	2⅛
Iron—Bars, British ..... per ton	7	2	6	8	17	6
P g. No. 1 Clyde ..... „	2	13	3	3	16	0
Lead ..... „	16	7	6	19	2	6
Tin ..... „	137	0	0	157	0	0
Copper—Sheeting ..... „	75	10	0	95	0	0
Wheat (Gazette average) ..... per quarter	2	12	0	2	15	8

and in other cases there is a tendency upwards in price much more often than there is a tendency downwards.

This general rise of price must be due either to a diminution in the supply of the quoted articles, or to an increased demand for them. In some cases there has no doubt been a short supply. Thus in wool, the diminution in the home breed of sheep has had a great effect on the price.

In 1869 the home stock of sheep was	29,538,000
In 1871 — —	27,133,000
Diminution	2,405,000

Equal to 8.1 per cent.

And in the case of some other articles there may be a similar cause operating. But taking the whole mass of the supply of commodities in this country, as shown by the plain test of the *quantities* imported, it has not diminished, but augmented. The returns of the Board of Trade prove this in the most striking manner, and we give below a table of some of the important articles. The rise in price must therefore be due to an increased demand, and the first question is, to what is that demand due?

We believe it to be due to the combined operation of three causes—cheap money, cheap corn, and improved credit. As to the first indeed, it might be said at first-sight that so general an increase must be due to a depreciation of the precious metals. Certainly in many controversies facts far less striking have been alleged as proving it. And indeed there plainly is a diminution in the *purchasing power* of money, though that diminution is not general and permanent, but local and temporary. The peculiarity of the precious metals is that their value depends for unusually long periods on the quantity of them which is in the market. In the long run, their value, like that of all others, is determined by the cost at which they can be brought to market. But for all temporary purposes, it is the supply in the market which governs the price, and that supply in this country is exceedingly variable. After a commercial crisis —1866, for example—two things happen: first we call in the debts which are owing to us in foreign countries; and we require those debts to be paid to us not in commodities, but in money. From this cause principally, and omitting minor causes, the bullion in the Bank of England, which was 13,156,900*l* in May, 1866, rose to 19,413,000*l* in January,

1867, being an increase of over 6,000,000*l*. And then there comes also a second cause tending in the same direction. During a depressed period the savings of the country increase considerably faster than the outlet for them. A person who has made savings does not know what to do with them. And this new unemployed saving means additional money. Till a saving is invested or employed it exists only in the form of money: a farmer who has sold his wheat and has 100*l* "to the good," holds that 100*l* in money, or some equivalent for money, till he sees some advantageous use to be made of it. Probably he places it in a bank, and this enables it to do more work. If 3,000,000*l* of coin be deposited in a bank, and it need only keep 1,000,000*l* as a reserve, that sets 2,000,000*l* free, and is for the time equivalent to an increase of so much coin. As a principle it may be laid down that all new unemployed savings require *either an increased stock of the precious metals, or an increase in the efficiency of the banking expedients by which these metals are economised.* In other words, in a saving and uninvesting period of the national industry, we accumulate gold, and augment the efficiency of our gold. If therefore such a saving period follows close upon an occasion when foreign credits have been diminished and foreign debts called in, the augmentation in the effective quantity of gold in the country is extremely great. The old money called in from abroad and the new money representing the new saving co-operate with one another. And their natural tendency is to cause a general rise in price, and what is the same thing, a diffused diminution in the purchasing power of money.

Up to this point there is nothing special in the recen history of the money market. Similar events happened both after the panic of 1847, and after that of 1857. But there is another cause of the same kind, and acting in the same direction, which is peculiar to the present time; this cause is the amount of the foreign money, and especially of the money of foreign Governments, now in London. No Government probably ever had nearly as much at its command as the German Government now has. Speaking broadly two things happened: during the war England was the best place of shelter for foreign money, and this made money more cheap here than it would otherwise have been; after the war England became the most convenient paying place, and the most convenient resting place for money, and this again has made money cheaper. The commercial causes for which there are many precedents have been aided by a political cause for the efficacy of which there is no precedent.

But though plentiful money is necessary to high prices, and though it has a natural tendency to produce these prices, yet it is not of itself sufficient to produce them. In the cases we are dealing with, in order to lower prices there must not only be additional money, but a satisfactory mode of employing that additional money. This is obvious if we remember whence that augmented money is derived. It is derived from the savings of the people, and will only be invested in the manner which the holders of the time being consider suitable to such savings. It will not be used in mere expenditure; it would be contrary to the very nature of it so to use it. A new channel of demand is required to take off the new money, or that new money will not raise prices. It will lie idle in the banks, as we have often seen it. We should still see the frequent, the common phenomenon of dull trade and cheap money existing side by side.

The demand in this case arose in the most effective of all ways. In 1867 and the first half of 1868, corn was dear, as the following figures show:—

GAZETTE AVERAGE PRICE OF WHEAT.

	s	d		s	d
December, 1866	60	3	October, 1867	66	6
January, 1867	61	4	November —	69	5
February —	60	10	December —	67	4
March —	59	9	January, 1868	70	3
April —	61	6	February —	73	0
May —	64	8	March —	73	0
June —	65	4	April —	73	3
July —	65	0	May —	73	9
August —	67	8	June —	67	11
September —	62	8	July —	65	5

From that time it fell, and was very cheap during the whole of 1869 and 1870. The effect of this cheapness is great on every department of industry. The working classes, having cheaper food, need to spend so much less on that food, and have more to spend on other things. In consequence, there is a gentle augmentation of demand through almost all departments of trade. And this almost always causes a great augmentation in what may be called the instrumental trades—that is, in the trades which deal in machines and instruments used in many branches of commerce, and in the materials for such. Take, for instance, the iron trade—

	tons.	tons.
In the year 1869 we exported	2,568,000	
— 1870 —	2,716,000	
		5,284,000
— 1867 —	1,882,000	
— 1868 —	1,944,000	
		3,826,000
Increase		1,458,003

—that is to say, cheap corn operating throughout the world, created a new demand for many kinds of articles; the production of a large number of such articles being aided by iron in some one of its many forms, iron to that extent was exported. And the effect is cumulative. The manufacture of iron being stimulated, all persons concerned in that great manufacture are well off, have more to spend, and by spending it encourage other branches of manufacture, which again propagate the demand; they receive and so encourage industries in a third degree dependent and removed.

It is quite true that corn has not been quite so cheap during the present year. But even if it had been dearer than it is, it would not all at once arrest the great trade which former cheapness had created. The "ball," if we may so say, "was set "rolling" in 1869 and 1870, and a great increase of demand was then created in certain trades and propagated through all trades. A continuance of very high prices would produce the reverse effect; it would slacken demand in certain trades, and the effect would be gradually diffused through all trades. But a slight rise such as that of this year has no perceptible effect.

When the stimulus of cheap corn is added to that of cheap money, the full conditions of a great and diffused rise of prices are satisfied. This new employment supplies a mode in which money can be invested. Bills are drawn of greater number and greater magnitude, and through the agencies of banks and discount houses the savings of the country are invested in such bills. There is thus a new want and a new purchase-money to supply that want, and the consequence is the diffused and remarkable rise of price, which the figures show to have occurred.

The rise has also been aided by the revival of credit. This, as need not be at length explained, is a great aid to buying, and consequently a great aid to a rise of price. Since 1866, credit has been gradually, though very slowly, recovering, and it is now probably as good as it is reasonable or proper that it should be. We are now trusting as many people as we ought to trust, and as yet there is no wild excess of misplaced confidence which would make us trust those whom we ought not to trust.

But comes the final question—Will this rise be permanent? We have seen how it arises, does that explanation teach us that we can, or that we cannot, rely upon it? Certainly that we cannot. Of the three causes—cheap money, cheap corn, and good credit—cheap money is obviously extremely temporary. Probably—indeed, almost certainly—the extreme present cheapness of money is due to the presence in London of very large and very unusual sums in foreign money. If we had only our own money and our usual money, and if trade were what it now is, the rate of interest would be 4 per cent.—perhaps more. Now, any day the money of foreign Governments may be removed. It is guided by political ideas and calculations which are in themselves changeable, which it is very difficult to know, and which when known are difficult to estimate and judge of. Suppose, for example—we use the illustration only to point the argument, and do not hint that it is likely. Suppose a recurrence of the war between France and Germany. Who can say what would and what would not be the effect of that event on the foreign money now in London? Probably the money of the Governments would be withdrawn for use; probably the money of individuals would be sent hither for safety; but who can say how much of either? But even if neither that great calamity nor any other disturbing foreign event should happen, it is plain that the rise of prices cannot be permanent. It arose from an unusual plentifulness of the precious metals and their equivalents in this country—from an unsual command of England over the effective stock of

gold and silver. This arose from the non-investment of new savings, and from the calling in of old debts. But the exact effect of a great brisk trade throughout the world is to invest English savings in that trade, and to create new loans from England to foreign countries who are concerned in that trade. Inevitably therefore the causes which gave us that unusual command of the precious metals cease, and there arise in their place other causes which tend to give a less than usual command of them. The tide which came in will some time go out, and then there will be low water, as there now is high water.

The greatest possible caution therefore is necessary in dealing with commodities at their present high values. No one should "speculate at a high price;" and that remark is even more applicable to several sorts of "securities." But as their case involves some new considerations, we defer dealing with it till next week.

PRINCE BISMARCK AND THE FRENCH.

Prince Bismarck has written a despatch to the German Ambassador in Paris, Count von Arnim, which has a very menacing and unpleasant sound, though we hope, and are inclined to believe, that the true construction to put upon the matter is this—that the Prince is compelled, no less by what is due to the German army of occupation than by what is imperiously demanded by German public opinion, to put an end to the murder of German soldiers by Frenchmen, and thinks, probably with great justice, that the more strongly and authoritatively he expresses the German sentiment on the subject, the more chance he shall have of leading and therefore curbing the German demand for revenge, and the more hope there will be of intimidating the French authorities into procuring, by whatever exercise of administrative pressure, justice for the future. The simple facts of the case are these. German soldiers have got into broils with Frenchmen in the still occupied districts of France, and have been murdered. The French murderers have fled across the frontier into the French districts; their extradition has been demanded by the German authorities, and has not been conceded, the French declaring that they will themselves try and punish the offenders if found guilty. The trial has ended in the acquittal of the accused *against* evidence, from mere political sympathy with the French ground of quarrel. And the French press has sustained and approved the acquittal. Of course both the German army and the German nation have been profoundly irritated by this utter failure of justice, especially in a case where so many more lives are at stake; for a practice of wholesale murder might begin in case the French population of the occupied districts could count on being effectively sheltered from justice on the other side of the military frontier. We do not then see how Prince Bismarck, strongly, irritatingly, and contemptuously as he writes of the temper of France, and menacingly as he speaks of the future, could well have written in any other tone if he wanted to keep full control of German opinion. This is threatening, but hardly too threatening for the emergency:—"But in future it would "be impossible for us to exercise the same moderation in "presence of the indignation of the German people; on the "contrary, if the extradition of the criminals were denied us, "we should be necessitated to seize and detain Frenchmen as "hostages, or, if circumstances required it, to adopt still more "decided measures in order to obtain the fulfilment of our "demand—an eventuality from which we earnestly desire to "be dispensed." There are sometimes occasions when the strongest and most haughty tone is the most pacific. We are not disposed certainly to argue that because Prince Bismarck hints at a new irruption into the conquered territory, he wishes for and calculates upon any step of the kind. We believe that he counts upon restraining German impatience better, the more forcibly he expresses it, and on stimulating the French fear of war, the more plainly he intimates that under certain emergencies Germany will not shrink from such a result.

At the same time we do not doubt for a moment that, however reasonable Prince Bismarck's despatch really is in the present situation of affairs, he has chiefly himself to blame that the relations between France and Germany are now so unpleasantly strained. It is all very well to denounce the revengeful spirit of the French, and the cynical injustice of their tribunals in acquitting the murderers of German soldiers against all the evidence, and we ourselves of course heartily concur in the condemnation; but still Prince Bismarck perfectly well knows, as a practical statesman, that these things always will happen under an army of occupation, and that the radical sympathy of the suffering people, juries and all, always will go with their countrymen, who represent the national resentment, even though they have committed the gravest crimes in expressing that resentment. If France had been occupying German provinces instead of Germany French, the same kind of events would have happened, though it may be that there would have been somewhat fewer of them, the Germans being a soberer and less excitable people. And as for political acquittals, why in England itself, to say nothing of Ireland, everyone knows it is next to impossible to obtain a verdict against a political criminal who is accused, even upon the best evidence, of a purely political attempt to assassinate, so long as the object of his vengeance is politically unpopular here. If this be the case in England where the popular sentiment is not excited by national feeling, but purely by sympathy with the national feeling of other peoples, how can Prince Bismarck expect that in mercurial, passionate, impulsive France a criminal, whose crime is the bitterness of his national vindictiveness, could be easily convicted, or his conviction approved by the unscrupulous French press? The only possible way of avoiding these bitter complications would have been to avoid any lengthened time of occupation of French territory, and that Prince Bismarck knows as well as anybody. This lengthened occupation however could only have been avoided by a moderate peace, by not asking more money than France could pay within a reasonably short time—by granting easy terms, and enforcing speedy fulfilment of those terms. Prince Bismarck's terms were, on the contrary, enormously grasping, and he could only hope to compel fulfilment by keeping a large part of France in pawn. It is not however possible for a conquering army to hold a conquered land in pawn without leading to violence and blood, and to partizanships so bitter that justice ceases to be an intelligible word as between the victors and the vanquished. If then Prince Bismarck is really annoyed, as we

believe and trust he is, at the high tension of feeling which has already resulted between his army and the people whose territory it occupies, he has only himself to thank for the anxiety he suffers. We do not seriously doubt for a moment that he would greatly have preferred a lasting peace to a hollow truce. We do not say that, looking to the temper of the French people, he could have secured a lasting peace consistently with his avowed determination to annex Alsace and German Lorraine to Germany. But certainly he might have so managed that the truce, while it lasted, should have been real, and so far tempting to the French peasants,—at heart the most cautious and pacific population in Europe,—that there might have been reasonable hopes of its being prolonged till the vindictive passions roused by the war had cooled down. He rendered this absolutely impossible by the policy on which he decided of a prolonged occupation, and he now sees the disastrous results. Not so much the terms of peace as the conditions necessary to secure those terms are the most prolific causes of fresh quarrels and of future strife. A wise statesman indeed, even if inclined to insist on grasping conditions, would have limited himself to such as might have been fulfilled without chronic and constantly accumulating grounds of new hatred. It would almost have been better to take more territory out and out, than to demand a sum which can only be paid by slow instalments over a long period of time, and which demands therefore an indefinite German occupation to secure it. The suspense and hope which stimulate the irritability of the people of occupied districts, is probably a much more fertile cause of violence than even the sullen despair of those who know that their choice is between emigration and submission to the new authority. At all events there is no simpler and plainer rule, and none which we should have thought more likely to recommend itself to Prince Bismarck's broad political sagacity, than to diminish as much as possible the *area* of political irritation, as soon as the conditions of peace are determined on. The inhabitants of territory to be annexed must suffer; there is no choice for them. The inhabitants of territory not intended to be annexed, need not necessarily suffer; and no policy is less wise than to prolong needlessly in such cases local irritation,—irritation which is felt all the more keenly, that a great part of the territory of the offending country is free of the burden of the invader, and the irritant poison concentrated on one comparatively limited spot. We blame France for these murders and acquittals as much as we blame any country for a complement of crime which we expect and believe, under the ordinary law of human circumstances, to be all but certain. But we blame Prince Bismarck for his share in the responsibility, as we should blame any really wise and sagacious man who had allowed his political greed to overpower his soberer judgment and so done what he had all the data for knowing to be impolitic, and certain to engender a superfluity of future discords.

THE APPARENT TENDENCIES OF FOREIGN TAXATION.

The advocates of direct taxation, and particularly of the income tax, cannot, we fear, just now be in a mood of much elation. They are being defeated at all points, and in almost every country in the world. The United Kingdom endures the income tax, and so does Italy; but France, amidst all her difficulties, appears determined to reject the proposal; the United States, after establishing the tax, is about to abolish it again; and the Prussian Government, though it has not proposed to abolish it, has proposed to relieve the poorer classes entirely from its incidence. The general movement against the tax is the more remarkable because it comes from the Governments and not from the Opposition, and because the motive of the Governments is everywhere the same—to avoid irritation among the masses of the people. In America it is well understood that, although the Secretary to the Treasury proposes the total abolition of the tax, he would like to keep it on and pay off debt with it, and only yields to the electors who dislike the tax more than they dislike the most oppressive tariff. In Prussia it is the Minister of Finance who proposes that the poorer classes should be exempted from the tax—which is levied by ranging them in classes of incomes according to their supposed receipts—on condition that the exemption should be followed by the imposition of octroi duties in all towns—a measure which will really tax the poor more heavily than before, but will transfer the consequent odium from the Government to the municipalities. In France it is avowedly the President who resists the tax, on the distinct ground that, unless applied to the body of the people, it would be a socialist tax, and if applied to them would create universal and dangerous irritation.

It is well that English politicians, and more especially English Radicals, should take note of these facts, for the dislike of direct taxation is a direct result of one of their favourite ideas. They desire to see a much greater equality of condition than at present exists in Great Britain, to legislate so as to defeat the natural tendency of property to accumulate in a few hands, and create a tendency towards a wider distribution. That is the meaning of all their proposals about intestacy, primogeniture, the tenure of land, and the liberty of bequest, and it may for our present purpose be allowed to be an excellent tendency, but it is well that they should see clearly that one of its incidental results is an increased impatience of direct taxation. Wherever millions of persons own properties of small amount, they will, unless unusually self-denying or unusually alarmed for the safety of the community, as in war time, fret under any direct demand for money for the State. They will not, as we see in the colonies, voluntarily impose such taxes, and they will not, as we see in America, bear them when imposed a moment longer than they can help. It is futile to argue that this is an effect of calculation as to the cost of collection, or of a popular ignorance, which will by and by disappear. If the tax were popular, the cost of collecting it would be very small—for it might be asked for by post and paid by post in stamps—and no community is likely in our time to rise beyond the level of culture already secured in the cities of Prussia, and the villages of the New England States, where of all places direct taxation is most disliked. The plain truth is, that where men own property or receive wages regularly, yet have very small margins from which to save or buy luxuries, the better educated they are the more they wince under direct and unavoidable demands for specie, under taxes which cannot be made by any extent of self denial to adjust themselves. The direct tax is felt by such persons as an annoyance, almost an oppression; and very few people bear an annoyance cheerfully, even when convinced that it hurts them less than some other alternative which does not annoy them so perceptibly. The income tax is borne patiently in England because the masses do not pay it, and because those to whom it is an annoyance—namely, the men of moderate fixed incomes—are for many reasons a singularly helpless class; and it is not borne patiently in America because it touches the masses, and they, as electors, are all-powerful. It comes therefore to this, that the diffusion of property and of knowledge, which all Radicals desire, is inimical instead of friendly to the system of taxation of which they approve. That is a very remarkable result of progress, and it is one to which we see little chance of a corrective, the mass of mankind tending as they advance in civilisation to be more instead of less impatient of hardship of any kind. The tendency of the hour in this country, for instance, is certainly towards education, but it is also against the right of eviction, of dismissal, and of exacting work, against in fact the kinds of hardship most usually and widely felt. The difficulty of adding anything to the rates too—that is, to direct taxes felt by the whole body of the people—decidedly increases, and may before long compel Government, in spite of the economists, to devise some new and less visible method of raising money for local purposes. When we see how people legislate in Canada and Australia, how severe the pressure is on a powerful Government like that of Prussia, how ready Americans are to abandon payment of debt rather than endure pecuniary annoyances, and how impossible we found it to abolish "compounding," we cannot feel very sanguine as to the future of direct taxation.

THE INTERNATIONAL IN AMERICA.

We cannot imagine a country in which the International has less chance of achieving success than the United States. It is no doubt very difficult to predict the progress of any idea from concrete facts, for judging from them alone, Dr Karl Marx is right, and Great Britain ought to afford the best field for Socialist propagandism, which it notoriously does not do. Some of the facts however in the social and political life of the American Republic are so large and so undeniable, that it

is difficult to believe that the International is not wasting strength—that it has even a chance of the position one or two American papers are disposed to assign to it in the politics of the future. In the first place, electoral power within the Union, as a federation, and physical power are closely united, both resting in the hands of that vast and conservative body—the adult male farmers on whom depend the twenty or twenty-five millions of Americans who live, and live comfortably, on the produce of their freehold estates. To suppose that this class, which increases in number faster than any other, which supplies the bulk of the militia, and which is in the main severely orthodox and conservative, will accept the teaching of a Society which desires to abolish property and suppress religion, is to suppose a conversion without a parallel in the history of the world, a conversion without either an object or a motive. It is much more likely to become as angry with the Socialists as it has been with the slaveholders and polygamists, and to put them down by force. Failing the adhesion of the small proprietors, to whom are the Internationalists to look for aid? There are no doubt discontented classes in the great cities, unskilled labourers who lead uncomfortable lives, and skilled labourers who, though sufficiently comfortable, wish for more than they have; but a majority of the unskilled are Irish Catholics, who dislike the leading ideas of the Society—which insists, for example, in New York, on parading on Sunday, because the choice of that day affronts the religious—and the skilled have not had much success in strikes. They are faced, not by individual employers, but by companies which divide great dividends, which are directed by men of great resolution, and which can afford to wait. In attempting to affect the politics of the Union, the International would therefore have to rely mainly on foreigners, on the floating scum of the great cities, and on a few idealists—that is, upon a force entirely disproportioned to that which protects the existing order of society.

But the International might obtain possession of some single city or State, and in possession of the State or municipal authority, might carry out some of its ideas? Strangely enough this notion, which in Switzerland is a valid one, in America brings the society directly into conflict with the national Constitution. If the framers of that document had foreseen the International, they could hardly have provided more carefully against its effective action on any considerable scale. Under Section VIII. the control of general taxation is assigned to Congress, with a proviso that a national tax cannot be specialised in any one State, that taxation for national purposes must be uniform, a rule which would, for example, preclude New York from levying its quota by taxation on the rich alone. The State taxation might, we presume, be so levied, and a State might set up a Poor law which would tax the wealthy and might distribute the receipts to the poor, but the only effect of this would be the flight of the rich into the next State—their right of inter-migration being a fundamental law of the Union, the removal of their personalty being expressly authorised by Section IX., Clause 5, and the seizure of their realty being, as we imagine the Supreme Court would hold, disallowed by the clause which prohibits the State from taking property without fair compensation. As to seizing special cities, or overriding the majority by force, or any of the violent projects attributed, sometimes recklessly, to the International, the Governor has only to ask aid from the Union, or the President has only to declare that Republican institutions are suspended in the peccant State, and the whole power of the general Government can be exerted to restore order as if the State were merely a county in insurrection. That this would be the actual course of affairs we may take for granted, as secession on a Socialistic platform would be at least as unpopular in the Union as secession for the sake of slavery, while the tendency to punish arson or murder on a great scale with savage rigour would be stronger even than in England. The International, in fact, can do nothing great through State agency, without coming across an infinitely greater power predisposed to put down its ideas.

There is a remarkable confirmation of these propositions in a letter addressed by Mr T. H. Banks, member of the International, to the *New York Times*, in which the immediate policy of the Society is explained at some length. He complains in very strong language of six grievances, six instances in which, as he asserts, the working people are plundered by the existing system. They are robbed—1. By the railroad corporations. 2. By the national Banks. 3. By the "infamous" tariff. 4. By the gifts of public lands to railroad companies. 5. By the system of laying out cities, which benefits the rich at the expense of the poor. 6. By the "Rings" of jobbers. In every one of these complaints there is a substratum of truth, but in no one of them, except perhaps the last, could an individual State take effective action. The railroad corporations cannot be confiscated, and cannot be bought up compulsorily, except by the general Government. The national banks were established by Congress. The tariff is national. The public lands spoken of exist in the Territories, and are disposed of by the central power. No State can re-lay out a city without full compensation, though of course it could found a new one on the principle of giving the rich the attics and the workmen the first-floors, but it could not compel anybody but convicts to live there. It could no doubt by strong repressive laws and careful selection of jurymen put down the Rings; but to do what Mr Banks seems to be thinking of, namely, to treat gas companies and the like as offenders, is beyond its power. It could not take their property; it could not compel them to sell cheap; and it could not punish their directors except by laws, which must not be *ex post facto*, and after trial by a fairly empannelled jury, any special commission for trial being forbidden. In short, the International must convert the whole Union before it can move with effect; that is, it must convince by argument a vast majority of adult males in possession of property that property is a bad thing for them. That will be a long task, longer than the establishment of Christianity, which took four hundred years.

BUSINESS NOTES.

HUNGARY.—As Hungarian finance has been little known since Hungary was constituted independent of Austria, the following figures, which we have been able to procure will be of some interest at the present moment when Hungary is about to be introduced as a borrower in the London market. It will be understood that Hungary, for financial purposes, is now a completely separate State, its connection with the Austro-Hungarian empire being that of a contributory in fixed proportions to certain common expenses. In outline the financial history of Hungary during the last few years has been* :—

	Receipts.	Expenditure.	Surplus.	Deficit.
	£	£	£	£
1868	16,038,200	15,787,571	250,629	—
1869	17,510,473	17,003,759	506,714	—
1870	21,154,100	21,065,200	88,900	—
1871 (Budget estimate)	20,506,100	22,341,100	—	1,835,000

Thus the current year is the only one that shows a deficit; but it is an estimate only, and the Hungarian Minister of Finance, Kerkapolye, states that the deficit will in reality be much less than the estimate, owing to the increase of revenue, especially the greater yield of the direct and indirect taxes. The real deficiency, he thinks, will scarcely reach 500,000*l*. According to the Budget of 1872—

	£
The income will be	20,680,500
And the expenditure	24,205,800
Showing a deficit of	3,525,300

But the deficit is solely due to the intended expenditure on railways, to meet which the new loan is authorised. Unfortunately, the above figures, which are the best we have obtained, are somewhat meagre, and particularly they do not show what the receipts are made up of. We should infer that they contain items, in the nature of loans, which ought properly to be omitted if a surplus or deficit answering to the English idea is to be exhibited. But as what is called the ordinary revenue has progressed as follows—

	£
1868	15,842,100
1869	16,882,473
1870	17,500,000
1871	16,245,100
1872	17,409,600

—we should also infer that there is no slight improvement in the permanent sources of income, and the improvement is stated to be 400,000*l* a year. There is no doubt that Hungary has progressed greatly during the last four years.

* Converting the florin at 10 per 1*l*.

M. Thiers and English Property Taxes.—In arguing against applying an income tax to France last week, M. Thiers made one of the most extraordinary statistical mistakes which it has been his misfortune to commit. The experience of England, he said, did not apply to France, because in England the propertied classes were in debt to the State as respects all taxes but the income tax, and such a tax was necessary in compensation. In France, on the contrary, real property was heavily burdened, and there was no room for an income tax on it. As regards England, a greater blunder could not have been committed, and M. Wolowski, who undertook to refute M. Thiers, had a very easy task, citing in refutation the results of Mr Goschen's inquiry last Session. The truth is that M. Thiers had forgotten, or chose to forget, that in England real property enjoys a partial immunity from Imperial taxation, because it is specially liable to local taxes, and the conclusion he came to was based on a comparison of Imperial taxes only. In fact, according to the report of Mr Goschen, who includes among the burdens on French property all the registration and stamp duties, which M. Thiers says should be included, the taxation on real property in the two countries compares as follows:—

	£
Taxation on real property in the United Kingdom.....	28,164,000
— — in France	23,528,000
Excess of taxation in the United Kingdom compared with France.....	4,636,000

The disproportion is the more remarkable, because the aggregate taxation of France is much greater than that of England. Of course the above figures for the United Kingdom include the income tax, but the proportion of the 28,164,000*l* contributed in this way is only 3,000,000*l*, so that even deducting the income tax, the English taxes on real property would be more than those of France. The example of England therefore, so far from furnishing M. Thiers with an argument of this sort against the income tax, is an argument for it.

The National Bank System of the United States.—We have from time to time drawn attention to the extraordinary reliance of a large portion of the American public on the integrity of the National Bank system, as maintained and checked by the elaborate system of detailed official inspection by the Banking Department at Washington. That department undertakes not merely to certify the arithmetical accuracy of the accounts of each bank, but also to certify the *quality* of the assets, investments, discounts, and advances of each bank, and this by means of a personal visit of inspectors taking place about once in two years. Considering that there are about 1,700 National Banks in the Union, it has always seemed to us that, unless human nature is radically different in America from what it is in the rest of the world, that any such system is in essence impossible and delusive. Nothing short of miraculous powers could enable a small party of inspectors to certify the *quality* of all the assets of 1,700 banks, and accordingly we read without surprise the following paragraph in the *New York World*, of the 13th ultimo:—"There were "several serious failures yesterday. First, the Ocean Bank, "being unable to satisfy its obligations to the Clearing-"house Association, was suspended, and then expelled from "the association. A receiver has been appointed by the "Comptroller of the Currency. Some comment has been "made on the street in reference to the selection made for "this position. Rumours of the wildest management have "been circulated. *It is said that the examiner who recently "certified to the safe condition of the bank was largely favoured "by it. A strange feature of the management was that cheques "were certified for as if they were greenbacks.* The friends of "the bank say it will pay every cent on the dollar. There "were also several failures in the cotton trade, caused by the "recent rise of two cents in the pound, which was based on "the interruption in the supply from the South. The cotton "markets, South and North, have been greatly upset. There "was also a run on the Union square Bank, which had transac-"tions with the Ocean Bank. No unfavourable result to the "up-town institution followed, every cheque being promptly "paid. It is said the Ocean Bank had large transactions with "the New York Printing Company, and Mr W. M. Tweed "was one of its directors."

The Rise in Railway Stocks.—On the 9th inst. we published an estimate of the coming railway dividends, with the addition of an estimate for the margin of rise in each case on the basis of a 5 per cent. price for the estimated dividends of 1872. The latter estimate was based on the assumption that 1872 would increase over 1871 as much as 1871 had increased over 1870; but notwithstanding the magnitude of this assumption, a very large part of the estimated margin has been consumed by the increase which has since taken place, especially in the heavy lines. The following are the most striking instances:—

	Price on Dec. 9.	Price at 20 years' purchase of estimated dividend in 1872.	Actual Price.
London and North-Western...	149	162½	158
North-Eastern	175¼	215	184
Midland	140	160	149
Great Western	111½	127½	117
London and South-Western...	109½	127½	112
South-Eastern, A.....	78	100	82
Great Western, A.....	164	170	195
Caledonian	118	127½	123½
